Scourge Spreading Rapidly

Can Be Prevented—Can't Be Cured

Don't be the man who locks the stable door after the horse is stolen. Don't wait until cholera breaks out in your own neighborhood before you try to save your herd. "An ounce of prevention is worth a pound of cure"—and in this case a little prevention **without one penny of risk** may mean the saving of many hundreds of hardearned dollars. You can't afford to risk another day's delay—especially when I offer to do for you what I have done for thousands of farmers, and before you pay me a single penny. Read my offer below:

Act Quick—Don't Wait Until the Scourge Sweeps Off Your Hogs

Your only hope lies in **prevention**, and the time to act is now. The first step is to get rid of the disease-breeding, treacherous stomach and intestinal worms—the pests that not only rob your animals of their food but, what is still worse, sap their vitality and make them easy victims of cholera and other contagious diseases. Worms are often so deadly in their attacks that they are mistaken for the cholera scourge itself. Rid your hogs of these disease-breeding pests—do as thousands of other farmers are doing—feed Sal-Vet—get rid of the WORMS—and you will have less to fear from cholera and similar fatal diseases.

I'll rid your hogs of worms or no pay. I'll drive out the blood-sucking, life-sapping, disease-breeding parasites which are the cause of 90% of all live stock ailments. I'll do for you what I have done for thousands of farmers. **I'll prove it before you pay.** I'll do it with Sal-Vet—the greatest worm destroyer and live stock conditioner ever discovered—the most widely known and used live stock preparation on the market. You take no risk whatever. Sal-Vet has saved millions of dollars worth of hogs because it promptly gets rid of the destructive WORMS and puts all farm animals in a vigorous, healthy condition enabling them to better resist contagious diseases. Read the letters below.

The Great Worm Destroyer

TRADE MARK

SAL-VET

REG. U.S. PAT. OFF.

The Great Live Stock Conditioner

"Hogs all around my place had the cholera. I have been feeding Sal-Vet and not one of my hogs were taken sick. I cannot help believing that Sal-Vet prevented my hogs from contracting the disease." (Signed) L. O. Haworth, Cuba, Kansas.

"I cannot find words to express how much I think of 'Sal Vet.' Hogs all around my place had cholera, but I did not lose a single one of mine, and all winter they continued to look just fine. They had been on Sal-vet of course."—Wm. Campbell, Rt. No. 10, Decatur, Ind.

"I had cholera on my farm but not in the particular bunch to which I fed Sal-Vet. I consider it a good medicine to feed to hogs the Year 'round."—H. M. Schondelmaier, Houstonia, Mo.

"I have used Sal-Vet for two years, within which time I have not lost a single hog. I consider it a sure preventive for cholera. Have fattened 74 head of May pigs that we sold December 10th, and which averaged 207 pounds each. They took Sal-Vet every day, and never stopped growing. We cannot say enough for the merit of Sal-Vet."—F. R. Dalrymple, Carthage, Ind.

"My hogs were in bad shape when I received your Sal-Vet. Since feeding it they look fine and ARE fine. I have not lost a hog but those belonging to my neighbors on all sides have died."—D. H. Manshop, Colo, Iowa.

"The hog cholera is all around us in this neighborhood, but so far there is not a single case among the hogs belonging to the men who are feeding Sal-Vet."—Thomas Cannedy, Woodhouse, Ill.

I'll Feed Your Stock 60 Days Before You Pay

All I ask is the privilege of sending you as much Sal-Vet as you need to last all your stock 60 days. I don't ask you to send me a single penny in advance or to take any risk. Simply place Sal-Vet where your hogs, sheep, cattle and horses can run to it freely and **they will doctor themselves.** Sal-Vet is a medicated salt. It requires no mixing, no dosing, no drenching, no starving. No trouble at all.

Send No Money---Just the Coupon

Simply fill out the coupon, tell me how many head of stock you have, and I'll ship you enough Sal-Vet to last all of them 60 days. When it arrives pay the freight charges and at the end of 60 days report results. If Sal-Vet does not do what I claim, I'll cancel the charge—you won't owe me a penny. Send today. Address

hand, is found plentifully throughout Russia and can be purchased as cheaply as in this country. As practically all of the machines at the present demonstration were burning kerosene, some going so far even as to disconnect entirely the gasoline attachment, this visitor apparently found what he was looking for.

It is estimated that on several occasions during the demonstration over 3,000 persons, men and women, were following the various machines at one time. In commenting on this, Prof. L. W. Chase, president of the society of Agricultural Engineers, said: "Never in all the big international contests at Winnipeg have they had such crowds as they are having here at this American demonstration. I prophesy that this will be of tremendous value to the farmers who are having a chance to study the possibilities of farm power at first hand. In many parts of this country there is a periodic hay famine, or else a scarcity of fodder, but so far we have never had a fuel oil famine. A meet like this teaches the people that there are tractors of all sizes for all farms, and that with good market value which such conditions bring about for hay and oats it will oftentimes be a paying proposition to have a gas or kerosene driven power plant do the work and sell the feed which otherwise would be required to maintain a greater number of horses."

THE DAIRY BARN.

To the Editor of The Homestead:

Care should be taken in building a dairy barn, to have at least a slope from the barn in one direction, affording natural drainage for both barn and yard. If the barn happens to be already built, and is poorly located, much may be done to remedy the evil by draining and grading. It would take only a small amount of labor with team and scraper, when the ground is in suitable condition, to give the surface of the yard sufficient slope to carry off the surface water. It will not be inexpensive, even if dirt has to be hauled to the barn from the outside.

To give his cows the proper shelter, the dairyman must have a clean, warm, well-lighted, and well-ventilated barn. The size will depend altogether upon the capacity of the farm and the number of cows to be sheltered. My ideal is the basement barn, or, in other words, to build the barn on a hillside, or some way that leads to a second story. In this way ventilation and doorways may be had in the sides and end of the barn. The walls of the basement may be made of stone or brick, or if this cannot be afforded, a wall under the side that stands next the hill may be constructed, and the other three sides be made of framing. Many prefer the cement walls, which are cheaper than the rock or brick, as a man can build a cement wall himself, which will save all expense, except for the material. The stalls of the dairy barn should have tight walls and ceiling, but should be well ventilated. It should also have a sound floor. The cows that are forced to stand in a dark, dirty stall cannot be expected to produce as much milk, nor milk that will have the wholesome qualities, as the cow that is furnished with a well-lighted, airy stall; one that has windows to admit the sunlight and one that the foul air of the stable is replaced by the good, pure air, without subjecting the cow to injurious drafts. The stalls with tight walls and ceilings prevent loss of heat in cold weather and thus contribute greatly to the comfort of both the cow and the milker. When the dairy cow is on full feed, she is hard worked and is less able to withstand extremes of weather than other stock, for her energies are then being exerted in the direction of production, rather than self-preservation. It is more profitable, as well as more human to keep her warm by making the stable comfortable instead of compelling her to use large amounts of expensive foods in maintaining her body temperature. Nothing is more important in the dairy barn than a sound, impervious floor. There is more than one benefit derived from such a floor. The animals are more comfortable, and hence, profitable; the manure is saved and applied to the land without loss; the stables are cleaned with less effort, and cleaner milk is produced, which will always command a higher price.

The constant loss of fertility occasioned by the wasting of manure is one of the greatest leaks on the farm. The more progressive dairymen look upon the cement floor as an essential. It is by far cheaper than the wooden floor, when its durability and convenience are considered. The fact that it is permanent adds greatly to its introduction and use in all dairy regions where many cows are kept and the conservation of manure is a vital problem. The cement floor must be well bedded in cold weather, else the udder may become injured by coming in contact with the cold cement.

It is best to haul the manure directly from the barn to the fields, but if this cannot be done every time, it should be removed at least two hundred feet from the barn. No swine pen should be nearer than 200 feet from the barn, as they always have a bad odor, and milk will readily absorb odors. It will help one a great deal in arranging his dairy stalls to visit some good dairy farm and see how others have done the work and what little conveniences experience has developed. The individual who has determined to go into the dairy business may obtain quite a bit of information in the papers, and circulars may also be obtained for the asking that will help solve some of the problems.

POULTRY DEPARTMENT

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be inclosed with inquiries. Address all letters relating to poultry topics to this office.

THE PREVENTION OF POULTRY DISEASES.

To the Editor of The Homestead:

It is a noteworthy fact that in the first few years' experience of the beginner he has more sickness among his fowls to contend with than he has in after years. Why is it? Inexperience. The way to prevent diseases is to carefully look after everything that is likely to cause illness, as for instance: Improperly ventilated houses, improper feeding, improper care. These three mistakes cover a multitude of neglects and carelessness; they form a part of each man's experience.

Ventilation of houses is a matter that should be studied carefully, a too-close house, a drafty house, and a filthy house are one and the same thing when it comes to the sanitary question. Fowls want pure, fresh air, but they cannot stand a draft over them while roosting. For summer the best house is the one with a solid back wall, good roof, and good sides, but with an open front. The air must be pure, but it can never be so if the quarters are allowed to become filthy. Clean up the droppings every morning if you possibly can, and once a week examine the entire building for cracks in the walls or leaks in the roof. We are opposed to allowing fowls to roost outdoors, either during the summer or winter, but it would be far better to allow them to do so than compel them to pass the night in a foul, ill-ventilated pen.

It is just as bad to have a too-close house in winter. Some beginners, through pure kindness, have their hen house so tight that there is not a possible chance to get a breath of air in it. The result is, the fowls huddle together and start sweating during the night. The next morning they are allowed to run out in the cold air, and the outcome is a cold. This is especially true when the flocks are overcrowded.

The introduction of the scratching-shed house has done wonders in correcting this bad practice. Each pen is divided into two rooms—a small one for roosting and a large one for scratching purposes. The door between the two rooms is left open at night. The front of the scratching shed being muslin, there is plenty of fresh air admitted, and consequently less trouble with colds. These colds are only slight troubles at first, but they gradually develop into something more serious, generally ending with roup. You can cure the slight colds, but never can you eradicate roup from the system of the fowls that have contracted it.

Poor houses have caused more illness than has anything else.

Improper feeding is also a cause for considerable complaint. Too much corn has been a curse rather than a help to the poultry bill of fare, and yet a certain amount is needed in the menu. But it must be given with more discretion. It is a heating and fattening food, and should never be the main article of diet. It should not be fed alone, but always in connection with wheat or oats. Corn, wheat and oats—with their by-products, cornmeal, bran middlings and ground oats—together with green, bulky food, as cut clover hay, or vegetables; and green cut bone or meat scraps should be about the variety that should be given. An all-grain diet is a mistake, and will lead on to indigestion or "cholera." We quote that word "cholera," because we firmly believe that it is a disease that gets entirely too much blame. Nine-tenths of the reported cases of cholera are nothing more or less than indigestion, apoplexy, liver troubles, etc., all due to an exclusive grain diet. Overfeeding, too, has a tendency to develop the same diseases.

There should be a mash fed once a day. We prefer to give it in the morning, especially during the winter, as it digests too quickly, leaving the crop empty before morning, when given at night. But the mash must not be in a sloppy state.

Fowls should be kept in an active condition, and be made to scratch for their whole grain meal. This exercise aids digestion. They should also be fed regularly—at certain hours of the day.

As to proper care, we will briefly enumerate; perfect cleanliness, freedom from lice, removal of ailing fowls from the well ones, pure food, fresh water, clean drinking vessels, exercise, small flocks, comfortable quarters, and everything that will keep the bright red color to the head, and the active, busy gait to the body.

There must be a constant watch over the flocks. Not a day should be passed without at least a glance at the stock to see if all are in condition. The eye soon learns to detect the slightest ailment. When a hen is listless we know that she is "out of sorts"—her food does not properly digest. She needs attention. So also in cases of diarrhea, or paleness of comb, or lameness, etc. Keep a watch.

Michael K. Boyer.

More About Germozone

I know a man who bought a profitable poultry farm with two thousand healthy, laying hens and lost sixteen hundred of them within three months. I know another man who bought a 2,500 hen farm, producing regularly 100 dozen eggs a day, and within sixty days his egg production had dropped to 8 dozen per day and over 200 hens had died.

It's easy to keep a healthy hen healthy and it's easy to keep a laying hen laying, but its ruinous to wait until they become sick or until they quit laying before taking preventive measures.

On both of the above mentioned farms the chickens had been getting **Germozone** regularly twice a week in the drinking water and **Lee's Egg Maker** daily in the food. The new owners "did not believe in feeding medicine to healthy chickens," and had their own notions about feeding, not realizing that the previous owners had put in many years in finding out exactly what gave the best results.

One cannot well disinfect the floors, yards, and scratching litter every day, but one can, by use of **Germozone** in the drinking water, produce an antiseptic condition of both food and drink and also of mouth, throat, crop and bowels. **Germozone** is also the best remedy for **Roup, Colds, Swelled Head, Chicken Pox, Bowel Complaint, Cholera, etc.**

On our own farm, we would as soon think of omitting food as to omit the **Germozone** water all day on Wednesdays and Sundays.

Six Grape Vines Free

HOW would you like to have a start of the best and heaviest bearing varieties of black, red and white grapes? I have six vines (three black, two white and one red) to give to any one who answers this advertisement during September.

They are year-old stock, perfectly rooted and guaranteed to be in growing condition when they reach my readers.

These Vines Consist of:

Campbell's Early—This is a very popular and productive variety. The fruit is black and of fine quality and flavor.

Moore's Early—Is very popular because it ripens early. The bunch is medium size, compact and uniform in shape. The berries are large and quality is good.

The Worden—Acknowledged to be the best black grape ever created. The berry is large, black with thin skin. The flavor is fine, rich and very sweet.

The Niagara—This is a white grape noted for its large long bunches of excellent well flavored fruit. It bears heavily and regularly. Its quality is the highest.

The Diamond—This grape has a long, compact bunch with a round, greenish white berry. The flesh of the fruit is vinous, juicy and pleasantly flavored.

The Brighton—This grape when ripe is a dark crimson or brownish red. The bunch is set with large, compact berries. The flesh is rich, sweet and refreshing, being tenderest in the center.

You can set out these vines yet this fall—any time before November 1st.

This Is My Offer: Send me one dollar for one year's subscription to The Homestead and I will send you these six grape vines prepaid absolutely free of charge.

This offer is good only till October 1st. To insure getting these six vines you should send your order in today. Don't let this opportunity slip. You will never get another one like it. Use the coupon below and address all orders to

ADDITIONAL FIELD NOTES.

A big advertisement of Philipsborn's fall fashion book will be found on page 24 of this paper. The book is an authority on fall styles of women's clothing and dress goods. It also catalogs various sorts of clothing such as coats, furs, suits, skirts, etc., and at prices which most effectively save money to the buyer. For copy of the book or other information write to Philipsborn, Dept. 30, Van Buren and Peoria streets, Chicago, Ill.

The picture in the big Kalamazoo stove advertisement on page 40 gives a hint of the comfort that comes from a Kalamazoo Radiant base burner in a farm home and the time to obtain one is now. The Kalamazoo people make also ranges and furnaces suitable for every purpose. They sell them cheaply, in fact letting them go to our readers at factory prices and prepaying freight charges. In order to be prepared to order intelligently a copy of their descriptive catalog and price list should be obtained. Fill out the coupon in the advertisement and forward it to Kalamazoo Stove Company, Kalamazoo, Mich., asking for catalog No. 165.

Rob Schug's Immune Boars.

If you want to buy a good Poland China boar, one that is bred right and one that is cholera immune, then write R. A. Schug, Coleridge, Neb. He offers thirty head of good boars for sale, all of which have been treated with the simultaneous method and are ready to ship. Five of these are sired by his old champion boar, King Mastiff. Some are sired by Great Columbus, Nebraska Model, Big Kind and Farver's Goliath. Rob is certainly offering some good boars for sale this year. When writing him kindly mention The Homestead.

Wood & Wescott's Hampshires.

Wood & Wescott, Sheffield, Ill., are advertising fall and spring Hampshire boars of the best of breeding and nicely marked, on page 31. The fall boars are sired by Tom Boy 8875, and he is from the same litter as Sharp & Sons' great boar, Mike, and W. J. Brinigar's King James. The spring boars are sired by a brother to Captain Porter 8873 and Rival Lad, a hog bred by Hughes Atkinson. This firm has the right kind of Hampshires and does business on the square. They will be glad to hear from any of our readers wanting good Hampshires. When writing them kindly mention The Homestead.

Never Mind the Cry About Hog Cholera.

Get your hogs in good condition, free from worms and in perfect thrift and you will go a long ways toward preventing later losses, and the way to do all this is fully outlined in the Sal Vet advertisement on page 19 of this paper. The Sal Vet people have great confidence in the preparation. They are willing to send it in quantities to suit the purposes of any stock raiser, on free trial and prepay freight charges. It is worth while to take advantage of this offer because the preparation is certain to do just what the manufacturers say it will. Just fill out the coupon in the advertisement and forward it to the S. R. Feil Company, Dept. I. H., Cleveland, Ohio.

A Pocket Calculator Free.

Through the liberality of the Keystone Steel & Wire Co. any of our readers may obtain a copy of Ropp's New Calculator, a book which saves hours of work in arriving at correct amounts in all kinds of figuring. If a load of corn be sold at a given price you have merely to turn to a page in this book and learn exactly the amount of money it will bring. Any other kind of figuring is done in the same way and with absolute accuracy. The book sells for fifty cents, but for a limited time readers of this paper may procure it by sending a request, mentioning this paper, to the Keystone Steel & Wire Co., 528 Industrial St., Peoria, Ill., whose advertisement of Square Deal Fence will be found on page 7.

Walker & Son's Noted Polands.

Few herds of Poland Chinas are so well and so favorably known throughout the country as is the herd owned by Thos. F. Walker & Sons, Alexandria, Neb. This is one of the truly great herds of the country, inasmuch as it has really been built by the efforts of one that has had an idea of what he wanted, and then sought to get it. Mr. Walker has not made the Blue Valley herd by buying from everyone that laid claim to good hogs, but on the other hand, has built this herd to a very great extent from selections made in his own herd. Some hogs have been bought and retained, others have been purchased and found wanting and discarded. One thing is certain, those that have bought from this herd have found that their boars have produced a type that was fixed and the sows have farrowed pigs all of a kind. There has been no guessing how they would work with Walker & Sons, they planned the matings so that they know almost to a certainty. Boars of this sort should possess great value to the man who cares, to the man that wants the better kind. If in search of a herd header, write as above and mention The Homestead. See page 37.

Steele's Immune Duroc Boars.

On page 31 we begin the Duroc Jersey advertisement of C. R. & R. W. Steele, Ireton, Iowa, who are offering sixty head of immune fall and spring boars for sale. The senior member of the firm is Chas. Steele, formerly known as one of the best breeders of Shorthorn cattle in northwest Iowa. These gentlemen showed spring boars at the Interstate Fair at Sioux City last week and secured first prize on their under-six-months boar and this is the first time they ever came out with a herd of hogs. The major portion of these boars they are offering are sired by a son of Carl's Col., a boar they purchased at the Shade sale and he was the highest priced spring boar in that sale. We have seen some of the boars they are offering for sale and they are all right. They are pricing these at from $35 to $50 and will ship on approval. You will not go wrong if you send Chas. Steele an order for a boar. Mention The Homestead when writing the above firm.

Rickey's Duroc Jersey Sale.

W. C. Rickey & Son, Thornburg, Iowa, will hold their first annual sale of Duroc Jerseys, September 29th. Fifty head have been cataloged for this occasion. There will be five fall boars of December farrow sired by Bruce and out of a dam by Crimson Wonder Chief. There will be two September yearling boars sired by H. A. Orion and out of an Iowa Col. sow. The remainder of the offering will be of spring farrow. A large number of them are sired by Chief Select 2d, an excellent son of Chief Select, and Willetta 14th by Tippy Col. This young boar has proven an excellent sire as his get will show sale day. Others are sired by A Chief 2d by A Chief Defender by Defender, and still a few more by High Col. 2d, by High Col. by Freed's Col. There is a litter sired by Chief Select 2d and out of Defender Lady by Defender that are extra good. Write Messrs. Rickey for a catalog at once and if you cannot attend their sale send a bid to Carlos C. Palmer, Homestead representative, in their care.

Naiman Still Offering Bargains.

John L. Naiman, Alexandria, Neb., is still offering readers of this paper rare bargains in high-class Poland Chinas. Mr. Naiman has raised the best crop of spring pigs that he has ever raised, and owing to the short corn crop in his section these pigs are absolutely on the bargain counter. We do not mean that Mr. Naiman will take pork prices for these hogs, for if he were to do that he had better sell them on the pork market, but we do mean that he will sell these spring boars at about 40 per cent less than they are really worth and what he should have for them. It costs more to raise a crop of boars than a crop of barrows and a very small profit above the cost of production is all that Mr. Naiman asks. Most of the boars are sired by Naiman's Expansion, a son of Expansion Over, the St. Joseph champion. Mr. Naiman also has a big crop of fall pigs, and they will be sold

BIG-TYPE POLAND CHINA PIGS.

The above engraving shows some fine spring boars offered for sale by John I. Dripps, Springville, Iowa. They are big, smooth and have plenty of bone. See his advertisement on page 36.

Nebraska Land Bargain.

In an advertisement on page 22 the Woods Investment Company puts forward the principal facts with relation to a 600-acre farm, which they have for sale. The land is located in the

BARGAIN --IN-- Nebraska Corn Land

$4,000 DOWN and time on the balance at 5% interest will buy a 600-acre farm, we have for sale in the North Platte Country, Nebraska. It joins a railroad right-of-way, is near beet dump, has good house, barn and improvements. 100 acres in corn this year will go 30 to 40 bushels. 35 acres in alfalfa has produced three crops. Subject to irrigation. Price $40 per acre. The soil is exceptionally good and this is a rare bargain. Address
WOODS INVESTMENT CO.,
LINCOLN - - - NEBRASKA

Farm Auction

115 ACRE FARM, VAN BUREN COUNTY

Tuesday, September 30

NEAR Stockport, 11 miles from Fairfield. Seven room house, two good barns, corn crib, granary, silo, young orchard and small fruit. All land in high state of cultivation. Will positively be sold to highest bidder to settle estate.
A. L. STOUT - STOCKPORT, IOWA

North Platte country, which through the irrigation development of the last few years has become the most productive and most certain of Nebraska land. Crops of all sorts have been remarkably large and the prospects of an advance of land values are exceedingly flattering. The entire 600 acres is subject to irrigation, and when so improved it cannot fail to become a veritable garden spot, with a value not equaled by land in any section. Note that liberal terms are quoted and that the original price is only $40 per acre. For additional particulars write the Woods Investment Co., Lincoln, Neb.

Gruis Offers Immune Boars.

At the Sioux City Interstate Fair last week H. Gruis, George, Iowa, showed that splendid senior yearling Duroc Jersey boar, A Wonder Jr., and won first on him in a strong show and he was one of the greatest boars on the ground. Mr. Gruis has fifty head of boars, a great many of which are sired by the above hog, and every one of these have been vaccinated by the double treatment and are immune and ready to ship. He is pricing these at $25 and $30. Write your order to him at once and mention The Homestead. See page 31.

Wilson Offers Choice Short-horns.

Irvin E. Wilson, Belvidere, Neb., is offering at present some very choice yearling Short-horn bulls. These bulls are pure red and are sired by the great Scotch bull, Secret Hero, that actually weighed in breeding condition 2,200 pounds and is now at the head of the good herd owned by North & Robinson, Bridgeport, Neb. These young bulls are from excellent cows, as that is the only kind Mr. Wilson keeps. Mr. Wilson is the secretary of the Nebraska Short-horn Breeders' Association and is one of the most enthusiastic stockmen of the country. These bulls are good and priced worth the money. We would urge that Homestead readers write Mr. Wilson at once and when doing so, kindly mention this paper. See page 36.

Zelmer's Duroc Jersey Sale.

On Saturday, October 4th, at Atlantic, Iowa, Z. A. Zelmer will make a public sale of fifty head of Duroc Jersey boars and sows. It will be an immune sale as everything he sells will have been vaccinated and will be cholera proof. He has taken the precautions to do this early in the game and he believes that the breeders want them that way. He is listing twenty-seven boars and twenty-three sows and he will have a good offering. He will sell seven fall boars and these are sired by King Carlos, a grandson of old Ohio Chief; also a few by Fancy Col. 2d. There are some splendid fall boars among these and some that will make good herd boars. They are well grown, large, rugged fellows and are the kind that breeders and farmers are looking for. The twenty spring boars that he will sell will be sired by his present herd boar, Cedar Grove Chief and Col. Lafollette. Two of the best fall boars that he will sell are out of Cedar Grove Lass, a daughter of Golden Model Again. He will offer five good fall sows that are full sisters to the fall boars that he will sell in the sale. He will also sell sixteen head of his best spring gilts and these will be sired by Cedar Grove Chief and King Carlos. He will also sell two yearling tried sows, both sired by Louis' Gem and out of Gem's Model. One of these will be bred and the other will be sold open. The sale will be held right in town in the Swab's Feed Yard where it will be convenient to everybody. Write for his catalog and mention The Homestead. M. T. White will represent The Homestead at the sale. See page 30.

Tyrrell's Short-horn Sale.

G. P. Tyrrell, Oxford Junction, Iowa, held his Short-horn sale on September 19th, as previously advertised in this paper. It was very satisfactory to the seller and buyers received full values. There was a large crowd in attendance and there was a strong demand for both bulls and females. A report of the sale shows that the buyers were largely younger breeders, which indicates a healthy tone in the trade. A. W. Dixon, Cambridge, Ill., topped the female offering in the excellent cow, Lady White Stocking at $205. He bought several other high-class females. Prince Wayside was the top animal of the sale, selling for $300 to C. B. Kline, Olan, Iowa, and he was cheap at that figure. W. H. Webb, Spencer, Iowa, secured a good bull in Roan Chief at $235. Col. H. S. Duncan assisted by G. H. Burge and Wm. Brock sold the offering in a satisfactory manner. A list of those selling for $100 and above is appended.

11 bulls	$1,685; average	$152
35 female	5,330; average	152
46 cattle	6,985; average	152

IOWA WEATHER AND CROP BULLETIN.

The following climate and crop bulletin is issued by the Iowa Weather and Crop service from the central station at Des Moines, for the week ending September 21, 1913:

The past week was cooler than usual, the average daily deficiency in temperature being about 4 degrees, and the week closes with a cool wave which will probably result in light to heavy frost tonight. Light to copious showers occurred on several days, and while there has not been enough moisture to effectually break the drouth or increase the water supply, the ground has been softened and much plowing and seeding of winter wheat has been done. Pastures and meadows have been greatly improved and in some sections late potatoes have been benefited. Potatoes will, however, yield only about 50 per cent of a normal crop. The bulk of the corn is now beyond danger of injury by frost, and practically all of it will be matured by the close of the month. Probably a little more than the usual amount of corn has been put in shock, and the amount cut for ensilage is much greater than ever before. Reports received Monday morning, September 22d, show that freezing temperatures occurred in all parts of the state, the lowest reported being 21 degrees at Sibley, Osceola county. This will be the last issue of the bulletin for this season.

Geo. M. Chappel, Sec. Dir.

SEEDS WANTED

METALLIC CARTRIDGES

Made by the Foremost Ammunition Concern in America

THE biggest name in the ammunition and firearms world today is *Remington-UMC*. Whether your arm is a Remington or any other standard make, whatever its calibre and the load you need, you want Remington-UMC metallics—not because they are necessarily stamped with the same name as your firearm, but because they give more accurate results.

This Company has been making ammunition for fifty years. We produce metallics for every standard make of arm—and every Remington-UMC cartridge is tested in the arm for which it is made.

There is a dealer in this community who can give you Remington-UMC Metallics for *your* rifle, *your* pistol. Find him. Ask him for them. Look for the Red Ball Mark on every box of metallics and shot shells you buy.

Remington Arms-Union Metallic Cartridge Co.

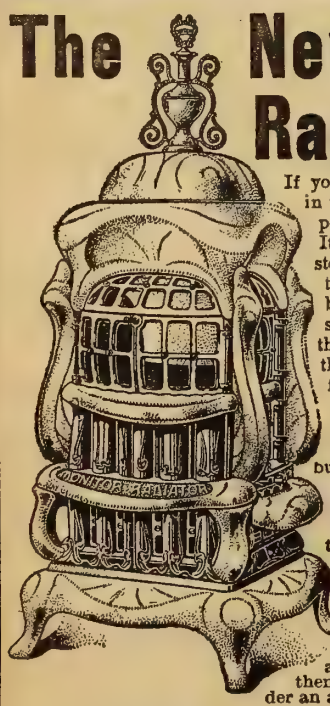
The New "MONITOR" Radiator

The Most Wonderful Base Burner Ever Manufactured



If you want your house really **warm and comfortable** in the severest weather, if you want to get **all the heat** possible out of the fuel you use, get a "MONITOR." It is **different** from all other base burners. Instead of letting the heat go up the chimney, blistering the wall behind the stove on its way out, as old-style base burners do, the "MONITOR" draws the smoke over the front of the fire pot and therefore throws the **most intense heat** directly out into the room. This is chiefly due to the five radiating flues built in the front part which, even in the smallest size "MONITOR," have a radiating capacity of 1,250 square inches. In addition it has **larger back and bottom flues** than any other base burner, and we cheerfully stake our ninety years' reputation on the claim of

More Heat—Less Fuel

than with any base burner ever made. And it has lots of other good points. The fire pot, which is so set in that it **cannot possibly break** from use, can be taken out through the two front doors. The duplex grates can be removed through the ash pit door **without tools.** There are two clean-out doors in the base, one on each side of the stove. All joints in the stove are closely fitted and packed with asbestos stove cement, making them **gas tight.** Every "MONITOR" is sold under an absolute guarantee of

Satisfaction or a New Stove

There are many more good features that we can't possibly mention in this space. Let us tell you about them and prove that the "MONITOR" is the most economical base burner on the market, by letting us send you our **free booklet.** We also manufacture other heaters, as well as the famous "SILVER MONITOR" Ranges, Steel and Cast Ranges. Furnaces, etc., etc.

USE THIS COUPON

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 639, Aurora, Missouri.

WITH THE EDITOR.

John Stuart Mill, a great student of the affairs of men, said, nearly a half century ago, that it was time for the world to discuss more rational distribution of wealth already acquired, rather than to be seeking for means of increasing the production of wealth.

Recently, Governor Osborn, of Michigan, said: "'Our forefathers built up a prosperity that was of necessity material, perhaps sordid. It is now our task to acquire the arts and to pay attention to ethics. It is our duty to let religion escape from the bounds of the four walls, to make it practical and efficient, to turn it into a seven-day affair and to reach the lowly as well as the prosperous."

Among other signs of the times that point out the trend of the better building of human institutions is the report that comes from the meeting of the federal council of the churches of Christ in America. The opinion of this council is that among other things the church must stand for the abolition of child labor, abatement and prevention of poverty, protection of the workers from dangerous machinery, occupational diseases and mortality, and against the hardships of enforced unemployment, compensation for aged and injured workers, the principle of conciliation and arbitration in industrial disputes, the gradual and reasonable reduction in the hours of labor to the lowest practicable point, a living wage as a minimum in every industry, and the highest wage that each industry can afford besides the most equitable division of the product of industry that can ultimately be devised.

There are three steps in the development of a movement for the betterment of general society. First the student, the thinker, working along ideal lines, perceives an injurious condition and in the quiet of his study solves the problem. But only in a general way—he does not attack particular conditions. Next, a man of affairs, in actual touch with life as it is being lived by the mass of the people. He shows the positive condition in which we are placed and points out the definite road along which progress is to be made. Then, we have a great body of men from widely scattered communities, men who are in touch with the daily existence of small groups, and these men declare not merely their individual opinions but are the bearers of the developed thought of the people.

In this attitude of the evangelical churches may be seen a real proclamation of the brotherhood of man as a fact and not a mere theoretical announcement. "The old order passeth."

HOME AND HOMEMAKING.

THE AIM.

O Thou who lovest not alone
The swift success, the instant goal,
But hast a lenient eye to mark
The failures of th' inconstant soul.

Consider not my little worth—
The mean achievement, scamped in act,
The high resolve and low result,
The dream that durst not face the fact.

But count the reach of my desire,
Let this be something in Thy sight—
I have not, in the slothful dark
Forgot the Vision and the Height.

Neither my body nor my soul
To earth's low ease will yield consent.
I praise Thee for my will to strive,
I bless Thy goal of discontent.
—Charles G. D. Roberts.

HOUSEHOLD NOTES.

Alcohol will remove grass stains.

Sour milk makes spongy light cake.

Acid fruits are generally the most suitable for jelly.

Extract of vanilla loses its strength if exposed to the light.

To keep butter, fill a bowl with cold water. Put the butter on a plate and put on top of the bowl, then take a piece of butter muslin and put over the butter and let both ends drop into the water.

Ants seem to have a great dislike for strong odors. Any of the following, sprinkled around the shelves, are an excellent means of keeping the pantry free from these energetic little animals: Oil of pennyroyal, cedar or sassafras, powdered cloves or camphor, tar, wormwood or tansy leaves, or sliced onions. Sulphur, blown around the crevices of the pantry, is also said to be good.

FOR THE COOK.

Green Corn Souffle.—One pint of grated corn (canned corn run through the food chopper may be used), one scant teaspoonful of salt, one and one-half tablespoonfuls of sugar, three tablespoonfuls of soft butter, the well beaten yolks of four eggs. Mix well, then fold in the stiffly whipped whites of the eggs, turn into a buttered pudding dish and bake for thirty to forty minutes. Serve as soon as done, before it falls.

Stuffed Eggplant.—Cut an eggplant in halves, scoop out the flesh, leaving a sufficiently thick rind to hold it in shape. Chop the flesh fine and mix with an equal amount of chopped bread, two tablespoonfuls melted butter, a teaspoonful of salt, a quarter teaspoonful of black pepper and a dash of cayenne. Mix thoroughly and put in the shells. Lay on top of each a thin slice of bacon and bake in a quick oven forty minutes.

Boiled Squash.—Wash and peel the squash and cut into bits. Cover with boiling water and boil for twenty-five minutes, or until tender. Drain in a colander, pressing out all the water, then turn into a wooden bowl and mash as you would potatoes. When smooth whip into the squash with a fork a great spoonful of melted butter and salt and pepper to taste. Put into a saucepan and heat over the fire until you have a light, smoking mass.

Green Tomato Mincemeat.—One peck green tomatoes, five pounds brown sugar, two cups vinegar, two pounds seeded raisins, one tablespoon each of cinnamon, cloves, nutmeg and salt. Chop tomatoes fine, add the salt and let drain over night. In the morning add the other ingredients and cook two hours. Seal in glass jars. Make pies of it the same as other mincemeat. These are excellent.

AMONG OURSELVES.

It is nutting time and it is our good fortune to have for our first number today some lines on nutting written by our friend Mr. Eugene Secor, of Forest City, Ia. Mr. Secor's "Verses For Little Folk and Others" has endeared him to all who are acquainted with the poems. Memory of them insures him a warm welcome Among Ourselves. Before presenting Mr. Secor I take the liberty of telling the friends that a new honor has been conferred upon him. The governor of Iowa has appointed Mr. Secor one of three to prepare a statement bearing on the agricultural needs of Iowa for the use of the American Commission on Agricultural co-operation.

NUTTING.

The hills put on a coat of blue,
When she and I went nutting;
Her eyes, though, wore a darker hue,
On that September outing.
The midday sun beat hot upon
Our heads when unprotected,
But with one parasol for two,
An awning we erected.

The old horse needed little rein;
He knew there was no hurry,
He knew we only sought to leave
Behind all care and worry.
He snipt the fragrant melilot
That grew along the highway,
And waited while we pluck'd the blooms
At every hedge and byway.

Beneath a fragrant walnut tree,
Where squirrels frisk'd and scolded,
We ate our snack and bagged our spoil,
Till the wings of day were folded.
But the dearest treasure I brought home
From that delightful outing,
Was her sweet "Yes"—my chiefest quest,
When I plann'd to go a-nutting.

Nutting is a pastime long dear to the hearts of young people. It needs not to be commended to the lover intent on opportunity to woo the maiden of his choice, but this dainty bit of delicious moments will surely stimulate nutting engagements. If it should moreover stimulate marriage engagements of the right sort no one will be better pleased than Mr. Secor whose heart is young though his hair is graying.

Like Mr. Secor it is some time since Mrs. Old Mother was Among Ourselves, but we do not forget she has kept her place and we greet her with pleasure:

Did I hear some one say, "Where is Mrs. Old Mother?" Lying with three-months-old "Little number nine" asleep on her arm while "Little Brother" aged twenty-one months plays contentedly

with his blocks and cart. Looking from my window I have so often thought of you during the last two years. Lately I have wanted to say how glad I am that I am in "Old Wisconse" and not where it is "always rose time." How much the dwellers in the Land of Flowers—in California and Florida—miss. "My little strip" visible from my window is such a succession of pictures. The first bare ground to be hailed by the little folks. Such fun they had sliding down hill on the crust, such snow families, such flashing, changing, northern lights, such peaceful moonlight, snow covered pictures, and then the first tender green grass, to waken up some morning and find it a cloth of gold. There is a cherry branch stretching out across one corner. How beautiful it is frosty winter mornings, outlined against the blue, blue sky, and then so soon covered with white bloom. Oh, I would never choose to live where it is always rose time. Would you? Books? Not many lately, "I have no time." Have been reading "Treasure Island," with Big Brother and talking it over with him, telling Little Sister the same man wrote it that wrote her "Garden of Verses," and the prayer that hangs in passe partout by the looking-glass. "The day returns and brings us the petty rounds of irritating concerns and duties. Help us to play the man. Help us to perform them with laughter and kind faces. Let cheerfulness abound with industry. Give us to go blithefully on our business all this day, bring us to our resting beds, weary and content and undishonored, and grant us in the end the gift of sleep. Amen." I hope in after years "Treasure Island" will mean more to them than just a pirate story, blood and thunder—"Yo! ho! ho! and a bottle of rum," but bring to their minds the picture of Stevenson, a brave man making a good fight. We read "Hans Brinker or The Silver Skates," and that led to a talk of Holland and "Little Peter whose courage saved the land." "Buffalo Bill" lasted many evenings and we talked and talked of the old pioneer days. They do not really like Alger's books. They say they are all alike, a poor, good boy and a rich, bad boy. Someone giving the poor boy lots of money and the rich boy getting poor. I am glad Big Brother doesn't "take any stock" in them. I think it would be discouraging if he thought there were really boys getting rich so easily and he is expected to "perform cheerfully the petty round of irritating duties" with no reward but his restful bed and sleep. And I am tired—so tired. Many times I have wanted to write to you of the things that are near my heart, but I am too tired, but not too tired to enjoy your discussions.

What a "homey" glimpse of a mother with her babies that is! It is so good when the mother thus lives with the little ones and leads them step by step out into the world of thinking and doing. But it seems too bad the dear mother should be tired, so tired. Some day I fondly hope life will be so that mothers will be less occupied with material things, and being freer from work and worry be freer to perform the more important duties of motherhood.

Mrs. M. L. A. brings with her a recipe for tomato catsup, a hint for preserving dried fruit and also a word regarding the social life of the neighborhood where she resides:

Wash and cut up ripe tomatoes and cook them in a granite kettle without adding water. Add several raw onions, sliced and cook until done. Rub through sieve to remove seeds and skins. To each gallon of strained tomato add one cup sugar, two cups vinegar, one tablespoonful salt, one-half teaspoonful each black pepper, ground cloves, allspice and cinnamon. Put spices and pepper in thin cloth bag if you wish catsup to be nice color. Boil all together two hours or more, and bottle or can hot. If bottles are used, scald corks and push in far enough so melted paraffin can be poured over top. Heat dried fruit thoroughly in the oven and put it away in paper bags tied securely to keep out worms. We have ladies' aid and missionary societies and each meets in farm homes once a month. We visit and sew at "aid" meetings and study under leaders at mission meetings. The lady who has the meeting serves lap supper.

We have never had many hints about drying fruit or vegetables for winter use. Won't the friends let us hear from them along this line? And may we not have a batch of reports concerning the social activities of our members? I mean accounts of all sorts of gatherings, whether for social intercourse, study or work with the hands. Let us do all we can to provoke one another to gathering together in a spirit of good fellowship and mutual helpfulness.

A double-cropping raspberry has been originated by an Italian small fruit grower of Hammonton, N. J. It produces berries on the tips of the new shoots of the season's growth from the last of August until frost, and on the laterals of the same shoots the following year in June. The berry is crimson, without any purple shade, and of a large size, both in June and autumn. It has a good flavor, is firm, and consequently a good shipper.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

3d Quar Lesson 13. September 28, 1913

DELIVERANCE AND DISOBEDIENCE: REVIEW.

For sustained interest, scenic effects, trying situations, unlooked-for deliverances, the lessons of this quarter form a narrative unsurpassed by the most thrilling fiction ever written. "Romola," or "Tale of Two Cities." or "Heart of Midlothian," are not to be compared to it. The scene shifts from the rustic hills and dales of Canaan to the Nile valley, with its superb civilization and its architecture characterized by a reserved grandeur; thence to Goshen, the "land of verdure," the pleasant and goodly pasturage; thence to the great triangle between the arms of the sea, the Sinaitic peninsula, with its granite cliffs and silent canyon. Moses is easily the most towering personality of the Old Testament. We find him first in his river-rocked cradle on the mystic Nile. Then undergoing his double tutelage, that of the court in all Egypt's wisdom, and of his mother in the pious annals of the patriarchs. Next flashes out that signal instance of self oblivion which deliberately rejected the treasures of Egypt for the affliction of God's people. The premature effort at emancipation is followed by the flight into Midian, whose awful solitudes were educative in themselves. Next we see the lonely shepherd bowing before that shaggy acacia, transmuted into a golden shrine. Next we see him waving his wonder-working rod over Egypt and evoking plague after plague to break the iron will of the Pharaoh. We find him standing on the west shore, opening with his crook, a path through the deep for a myriad of manumitted serfs who have just partaken of a newly-instituted and most significant sacrament. We see the same towering figure standing on the east shore of the sea with the same rod converting what had been a highway for the fugitives into a grave for their pursuers. Now begins Israel's march of mystery through the wilderness. The commissariat problem becomes urgent at once. Under the most favorable conditions the provisioning of such an emigrant host would have taxed an expert quartermaster general. But the exigencies of the case make it the most remarkable of history. For the people in such an environment not to have "murmured" would have been unnatural. Fear is the worst of epidemics. As usual under such conditions, the people overrated their past advantages and underrated their past perils. The melancholy stampede was a real disgrace. See the long-suffering patience of God! The last word of the people is "bread." God's first word is promise of "bread from heaven." Now the emigrant nation came to the Almighty's secret audience chamber, Mt. Sinai. Here the setting of nature is appropriate to the scene of superlative majesty. Three million people stood and looked upon the granite throne of the Almighty. Nature was agitated. The mount shook. Speech of man breaks down in effort to describe the Theophany—that most august sight of earth. If the decalogue had been given in Palestine, it might be inferred that it was intended for the Jew, to whom Palestine belonged. Not there, but in the wilderness the law was given: and the wilderness belonged to everybody. Again, the cliff from which the decalogue was given belongs to the most enduring strata. The decalogue is even more enduring. Heaven and earth may pass away, but the law never! Rugged though the decalogue is, it is still saturated with love. It is not arbitrary commandment with pains and personalities, but rather a loving covenant between God and man. Spite of all the mighty works the people's religious perceptions were indistinct. They were very far short of the idea of the spirituality of God. They coveted a visible palladium. They required Aaron to make one. This was the occasion to which Stephen refers when, in their hearts, they turn back to Egypt. That glittering image carried in the van would be a substitute for the fire-cloud pillar. The image of

A Woman Who Has Brought Up Over 17,000 Babies

And does it by mail and with such astounding success that doctors not only marvel how she does it, but concede that she has saved the very lives of hundreds of babies. She has a marvelously complete service that keeps her in personal touch with the mother of the baby, from month to month, for 24 months, and tells, every 30 days, exactly how to feed, dress, wash and take care of the baby.

She is Doctor Emelyn Lincoln Coolidge, the Baby Editor of *The Ladies' Home Journal*, and it is through the personal service back of the magazine that this marvelous work is done with the mother readers of *The Journal*.

Of all the 21 departments of *The Ladies' Home Journal's* personal service this Baby work is unquestionably the greatest and the most important, hundreds of mothers frankly crediting to Doctor Coolidge the very lives of their babies.

Just now Doctor Coolidge has over four thousand *Ladies' Home Journal* babies under her charge; her total in four years has been over 17,000 babies.

Each month Doctor Coolidge has a regular department in *The Ladies' Home Journal* that tells about this marvelous work. And it is free to every reader: the most expert baby-health advice without a penny's cost.

A booklet, entitled "The Story of 600,000 Invisible Hands," tells something about this service. A postal-card request will bring a copy.

A year's subscription to *The Ladies' Home Journal*, by mail, costs $1.50, or it may be bought from any Newsdealer or Boy Agent at 15 cents a copy.

THE CURTIS PUBLISHING COMPANY
INDEPENDENCE SQUARE
PHILADELPHIA, PENNSYLVANIA

Egypt's famed Apis would be an aegis under which they might shelter themselves. Just then Moses returned. Great and just was his anger. He took the granite fragments of the broken tables of the law to grind the golden calf to powder. Then he went up the staircase of Sinai once more, to intercede for the guilty nation.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

A FRIEND.

After a few vain efforts to fly, a little bird lay exhausted and powerless on the ground. Its tiny wing is broken and bruised by a shot fired from a thoughtless human hand, while the baby birds above are left alone to die.

Boys and girls of this, a Christian nation, think twice before you kill that little bird and friend, the English sparrow.

What if a few books do condemn them; should the theory of two men or even two hundred influence two million rising farmers who should be theorists themselves?

Do you agree with me?

Did you ever see an English sparrow eating cherries, apples or berries? No! But many other birds have destroyed your small fruits. The blue jay is one; he is the destroyer of other birds' nests, the murderer of countless baby chicks, the terror of all other birds, yet you protect him and condemn the English sparrow!

Did you ever see them fight other birds unless they or their nests are first disturbed? On one of our sheds a robin raised her young in a vine not three feet from two sparrows' nests. They did not fight; yet you say that the English sparrow frightens away all native birds.

Did you know that they were scavengers of city streets, and that the little grain they consume does not compare with the thousands of moths, worms, ants, etc., which they destroy daily?

Yet still you protect hundreds of birds that eat both fruit and grain, and condemn the English sparrow.

—Lois Stewart, Age 15.

[Farmers' Bulletin 513 of the U. S. Department of Agriculture has this to say about the English sparrow: "Its habit of driving out or even killing more beneficial species and the defiling of buildings by its droppings and by its own unsightly structures, are serious objections to this sparrow. Moreover, in rural districts, it is destructive to grains, fruit, peas, beans, and other vegetables. On the other hand, the bird feeds to some extent on a large number of insect pests, and this fact points to the need of a new investigation of the present economical status of the species, especially as it promises to be of service in holding in check the newly introduced alfalfa weevil, which threatens the alfalfa industry in Utah and neighboring states. In cities most of the food of the English sparrow is waste material secured from the streets." As a matter of fact, there are but two or three species of birds in this country that really deserve death. Most of them are very useful indeed, and should be protected.]

Making Money.

(First Prize.)

I will try to tell you how my brother and I made a little money.

About two years ago my uncle had quite a sick spell, and he stayed at our place.

There was no one there to do his chores, so my brother and I did his chores, for his place was about one-fourth of a mile from the schoolhouse, so one of us would go over every morning to do his chores.

When he got all right again, he gave us a pig for doing his chores.

When the pig got big we sold him and got over $25.

So then we bought us some seed potatoes and planted them. When they were ready to be dug, we dug them, and sold about $12 worth.

This year papa let us have some more potatoes, and we sold about $4.80 worth. He also gave each one of us twenty-five bushels of wheat, and a pig.

We sold the wheat and got $15 apiece.

The pig is not full grown yet, so we have to wait a while. —Leo Knop.

Our Playhouse.

There are four of us girls who have our playhouse together. We have had our playhouse together for some time. This year we had a show in it, and got $1.02. We charged two cents for admission, and one cent to have your fortune told, one cent to have a reserved seat, and one cent to have a bag of popcorn and an apple. I think we did well. We had two plays, singing and speaking. After we had our show, a day or more after we cleaned all of it up, and began to play house. We have a nice piano to play on. It is a large one. And the way we came to get it was, two of the girls are sisters, and their father brought it down to the playhouse from his hall. We have a nice sideboard, and have a great number of dishes. Some of them are cracked and some not. We have jello dishes and glass tumblers and most any dish you can think of. We have a cot and chairs, a table, and a clock-shelf, a shelf for our tooth powder and a great number of other things. We have bed rooms. We fix them in two different places. The building used to be a summer kitchen, but we girls have it for a playhouse now. It is all in one room. We have named it "Dennison Hall."

—Lillian Amidon, Age 12.

A House of Curios.

(Third Prize.)

I thought I would tell you about a strange thing in our town. It is a log cabin that people send strange things to. I have a log in the cabin with the others. There is a glass bottle in the southwest corner of the cabin with the names of the ones who put a log into the cabin.

In the cabin there is a flax hackle that came from Ireland and some peat from an Irish bog. There is a skin of a wild hog that was killed in Mexico. There is a spinning wheel, and many old guns that were in the revolutionary war, and so many other things that I can't tell about them all, for there are over a thousand things in the cabin. H. L. Williams is the cabin manager, and he and I are very good friends. I will close now, for I could write a week and not tell about all the things that are in the cabin.

—Walter Rogers, Kan.

BANNER TAILORING CO., Dept. 494 Chicago

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect-fitting, seam-allowing patterns at 10 cents each, postage prepaid. Full directions for making, as well as the amount of material required, accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

6373 Ladies' Dress.—Serge or cheviot can be used to make this dress with the collar, cuffs and belt of contrasting material. The dress can be made with either long or short sleeves. The two-piece skirt closes at the left side.

The pattern 6373 is cut in sizes 34 to 42 inches bust measure. Medium size requires 5½ yards of 36-inch material, ⅝ yard of 18-inch goods for vest and 1¾ yards of 24-inch satin. Price of pattern ten cents.

6321 Child's Nightgown.—This dainty garment is made with body and sleeves in one and is to be slipped on over the head. The neck may be high and finished with a collar or low in round or square outline. Nightgowns are made of nainsook, lawn, batiste, cambric, sateen, outing flannel and wash silk.

The nightgown pattern 6321 is cut in sizes 4, 6, 8, 10 and 12 years. Medium size requires 2⅝ yards of 36-inch material, with 3⅛ yards of edging and 1⅞ yards of ribbon. Price of pattern ten cents.

6304 Children's Dress.—This dress can be made with either the long or short sleeves. The closing is at the front. The skirt is cut in three pieces. Serge, cheviot or linen can be used to make this dress with the trimming band of contrasting material.

The pattern 6304 is cut in sizes 2, 4, 6 and 8 years. Size 6 years requires 2¼ yards of 36-inch material with 1 yard of 27-inch contrasting goods. Price of pattern ten cents.

6338 Ladies' Three-Gored Skirt.—There is a bit of fulness at the waistline in this pretty skirt which is particularly effective. A stitched tab holds it in place. This and the cut-off corner on the front gore is the only trimming with the exception of the buttons and loops.

Pattern 6338 is cut in sizes 22 to 30 inches waist measure. Medium size requires 3¾ yards of 36-inch material. Price of pattern ten cents.

6358 Ladies' Box-Plaited Shirt Waist.—This shirt waist can be made in either the box plaited or gathered style. It is made with the seamless yoke and with either a high or low collar. Linen or madras can be used for this shirt waist.

The pattern 6358 is cut in sizes 34 to 42 inches bust measure. Medium size requires 2¾ yards of 36-inch material. Price of pattern ten cents.

FIELD NOTES.

One-year-old Single Comb White Leghorn hens and cockerels are offered for sale by Mrs. S. J. Philson, Harlan, Iowa, on page 21 of this issue.

On page 21 of this issue will be found the advertisement of Orlando Jacobs, New London, Iowa, offering Single Comb Brown Leghorns for sale. In furnishing copy he writes: "While not as large as some years, our Single Comb Brown Leghorns are exceptionally good and show the results of careful breeding. For ten years I have made an effort to produce the best possible, and believe that I can furnish stock that will be appreciated."

Thirty Duroc Jersey boars—seven fall and thirty-three spring boars—at $30 to $40 are advertised for sale by R. F. Alkman, Audubon, Iowa, on page 39.

Mrs. Laun, Floyd, Iowa, is offering Rhode Island Red yearling hens, cockerels and pullets, and Indian Runner ducks, for sale in her advertisement on page 21.

The advertisement of Geo. W. Harris, Shelby, Ohio, offering Single Comb Mottled Anconas for sale will be found on page 21 of this issue of The Homestead.

J. H. Berry & Sons, Iowa City, Iowa, are advertising fall and spring Duroc Jersey boars, with quality, at very reasonable prices. They guarantee satisfaction on all mail orders.

Glen F. Rider, Farmington, Iowa, is offering to sell registered Shropshire yearling rams and ship them C. O. D. within 100 miles of Farmington at $12.50 per head. See page 28.

C. C. Evans, North English, Iowa, is offering Chester White boars for sale on page 38. He has a fine lot of boars sired by Combination 2d and would be pleased to price them to any of our readers.

Single Comb Black Minorca pullets, bred from the best of layers and large, improved stock, are offered for sale by Lewis Tieden, Elkader, Iowa, in his advertisement appearing on page 21 of this issue.

Fifteen Duroc Jersey boars, all of which have been vaccinated and are therefore immune, are offered for sale by Will Bauer, Audubon, Iowa, on page 38. He is pricing these at $30 and $40 if ordered soon.

Sixty head of immune Chester White boars are advertised for sale by J. H. Stewart, Dickens, Iowa, on page 38. He certainly has a dandy crop of boars this year. Write him for prices and mention The Homestead.

W. H. Hunt & Son, Galt, Ill., have registered Oxford and Shropshire yearling rams and ram lambs for sale as per the advertisement found on page 23 of this issue. These animals are of the best of breeding and will be priced right.

If you want a good Duroc Jersey boar at a reasonable figure read the advertisement of Perry O. Brown, Lamoni, Iowa, on page 39. He has twelve head of good boars for sale and he is making special prices on these in order to move them. Write him about them at once.

Mrs. Laura Mather, Clarksville, Iowa, in furnishing copy for her advertisement on page 21 of this issue, writes: "I have an exceptionally fine flock of pure-bred Rose Comb Brown Leghorns (young hens, pullets and cockerels) that I will offer at barely remunerative prices."

Earl Bloom, Bridgewater, Iowa, makes a change in his advertisement of Shropshire sheep on page 23, which will be of special interest to buyers. He is closing out his flock, but still has eleven head of choice yearling and ram lambs and one two-year-old ram. He says that these are heavy-boned, well-wooled animals, and that in order to close them out he will make some specially low prices

Sherwin-Williams paints and varnishes are advertised on page 10. The advertisement truthfully says that painting today saves rebuilding tomorrow. It says other things, too, and hints that any reader of this paper may obtain a valuable booklet entitled "Paints and Varnishes on the Farm," without cost. Get one. Write for it to Sherwin-Williams Co., 683 Canal Road, Cleveland, Ohio.

L. I. Handlon, proprietor of the Shamrock herd of Chester White hogs, announces on page 38 that he has for sale high-class fall boars, as well as winter and spring pigs of both sexes. He is quoting unusually low prices on these animals and guarantees satisfaction. His herd is in perfect health and thrift and there is no disease in his neighborhood. For descriptions write to L. I. Handlon, R. R. 3, Farmington, Iowa.

R. W. Botts, the well-known Short-horn breeder at Plymouth, Ill., will disperse his herd Thursday, October 16th, at which time he will present forty head of well-bred Scotch cattle including thirteen bulls. The buying public will find this an attractive lot of cattle. W. B. Rigg, Mt. Sterling, Ill., will contribute nine head, eight females and one bull. Particulars regarding the sale will appear in later issues of The Homestead.

D. Nauman, West Liberty, Iowa, has twenty-five Duroc boars on hand sired by Chief Jewel and Proud Ohio Chief 2d. All his hogs are vaccinated with the double treatment and everything shipped out is guaranteed to please. Mr. Nauman won first, second, fourth and sixth place on boar pigs, and first and fourth on sow pigs at the recent Iowa State Fair. Mr. Nauman will make a brood sow sale January 20th. See page 31.

E. J. Trumbauer, St. Charles, Iowa, breeder of Chester White swine, in furnishing copy for new advertisement on page 38 of this issue, writes: "The Chester White boars I am offering for sale are of March and April farrow; will weigh from 100 to 175 pounds each; have had but very little grain, hence are not loaded down with corn fat, but instead, have had the run of an alfalfa pasture all season, so they have the size, bone and lots of quality. Their dams are of the large kind, weighing from 450 to 600 pounds. They are sired by the two herd boars, Fancy Boy 20451 (this hog is a real quality hog throughout) and Big Jumbo 22969, one of the best in the White family, in length, arched back, well-sprung ribs, head, ears and bone. In short, none better than he. If in need of one come see or write."

Guy Sickels, Athelstan, Iowa, who has been advertising a public sale of Poland China hogs to take place October 6th, advises us that on account of disease he has postponed the sale indefinitely.

In his advertisement on page 38 Earl Bloom, Bridgewater, Iowa, offers choice Chester White hogs for sale. He has in particular one extra choice aged herd boar, and some fine spring pigs. He advises us that he has just returned from the Hoover herd at Oskaloosa, Iowa, where he bought an extra fine fall boar, and one of the best gilts in the herd.

Henry G. Walker, postmaster, Iowa City, Iowa, whose advertisement of Rose Comb Rhode Island Reds appears on page 21, writes that at the Johnson County Fair his young stock carried away the blue ribbon on both cockerel and pullet. His flock, he writes, includes the best birds he has ever raised. He also has a few choice Indian Runner ducks for sale.

J. L. Stittsworth advertises Chester White hogs on page 31 of this paper. He wishes to close out a fine lot of early spring boars and has made very low prices on them. They are right in every way. The herd has gone through disease in the summer time, and those which remain may be considered cholera proof. For further particulars, address J. L. Stittsworth, R. F. D. 4, Knoxville, Iowa.

Forty head of Short-horn cattle will be sold at Wheaton, Ill., Tuesday, October 14th, by Thomas Stanton. Fifteen head are representatives of popular Scotch tribes and the balance belong to the Young Mary, Rose of Sharon, Duchess and Wild Eyes families, topped out by good Scotch bulls, and a lot of extra good, roomy matrons, all heavy milkers and approved breeders, fourteen of the cows selling with calves at foot. Particulars will appear in later issues.

Orlando Jacobs & Son, New London, Iowa, are advertising Berkshire boars and sows for sale in their advertisement which appears on page 36 of this issue. In furnishing copy they write: "Our herd of Berkshire hogs is in good healthy condition and contains some excellent boars and gilts. They are sired by three grand boars, among the best known to the breed. The dams are equally well bred. We solicit a share of the trade and will ship on approval to any responsible party."

C. H. Porter, Eagle Grove, Iowa, places a new advertisement of his herd of big-type Poland China hogs on page 31 of this paper. Mr. Porter's herd is one which has established an excellent reputation as a producer not only of big Poland Chinas, but those which have as well quality, finish and early maturing merits. The blood lines are those now most popular, but Mr. Porter has exercised unusual care and selection and has avoided much of the inferior character that has crept into other herds of big-type hogs. He has for sale spring boars, which he believes to be better than any he has ever before offered for sale. They have all been immunized by the simultaneous treatment, and may be purchased and taken to other herds with the certainty that they will not suffer from cholera. For special prices call on or visit C. H. Porter, Eagle Grove, Iowa.

We wish to call attention to the fact that Orville O. Jones, York, Neb., has for sale some very choice Poland China boars sired by the great and only Jumbo The Great. This boar is one of the great boars of a great Poland China state and as a sire he is first class. Mr. Jones has only reserved about a dozen of the very best out of a herd of thirty or more boars and these have passed through the disease and also a double serum treatment. They certainly should be immune. They should appeal especially to those that are close to diseased herds or that have been visited with the cholera. These boars are being held at very reasonable prices, really less than they should bring. Mr. Jones also has three Short-horn bulls for sale. Two of them are roans and very fine and one a red. They are priced at such figures as farmers should be willing to pay. Some of them are by Pleasant Lawn Knight, one of the largest and best breeding bulls used in central Nebraska. Barred Rock cockerels of the very highest type are also for sale. They are of such breeding conformation that they should be winners at the big poultry shows this fall. Mention The Homestead and ask about this stock. See page 31.

H. S. Allen advertises Duroc Jersey hogs on page 31. Writing with reference to them Mr. Allen says: "In calling attention to the boars we have for sale we can frankly say that they are a good lot. Some of them are as good as we ever raised. Three are sired by Crimson Wonder Jr., he by Crimson Wonder Again, and his dam the noted sow, H. A.'s Queen. These are hard to beat. They are big and have quality. There are also good ones sired by Crimson Wonder Again. Do you know what the get of old Crimson Wonder did at the Nebraska State Fair? F. H. Allen, Tobias, Neb., showed one litter of one boar and three sows that captured first on boar under one year, and first, second and sixth on sows under one year. They were winners of first under-one-year herd, first on National Duroc Jersey special, second on get of sire, and the National Record Association cup. The grand champion boar at the Nebraska State Fair had for dam a daughter of Crimson Wonder Again. The grand champion boar at the Iowa State Fair was a grandson of Crimson Wonder Again, as was also the grand champion sow at the Nebraska State Fair. The animals I have for sale will be priced very low. Russell is on the main line of the Burlington railroad, fifty miles south of Des Moines." Address H. S. Allen, Russell, Iowa.

Grant Lynn, Spirit Lake, Iowa, recently sold to W. M. Sells his noted Duroc Jersey boar, Evergreen Prince, and he secured in this deal Mr. Sells' well-known herd boar, L. E.'s Col. Grant will use him on quite a number of his best sows that he will sell in his winter sale. Grant has vaccinated all his boars and they will be ready to ship in a few weeks. He concluded that everybody wanted vaccinated boars and he wants to fill his orders to the satisfaction of his patrons.

As per the announcement on page 31 the Singmaster Percheron importing and breeding concern has opened a branch establishment at the stock yards of Sioux City, Iowa, which will be operated under the name of Singmaster & Walker, and will be under the management of C. C. Walker, whose experience in the past, good judgment, ability and honesty entitle him to consideration. Some of the best stock of Maplehurst Farm will be forwarded to this branch. Buyers are requested to call at the yards.

C. F. Adams, Owasa, Iowa, will hold his sale of Poland Chinas on October 9th and will sell forty spring boars and a few gilts and a fall yearling boar by Big Jumbo. These boars all have extreme length and immense size for which Mr. Adams' herd is noted. Mr. Adams has five herd boars whose combined weight is 2,850 pounds, and none of them are fat. There are several spring boars that go in the sale that are better prospects than the older boars were at the same age. Maid's Halver 1st is a two-year-old boar that weighs 860 pounds. See page 31 and write Mr. Adams for catalog, mentioning The Homestead.

J. B. Heisel, breeder of Poland China hogs advises us that he is now making special prices on boar pigs of March and April farrow. These, he says, are a good lot of big-type pigs, weighing from 150 to 200 pounds apiece. He has a large crop of fall pigs and must dispose of his spring boars as soon as possible, and for that reason he has priced them as low as $25, a figure which any farmer can afford to pay. Mr. Heisel raises and sells from 100 to 125 pigs each year, and almost every sale is to a satisfied customer. He made one of the finest exhibits ever shown by one breeder at the Grinnell Fair, which included forty of his choicest hogs, and took home with him twelve first prizes and eight seconds. He also offers twelve pigs to be shipped at weaning time, at from $12.50 to $15 each. Address J. B. Heisel, Grinnell, Iowa.

Shetland Ponies for Sale.

If any of our readers want some good Shetland ponies, H. W. Littleton, Harlan, Iowa, has them for sale. He offers eighteen head, including stallions, mares and fillies. His advertisement appears on page 35. Write him at once and mention The Homestead.

Polled Hereford Bulls.

A number of good young Polled Hereford bulls, ranging in age from ten to fifteen months are offered for sale by F. O. Peterson, Galva, Iowa. Mr. Peterson will be glad to tell The Homestead readers more about these bulls provided they mention this paper when writing him.

Fisher's Prize-Winning Hampshires.

If any of our readers want to purchase Hampshire boars they can easily secure them from Roy E. Fisher, Winside, Neb. He has forty head for sale sired by his leading prize-winning boars. At three state fairs this fall he won forty-two of the leading prizes, so you may know he has some excellent Hampshires. He has boars of all ages, some of which were winners at those fairs. Write Mr. Fisher about these at once and kindly mention The Homestead.

Heckenlivly's Polands Meet With Favor.

In Dawson county, Nebraska, they have quite a big fair, and as this is the center of a great pure-bred stock breeding section there is much interest in the stock exhibits at the fair. This season A. B. Heckenlivly, Cozad, Neb., took thirteen of his big Polands to the fair. To prove that thirteen is not a bad number he won twelve prizes on these thirteen head. He got two of the championships, four firsts, three seconds and three thirds. These Polands are of the big Nebraska kind, the kind that are big and the kind that have fleshing quality. Mr. Heckenlivly will sell these hogs at very reasonable prices. They are good stuff, the writer has seen them, and we know whereof we speak. In interested one will do well to write immediately. Kindly mention The Homestead when doing so.

Paulsen's Hampshire Boar Sale.

We wish to call special attention to the sale of Hampshire boars that will be made by C. P. Paulsen, Nora, Neb., at Fremont, Neb., on October 10th. This sale will consist of sixty-five head of as choice boars as have passed through a sale ring in the West, if not in the whole country, in the history of this breed. Mr. Paulsen has about 100 head of fall and summer yearlings and he has chosen sixty-five of the very best of these for this sale. There are boars in this collection that are good enough to win in the best shows of the country and they are well enough bred and well enough marked to head the very best of the good herds. The writer saw this bunch of boars a short time ago and they are the best that we ever saw in one lot. We would advise Homestead readers to get the catalog of this sale immediately. Look it over carefully and plan to attend this sale. Homestead readers who cannot attend may send buying orders to J. C. Price, representing The Homestead, and careful

CAREY CAMERON'S SALE

SHORT-HORN CATTLE

and Duroc Jersey Hogs

HERMAN, NEB., OCT. 6, 1913

33 Head Short-horns, 8 Bulls, 25 Head Cows and Heifers

12 Head Duroc Jersey Boars

THERE will be **three head of Scotch bulls** in this sale, **four Scotch heifers and two Scotch cows.** The remainder will be well-bred Scotch-topped with five or six of the best Scotch crosses. There will be daughters of the great **Banker's Victor** in the sale and seven choice heifers sired by **Royal Knight,** a son of the great March Knight.

Charlie Laughlin and **Carl Hansen,** two of the best young breeders in this part of the state, will sell seven head of cows and heifers in my sale. These are practically the same breeding, as they were originally purchased from my herd. Write for my catalog at once and come to this sale. Address

Carey Cameron - Herman, Neb.

Carey M. Jones, Auctioneer **M. T. White, Fieldman for Homestead**

S. C. Wyckoff's Sale of Big-Type

EVERYTHING I will sell in my sale will be **immune** and **cholera proof.** The boars will be sired by **Kellerton King,** a son of Long King; **Good Orange,** a son of Big Orange; **Big Jumbo 2d,** by Big Jumbo; **Big Rattler** and R.'s Lad. I am selling as good a bunch of large-type Polands as will be offered this fall. Catalog ready, write for it and mention The Homestead. Address.

S. C. WYCKOFF - - KELLERTON, IOWA

H. S. Duncan, Auctioneer

KOOL'S POLAND CHINA SALE

TO BE HELD AT THE FARM NEAR

CORDOVA, IA., WEDNESDAY, OCT. 8, '13

THE sale will include three fall gilts, thirteen fall boars and twenty spring boars. The offering is almost entirely the get of Big Victor's Improver and Jumbo, but there will be one spring boar by the $1,500 Smooth Wonder 2d. The dams are mostly by Big Victor's Improver, but there are four out of Queen 1st, a 900-pound daughter of Lentz' Dandy Jim, two out of Lady Lightfoot 29th by Jumbo, five out of Lady A by Big King and five out of King's Lady 2d by Big King. The consignment is of high-class, big-type quality, in fair flesh and thrifty, growing condition. Send mail bids to C. C. Carlin, of The Homestead, in my care. Col. W. B. Duncan, auctioneer. For catalogs address.

A. KOOL - - - CORDOVA, IOWA

selections will be made for them, and their interests in general well looked after. When writing for the catalog kindly mention The Homestead.

De Young's Duroc Boars.

That old and reliable breeder of Duroc Jerseys, A. J. De Young, Sheldon, Iowa, advertises fifty head of splendid boars for sale on page 31. These have all been vaccinated and are immune and are ready to ship. If you want an immune boar, one that is well bred and right in every way, write Mr. De Young at once and mention The Homestead.

Crow's Durocs.

Frank N. Crow, Oxford, Iowa, is offering for sale three yearling boars sired by Chief's Col. and eight fall boars sired by Chief's Col. and Prize Wonder; also twenty March and April pigs sired by Prize Wonder and Chief Col. These pigs are out of sows sired by Royal Col., Prairie Commodore, Crimson Rambler, Col. Whitehall and others. These pigs have good bone and good length, are well proportioned and have good size for their age. Prices are reasonable. See page 31 and mention The Homestead when writing.

Pelzer's Poland China Sale.

On October 11th, Frank Pelzer, Marne, Iowa, will make a public sale of forty head of Poland Chinas at Atlantic, Iowa, and it promises to be one of the good offerings of the season. Mr. Pelzer has been breeding the larger kind for these many years and he is one of the best feeders in the state and you can take our word for it that he will put up a great line of boars and sows in this sale. Write him a card at his home town for catalog and see that your name is placed on his mailing list. We will tell you more about his offering in next week's issue.

Lefebure's Belgian Importation.

Just as we go to press we are in receipt of a telegram from Henry Lefebure advising us of the arrival of his twenty-eighth annual importation of Belgian horses. This includes 100 head and is in fact the largest importation made from Belgium this year. The consignment includes Belgian stallions and fillies and twenty Percheron stallions. Mr. Lefebure has just completed a new barn, No. 7, and it is filled with high-class horses. The pastures are also full of mares, fillies and colts. Mr. Fefebure invites the attention of critical horsemen and buyers and believes that they will find a visit to his farm one of interest in any event. See his advertisement on page 35 and for other particulars write Henry Lefebure, Fairfax, Iowa.

Polled Angus at Fond du Lac, Wis.

Horace E. Whittaker has a fine herd of seventy-five Aberdeen Angus cattle. His herd bull is Glenfoil Star, that was third at the 1911 Wisconsin State Fair and first at the leading Wisconsin county fairs. His sire was Black Woodlawn, champion at the 1909 International, and his dam was also an International winner. His females are principally of the Blackbird strain. He has four cows sired by Imported Prince Ito, that was imported from Scotland at a cost of $9,100 by Stanley R. Pierce, of Illinois. Mr. Whittaker has shown at the leading state and county fairs for eight years. For further information write Mr. Horace W. Whittaker, of Fond du Lac, Wis. Kindly mention this paper when writing.

Geo. Porter's Berkshires.

One of the best informed, most progressive breeders of Berkshire swine that the writer has met in some little time is Geo. Porter, Stanton, Neb. Mr. Porter has been breeding Berkshire swine about ten years, and his knowledge of pedigree and breed characteristics is certainly great for that length of time. He very early in the game, chose a type of hog that if not at present will certainly in a very short time come to be very popular. He has secured some of the best breeding stock that was obtainable and has been very careful in the selection of his breeding boars. Careful adherence to his one policy of mating has given him a type of stuff that is really good and very uniform. Among the good boars that have been in use we mention Lord Lee 20th, the sire of nearly all the breeding sows on the farm. Lord Lee 20th was sired by that great breeding boar, Lord Ezit 3d and out of Stumpy Girl 105th. He sired Mr. Porter a grand good line of brood sows. The spring crop of stock is nearly all out of these sows and sired by Baron Peaboby 10th by Baron Duke 88th and came from the famous Peabody Farms owned by June K. King, Marshall, Mo. Another boar in the herd is the one-time famous show boar, Longfellow's Premier by Premier Longfellow and out of a daughter of Lord Premier. This boar was successfully shown by Wm. Holt and later did service in some of the real good herds of the country. Mr. Foster has forty boars for sale. We recommend them to our readers that are looking for good, practical Berkshires. See page 31.

Forty Hampshire Boars.

On page 31 F. O. Peterson, Galva, Iowa, advertises forty head of immune Hampshire fall and spring boars. These are sired by Peterson's Choice and Cherokee Lad, both first-prize winning boars at the Interstate Fair at Sioux City. He is also offering Peterson's Choice for sale. He is pricing these boars where they will sell, as he wants to dispose of them as soon as possible in order to make room for his fall pigs. Mention The Homestead when writing Mr. Peterson.

Leitch's Clydesdales Win.

At the 1913 Indiana State Fair the Clydesdale horses exhibited by John Leitch & Son, Lafayette, Ill., were one of the strong features of the live stock show, and captured a majority of the prizes, winning first, second and third on aged stallion, first, second and third on two-year-old stallion, first second and fourth on aged mare, first and second on three-year-old mare, first on two-year-old mare, first on yearling mare, first on produce of dam and champion stallion and champion mare. There were three other exhibitors beside Leitch & Sons. With the exception of four head the horses exhibited by Leitch & Sons had never before been shown in an American ring and they were all of the high quality for which this establishment is noted.

Cooper's Poland China Sale.

W. H. Cooper, Hedrick, Iowa, will sell a great lot of Poland China boars and sows on October 7th at his East-side Farm adjoining the city. They are the top of 200 head and they will look good sale day. The offering is sired by the 900-pound, Big Bone 2d by the famous Big Bone; Big Expansion, a son of the noted Dorr's Expansion, and others by Chief Leader and Ideal Chief. The dams of the offering are sows with immense size sired by Big Bone 2d, Big Ex, Chief I. X. L. 2d and others of equal breeding. Mr. Cooper guarantees everything absolutely as represented and is always willing to make good every promise. It has always been his policy not to take a man's money unless he could give full value for the same. See page 31 and write Mr. Cooper for catalog, kindly mentioning The Homestead. Bids sent to Carlos C. Palmer, Homestead representative, care of Mr. Cooper, will receive proper attention.

Coleman Bros. Buy New Boar.

Coleman Bros., Ithaca, Neb., recently purchased a new Poland China boar. They made a careful selection from the well-known herd of Thos. F. Miller, York, Neb. Coleman Bros. lost all their boar pigs with disease this fall, but they have saved fifty-five sows and in this fifty-five head are twenty-five of the best fall gilts that we ever saw in one bunch. They are sired by one of the best sons of A Wonder that we know of and out of an excellent line of brood sows. These gentlemen will probably make a brood sow sale in the winter.

Lineweaver's Duroc Jersey Sale.

H. W. Lineweaver, South English, Iowa, makes his seventh annual public sale of Duroc Jersey hogs on Thursday, October 9th, as noted in his advertisement on page 29. Forty-five head have been cataloged for this sale. One of the principal attractions will be the herd boar, H. & B.'s Ohio Chief, which Mr. Lineweaver considers the greatest Protection-bred hog living. This animal is a son of Proud Ohio Chief, he by Ohio Chief, and his dam was a daughter of High Chief, another son of Ohio Chief. He has typical Ohio Chief head and ear, a prominent eye, a strong, deep, well-rounded body, heavy bone and good feet. He will weigh 900 pounds when fitted and looks as though he would make a good show. He is sold guaranteed in every respect and is only parted with because so many of his get are to be retained in the herd. Five choice boars and the same number of gilts of March and April farrow by H. & B.'s Ohio Chief have been cataloged for this sale. Their dams are daughters of Muncie Chief, Col. Tientsin, etc. The remainder of the offering are by Cherry Chief, Model Wonder, Golden Model 30th and a son of Chief Select. It is good breeding all through, the individual is most desirable, and the health, thrift and condition all that any buyer could ask. Remember that the sale will be held on the day fol-

NEXT WEEK'S SALE PROGRAM

Monday, September 29	Duroc Jerseys, W. C. Rickey, Thornburg, Iowa.
Tuesday, September 30	Duroc Jerseys, Waltemeyer Bros., Melbourne, Iowa.

Friday, October 3	Poland Chinas, J. M. Sheehan, Stuart, Iowa.
Saturday, October 4	Poland Chinas, Frank Rainier, Logan, Iowa.
Saturday, October 4	Duroc Jerseys, Z. A. Zelmer, Atlantic, Iowa.

EXTRAORDINARY SHORT-HORN DISPERSION SALE

TO BE HELD AT THE FARM NEAR

MORLEY, IOWA, THURSDAY, OCTOBER 9, 1913

50 HEAD: 10 BULLS 40 FEMALES 50

THE bulls include Diamond King and Sterling Scottie, the two herd bulls we have been using so successfully. Diamond King has been rated by the best of breeders and judges as one of the great sires of the breed. He will do someone a world of good as he is very vigorous and sure. Sterling Scottie is a grand young bull that should head some good herd. Among the females Roan Lady, a 4-year-old daughter of Diamond King, is rated by many as the best Short-horn cow to be sold at public auction this year. She will weigh about 1,800 pounds and is every inch a show cow. Practically the entire offering is of the very best Scotch breeding. The Red Rose, Nonpareil, Fairy Queen, Beauty, Eliza, Flora, Ury and many other equally popular Scotch families are represented. We want you to write us for our catalog at once, mentioning Homestead. Auctioneers, Woods, Burge and Brock.

MILLER & NORTHY - - - MORLEY, IOWA

lowing that of Wm. Reed and may be easily reached from there. For catalogs or other information write H. W. Lineweaver, South English, Iowa.

Whitman's Short-horn Bulls.

J. H. Whitman, Lisbon, Iowa, is advertising Short-horn bulls on page 31. He has some reds and roans sired by Mister Robbin 338773, an extra well-bred Marr Miss bull sired by the noted breeding bull, Prince Robbin. One of these calves, Enterprise Robbin, a ten-months-old fellow that will weigh over 900 pounds, is of the Raspberry family and is a mighty good calf. He has six Cruickshank crosses in his pedigree. There is another sixteen-months-old roan Scotch-topped bull out of a Money Musk cow. See page 31 and write Mr. Whitman for prices, mentioning The Homestead.

Sharp's Hampshires.

Mike Sharp & Sons, Coal Valley, Ill., are breeders of Hampshire swine who are well known wherever this popular breed of swine is known. They have exhibited and been good winners at most of the leading corn-belt fairs and their herd has a reputation for quality and individuality. Messrs. Sharp have a number of the finest fall and spring boars that they have ever had on the farm. They have a yearling boar and a fall yearling boar that would make a mighty hot show at any state fair in the country. Any breeder who wants a really high-class herd boar should write or visit Mike Sharp & Sons at an early date. See page 36 and when writing kindly mention The Homestead.

Angus Cows and Heifers for Sale.

On page 31 Chas. Escher & Son, Botna, Iowa, advertises two car loads of splendidly bred Aberdeen Angus cows and heifers for sale. Half of these have calves at foot and these are sired by their noted show and breeding bulls. These cows are practically the same line of breeding as they have been selling in their sales. They will not make a public sale this fall and have therefore concluded to sell these privately. They also have thirty head of choice young bulls for sale and among these are some outstanding herd-bull propositions. There never was a better time to buy Angus cattle and Chas. Escher & Son are making special inducements on these two car loads of cows and heifers. They will be pleased to hear from parties who may want Angus cattle and they would like to have them call at the farm and inspect these cattle. When writing them kindly mention The Homestead.

Gudgell & Simpson Hereford Sale.

The sale of Hereford cattle to be held on Saturday, October 11th, by Gudgell & Simpson, Independence, Mo., at their farm, two miles from Independence, affords an opportunity seldom equaled to buy bred heifers that are superior individuals. There are fifty of these top heifers listed and Gudgell & Simpson have not parted with so good a lot in any sale. They are a decidedly uniform lot, they have plenty of size, excellent bone, are thick fleshed, have all the quality desired and have as good heads and horns as are to be found. The man looking for Herefords of the modern type that are so bred that they cannot fail to reproduce their kind cannot afford to miss this opportunity. Domino, Beau President, Beau Picture, Beau Dandy, Beau Modest and Bright Stanway are the sires. They are bred and safe in calf to Bright Stanway, Beau Dandy and Beau Modest. Two have calved and sell with calves at foot, the balance are due to calve this fall and during the winter and early spring. Breeders or those expecting to found herds should not overlook this opportunity, as these heifers will prove valuable things to add to good herds or for foundation stock. John W. Lenox, Independence, Mo., contributes ten choice yearling bulls, the pick of all his yearlings. They are sired by Simoon, Don Carlos by Publican, Folly's Lad, Harris' Prince 175th and Advertiser 10th. They are well grown, are big, strong fellows and are an attractive lot that should be appreciated. As the sale is to be held on Saturday of the American Royal Show week those who come to the show can easily run over to Independence on the interurban cars and see the cattle at any time during the week. Catalogs are ready and are being mailed on receipt of request for same mentioning The Homestead. See page 34.

Roberts' Poland China Sale Postponed.

Frank Roberts, Dexter, Iowa, has decided on account of the prevalance of disease in his community to postpone his Poland China sale for about a month until conditions for the local patronage are more favorable. Mr. Roberts' herd itself is not affected, and by sale date will be sold with a guarantee of immunity. Additional announcements will be made in later issues of this paper.

Moulton's Durocs.

C. A. Moulton, Morrison, Ill., has an excellent herd of Duroc Jerseys and at the present time is offering a fine lot of boar pigs of spring farrow of the most fashionable breeds. These pigs are sired by Success, Captain Model and S. E.'s Premier Col. Success is sired by S. E.'s Premier Col. and out of Pride of Sunnyside by Chief's Col., second dam Helen's Duchess by Ohio Chief. The pigs are out of sows by Browning Boy, he a grandson of Chief Col. Mr. Moulton's pigs are growthy and heavy boned and at the price he is asking for them should sell very readily. See page 39 and when writing him kindly mention The Homestead.

Angus Entries for Omaha Sale.

M. A. Judy, the sale manager, writes that he can still accommodate a few more Angus cattle in his combination sale at Omaha, Neb., November 4th. Mr. Judy has a fine lot of cattle consigned from well-known and reliable herds and parties with surplus cattle to sell will find this a most desirable outlet. The sale will be liberally advertised, the best of auctioneers employed, and when one considers the strong demand now existing for breeding cattle, there would seem to be no question but what good prices will be realized at the Omaha sale. The cost of consigning cattle to this sale will be only nonimal and full particulars can be secured by addressing M. A. Judy, West Lebanon, Ind.

Johnson's Immune Duroc Boars.

On page 31 Peter Johnson, Dickens, Iowa, advertises eighteen head of spiendid Duroc Jersey spring boars, every one of which has been vaccinated and are ready to ship. These are mostly sired by his good herd boar, Gold Col. 98857, a grandson of old Prince of Cols., and out of a dam by Tientsin. This boar has sired him some excellent pigs and he is offering a cracking good bunch of boars for sale. One of these litters is out of Belle Pilot, a daughter of A. F.'s Pilot Wonder and another litter is out of Nancy 3d, a granddaughter of old Golden Rule. A few others are out of daughters of Rowena's Hanley, and you will therefore see that he has a nice line of breeding behind these boars. Mr. Johnson's whole herd was vaccinated four or five weeks ago, and are therefore immune. These boars are ready to be shipped at any time and we know you will be pleased if you order one of them. When corresponding with him kindly mention The Homestead.

Larson's Duroc Sale.

Those of our Duroc Jersey readers who want to buy a King the Col. boar will get another chance in the sale of O. S. Larson, at Logan, Iowa, on October 7th, when he will sell fifteen head sired by this noted boar. In last week's issue of The Homestead we gave a detailed description of these boars and their breeding on the dam's side, and we will just add to it that he will sell just as good a bunch of boars in this sale as he sold before, and in a few cases we feel that they are better. One of the outstanding King the Col. boars is out of old Crimson Lady 2d and two very stretchy King the Col. boars are out of a Golden Model 11th dam. Other good boars in this sale are sired by Select Chief, Crimson Wonder 3d, a good fall boar by Advance Critic and several others by other well-known sires. Two sows go in the sale with a breeding privilge to King the Cols. and three choice King the Col. gilts are also listed. Get the Larson catalog and when writing for it kindly mention The Homestead. M. T. White will represent this paper at the sale. See page 32.

MAPLEWOOD
CHESTER WHITE SALE

To be held on the farm near Ankeny, Iowa,

Tuesday, Oct. 14, 1913

This is a Sale of Premier Hogs of Strictly Choice Lines of Breeding

THE consignment includes six mature tried brood sows, eighteen fall yearling sows, fourteen spring gilts, fall yearling boars and spring boars. They are the get of O. K. Perfection, Prince B., Grand Leader, High Honor, New Hampton Regulator and St. John. These boars are either champions or sons of champions. The dams are equally as well bred and trace to the best herds in the land. This is the biggest and best sale of the year. It contains breeding animals with show-ring quality. Cols. C. C. Evans and C. E. Luther, auctioneers. Send mail or wire bids to C. C. Carlin, of The Homestead, in my care. Catalogs now ready. Absolute health and thrift.

M. W. YOUNG - - ANKENY, IOWA

H. W. LINEWEAVER'S SEVENTH ANNUAL

Sale Choicely Bred Duroc Jerseys

At Farm, 2 Miles East of

South English, Iowa, Thursday, Oct. 9, 13

45 HEAD, including one of my herd boars, H. & B.'s Ohio Chief, the greatest Protection-bred boar living. There will be five choice boars and five choice gilts of March and April farrow by H. & B.'s Ohio Chief. Their dams by Muncie Chief, Mayor Jr., Wonder and Col. Tientsin, others by Cherry Chief, Model Wonder, Golden Model 30th and a son of Chief Select. If you are looking for quality we have got it. We have some very choice individuals to sell and desire your presence at this sale. Write for catalog and mention that you saw my advertisement in The Homestead. Send bids to Carlos C. Palmer, in my care or to either of the auctioneers. This sale follows Wm. Reed's sale at Rose Hill, Iowa, which is only thirty miles east. N. G. Kraschel and J. L. McIlrath, auctioneers.

H. W. LINEWEAVER, SOUTH ENGLISH, IOWA

William Reed's Great Duroc Sale

To be held at the farm adjoining Rose Hill, Iowa,

Wednesday, October 8, 1913

50 HEAD 50

THE offering consists of three fall boars, twenty-two spring boars, six fall sows and nineteen spring gilts. The fall boars are sired by Reed's Top Col. and Chief Select. Among the fall boars is one extra large, heavy-boned, high-backed boar with plenty of quality, sired by Reed's Top Col., that will make a herd boar. The spring boars are an extra good lot and among them is one outstanding good pig sired by Chief select and out of Fair Wonder 2d by J. C.'s Model Chief. There are six mangnificent fall sows by Reed's Top Col. and twenty extra spring gilts sired by Reed's Top Col. and Chief Select. This is by far the best offering of gilts I have ever put up. Write me for catalog mentioning The Homestead.

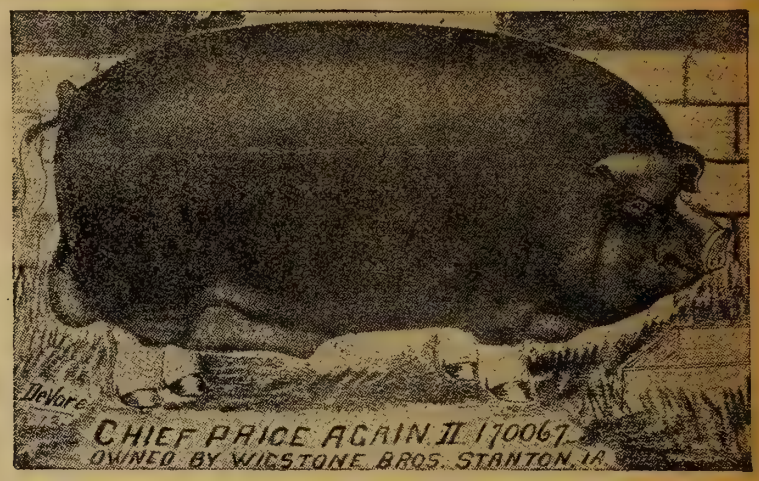
Wigstone Bros'. Great Sale

BIG-TYPE POLAND CHINAS

RED OAK, IOWA, OCT. 11, 1913

50 Head, 19 Boars, 31 Choice Sows---50



NINETEEN choice boars in sale—17 spring boars and 2 fall boars. A January boar sired by Chief Price Again 2d is one of the best boars to be sold this year. A March boar by same sire out of W.'s Lady Wonder is also a corker. Also some splendid boars sired by Big Jones 3d. We are selling some wonderful brood sows in our sale, several of which will have litters at side by Chief Price Again 2d, and 25 of the best big-type gilts that will be sold this fall. It is a great offering from one end to the other. Not a cull in the entire offering. Write for catalog and mention The Homestead. Address

WIGSTONE BROS. - STANTON, IOWA

H. S. Duncan, Auctioneer **M. T. White, Fieldman for Homestead**

Pemberton's Dispersion Sale of Shorthorns, Percherons and Polands.

Frank T. Pemberton, Iowa Falls, Iowa, will hold a dispersion sale of Short-horn cattle, Percheron horses and Poland China hogs at his farm near Iowa Falls, October 10th. This dispersion is made necessary owing to the fact that serious illness in the family necessitates his leaving the farm permanently. He has spent several years, as well as several thousand dollars, in getting his herds of pure-bred stock together and he regrets very much the necessity of closing them out. Fifty Short-horns, twelve Percherons and fifty Poland Chinas make up the offering. Thirty-five of the Short-horns are of the best Scotch breeding and descend from many of the most fashionable families in the herd book. The two herd bulls, Snowflake and Favorite Goods, are included. Snowflake is a Cruickshank Marsh Violet sired by Roan Sovereign, he a son of Valley Sovereign and out of Honey Flower 2d. Snowflake, as his name indicates, is white in color and is bred in the purple. Favorite goods is of the Jealousy tribe and sired by Straight Goods, a grandson of the sensational sire, Imp. Choice Goods. These are the only two of serviceable age that will be in the sale. The imported cow, Strowan Buttercup 24th, a twelve-year-old cow, as well as several of her daughters and granddaughters, are cataloged. Archer's Victoria 2d and Village Victoria are both Cruickshank Victorias descending from the imported cow, Victoria 73d. Miss Laura is a five-year-old daughter of Choice of Archers and out of Imp. Laura 12th. There are others of the Duchess of Gloster, Acorn, Lavender, Secret, Rose of Strathallan, Orange Blossom, and Dorothy. The advertisement on page 33 gives a sample of a few of the pedigrees of the Short-horns. The big catalog issued by Mr. Pemberton gives complete information regarding the offering. In Percherons a six-year-old imported stallion, Hihi, sells. He is a large flat boned, good quality horse and has proven a sire of the good ones. There are two imported three-year-old fillies both in foal to Hihi. There are several other mares of the useful sort. The mares will not be fat as they have been worked hard all summer and have been made to earn their own way. They are the kind that will do the work of any ordinary farm horse and at the same time raise a colt that will make a handsome profit on the investment. The fifty Poland Chinas are largely fall yearlings. The boars and sows are of the large, long, heavy-boned kind and at the same time they have plenty of quality. They are of the very best big-type breeding, such sires as Hadley Expansion, Big Halver, Long Victor, Grand Chief and Mammoth Jumbo appearing in their pedigrees. There are sure to be many bargains in this offering of cattle, horses and hogs as is always the case when so many head are to be sold in one day, and this is why everyone interested should plan to attend this sale. Write Mr. Pemberton for a catalog, kindly mentioning The Homestead.

Wycoff's Big-Type Poland Sale.

Thursday, October 9th, at Kellerton, Iowa, S. C. Wycoff will make a public sale of sixty-three head of big-type Poland China boars and sows and he is putting up a splendid offering. His will be all of the strictly large-type kind of Polands and they will be backed by the best blood known to the larger strains that are now in demand by the best breeders throughout the West and the East. He is selling thirty-seven head of boars and twenty-six sows and gilts, and one of the very important factors of this sale is that everything he will sell has been vaccinated and are cholera immune. His boars have splendid size and this is another thing the farmers and breeders are looking for. In a recent letter to us Mr. Wycoff has the following to say: "The hogs are coming along fine, they are great big boned, long enough to suit the most exacting, with enough quality to make just the kind of hogs that have made the big type famous. The litter of thirteen pigs out of Queen Hadley are coming on in grand shape; there will be twelve of this wonderful litter in this sale which of itself ought to make this one of the best sales of the season. They are sired by that good son of Long King (Kellerton King) that has done me so much good in building up my herd Then there are the three litters out of the Big Orange sows that are hard to beat, also sired by Kellerton King. And I wish you could see the six fine boars out of the Long King's Equal sow; they are simply killers; they are sired by Kellerton King, making them line bred Long Kings. And the litter out of Sue Wonder by Good Orange are probably the best things in the sale. W. B. Duncan says so and Will is a good judge. I also have a litter out of an R.'s Pawnee Lad sow sired by Good Orange that are very good. Two of my Big Orange sows will have litters in the sale sired by Big Jumbo 3d, a grandson of Mouw's Big Jumbo, combining the blood of two of the most popular hogs that the breed affords. I will sell this great yearling hog, as I have more herd boars than I need. He is a large, well-grown yearling of May farrow, extra heavy bone, good head and ear, good coat of hair, well marked, and is a good breeder, as his pigs will show sale day. I am putting two as good two-year-old sows in this sale as will go through a sale ring this fall; one will have litter at foot by Big Jumbo, the other one due to farrow to the service of Good Orange October 11th, just two days after the sale." His catalog is now ready for distribution and will be sent to our readers upon application. When writing for it kindly mention The Homestead.

Waltemeyer Bros.' Duroc Sale—Last Call.

Waltemeyer Bros., Melbourne, Iowa, will hold a sale of Duroc Jerseys on September 30th. This sale is one of the most important to breeders in general that will occur in a long time. This firm have made a marked success in the breeding, developing and showing of pure-bred swine. Their prize-winning herds that have made an almost unparalleled record in the show rings have practically all been bred by themselves. To start with these breeders had energy, ability and integrity. With these as capital they have succeeded. It is not so much of a feat if one has financial backing to buy a large number of the best animals of any one breed and make a successful winning in the show ring. It does take ability to breed the animals that can win in the strongest competition such as Waltemeyer Bros. have done. In the last issue of The Homestead we gave a description of the boars they will sell in their forthcoming sale and we want to further emphasize the fact that this is an exceptional opportunity for breeders to secure really high-class boars. High Model, the grand champion of Iowa, 1912, and first in the aged class at the Iowa and Nebraska State Fairs in 1913, is one of the great boars of the breed. He is one that should be looked after by the very best of breeders. Golden Model 34th, the grand champion boar at the Nebraska State Fair, 1913, is another great prospect for a herd header and should go into a good herd. Golden Model 31st, the grand champion of Sioux City, 1912, and second in the aged class at Lincoln, Neb., 1913, has proven a sire of exceptional merit. No breeder can go wrong in placing at the head of his herd either of the three above boars. All three of the above boars are sired by the phenomenal sire of prize winners, Golden Model 2d. Tormenter, the senior yearling prize winner in the 1913 shows, is a son of W. B.'s Model Chief and out of Fancy Wonder, the dam of Golden Model 31st. There will be a great lot of spring pigs sired by High Model. Sensation Wonder, Golden Model 2d, Crimson Wonder Again, I Am Golden Model 2d and Model Chief's Lad. Breeders in general look to the herds that have been producing the prize winners for herd boars and this is a logical thing to do. A family that has been producing prize winners are bound to continue doing so. When any breeder or breeders can breed Durocs that can win in the fastest company, he or they must be considered as having hogs of superior merit, especially when the winnings have been won under different judges each year and at the different fairs. Any of our readers in need of a high-class herd boar should write Waltemeyer Bros., Melbourne, Iowa, at once, kindly mentioning The Homestead, and arrange to attend the sale. If it is impossible to attend send a bid to Carlos C. Palmer, Homestead representative, in care of these gentlemen and your interests will receive careful attention at his hands.

Rainier's Chief Price Again Sale.

On October 4th, at Logan, Iowa, Frank Rainier will sell forty-five head of his big-quality Poland Chinas and he is putting up an excellent lot of boars and sows in this sale. Mr. Rainier and Harvey Johnson together own that noted show and breeding boar, Chief Price Again, and he ranks as one of the greatest breeding boars today in the West. Those who saw him when he was shown at the Iowa State Fair a few weeks ago said he was the greatest boar at that show and they were about right. He at that time weighed 910 pounds as a two year old, smooth as a ribbon and with the size that is seldom seen coupled with the quality that he has always carried with it. He sired Chief Again Price that was a grand champion boar the following year at the Nebraska State Fair and he was also the sire of Chief Price Again 2d, the third-prize boar at Des Moines and he weighed 1,024 pounds. So much for this great boar at this time, but we will say that there is quite a number of his get in this sale. In this sale there will be forty-four head of top notchers, ten fall and summer boars. A good share of these are strictly herd-heading propositions—great backs, heavy bone, good broad heads and nicely hung ears and the best of feet. There are also three fall gilts that are worthy of special mention. Two of these were bought of Harvey Johnson at a good price as attractions for this sale. One of these is sired by Long Chief, a son of Chief Price Again and out of Columbia's Likeness, bred to farrow a few days after sale to Long Wonder by Crow's Kind. The other is by Big Wonder, a son of Pritchett's A Wonder and bred to Chief Price Again. And there is one open gilt by Chief Price Again that is a stunner and would make a sale topper next spring. If either one of these three splendid fall sows sell under three figures they will sell too cheap. There will be two sows sold with litters by C. P. A. Beauty Surprise, by Big Chief, by Orange Chief, out of Logan Surprise, is a typical Minnesota sow, bred for size, and is a good one, what we call a great two year old. The spring pigs are a grand, good lot, mostly all by C. P. A., and the nineteen boars will make a fine bunch to pick herd boars from. There is one out of Beauty Surprise, the sow that goes in sale

COOPER'S ANNUAL SALE, BIG-TYPE POLAND CHINA BOARS and GILTS
HEDRICK, IOWA, TUESDAY, OCTOBER 7, 1913

WE will sell on this date, the most select draft of boars and gilts we have ever made from our herd. There will be no tail enders, but all top stuff. If you are interested in the best there is in big breeding, and big hogs with quality, come. We assure you no disappointment. They will be sired by Big Bone 2d, Chief Leader, Big Expansion, Ideal Chief, and other noted boars of the breed, from 600-pound yearling sows to sows weighing 800 and over. Send for our catalog. It tells all.

W. H. COOPER - - - - - - - - - - **HEDRICK, IOWA**

that will just suit someone who wants extreme size with lots of quality. Mr. Rainier is also including one gilt of this litter by C. P. A., and she is sure the right kind. There will be ten spring gilts in all, and every animal that goes on sale is worthy of special mention. If you have not received his catalog write for it at once and kindly mention The Homestead. Bids sent to M. T. White will receive attention on sale day. See page 34.

Wigstone Bros.' Great Poland Offering.

One of the greatest offerings of big-type Poland Chinas that will be sold this fall will be that of the Wigstone Bros., whose sale will be held at Red Oak, Iowa, October 11th. The boys have listed fifty head for this sale and it is an offering that we can recommend to any of our Homestead readers who are going to be ready to buy a good boar or a few good sows. Their offering is all that the best big type calls for, and the man will be hard to please who will not be able to get what he wants either in a boar or a sow in their sale. In the first place many of the things they will sell will be sired by Chief Price Again 2d, a boar that weighed 1,024 pounds at the Iowa State Fair and he is one of the largest and one of the best boars that is doing business today in western Iowa. He has the size and the smoothness that the boys all like and he is siring some corking good things on their farm. They will sell seventeen head of spring boars and we will just mention a few of the best. No. 1 of the catalog is a January pig, sired by Chief Price Again 2d and out of the great sow, Giantess D. Here is one of the largest and best sows in their herd and here is a boar that will not only be large himself, but will be smooth and he is a prospect and a very good one for the 1,000-pound class when he is grown out. Some good breeder should get his eye on this boar and go and buy him. A March boar by the same sire and out of W.'s Lady Wonder is also a good one and he will make another splendid boar when grown out. This pig has a little white spot on him, but that makes him all the better and a great many will like him when they see him at the sale. There are three good Big Jones 3d pigs in the sale. One of these is a January pig out of Mammoth Lady, and he is a good one; another is out of Chief's Lady 4th by old Major Nelson. A splendid boar that came in February and sired by W.'s Wonder is out of Miss Jane, one of the best sows in the herd. He is a good boar and his dam is a splendid sow and she will also be sold in the sale. There will be two fall boars in the sale sired by Big Jones 3d. They will sell twenty-three spring gilts sired by Chief Price Again 2d, Big Jones 3d and W.'s Wonder and there will be few sales this fall where you will find such a good lot of gilts as these boys will sell. A January gilt by C. P. A. 2d and out of Miss Peerless is an outstanding good one and you will not see a better one this fall. She goes back to Peerless Lady, their noted old show sow. A full sister to her goes in and she is almost as good. A good gilt by C. P. A. 2d out of Giantess D., is another good one and she is a full sister to the boar No. 1 in catalog. Two very choice gilts sired by Big Jones 3d and out of Mastodon Lady 3d are also strictly first class. Three of their best sows with litters by Chief Price Again 2d also go in and five open sows. It will be remembered that Chief Price Again 2d was third-prize boar in 1912 at the Iowa State Fair and he weighed at that time 1,024 pounds. If you are looking for the same kind make it a point to attend the Wigstone Bros.' sale on October 11th. When writing for their catalog kindly mention The Homestead. M. T. White will represent The Homestead at the sale and will handle bids sent in his care. See advertisement on page 30.

Sheehan's Last Call.

When it comes to large-type Poland Chinas you invariably think of J. M. Sheehan, Stuart, Iowa, who will make a public sale on October 3d, because he has one of the good herds today in western Iowa. He is offering a draft of seventy head in this sale and he is selling a grand good lot of big, useful boars and sows, and it is going to be a great place to buy. Included in this sale will be twenty-five head of fall boars sired by his noted herd boar, King Wonder, a boar that has made his mark as a large-type sire here in western Iowa. A large per cent of his offering will be sired by this boar, and yet he will have quite a few things in this sale that will be sired by other well-known boars and he has these for those farmers and breeders who have purchased from him before and who want something a little different from his older line of breeding. This in itself makes his sale attractive because he will offer some things that any of the best breeders can use in their herd. Two splendid spring boars sired by Mouw's Chief Price and out of a Big Jumbo sow are listed for this sale and while both are good, one is especially good. He is offering fifteen fall sows in this sale that will make great brood sows. These sows are of the same breeding as the fall boars and some man can pick up some of these sows and establish a herd. There is no better big-type breeding than you will find in the pedigrees of this offering throughout, and it will be a very good place to go to buy a boar or some good sows. Write for his catalog at once and kindly mention The Homestead.

Cameron's Short-horns and Durocs.

On October 6th at his farm near Herman, Neb., Carey Cameron will make his annual sale of Short-horn cattle and Duroc Jersey hogs, and those who know him always look forward to these occasions, as he never fails to put up a splendid offering. He is selling thirty-three head of cattle in this sale and he is selling some very good ones. He is also selling twelve head of Duroc Jersey boars, all of which are spring boars except one and he is a fall boar and a good one. There will be eight head of bulls in the sale and three of these are straight Scotch. He is also selling some good Scotch cows and heifers. Two of the bulls will be Cruickshank Butterflys, one of which is a roan and is sired by Chet, a grandson of the $1,200 bull, Sultan, that Charlie Norton sold to go to Minnesota a few years ago. The dam of this bull is a daughter of Gloster's Choice, second dam by old Red Bud, and third dam by Chief Lavender. A nice red Scotch bull is also sired by Chet and he is out of Barmpton Snowflake, a daughter of the great bull, Banker's Victor. He is also a Cruickshank Butterfly. He is selling an April 15th bull calf, sired by the same bull and out of Butterfly 6th that is one of the choicest young bulls in the sale, and he will be a bargain for the man that can buy him and wait on him to mature. There is a splendid dark roan bull in the sale that is a good one and he is out of a daughter of Gloster's Choice, then comes Red Bud and Chief Lavender. Individually, he is one of the best he will offer in the bull line. There will be seven very choice heifers in the sale sired by Royal Knight, he by the great March Knight. Among the Scotch cows that he is listing is Barmpton Miss, a daughter of Banker's Victor, and she is a cow that he secured from C. C. Norton, who had a reputation for breeding the very best. She is one of the very best cows he will sell and she goes in bred to Chet, also a Norton-bred bull out of one of his best Sweet Charity cows. Another Norton cow that he is listing is Barmpton Snowflake, a daughter of Banker's Victor. Her grandsire was Imp. Bapton Admiral, then comes Imp. Salamis, Imp. Prince Bishop, Roan Gauntlet and other noted Cruickshank bulls. A good two-year-old daughter of this cow will also be sold in the sale and she is sired by a bull called Roan Gloster. Among the thirteen heifers is Nelly Gloster, a richly bred Orange Blossom, and she is good enough to go into any herd. A nice roan heifer called Secret, sired by Royal Knight is one of the good ones and she is a richly bred Cruickshank Secret, and there is a good heifer out of Barmpton Miss in this sale, called Barmpton Pearle. Another heifer that we cannot refrain from mentioning is Moss Rose, a rich roan sired by Royal Knight, and while not absolutely Scotch she is nevertheless the best heifer individually in the sale. Charlie Loughlin, a neighbor breeder who has been buying from Mr. Cameron for a number of years sells five cows in this sale with calves at foot, three yearling heifers and one bull. Among these is Jennie B., a six-year-old daughter of Imp. Victoria's Count, a bull that formerly headed the Cameron herd. She is a good red cow and sells with an extra good bull calf at foot. Carl Hansen, also another neighbor breeder, who has always bought the very best is selling two good cows and two choice heifers in this sale. We never saw Carl Hansen buy a poor one and as he is a good caretaker you can expect he will have some good things to offer on this occasion. There will also be twelve head of good Duroc Jersey boars in the sale. Write Carey Cameron, Herman, Neb., for a catalog and kindly mention The Homestead. See page 28

Handley's Big-Type Durocs.

For the last time we want to call attention of Homestead readers to the big-type Duroc Jersey sale of E. E. Handley, Carroll, Iowa, October 3d. Mr. Handley has built up a reputation for breeding the big Durocs and he generally has what the people are looking for. He formerly owned that great boar, Colonel Sensation, the 1,050-pound boar that showed this year at Des Moines and some of the best sows in his herd are daughters of this great sire. He is selling thirty growthy spring boars in the coming sale and a large number of these are sired by the 1,000-pound boar, Frankfort K. Old Frankfort K. was one of the most consistent winning boars that has been seen in later years on the western state fair circuit. He first came into notice at the Nebraska State Fair a number of years ago where he landed first prize as a pig. He then was shown at the Interstate Fair at Sioux City where he was also victorious and later as an aged boar he came back and landed first prize and grand championship. He was one of the largest boars that was ever shown at that fair. Mr. Handley has a splendid offering for the boys and those who are going to want a good boar or a few choice gilts will do well to attend this sale. His catalog is now ready and can be had for the asking. Mention The Homestead when writing for it. Our M. T. White will represent The Homestead at the sale.

TOO LATE TO CLASSIFY.

ABERDEEN-ANGUS
COWS AND HEIFERS FOR SALE

When Writing to Advertisers Please Mention The Homestead

The Lockridge Short-horn Sale.

Forty-two years ago S. F. Lockridge embarked in the breeding of Short-horn cattle, and from that time to this has been constantly engaged in producing specimens of his favorite breed that would meet with the approval of a discriminating public. The work accomplished by Mr. Lockridge is well known. He has carried on his operations in a quiet way, never making any great display of his work, but he has accomplished results that have demonstrated his ability as a constructive breeder. In all these years Mr. Lockridge has made but four public sales, always disposing of his surplus cattle at private treaty, and the fact that he has decided to make an offering from his herd at Chicago, October 13th should attract wide attention. For this sale he has selected forty head from his herd, all but two of which were bred by himself. These cattle were recently inspected by a representative of The Homestead, and found to be a lot of cattle that can be recommended to the buying public in every way. Mr. Lockridge has never followed any fads in his breeding operations. Common sense and good judgment have been the basis of his work. He has always used the very best bulls that he could secure, mating them with high-class matrons, having the production of a definite type of cattle in view, and the animals that he will offer at Chicago October 13th will be a credit to him and his work in every way. In the list are seventeen cows, thirteen of them with calves at foot and at no sale this year has there been presented a better lot of matrons. They are all good young ages, with scale and conformation, and bred along the most popular Scotch lines. In fact, it is doubtful if there is today a herd that has more real Cruickshank blood in it than can be found in Mr. Lockridge's cattle. These cows are all producers in the strongest sense of the word, and would look well in any man's herd. Sixteen heifers, all bred but three, are catalogued, and they are a toppy lot in every particular. Seven bulls are listed, and the list includes both herd heading prospects and the best of steer-getting material. Mr. Lockridge raises his cattle under conditions that tend to future unefulness, and the reader of The Homestead that is in the market to buy Short-horns of the right type and most approved blood lines should not overlook this sale. The cattle come from one of the best herds in the country, and they are presented by a gentleman who is the soul of honor, who has been a faithful adherent of the Short-horn for nearly half a century, and who has demonstrated his faith by his works. There is no need to particularize regarding this lot of cattle. They are all good, and they will please you on sale day. The catalog should have wide distribution, and the sale a liberal patronage. Write today for the catalog to S. F. Lockridge, Greencastle, Ind., mentioning The Homestead when you write. The advertisement will be found on page 32.

At Beaver Dam, Wisconsin.

When at the Dodge County Fair (Wisconsin) be sure and call on H. B. Drake & Son, the veteran Short-horn and Poland China breeders. You will see some excellent Short-horn animals of A-1 breeding. Their herd sire is a big, fine roan weighing over 2,400 pounds, but in spite of his great size, his skin has most wonderful handling qualities, showing his fine quality. His name is Broadhooks Prince and he is a son of Anoka Sultan, a son of Whitehall Sultan. It is but a short drive to the farm of Mr. Schoenfeld, one of the oldest and largest breeders of Short-horn cattle and Poland Chinas in the state. Mr. Schoenfeld purchased his foundation stock from the famous Sherman Stock Farm at Burnett, which was the most noted stock farm in the state thirty years ago. Mr. Schoenfeld supplemented this fine stock in buying some of the winners at the Chicago World's Fair. From here it is but a few rods to the farm of Richard Maurer & Sons, breeders of Short-horn cattle and Duroc Jersey hogs. Here you will find a collection of exceptional Scotch top Short-horns. Their herd bull, Village Hero, is an excellent animal of great size, fine quality and typical Short-horn conformation. Their young bull, Mars Premier, is also a fine animal, and his breeding is of the best. His dam was of the Mars Emma strain and his sire was Clipper Stamp, which was a son of Premier, the $4,500 bull. John Keller is another breeder of Duroc Jerseys, and a visit to him will result profitably to a buyer. He is located directly opposite the fair grounds, so is very convenient to call on. H. E. Krueger, the well-known seedsman, is also located near Beaver Dam, and a visit to his farm is well worth while. He is raising large Yorkshire hogs, and has some fine individuals. It will pay you to take the time to visit these men, if interested in these breeds of live stock, when at the Dodge County Fair, Beaver Dam, Wis.

Jones' Poland Chinas and Short-horns.

Orville O. Jones, York, Neb., advertises Poland China hogs and Short-horn cattle on page 31 of this paper. Mr. Jones has given his herd of hogs the simultaneous treatment and is now prepared to ship them as immune from attacks of cholera. He has a number of unusually good boar pigs sired by Jumbo the Great and Long Chief Jr. He will sell these at low prices to quick buyers in order to reduce feed bills. All his sows and gilts will be reserved for a sale to be held February 21st next. He has also two good yearling Short-horn bulls, the get of Pleasant Lawn Knight. The sire is an unusually large animal and the youngsters offered for sale are good individuals as well as having also promise of size. Write to the address named for particulars.

Blake's Poland China Sale.

R. R. Blake, Dallas Center, Iowa, announces a public sale of Poland China hogs to take place at his farm three miles north of Waukee, Iowa, October 13th. Mr. Blake has an attractive offering for this sale and he has not taken any pains to put them into more than good, thrifty, breeding condition. They have been immunized by the simultaneous treatment and will be safe to buy. There will be forty-five head in all, thirty-five boars and ten sows. A dozen fall boars are of September, October and November farrow. Nine of these are by Long King, others being by Smooth Wonder 2d Jr. and Columbia Chief 3d. The spring boars, of which there are thirty-two, are by Long King, L.'s Big Bone, Smooth Wonder Again, H.'s Big Bone and Big Nelson. Eight fall sows are by the same sires. The dams of the offering are great big, well-formed animals that carry the most popular strains of big-type blood. They trace to Smooth Wonder, Chief Price, Chief Price Again, Wonder A., Chief Price 2d and others from the Mouw, Miller and herds of like importance in the production of big-type hogs. Mr. Blake has consented also to include his herd boar, Smooth Wonder Again. This fellow is three years old, a son of Smooth Wonder 2d by A Wonder, dam by a grandson of Nemo L.'s Duke. This is a cross of strains of blood which have always been productive of most satisfactory results. The only reason this hog is being put into the sale at this time is because the farm is well populated by his get and he can not be used further to any advantage. Those who attend the sale by rail are requested to come to Waukee, Iowa. Send mail bids to C. C. Carlin, of The Homestead. For catalogs address R. R. Blake, Dallas Center, Iowa.

Wm. Reed's Duroc Sale.

Wm. Reed, Rose Hill, Iowa, will make a select offering of Duroc Jerseys at his farm adjoining town on October 8th. Fifty head will be sold and among them are some boars of herd-heading character and the best bunch of sows and gilts Mr. Reed has ever offered. There are three good fall boars. One of them is an extra large, heavy-boned, smooth fellew sired by Reed's Top Col. and out of a dam by John's Ohio Chief. Reed's Top Col. is sired by Top Col., and out of an Ohio Chief sow. Thus it will be seen that this boar is a very intensely bred Ohio Chief and Col. boar. Among the spring pigs is an outstanding show pig by Chief Select and out of Fair Wonder 2d by J. C.'s Model Chief. This pig is a toppy fellow with a world of quality and has a good set of feet and legs. He is a full brother to the pig that sold for $190 in Mr. Reed's sale last year. The spring boars and gilts are about half sired by Chief Select and Reed's Top Col. Six fall sows by Reed's Top Col. are extraordinarily good. Some good breeder should buy these sows to place in his herd or if bred to a good boar they would be sale toppers this winter. The boars in Mr. Reed's sale are good, but we want to put strong emphasis on the gilt end of this offering, as we have never seen a better bunch of gilts pass through a fall sale than those Mr. Reed will offer. See page 29 and write for catalog mentioning The Homestead. Bids sent to Carlos C. Palmer, Homestead representative, care of Mr. Reed will receive careful attention.

Horswell's Dispersion Angus Sale.

For the last time we want to call Homestead readers' attention to the dispersion Aberdeen Angus sale of J. R. Horswell, at Estherville, Iowa, on October 1st. It is going to be an excellent place to buy some good Angus cattle, and the breeder who is in need of a good herd bull will find in Black Ensign an unusually well-bred bull, as well as an exceptional individual. This splendid son of that celebrated Black Woodlawn and out of the great cow, Ellore, that was one of the highest-priced cows in the Donohoe sale, is a herd bull of more than ordinary merit, and some breeder is going to get a great bargain in him. Were it not for the fact that Mr. Horswell is going out of the business you could not buy this bull at any price, and that is the only reason that breeders will have an opportunity to buy him in this sale. About fifteen young bulls will also be included, as well as all of their breeding cows and young heifers. A good sprinkling of lackbirds, Trojan Ericas, K. Prides and other good families make up the list. Mr. Horswell has been breeding Angus cattle for a number of years and has bought liberally of the best, and in consequence you will find he has some good things cataloged for this sale. If you have not got the catalog send for it at once, but be sure to go to the sale, as there will be some splendid bargains in this dispersion. Mention The Homestead when writing for catalog.

Nagle's Chester Whites.

E. L. Nagle & Son, Deep River, Iowa, write under recent date as follows: "Our Chester Whites are doing fine. We have twenty-two spring boars and thirty-five gilts that are a grand good bunch. There are many show prospects among them. We still have for sale the first-prize boar at Des Moines this year and he was at the head of the first-prize young herd, also herd bred by exhibitor, first in produce of sow, second in get of sire and it looks like he had winnings enough for anyone that wants a herd boar and he is as good as his winnings. We have won more premiums on pigs than any other exhibitor at the state fairs." See page 38 and write your wants, mentioning The Homestead.

Duncan and W. H. Cooper, auctioneers.

FRANK T. PEMBERTON - : - IOWA FALLS, IOWA

Jerseys and Poland Chinas at Rosendale.

Scribner & Son, the well-known and successful breeders of Jersey cattle, at Rosendale, Wis., have a beautiful herd. Their females are principally of St. Lambert and Pedro strains, and in conformation, udder and vein development and quality of hair and skin, show the breeding which they have, and the care they get. The herd bulls are excellent animals. The older one, Lomas King, of St. Lamberts King, is an animal of great size. His skin is as soft as velvet and his back is straight with open backbone and thin at the withers. His sire was King of St. Lamberts King, that has forty-three tested daughters, and his dam was Loma of Maple Glens, that has a record of fourteen pounds of fat. Another herd bull is Viscount of St. Lamberts, another pure St. Lamberts bull. He is also of extreme fine quality, yet of large size. He is a grandson of the famous bull, Rioter of St. Lamberts, that has fifteen tested daughters with records up to twenty-two pounds. A young bull recently purchased is Magnate's Sophie Lad, sired by the great show bull, Magnate's Golden Interest. He is also a grandson of Magnate's Interest, that holds a record of 833 pounds of fat. He traces back to Sophie Tormentor, of the famous Hood Farm breeding, and also to Brown Bessie's son, the grandsire of Sophie 19th, that made 1,110 pounds of fat in one year. The Scribners recently began testing and already have twelve Register of Merit animals, and will have several more under test the coming season. In their big-type Poland China herd is a female which is a daughter of Big Halvor, the 1,000-pound boar, owned by C. F. Adams, of Iowa. She is a long, short-legged, arched-backed sow, of great promise. The herd boar is a son of Grand Chief, a 900-pound boar. This boar is but six months old, yet he measures forty-four inches from base of ears to root of tail.

Marmion's Big-Type Poland Chinas.

Readers of this paper who are in search of good Poland China boars should read the advertisement of B. F. Marmion, Farmington, Iowa, which appears on page 31. The gentleman offers for sale some of the best big-type boars to be obtained. He can supply females also, and will fill orders for single animals, pairs or small herds not related. In this herd are the get of five of the best breeding boars of the breed. Mr. Marmion is offering an unusually good pig, one that has an excellent head and strong, well-arched back, is well filled behind the shoulders and has as good feet and legs as could be wished for. He weighs a little better than 250 pounds. Another pig sired by Big Knox and from a dam tracing to Chief Price 2d is a little younger, but nearly as good in every particular and right in quality and markings. These pigs have not been stuffed, but just kept growing so that if well cared for they will continue and make immense hogs that will do lots of good to their owners. A little brother of the first pig mentioned is an attractive fellow, although he may not have quite so much quality. He is more stretchy and looks like the kind that will sire big litters of good pigs. Those who are intent upon increasing the size of their hogs should get into correspondence with this herd. Address inquiries to B. F. Marmion, R. F. D. 2, Farmington, Iowa.

Woodlawn Farm Holstein Sale.

The big fall event in Holstein cattle circles will be the sale of 140 head at Woodlawn Farm, Sterling, Ill., October 21st and 22d. One hundred cows, thirty heifers and ten bulls are listed, all representatives of the greatest families known to the breed. Many of the cows have A. R. O. records and all are splendid milkers. There are ten record daughters of Sir Netherland Cornucopia in the list, all bred to Prince Hengerveld Segis, a bull whose seventeen nearest dams average over twenty-five pounds of butter and over 500 pounds of milk in seven days. There are also a number of extra choice heifers bred to King Cornucopia Hengerveld Segis, a bull whose seventeen nearest dams have a record of over twenty-six pounds of butter in seven days. The ten bulls cataloged are all by great sires out of high-record dams, and two state fair winners are in the list. This will give the reader some idea of the merit of the cattle cataloged for the sale. Woodlawn Farm is noted for its working Holsteins, its all-the-year-round milkers, and parties who attend this big sale can rest assured they will have an opportunity to place sale values upon a decidedly meritorious lot of cattle. A visit to Woodlawn Farm is time well spent whether you buy anything or not, as it is one of the big dairy propositions of the country. Over 1,000 acres of land are embraced in this farm and all operations are carried out on a big scale. More details regarding this sale will appear in later issues. In the meantime look up the advertisement on page 32 and write for a copy of the catalog to Woodlawn Farm, Sterling, Ill., mentioning The Homestead.

Miller & Northy's Short-horns and Percherons.

An important event in Short-horn circles will be the dispersion of the Short-horn herd of Miller & Northy, Morley, Iowa, October 9th. This herd has been pronounced one of the best in the state of Iowa by breeders who are in position to know. The herd of females is high class in every particular. A Homestead representative has looked over the offering and considers this herd of cattle the equal of any to be found in plain working condition. Fifty head are cataloged consisting of ten bulls and forty females. The nine-year-old herd bull, Diamond King, is as vigorous as a two year old and after inspecting his many daughters in the pastures we believe he is entitled to rank as one of the great sires of the breed. Diamond King is sired by Bapton Admiral and out of Imp. Diamond 32d. At his advanced age with a little fitting he would make a good show. Their other herd bull, Sterling Scottie, is a three-year-old son of Sterling Knight, he by Imp. Red Knight. The grandam of Sterling Scottie is Imp. Flower Girl by the great sire, Knuckle Duster. Sterling Scottie is a bull with good lines, lots of character and should prove a good sire. There will be eight young bulls of good quality. Among them is Prince by Lord Hampton and out of Nonpareil by Lavender Prince. This calf is a deep, thick, good lined fellow and should make good. The best young bull in the sale is sired by Diamond King and out of Gladys. He is a very promising youngster and with proper care will make a great bull. One of the best cows to be sold at auction anywhere during the coming season is Roan Lady, a four-year-old massive, roan cow by Diamond King and out of Gladys by Scottish Chief, tracing to the Imp. Scotch Louisa family. Roan Lady will weigh around 1,800 pounds and has had no feed other than blue-grass pasture. It is her kind that should produce herd bulls of the highest order. Red Rose 4th is a good seven-year-old red cow by Sittyton Royal and her grandam is Imp. Red Rose by A Master of the Ring. She has a good bull calf at foot. Flora Dora is a ten-year-old cow by Money Musk. She is of the Beauty family and was good enough to win first at the Iowa State Fair in 1904. She has proven an excellent breeder and has three good daughters in the sale. In the next issue of The Homestead we will have more to say in regard to the females of this offering. In the meantime anyone interested in really good Short-

The photo shown herewith, taken on the farm of C. P. Paulsen, Nora, Neb., is that of a group of some Hampshire swine, the equal of which is seldom seen. Sixty-five boars of this class will be sold at Fremont, Neb., on October 10th. Kindly notice the advertisement on page 32.

THE BEST LOT OF HEREFORD HEIFERS

Ever Sold From the GUDGELL & SIMPSON Herd Sell at the Farm Near

INDEPENDENCE, MO., SATURDAY, OCTOBER 11, 1913

AMERICAN ROYAL WEEK **50 2-YEAR-OLD BRED HEIFERS 50**

TWENTY-TWO daughters of Domino, 16 daughters of Beau Picture, 4 daughters of Beau President, 2 daughters of Britisher, 2 daughters Beau Dandy, 1 by Beau Modest, 1 by Bright Stanway. They have size, conformation, quality and are the modern type. All safe in calf to Bright Stanway, Beau Modest and Beau Dandy. For foundation stock or to add to good breeding herds they are the kind to buy. **10 Choice Yearling Bulls** contributed by John Lenox, Independence, Mo., are well bred and good. Send now for catalog, mentioning The Homestead. Cols. Reppert, Zaun and Snell, auctioneers. Address

GUDGELL & SIMPSON - - - - - INDEPENDENCE, MISSOURI

horn cattle should write these gentlemen, kindly mentioning The Homestead. We cannot too strongly recommend their herd of females to the buying public. See the advertisement on page 29.

A Helpful Library.

A series of handy and practical booklets, of much value to every farmer, is being distributed, absolutely free, by the Southern Cypress Manufacturers' Association, Room 102, Hibernia Bank Building, New Orleans, La. The latest volume is entitled "Short Cuts to Good Carpentry on the Farm" and shows how twelve difficult carpentering jobs may be done by the ordinary farmer, without outside aid and at a minimum of cost. The book is so complete in detail and so sound in its practical advice that we urge upon every reader the great advisability of sending for it at once, particularly as it will be furnished without a cent of expense. We have no hesitation in endorsing the entire series of booklets which the Southern Cypress Manufacturers' Association is issuing, free to all who desire them. One is known as "The Barn Book," another is "The Farm Needs Book," a third is "The Silo Book," and so on. The primary object of these valuable booklets is to show the many and valuable possibilities in the use of cypress, rather than the more costly and less durable woods, but regardless of any possible sales the association is doing a good work in placing such practical booklets in the possession of so many farmers, without any expense. A request for a booklet does not involve the writer in any manner, while at the same time it brings a return, the value of which is unquestioned. We would be glad to see these cypress booklets in the possession of every one of our readers. Further details of the offer may be found in the advertisement of the Southern Cypress Manufacturers' Association on page 18.

A Premier Chester White Sale.

An announcement which should attract the attention of Chester White breeders everywhere, as well as farmers who are in the market for choice animals of that breed, is that of M. W. Young on page 29 in which he presents what is practically a closing-out sale of his herd. It is and has been a good herd. It has one strong, commending feature above all others and that is strict uniformity of type. In this case it means also backs wide, well arched, well ribbed out and better from every point of view than can be found in any other herd of the breed in equal numbers. This extraordinary merit was obtained by care in the selection of the foundation stock as well as by close culling of animals of less desirable merit. The foundation came from the Reese, Hoover, Newburn and one or two other herds of exceptional standing as producers of the very best Chester Whites. There will be aged sows, spring sows, fall boars and spring boars. They will be the get of O. K. Perfection (a Reese-bred hog that on the side of both sire and dam came from champion prize winners); Prince B. (a Hoover-bred hog that traces to Hoover's most popular line of prize winners); Grand Leader (a hog bred by Newburn, recognized for many years as the greatest Chester White showman in the business); Combination (a hog whose string of champion ribbons is an exceedingly long one); New Hampton Regulator (a descendant of high-prize winners) and St. John (a junior champion at the Illinois, Wisconsin and Minnesota State Fairs and the grand champion at the latter in his under-a-year form). Most of the spring pigs in the sale are the get of the latter hog. Altogether the consignment contains merit such as goes to make up the best and most practical breeding form. The sale will be an opportunity for those who want to secure better animals than they have, as well as those who contemplate founding herds. Although Mr. Young does not say so, it is also a fact that men who know their business can find in this lot of hogs show prospects for another year that cannot fail to respond to proper treatment. We urge every reader of this paper to obtain a copy of Mr. Young's catalog and remember that the sale takes place at Ankeny, Iowa, which is located on the Des Moines branch of the Chicago & Northwestern railroad and on the Fort Dodge, Des Moines & Southern electric line, so that the facilities for getting in and out on sale day are exceptionally good. Those who are unable to attend may send mail or wire bids to C. C. Carlin, of The Homestead. For catalogs address M. W. Young, Ankeny, Iowa.

Kent's South Dakota Winnings.

At the South Dakota State Fair, Thos. F. Kent, Walnut, Iowa, well-known breeder of Chester Whites, won thirty ribbons among which was four championships, fourteen firsts, nine seconds, one third and two fourths. Among these was: First and second on aged boar, first on junior yearling boar, first on under-year boar; first and second on aged sow, first on senior yearling sow, first and second on junior yearling sow, third and fourth on under-year sow, first on undef-six-months gilt, championship boar on Combination I. X. L., championship sow on Kent's Kind, championship boar bred by exhibitor on Combination I. X. L., championship sow bred by exhibitor on Kent's Kind, first and second on aged herd, first and second on aged herd bred by exhibitor, first and second on young herd, first and second on young herd bred by exhibitor, first and second on get of sire, first and second on produce of sow. If you are wanting a Chester White boar or a few choice sows, all descendants from prize-winning stock write Thos. Kent. He can fill any kind of an order you may send him. Kindly mention this paper when writing him. See advertisement on page 38.

Kool's Poland China Sale.

On October 8th, as per announcement on page 28, A. Kool, Cordova, Iowa, will make his annual fall sale of Poland China hogs. It will be a good offering, one which possesses size, because of the size of the ancestors, and one which has quality, because quality has been a strong point in the herd and in the breeding that has gone before. Mr. Kool's principal herd boar is Big Victor's Improver, he a son of Lonergan's Big Victor, and an animal whose breeding leaves little to be desired. Big Victor's Improver is a big fellow, a hog with quality and finish, and his get have possessed those merits in a high degree. Quite a proportion of the stuff offered for sale will be by him and others will be the produce of his daughter. In all there will be four spring gilts, three fall gilts, thirteen fall boars and twenty spring boars. With one or two exceptions those not by Big Victor's Improver are by Jumbo, an unusually big fellow of popular big-type lines of breeding. There will be one spring boar by Smooth Wonder 2d and out of the 1,000-pound Long Model 3d, she by Long Wonder. Mr. Kool calls this fellow the best thing in the sale and considers him as having great promise of a high-class herd boar. There are four boars out of Queen 1st, a 900-pound sow and daughter of Dandy Jim, one of the best herd boars bred by Lentz, Ankeny, Iowa. These are by Big Victor's Improver and they are the right sort. There are two extra good ones by Lady Lightfoot 29th that have a combination of Jumbo and Big Victor's Improver blood. Four other good ones are out of Daisy 2d, she the daughter of Wonder Daisy, one of the best of the Peter Mouw bred sows. They are by the grandson of Big X. Two gilts and three boars are by Jumbo and out of Lady A., she by Big King, a daughter of Lady Lightfoot 5th and Big Victor's Improver. These are highly creditable pigs. Three other Jumbo pigs, two gilts and one boar, are out of Molly 4th, one of the best sows in the herd. Two extra good fall boars, big fellows, big boned and with lots of quality, are by Big Victor's Improver, and they are certainly a credit to their illustrious sire. Two fall boars and three fall sows by Jumbo are out of King's Lady 2d, she by Big King. Their grandam was by Hadley Expansion. There is a lot of other important information connected with this sale consignment which will appear in later issues of this paper. In the meantime, remember that the sale will be held at the farm three miles south of Otley on the C. R. I. & P. railroad and one mile north of Fifield on the Wabash road. Mail bids may be sent to C. C. Carlin, of this paper. For catalogs address A. Kool, Cordova, Iowa.

FRANK RAINIER'S

CHIEF PRICE AGAIN SALE

LOGAN, IOWA, OCT. 4, 1913

42 HEAD. 31 Boars, 11 Sows 42

I AM selling 16 head of spring and fall and summer boars that are sired by my sensational show and breeding boar, **Chief Price Again.** Also some choice gilts by same boar, and two sows that will sell with litters by **Chief Price Again.** Also some good boars by **Big Wonder, Monarch Chief, Long Orange** and **Long Chief.** Write for my great catalog at once and mention The Iowa Homestead. BLAKE'S POLAND CHINA SALE

ON THE FARM NEAR

DALLAS CENTER, IOWA, OCT. 13, 1913

I AM putting into this sale a consignment of forty-five head of Poland Chinas that are just about as good as any offering of the season will contain, although their merit is not concealed by high flesh or fancy fitting. I am putting in my herd boar, Smooth Wonder Again, because I cannot use him longer to any advantage. There will be twelve fall boars by Long King, Smooth Wonder 2d Jr., and Columbia Chief 3d Jr., out of dams of Smooth Wonder, Chief Price and A Wonder breeding. There will be twenty-two spring boars by Long King, L.'s Big Bone, Smooth Wonder Again, H.'s Big Bone and Big Nelson, out of dams of Smooth Wonder, Chief Price and other popular lines of breeding. Eight fall sows are by Long King, Smooth Wonder Jr., and Columbia Chief 3d. Their dams are of much the same breeding as that already referred to. One of these will have been bred to L.'s Big Bone for October litter and the other to Woodrow Wilson, a fifth-prize Iowa State Fair winner, for a November litter. Col. H. S. Duncan, auctioneer. Send mail bids to C. C. Carlin, care of The Homestead. Free transportation from Waukee to the farm. For catalogs address.

Chas. W. Crosier's Chester Whites.

With this issue of this paper Chas. W. Crosier, Juniata, Neb., starts an advertisement in which he offers choice spring boars and also female stock. Mr. Crosier is one of the pioneer breeders of Chester Whites in Nebraska, and his satisfied patrons are scattered over many states. Good hogs have been his aim at all times and he has bought the best breeding stock that he could find, and has always sold his stock at reasonable prices. He has been a constant advertiser in this paper for many years and is well and favorably known to a great host of its readers. The writer called on Mr. Crosier a short time ago and we wish to say that he has a good lot of stock for the season's trade, and readers need not hesitate sending orders for this stock. They will certainly be treated right, and they will also get some very fine stock from Mr. Crosier. Nearly all the spring crop is sired by Harvey's Choice, one of the real good boars of Nebraska. They are out of daughters of many noted sires, including the champion, Plainview Choice; the champion, O. K. Winner, and a few other boars nearly as well known. Kindly notice the advertisement on page 38 and write Mr. Crosier for prices immediately.

Rees Offers Scotch Bulls.

We desire to call attention to those of our readers who are wanting a young Scotch bull to the advertisement of Howell Rees & Son, Pilger, Neb., on page 36. They are offering some exceptionally good young Scotch bulls for sale, most of which are sired by their celebrated show and breeding bull, Ruberta's Goods. They have a number of bulls that will make splendid herd headers and now is the time to buy them. Write Rees & Son about these at once and kindly mention The Homestead.

An Attractive Offering of Richly Bred Scotch Short-horns

Will Be Presented at Union Stock Yards, Chicago, Ill., Monday, October 13, 1913

FOR THIS sale I have listed forty head of the top things in my herd, representatives of the Secret, Brawith Bud, Duchess of Gloster, Broadhooks and other Scotch tribes, and I present them confident that the public will appreciate them at their worth. I have been breeding Short-horns for over forty years, and the cattle that I will sell at Chicago October 13th represent the results of a lifetime spent in an endeavor to produce good Short-horns. It is a strictly breeding lot of cattle, all but two head having been bred by myself. There are seventeen cows in the offering, thirteen of them with calves at foot; sixteen heifers, all bred but three, and seven bulls, embracing both herd-heading propositions and high-class steer getting material. No better bred cattle will be offered at any sale, and I believe that the individual merit of the cattle is in keeping with the pedigrees. These cattle hav been inspecteed by Mr. Johnson, of The Homestead, and I would suggest that you read what he has to say about them in another column. Write for the catalog, which will be sent only upon request. Mention The Homestead and address

S. F. LOCKRIDGE - - - GREENCASTLE, INDIANA

Colonels Woods and Jones, auctioneers. Attention is called to the following Short-horn sales: Thos. Stanton, Wheaton, Ill., October 14th; C. J. McMaster, Altona, Ill., October 15th; R. W. Botts, Plymouth, Ill., October 16th.

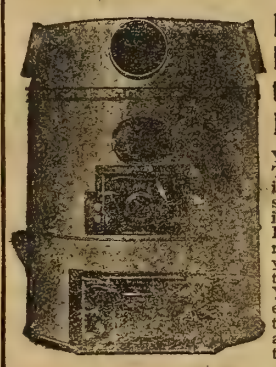
Kalamazoo Radiant Base Burner

HAVE the whole family study your Kalamazoo stove. Follow the plan of 250,000 other stove buyers all over the country who have been their own salesmen. They didn't ask anybody else to help them make up their minds. They sent for a KALAMAZOO catalog, picked out the stove they liked and tried it—found that it did everything they expected and more. They bought direct from the factory and pocketed the dealer's profits.

Sell Yourself a Kalamazoo Stove—

Take the Dealer's Commission

Why pay the dealer to sell you a stove? Why not be your own salesman? The dealer shows you eight or ten stoves and helps you pick out one. You have to pay him well for this service. The Kalamazoo catalog shows you 400 stoves. We'll pay *you* the dealer's commission if you'll make your own choice.



How Would You Like to Save $25 to $75 on That New Furnace?

You can. We'll prove it. The Kalamazoo Furnace is built as perfectly as the stoves. You can install it yourself if you wish. It's very simple. We furnish everything. We tell you how. So you save on the cost of the furnace. You save on installation expense. If you want the furnace catalog put a cross in the square on the coupon.

You Are Able to Choose for Yourself

It doesn't take a clever salesman to show you the good points of a stove. You can make your decision without him if you want to. The Kalamazoo Book will tell you more about stoves than any salesman knows.

Remember that the salesman must be paid. The dealer has rent, his interest on investment, his hundred and one expenses. You must help pay them. What does the dealer do for you? Nothing that Kalamazoo Stove Company doesn't do for you, except this: the dealer helps you make up your mind, and he generally knows how to make you pick the stove *he wants to sell.*

Kalamazoo Stove Co., Mfrs. Kalamazoo, Mich.

Please send me free, postage paid, your big catalog No. 165, with full particulars of the 30 days' trial, 360 days' approval test, easy payment plan.

Name.....

Street No. or Route.....

Town..... State.....

☐ Put a cross in this square and we'll send Furnace Catalog, too. ☐ Gas Stoves

Get the Factory Price

We Pay the Freight

What happens when you buy direct from the Kalamazoo factory? At one move you save for yourself all the commissions of the dealer, salesmen and jobbers. You pay no one to choose a stove for you. You are independent. You get the reward that independence always brings. You save anywhere from $5 up to $25, $35 or $40. These are not mere assertions. These are facts. The proof is in letters from our customers. Read these letters. You'll find them in the big book of stoves.

Dealers Don't Give Free Trials Backed By Bank Bond Guarantee

Your dealer doesn't give you a free trial. He says his word is good. Probably it is. So is the word of the Kalamazoo Stove Company. We've sold over 250,000 stoves. Our customers are satisfied. We believe this a wonderful record. And yet—we don't say "buy the stove because we claim it's O. K." We say "make the stove *prove* its worth to you—for 30 days—in your home." And we back that offer with a legally binding bank bond guarantee of $100,000.

Pay Us As Convenient

You say your dealer wants to trust you—give you time. So do we. Pay cash if you like or pay a little at a time. Our terms are what you would arrange. They are planned for your convenience. You will approve of them.

We Ship the Same Day

your order comes in. That means quick arrival of your stove or range. Our stock is large. Our manufacturing facilities are immense. No matter how fast the orders come, we're never out of the style you want. Kalamazoo stoves are made in 400 styles and sizes. The fact that we are always well stocked in all of them shows the magnitude of our business.

Look Over These 400 Styles of Stoves

that we show in the big Kalamazoo Stove Book. Even if you're determined to buy elsewhere it will do no harm to find out how stoves are made. You'll learn the good points and bad points of stove making. This text book of stoves is free. You are under no obligations in sending for it. We want everybody to know stoves. Because the more people know about stoves the more Kalamazoos are bought. If you don't buy a Kalamazoo now you will in the future.

Kalamazoo Queen Range

FREE

Here's a chance to save many dollars on a stove purchase. Send a postal if you wish. Or the coupon is convenient to use—and saves time. Mail it. Get the big Kalamazoo book. Study our plan. Read our offer. What does 360 days' approval test mean? We will tell you. What is the Kalamazoo $100,000 Bank Bond Guarantee? We'll explain that too. And you'll see the pictures showing every detail of the Kalamazoo Stoves. Write to us—mail a letter today. Ask for Catalog No. 165.

Kalamazoo Stove Co., Mfrs., Kalamazoo, Mich.

All Together For Good Roads

How Missouri Set an Example, Already Followed by Arkansas, With Other States Planning to Join the Campaign, for Good Permanent Highways

A QUARTER of a million volunteer workers, doing a million and a half dollars' worth of road work, in two days; such was the record of Missouri's Good Roads Day experiment, for which Gov. Elliott W. Major deserves the credit. Profiting by the good example set by the "Show Me" state, Arkansas has held a similar celebration, with equally productive results, while Kansas and other states are already planning to do likewise. Before the enthusiasm is over it is likely that a dozen or more states will have followed Missouri's example and set apart one or two days on which both men and women, of town and country alike, turn out to work upon the highways of the state.

When Governor Major issued his call for a Good Roads Day turnout of the people of the state, there were few optimistic enough to predict that in every county and practically in every township the response would be emphatic and unanimous. But such was the case. The celebration was of two days' duration and during this time nearly every man in the state either went out upon the highways and worked or else contributed financially to bettering the roads. The result was not only visible in the hundreds of miles of highways put in better repair, but in the quickening of interest in road making and road repair among all classes of people. Nor did the lesson stop there, for Missouri learned that roads cannot be made nor repaired by enthusiasm alone and that work to be effective must be permanent. As the St. Louis Globe Democrat aptly pointed out:

"It used to be that when roads got to their worst, and had to mend, there would be a rally of men in a township, a school district, or a road district, to mend them. In such small fields of effort permanent results could not be hoped for. Nor could such results in a much wider field be hoped for now, if opportunities of much larger and more effective co-operations were not to be seen growing out of new conditions.

"That is the chief significance of 'the Missouri idea.' It stands for the spirit of co-operation in a great and wealthy community, capable of carrying co-operative effort in roadmaking to points undreamed of by pioneers. Road dragging and patching cannot make permanent roads now more than such methods could a century ago. Should torrential rains come this autumn, as may be expected after a long drouth, it will be seen how little the co-operative labor of many thousand men, turning over, leveling and grading the soil of roadways and leaving them without firmer foundation or support, can do to meet emergencies. Dirt roads will be dirt roads still. And dirt mixed with much water makes for deep mud."

This idea of permanence was, in reality, the main lesson of the observance. Governor Major and Frank W. Buffum, the state highway commissioner, agree that the urgent need of the state and the hour is for more road-building machinery and more systematic and permanent work on the roads. Out of this will probably come to the next legislature a recommendation by Governor Major for the purchase by the state of ten to twenty of these equipments to be under the care of the highway commissioner and sent out by him from county to county where the farmers along the road will pay the expense of operating them and will follow behind them with shovels.

JUDGE D. E. KENNEDY ACTING AS "MULE SKINNER" ON PETTIS COUNTY, MO., ROADS.

Forty of these road-building equipments were operated in Missouri on the good roads days. Almost without exception they proved to be "eye openers" to the farmers and road overseers who were accustomed only to the old-fashioned wheel scrapers and plow methods. One of these machines was kept at work several days in Callaway county on the Ashland road.

With a crew of fifteen men this machine took a stretch of road almost impassable before and transformed it into as fine an earth road as could be built. It widened the road to forty feet from a narrow streak of holes and ruts through the underbrush. It ditched it on both sides and crowned the center. Commissioner Buffum, who has studied road building in this country and Europe, said the stretch when finished was as good earth road, after it had been dragged, as anybody could want. Under favorable circumstances this machine can build six and eight and sometimes ten miles of earth road a day, and build it so it won't have to be rebuilt next year. All it will need in the future is dragging. A hundred teams and 200 men would have to hustle to make as much road in the two days as this one machine did. Reports that have come in to Commissioner Buffum from the other outfits that made experimental roads in Missouri the two days were just as favorable as the outfit that worked on the Ashland road.

"We've been wasting too much energy, too much labor, too much money on our roads in the past," Governor Major says. "That is one thing the two days' road campaign has demonstrated to me. In the future we should strive for more system in our work."

The extent to which the general public responded in Missouri is shown by the report made for Jackson county (in which Kansas City is located). With two districts yet to hear from, the committee for the county reported that nearly eighty miles of earth road had been graded and an equal mileage freed from brush and weeds by volunteer workers. The report for this one county alone, which goes a long ways toward showing the extent of the work which was done

It widened the road to forty feet from a narrow streak of holes and ruts through the underbrush. It ditched it on both sides and crowned the center. Commissioner Buffum, who has studied road building in this country and Europe, said the stretch when finished was as good earth road, after it had been dragged, as anybody could want. Under favorable circumstances this machine can build six and eight and sometimes ten miles of earth road a day, and build it so it won't have to be rebuilt next year. All it will need in the future is dragging. A hundred teams and 200 men would have to hustle to make as much road in the two days as this one machine did. Reports that have come in to Commissioner Buffum from the other outfits that made experimental roads in Missouri the two days were just as favorable as the outfit that worked on the Ashland road.

"We've been wasting too much energy, too much labor, too much money on our roads in the past," Governor Major says. "That is one thing the two days' road campaign has demonstrated to me. In the future we should strive for more system in our work."

The extent to which the general public responded in Missouri is shown by the report made for Jackson county (in which Kansas City is located). With two districts yet to hear from, the committee for the county reported that nearly eighty miles of earth road had been graded and an equal mileage freed from brush and weeds by volunteer workers. The report for this one county alone, which goes a long ways toward showing the extent of the work which was done

THE HOMESTEAD

A PRACTICAL JOURNAL for the FARMER, STOCKMAN, FRUIT GROWER, POULTRYMAN, GARDENER, and HOUSEKEEPER

BY JAMES M. PIERCE

JAMES ATKINSON, Editor-in-Chief

ESTABLISHED IN 1855

Entered at Des Moines Postoffice as second-class matter

PUBLISHED EVERY THURSDAY

SUBSCRIPTION RATES—Single subscriptions, $1 a year; ten copies one year, $10, and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year. Subscription price, in Canada, $1.50 a year. Subscription price to other foreign countries, $2 a year. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to THE HOMESTEAD COMPANY, Des Moines, Iowa

ADVANTAGES OF HOGGING DOWN CORN.

The practice of hogging down corn is enthusiastically endorsed by the Iowa Experiment Station. The matter has been investigated with considerable care at that institution and a comprehensive bulletin has recently been published dealing with various phases of this problem. According to the conclusion reached by this station the plan of hogging down corn saves four handlings of the crop, namely: husking cribbing, reloading for feeding purposes and feeding the hogs on pasture or at the yards.

Two handlings of manure are saved. The manure is dropped in the fields where it is needed; no labor is necessary to haul it out of the lots and to scatter it.

Storage charges are saved upon the portion of the corn hogged, inasmuch as crib space is not needed. The rats and mice do not get any of the corn that is "hogged down."

Returns are equally as good in pork produced where the hogs gather their feed themselves as where it is handfed. It is proposed, of course, that some pasture or supplement be fed in conjunction with the corn in field as well as in dry-lot feeding. Hogs running in the cornfield and having alfalfa, rape or clover pasture in addition, with possibly a little supplement, depending upon the pasture used, are ideally handled to secure a maximum of pork at a minimum of expense. The hogs gain more economically and rapidly when in the cornfield properly supplemented than they do in dry lot.

The hogs develop good constitutions and are in excellent condition for quick fattening feed after coming out of the field. Range, with its accompanying exercise, provides a most excellent tonic; the hogs are healthier than in dry-lot feeding and are especially inclined to stretch and develop in the cornfield, building frame and muscle to a large degree, putting them in good shape for a few weeks close-pen fattening.

No manure is lost, practically speaking, as in dry-lot feeding; of course, this does not apply to pasture. Animal husbandry has not yet been able to devise a system of manurial fertility conservation which would excel the "hogging-down" way. With the almost entire lack of leaching loss we have only the fertility removed from the land which is carried away in the hog's body; which really comprises only a small portion of the corn crop's fertility.

The crop is harvested without waste, the hogs, if rightly managed, picking up practically every stray kernel of corn. By following up the fattening hogs with young shoats or even with brood sows, the field will be garnered more closely than it would be by the ordinary husker. In truth the hogs turned into the field after the husking is over pick up considerable corn which might otherwise go to waste.

The weeds may be cleaned up to some extent. One man especially says, "Quack grass has disappeared permanently since I started 'hogging-down.'" One would not ordinarily expect such a happy result as this, but nevertheless considerable of the weeds are destroyed.

Hogs may follow up cattle and otherwise save waste. They may clean up after silo-filling time, gathering the ears which have been dropped by the corn binder, they may follow the husking machine and garner the waste grains.

They facilitate and encourage the gathering of seed corn early from the standing corn in the field. One practical man puts it this way: "The reason many men do not gather their seed corn early is because they do not like to 'smash' down the rows with a wagon, and carrying a sack is a tedious, discouraging business. With us in half a day two men with team and wagon gather enough seed to plant a hundred acres. We then turn the hogs in and they efficiently do the rest with much profit resulting directly and indirectly."

UNEASINESS OVER MEAT SCARCITY.

A meat famine is in sight, according to the sentiment prevailing at the annual meeting of the American Meat Packers' Association that was held at Chicago last week. The shortage of live stock is constantly being intensified because of the increase of population, or, in other words, the demand exceeds the supply to such an extent that according to the American Meat Packers, prices are too high.

Matters have come to such a pass that the United States Department of Agriculture proposes to stimulate beef and pork production by establishing what is known as municipal abattoirs, or packing houses, throughout the country and to create co-operative live stock associations among the farmers of New England and the south Atlantic states as well as in the middle West. In addition a suggestion comes from Secretary Houston that boys' pig clubs similar to boys' corn clubs be organized. It is the belief of Secretary Houston that the farmer can be convinced that there are even greater profits in live stock than can be derived from the policy of growing grain and marketing direct and he proposes through the establishment of extension courses to demonstrate this to be true.

The belief that the establishment of municipal abattoirs would benefit stockmen is based on the fact that it will maintain a more favorable condition of market at all times. At the present time there is too wide a gap between what the farmer receives and the consumer's price, this going to, first, the stock buyer, the packer and the retailer. Heavy shipping expenses are involved which in the end must come out of the farmer and the consumer. At the present time the distance from the stockman to the ultimate consumer of meat is too great and it is pointed out that the establishment of municipal abattoirs will shorten the route and therefore benefit producer and consumer alike. According to Assistant Secretary Galloway, of the Department of Agriculture, it is simply a matter of being assured of a profit before a farmer will increase his live stock business. "Will stock raising pay?" asks Mr. Galloway. "As long as crops are more salable than cattle he will raise and sell crops. Once he is convinced that cattle are more salable than crops he will raise both crops and cattle, feed the former to the latter and sell the cattle." This is the whole problem in a nutshell. The present scarcity of both cattle and hogs is due, first, to the violent fluctuations in values resulting during certain periods in stockmen losing enormous sums of money; and, secondly, to a feeling of disgust which has grown up among stockmen on account of the wide margin that exists between the price obtained for the live animal and for the product when it is placed on the block.

If we ever have cheap meat in this country again it will be because farmers are compelled to sacrifice through market manipulation because never again can meat be produced as cheaply as in the past.

FEEDING VALUE OF MOLASSES.

On account of the rapid development of the sugar industry in the United States considerable interest is being shown in one of the by-products of sugar factories, namely, molasses, with special reference to its value as a stock food. This is indicated by the number of inquiries that are received from stockmen who are endeavoring to find by-products having the highest feeding value and at the same time reasonable in price.

In his book on "Profitable Stock Feeding," Prof. H. R. Smith calls special attention to an experiment in feeding molasses to 400 work horses. As much as fifteen pounds of molasses a day was fed to horses averaging 1,270 pounds. In addition to the molasses, these horses consumed four pounds of corn and three pounds of bran together with a limited supply of roughage. On this ration the horses were kept in the best of health and they maintained the highest degree of efficiency in their work. There was no undue tendency to fatten nor to the production of soft flesh, nor did molasses have any injurious effect on the wind.

Another instance is given in the American Veterinary Review, this being a report on the feeding of molasses to 100 horses at heavy work. In this case drafters were used weighing 1,700 pounds. They were fed twice a day, one quart of molasses diluted with three quarts of water while, in turn, this was mixed with six pounds of cut hay, one and one-half pounds of corn meal and two and one-half quarts of coarse bran. Five quarts of dry oats were fed at noon and whole hay was fed at night. While working on this ration the horses are reported to have kept in the best of health, whereas, while on dry feed wholly, there was considerable trouble with spasmodic cholera. The horses, while on this ration and at heavy work, actually gained in weight.

In commenting on the effect of this food, Mr. G. H. Berns points out that "molasses of a good quality is a most nutritious food for horses, is easily digested and assimilated, and will, in many cases, correct faulty digestive processes. Horses will do fully as much work and at the same time remain, as a rule, in much better condition than animals maintained on dry food, while the cost of feeding is reduced from 25 to 30 per cent."

The estimate placed on the value of molasses by Mr. Berns is that one quart is equivalent to three or four quarts of oats.

It is a well-known fact that the showmen use molasses to a considerable extent in feeding herds for the ring and this practice has been pursued by some of our best breeders—men who have been able to fit herds year after year, covering a long period and at the same time have kept the females as well as the males, in good breeding condition.

THE RENTED FARM

TO-DAY I wandered o'er the farm
Near which my early lot was cast,
And viewed the changes with alarm,
Changes that made the happy past
Seem far remote and fading fast.

The fields, where record wheat once grew
Are foul with briars and goldenrod,
Sumac, and ivy. There a few
Lean cattle bite the scanty sod—
Where corn once ripened, thistles nod.

Fences are falling, and the sad
Old barn which once was filled with sheaves,
Where I have played, a little lad,
Shows sagging roof with moss-grown eaves—
Its driveway choked with weeds and leaves.

The boys have grown, and left the place;
The father sleeps, now, on the hill;
And not one dear, familiar face
Of all I knew is left there still;
A tenant robs the soil at will.

The simple, quiet country life
Our fathers loved no longer seems
To please our young whose minds are rife
With thoughts of vast commercial schemes,
Where sudden wealth absorbs their dreams.

Thus do they leave the land to be
Half-tilled by those whose only care
Is present gain—resigned to see
Their birthright useless, brown and bare;
Results confront us everywhere.

Better to base one's hopes upon
The sure foundation of the soil,
Content to hold, when youth is gone,
An humble recompense for toil
Than scheme and fret for power and spoil.

—John E. Dolson, in New York Times.

FRAUDS IN SHIPPING PRODUCE.

An Iowa subscriber desires to call our readers' attention to frauds that are sometimes practiced on farmers who have produce to ship to the central market. Among other things this subscriber says:

Poultry dealers and farmers who make a practice of shipping their produce to the city markets are quite frequently "nicely trimmed" by unscrupulous commission merchants. This article is a little late to serve as a warning to egg shippers, but perhaps it may be in time to serve as a guide to those who are intending to market their poultry and other produce in the cities.

Of course, there are a great many honest dealers that are absolutely reliable. If you happen to be doing business with one that treats you square my advice to you is to "stick to him." Do not be led away from him by the fancy prices that unknown commission men hold before your eyes.

A few weeks ago a dealer in our town received a market letter from a firm in Chicago. They quoted a price on eggs which was two cents a dozen above anything that his regular buyers were paying him. The price quoted was for eggs f. o. b. here. In order to play safe the dealer here attached the bill of lading of the sixty-three cases of eggs to a sight draft drawn on the commission firm, for the value of the shipment. The firm, of course, could not get the railroad company to deliver the goods without the bill of lading and they couldn't get the bill of lading without paying the sight draft. The company wrote back at once saying that they did not do business that way and that the eggs would have to be turned over to them before they could use them. The dealer here, not knowing anything better to do, released the consignment to the firm with the instructions to send a draft for same at once. He waited about a week, but no draft came. He telegraphed several times, but could get no satisfactory answer. He finally became anxious and started for Chicago to see them. When he reached the city he found that the firm had tested his eggs and out of the sixty-three cases only twenty were up to standard, according to their test. The other forty-three cases were condemned as "rots" and "spots." They would probably settle for these at about one-half of the regular price. After a little straight talk the dealer here convinced the firm that he knew what he was talking about and he got full pay for all his eggs. His experience simply cost him his railroad fare to and from Chicago.

That man was lucky. I know of farmers that have shipped produce to the city markets that didn't fare as well as this. They received postal card market quotations that looked good to them and they shipped their stuff. Sometimes, after a considerable delay, they would get returns from it with a letter saying that the shipment had been poorly packed and had spoiled en route.

Another man sent a large shipment to a commission firm that quoted some very high prices. After a month of waiting and writing the man made a trip to Chicago to investigate. He found that the firm had never existed. Not only that, but the location and street number given was a vacant lot. This firm had trimmed a good many farmers and small dealers, but had gotten away before the postal authorities located the men that worked the graft.

It would be wise for anyone that has produce to ship to investigate their commission merchants thoroughly before consigning their goods to them. Precaution costs little and may mean dollars and cents to you.

We are glad to receive these specific instances where fraud has apparently been perpetrated. The cases given in this communication by this subscriber carry their own lesson and the only conclusion that can be reached is simply this, that a very thorough investigation should be made of the reputation and standing of an individual or of a firm before a shipment is made.

Stevens Point potato buyers report that the number of bushels marketed so far this year is about up to the average. While the yield in the north and central parts of the state is large, the scarcity reported from other states has resulted in the raising of prices. It is predicted that they will go above fifty cents a bushel.—[Wisconsin Farmer.

SENSIBLE TREATMENT OF AUTO TIRES.

Corn-belt farmers have millions of dollars invested in automobile tires. As the cost of tires ordinarily constitutes the principal item of auto upkeep, it goes without saying that any advice that will tend to prolong the life of either the inner tubes or the outer casing will in its total save an enormous sum annually.

A tire expert, Mr. F. A. Henderson, has recently submitted a few suggestions which we desire to place before those of our readers who own automobiles.

Mr. Henderson estimates that three-fourths of all tire trouble is due to insufficient inflation. When a tire is improperly inflated the walls are constantly bending back and forth as the car moves with the same result that is produced when a piece of metal is bent back and forth in the hands. The movement generates heat and the heated walls soon weaken and give way. The result is a premature blow-out. Those who fill their tires by guess without testing the pressure are the ones who have the most trouble. For the best results tires should be tested with a good gauge every day, according to this expert.

Little cuts, like little habits, soon get beyond control. They should be cleansed of sand and dirt with gasoline and then filled with cement or quick repair gum. This gum will set within a few hours and become an integral part of the tire and prevent future troubles. A very large cut should be vulcanized. If these cuts are not attended to one must expect sand blisters and mud boils which are caused by sand and dust entering the opening and working in between the tread and the fabric of the casing

Tires frequently wear out prematurely because an axle is out of true. When this is the case the tread surface is constantly grinding on the ground surface, the effect being just the same as if the tire were placed on a grindstone. It is most important that the brakes should be properly adjusted so that the strain of stopping comes on both hind wheels rather than on one. If one brake grips before the other, the tire on that wheel is put to an unnecessary strain. Of course it goes without saying that sudden stops are hard on tires, while skidding around corners can only end in disaster insofar as the life of a tire is concerned.

The life of a tire is shortened by overloading. Tires are designed to carry loads in proportion to their cross sections and diameter. Five per cent added to the weight of a car adds 15 per cent to the wear and tear on tires, and for this reason it is always in the interest of economy to use tires that are one or two sizes larger than the regular equipment that comes on a car.

Mr. Henderson recommends the removal of the casing occasionally so that the rims and casing can be examined. This gives an opportunity to detect weaknesses in the fabric which may be reinforced with a patch and thus a blow-out will be prevented. Rusty rims should be cleaned because rust is defective to fabric. Tires should not be stored or left off any length of time in the direct rays of the sun or kept in very warm quarters. Under such conditions rubber quickly loses its elasticity, becomes hard and soon develops innumerable fine cracks. To secure the longest life and the greatest amount of service from a tire it should be stored in dry, cool and dark quarters when not in use. Under no circumstances should a tire be allowed to stand in oil, as this will soften the rubber, making it pasty and glue-like in consistency and thereby remove its natural resistance and elasticity. Gasoline is the best agent for the removal of oil from tires.

Quality must be the key note of British agriculture, as the area is far too small to enable farmers to grow the quantities of produce that the newer countries of the world can yield; and in no connection is quality of greater importance than that of the cereal crops. Wheat, oats and barley still occupy a considerable portion of the land, and the condition in which they are put on the market substantially affects the prices they realize. —[London Telegraph.

James M. Pierce

THE PUBLISHER'S VIEWS —ON— TOPICS of THE TIME

WITH WINTER COMING ON.

I AM like a burned child, in that I dread a fire. Perhaps I have better reason for this dread than most, if not all, of my readers, because three different times I have seen my publishing plant burn down. It was on the 3d of last February that I had the last experience. Shortly after midnight on a raw, cold night, with the temperature down almost to zero, I was summoned from my home, by the telephone, and, with the members of my family clustered about me, watched the flames wreak their destruction on the building which I had erected twenty years before, as a home for my papers. Medical experts tell me that the human vitality is at its lowest ebb just before daybreak. I can truthfully testify that things looked exceedingly discouraging as I stood there, that bleak, barren morning, and watched the work and plans of years go up in smoke.

However, I did not set out to write with the intention of making this a tale of woe. The damage wrought by the flames that February morning has all been repaired and my publishing plant is in better condition and better equipped today than it was before that last disastrous and costly fire. The thing I had in mind, when I started to write, was rather to use my own experience as the text for a little sermonette on the great importance of being prepared for fires. The cold snap of the past few days, here where I live, has made us all realize that it is not long before winter will be upon us. Most of my neighbors have their fires going these days, the thoughtful ones are looking to their flues and chimneys and there is a general stir and bustle of get-ready-for-winter preparation.

I cannot impress too strongly upon every farmer the necessity of being ready, if a destructive fire ever does threaten. The first important thing to do is to look after the insurance. Nobody can afford to be without ample fire protection. While the rates vary according to location, condition of the property insured, proximity of other buildings and various other matters, it is safe to say there is hardly a farmer in the grain belt who cannot get good, sound insurance protection for $5 a year for every thousand dollars' valuation. It is poor economy to do without such protection, particularly when it costs so little, comparatively.

But the insurance policy is not all. There should be emergency appliances, or, at least, a general understanding of what should be done, in every farm building. I am glad to see that the Department of Agriculture has taken up this matter. Just last evening I read a fire warning issued by the department, together with this very sensible suggestion:

> Every household should be equipped with a fire bucket, provided with a cover, filled with water and used for no other purpose. The best type of bucket is one with rounded bottom, which prevents its sitting on the floor and so makes it useless for ordinary household work. One such bucket, at least, should be provided on every floor of the house or barn.

This is sensible, practical advice, and I hope every one of my readers will give the subject thought. I might add something I know from my own experience, and that is that if you will add to each bucket of water a little more than two pounds of fused calcium chloride it will keep the water from freezing at temperatures above zero. A bucket or two, ready filled with water, waiting a fire emergency, may save a disastrous blaze that might take the whole house and even the adjoining outbuildings. Barn fires were particularly numerous on grain-belt farms last winter. I hope they will be scarce this winter.

So, if you will take the advice of a man who has had three bad fire experiences, just remember these three things:

Keep your property well insured in a good, reliable company.

Have emergency appliances handy in every building.

Instill caution in the mind of every member of the family and every one of the hands.

After all, there's a lot of truth in the old adage that it's better to be careful than to be sorry.

THE VALUE OF A FRIEND.

I DID not have the pleasure of knowing the late Mayor Gaynor, of New York, personally, although my business called me to New York a number of times while he was in office there. I should like to have known him, however, for I am an admirer of the kind of philosophy which he possessed in such abundant measure.

We do not need to consider political differences in dealing with a man like Mayor Gaynor. All we need to consider, from this distance, are the qualities of heart and mind which he displayed in his public life. It is not given to many men, when they lay down their life work, to receive such tributes as were paid to Mayor Gaynor by Theodore Roosevelt and Wm. H. Taft, and, at the same time, to have the sincere, heartfelt sympathy of the countless thousands, unknown to fame and the public print, who mourned for a real friend gone.

After all, there is nothing of greater value in this life than a real, true friend. Mayor Gaynor started life on a farm; he quit it on board a magnificent steamship, in mid-ocean. But in all the journey from the cradle to the grave, he never did anything which marks him as more deserving of notice than those innumerable little acts and words of his which made the poor man his friend. Do you know what happened when his body was placed in the City Hall, in New York, to be viewed by the public? The first man in that long line, which required hours to pass the bier, was a German baker, who had taken his place at the doors in the chilling rain, and had stood for hours, after a hard night's work, just for the privilege of looking on his dead friend's face again for a moment. Right behind him were several Chinamen, later came Japanese, Russian Jews, all sorts and conditions of men, women and children, drawn together by the common magnet: love. To my mind, no man ever had a greater funeral cortege than those thousands of poor people (many of them, literally, starving wretches) who dropped a tear of real, downright sympathy for the man who had been their friend. Before such genuine mourning what is all the eloquence of the greatest public orator, all the melody of the greatest choirs?

Do you want to know why these people mourned? Because Mayor Gaynor was just a homely, simple, common man who was not puffed up by his high position. Just consider a few sentences taken at random from his daily business letters. Here are three I have picked out from among a number:

> Every morning I just forgive everybody and then take up the work where I left off the day before.
>
> I know of no place where there is more philosophy than in a barnyard. You can learn much from animals. Within their circle they know much more than we do.
>
> He who cares to do no more than he is paid for will never be paid for more than he does.

There spoke the man who began life on the farm and who never, throughout all his long life, forgot the philosophy which came to him as he followed the furrow, performed the innumerable chores of the farm home and mapped his life course by the stars at which he gazed from the little attic window of his father's farm house.

No matter what life has already brought us, or what it may yet have in store for us, neither you nor I can ever hope for any greater reward or recompense than such real, downright, unselfish, earnest, all-pervading friendship as was given, in such abundant measure, by so many of the common people, to the man who had gone out from the farm to a high place among the mighty of the land.

A GOOD OLD WORLD.

IT'S A PRETTY good old world, after all. Let's take just a minute and consider a few of the things for which to be thankful.

In the first place, the long-continued drouth, prevalent throughout much of the grain belt, has been broken.

In the second place, prices for farm products are better than they have been for several years, so that even short crops are worth as much money as big crops in past years.

In the third place, the country is at peace with the world, the prospects of war with Mexico being now quite remote.

In the next place, business conditions are again becoming normal, the country being well prepared for the proposed tariff changes.

And now, on top of all these things and a host of others that might be mentioned, comes the reassuring news from no less an authority than the president of the American Medical Association that the next ten years will see the almost total extinction of our most serious diseases. Think of what that means, you who have suffered or lost loved ones with tuberculosis, diphtheria, scarlet fever or any of the other dread diseases.

The basis of this wonderful prediction rests on the remarkable success of the serum treatment. Diphtheria, spinal meningitis and other equally malignant diseases are now successfully treated with anti-toxins, the death rate being reduced to a minimum hardly dreamed of a few years ago. Similar serum treatment is now predicted for tuberculosis, pneumonia and a host of other diseases.

Nor is the prediction an idle one, or one unlikely to be fulfilled. We of the older generation have witnessed the general adoption and the perfection of anesthetics, putting an end to the brutally painful horrors of surgery. The younger generation has been permitted to witness the initial working out by Pasteur of his successful treatment for hydrophobia, the blood discoveries and treatments of Von Ehrlich, the tuberculosis researches of Koch, the invention of the marvelous X-ray machine, and so on and on throughout a long and noted list which makes the present day the greatest of all in medical research. We have all this progress within recent years upon which to base our hopes that the prediction of serum treatment for pneumonia, tuberculosis and other dread diseases will be fulfilled.

It makes a bright prospect, doesn't it? It simply proves, moreover, that when we come to sit down and cast up accounts, it is not long before we are convinced that the good things overbalance the bad, that it's a bright and good old world, after all.

Detroiter—$900

The rougher the road and the harder the going, the better the Detroiter likes it. This is the car you want—for it makes no distinction between country roads and city boulevards. And wherever it goes, others admire its beauty as much as you, the driver, admire its easy strength.

Certainly you will not pay less if beauty and pride of ownership count with you—and why pay more? We pit this Detroiter against all for good design, for low upkeep, for hard work, for year-after-year satisfaction.

Its nine big features make it a really marvelous value—no other car has them within hundreds of dollars of the price.

Get our catalogue of 5 models. Drop a line for it today. It will post you fully.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

Judging by the interest that is being manifested in farm tractors I am of the opinion that it will only be a matter of a few years until most of the plowing and pulverizing will be done with gasoline or kerosene power. Those tractors that can handle three or four plow bottoms appeal to me strongly as labor savers and when they are idle the expense stops.

Having to hunt up heavier underclothes is an indicator of the weather that is to come. Winter and tax-paying time never fail to put in an appearance.

Every farmer can afford a good feed rack in his cattle yard. With feed worth as much as it is this year, one cannot afford to waste it by feeding in a poor feed rack.

I can remember when rough feed of all kinds was considered too cheap to be cared for in a way that insured more than two-thirds of it keeping through a rainy season. Hay was stacked by piling it and fodder was cut only in small amounts, the remaining stalks being pastured after the corn was husked. This year's prices are a great contrast.

There is always some way of getting work done without keeping the children out of school to help do it.

A subscriber writes to the Furrows Department that he saves all baling wire, as he feeds baled hay and uses it when next corn cutting time comes to tie corn shocks. Looks like a trick worth remembering, for shocks tied with binder twine often fall apart because the twine breaks or rots and then breaks.

I look for a good crop of pigs next spring; that is, a good average of pigs to the litter. The average corn belt farmer feeds too much corn to his brood sows, and corn being high in price, it will not be fed so liberally this winter. The result will be more pigs to the litter.

A good feed grinder will come near to paying for itself this year. There is no question in my mind but what grinding adds to the value one can get from grain, but when the price of grain is low the value gained may not be worth enough to equal the cost of high priced labor necessary to attend to the grinding, but this year any little extra obtained from grain will be worth considerable money.

Perhaps it is harping on the same old string, but how about that seed corn of yours? Have you found it yet and is it in a safe place for the winter? There is no use in making a great stir about seed corn in the spring—the time for action is here now.

I have a letter from a Kansas friend, in which he asks how one situated as he is, is going to have fruit and vegetables without buying in cans. This is in answer to the question to the assertion that as long as we live out of cans we may expect a high cost of living. Where all fruit and such vegetables as tomatoes, peas and beans were a failure, there certainly is no other way of getting it except to buy in cans, or to buy fruit, peas and beans dry.

We are now entering the season when we may expect to get all kinds of advice about gathering seed corn, from those who never handled an ear of corn in their life. I think advice emanating from that source does more harm than good and in the language of the school boy I would just like to tell these fellows to "shut up."

The man who would build a hay shed for his cattle this year would build almost as expensively as if he used lumber, if the hay he used was of any account. My first cattle shed was of hay and poles. It was in use for several years but required rebuilding every few weeks during the winter season, for cattle would eat hay off their shed. They would not have eaten it had it been put in their racks. Notwithstanding some of its disadvantages, the hay shed was warm shelter when kept well banked.

To those who are using an automobile for the first season I would call special attention to the importance of putting an anti-freezing mixture into the radiator before there is any danger of injury from frost. If the radiator holds three gallons of water, one gallon of denatured alcohol will answer every purpose until real severe winter weather makes its appearance. A break in the radiator or water jacket is very expensive to repair and here is an instance where a stitch in time saves at least nine.

I have always been very friendly to the plan of fall plowing, partly because the work can be done at a time when the farmer is not rushed and partly because the soil works down better in the spring. My favorable attitude toward this plan, however, is being somewhat altered because of the fact that I have repeatedly seen crops on spring-plowed ground come through the drouth in better shape than on fall plowed. I have in mind an eighty-acre field where eighteen acres were plowed last fall and the balance spring plowed. I believe there will be twice as much corn on a spring-plowed acre as on the fall plowed. I would like to ask the scientists why this should be the case.

For cheapness of locomotion the modern motorcycle must be given first place. My attention has been called to the fact that one of these machines has run 200 miles on a gallon of gasoline. This was a single cylinder machine of low power and possibly was more economical than the more powerful machine.

THE NATIONAL DAIRY SHOW.

According to the program that has been prepared for the National Dairy Show which is to be held this year in Chicago from October 23d to November 1st, special features are billed for each day of the fair period. The events of importance and the dates are as follows:

Friday, October 24th, Grange Day.
Saturday, October 25th, Women's Club Day and County High School Day.
Sunday, October 26th, Mothers' Day.
Monday, October 27th, Ayrshire Day, and Creamery Butter Manufacturers' Day.
Tuesday, October 28th, Jersey Day and Railroad Men's Day.
Wednesday, October 29th, Guernsey Day and Milk Dealers' Day.
Thursday, October 30th, Holstein Day and Milk Producers' Day.
Friday, October 31st, Ice Cream Manufacturers' Day.
Saturday, November 1st, School Children's Day.

Each night will have features of value to the interests represented on that day.

The meetings and conventions that will be held during the period covered by the show include the National Ice Cream Manufacturers' Association, the International Milk Dealers' Association, the National Dairy Union, the International Association of Dairy and Milk Inspectors, the American Association of Creamery Butter Manufacturers, the National Creamery Managers and the Dairy Department Men of the State Agricultural Colleges.

In addition association meetings will be held by the American Jersey Cattle Club, the Holstein-Friesian Association of America, the American Guernsey Cattle Association of America.

It is estimated at this time there will be 1,200 dairy cattle entered. Something like 40,000 square feet will be devoted to dairy machinery and farm and barn equipment including silos and ice cream machinery. A full-sized creamery will be operated each day and in addition a modern pasteurizing, bottling and distributing plant will be run. A full-size ice-cream factory will be in operation and dairy addresses will be given by experts in every branch of dairying. The dairy division of the United States Department of Agriculture has promised to give daily demonstrations of the value of cows in experiments showing cost of feed and results that are derived from sensible feeding and judicious care.

CURRENT EVENTS

THE republican party is seeing a great light. At the republican New York state convention, held last week, a resolution was adopted declaring in favor of changing the party rules so that each state may determine its own method of choosing delegates to the national convention and so that states which give the big republican pluralities shall have proportionately large power in selecting candidates for president. For this purpose the New York republicans call for a special national convention at an early date. Not the least remarkable thing about it all is that the fight for these reforms was led, at the New York convention, by no less a person than Senator Elihu Root, who was chairman of the national convention at Chicago last year, which rode, rough shod, over the progressive element of the party and absolutely refused to hear, or be guided by, the principles which Senator Root now champions. The steam-roller tactics of the standpatters, aided and abetted by Senator Root, brought about the secession of the Roosevelt progressives and the ultimate organization of the progressive party, under the leadership of Roosevelt. It begins to appear as though the Empire state were going to join hands with Iowa and other progressive states of the West in an effort to rehabilitate the republican party and bring about political reforms which will make the party more nearly represent the will of the rank and file of the people who compose it.

TALK is rife in the East of Theodore Roosevelt as the fusion republican-progressive candidate for the presidency in 1916. The movement to weld the two parties, with Roosevelt at the head, is being sponsored by Wm. Loeb, formerly secretary to Roosevelt, later collector of the port of New York and a supporter of Taft in the 1912 national campaign. While this talk is going on, Senator Cummins, of Iowa, is leading the fight for a special republican national convention to revise the rules so as to prevent a repetition of the steam-roller tactics at the Chicago convention, which nominated Taft over Roosevelt, and to make the representation more according to the actual vote cast for president in the various states. The republicans are beginning to see that it is none too early to start plans for the next campaign, particularly in view of the demoralized condition in which the party is at present, owing to the disastrous defeat of Taft. It is confidently expected that either President Wilson or Secretary Bryan will be the democratic nominee and with this understood the republicans believe they should be hitting upon their standard bearer with as little delay as possible.

POLITICAL interest centers now in the mayoralty campaign in New York City. The death of Mayor Gaynor makes the contest a double one, rather than a triple, leaving two tickets: the fusion one, headed by John Purroy Mitchel, and the straight Tammany democratic ticket, headed by Edward E. McCall. Inasmuch as the city will have subway contracts of about $70,000,000 to let during the next four years, Tammany hall is making a particularly hard fight to land the mayoralty and the board of public works, in order to have the disposition and control of this immense sum of money. With Gaynor in the race the democratic vote bade fair to be split, so that the fusion candidate stood a good chance of winning. But now that Mayor Gaynor is dead and his followers have decided not to put a new ticket in the field, the democratic hosts are in a fair way to swing to Tammany solid, so that at present the chances of McCall winning are better than those of Mitchel. The office of mayor of Greater New York is one of the most important political plums in the United States. The death of Mayor Gaynor brought many remarkable tributes of his worth as a man and an official. Ex-president Taft was one of the honorary pall bearers at his funeral. His body lay in state in the City Hall in New York throughout an entire day, thousands of people, of all classes, passing in review and paying their last tribute of respect to a man who had served his state and city to the best of his ability.

THE passage of the Glass currency bill in the house, by a decisive vote, sends that measure to the senate for consideration. Notwithstanding the president's insistence that as little time as possible be lost in enacting currency legislation in keeping with the changed tariff conditions, it is not considered likely that the senate will complete its currency program much before Thanksgiving. Several weeks, at best, will be consumed in the consideration of the present bill. There was some talk of the house adjourning while the senate was at work, inasmuch as the house has practically concluded its business, but President Wilson considers it best for the house democrats to remain in Washington, to give their brothers in the senate the moral backing of their presence and influence. The tariff bill was an immense personal victory for President Wilson and if he can carry out his plans of forcing currency reform at the present special session of congress, he will have legislative matters well in hand and but two-thirds of a year elapsed since he took office. The prospects are good of congress remaining in session practically to the convening of the regular session, the first of December. In the meantime, the tariff differences between the two houses have been practically disposed of, in conference, and the bill will be ready for the president's signature by the last of this week.

POINTERS ON ROAD BUILDING.

Build roads at least forty feet wide; culverts should be thirty feet from tip to tip. Curves and turns in roads should be well rounded. Shrubbery and trees at turns must be cleared seventy-five feet back from the roads. Knobs, bulbs, trees, weeds and shrubbery must be done away with at railway grade crossings.

Those are some of the ideas being pounded into the heads of listeners to the motor road boosters along the route of the trade working trip. Build well, build strongly, build permanently, is the tenor of all the speeches; there is plenty of interest and the indications are that much improvement will be made in many of the roads, because of this road-boosting trip.

"Don't procrastinate; hurry in the work," urges Frank W. Buffum, the road expert, says a dispatch from Brooksfield, Mo. "You townspeople and the farmers are the ones who will benefit most by the better roads. The farmer gains 95 per cent and the motor car owner about 5 per cent as the result of good roads. Better roads mean an increase in value of the farms. Rainy days may be utilized. Now they are mostly idle days for the farmer. With good roads he may go to town on bad days and carry his products.

"With a rock road from the towns along this route to Kansas City, a motor car service for produce carrying would result. That would mean the cutting out of many of the middlemen between the producer and the final consumer. The farmers with rock roads will be the most independent men on earth."

George A. Bond, of the Bond Motor Car Company, said in a speech: "Take a farm worth $25 an acre and put a rock road in front of it and its value jumps to $100.

"Of course, if the farmers get better roads they will demand motor cars. With better road facilities, however, they can better afford motor cars, because they will be more prosperous."

Should Hail, Frost, Drouth or Bugs Destroy One-Fourth of Your Crop You Would Consider It a Direct Loss.

If you are not using a

MONITOR DOUBLE DISC DRILL

you are raising one-fourth less grain each year, than you would had you used it. The Monitor is the only Drill that drops all of the seed in front of the bearing at the bottom of a clean, wide furrow in two rows, at an even depth and covers it with a uniform amount of moist earth.

Every seed grows—absolutely no waste.

It requires one-fifth less seed than other drills and increases the yield from three to seven bushels per acre.

The **MONITOR DRILL** is one-third lighter draft than any other of equal size and will work very satisfactorily where any other drill will work and under many conditions where no other drill can work.

In sections where it is desired to leave the seed bed ridged between the rows of grain to prevent the soil from drifting and to pack the loose soil around the seed, we furnish weight coverers at a small additional cost.

The ridges serve as trenches to hold the snow and rain and are especially useful where the rainfall is light.

We manufacture Drills of every style to meet any conditions in the United States.

Remember our Double Disc, Single Disc Shoe and Hoe Furrow Openers all interchange on the same frame.

See your Flying Dutchman Dealer about **MONITOR DRILLS.**

Our large Monitor Drill Booklet will interest you. It's Free. Write today.

REMINGTON UMC

ARROW SHOT SHELLS

SPEED—SPEED—and again, SPEED

YOUR object in shooting is to get your bird with the center of your load. Of course! Then shoot these Steel Lined *Speed Shells.*

They are the fastest shells in the market. Their speed is demonstrated beyond question by the one sure test in all ballistic matters—the Electric Chronograph.

Then, too, there is the experience of thousands of seasoned gunners who have been shooting the Remington-UMC Steel Lined Shells ever since they came out.

The steel lining is the thing. It grips the powder—holds it in *compression*—puts all the drive of the explosion behind the shot.

Your load travels quicker—you shorten up your lead. You cut down the guess work on lead and angles—*you get more birds.*

Your dealer carries these speed shells. Get them. Use them. Find the Red Ball mark on *every* box of shells and metallics you buy.

Organization in Farm Affairs

HOW to organize the farm for profit and keep in smooth operation the various branches of a diversified agriculture, using labor, soil and power to the best advantage and steadily increasing the value and fertility of the premises is a problem as intricate as it is immense. There must be organizing efficiency in order to accumulate a surplus of tangible assets through a term of years, and it is certainly true that the man who, by study and thought and business ability, has been able to develop and improve a large farm is better able to secure from the land the maximum yield than an untrained man of less experience. A man needs to have business ability as well as agricultural training to enable him to make a farm show satisfactory profits through a term of years. Many a trained agricultural expert has been humiliated by the sense of incapacity felt while trying to manage his own farm, and, as he gradually discovered the magnitude of his job and the smallness of himself in relation to it, sold out rather than frankly admit that he could not make it pay. Business ability is as much a part of the farmer's equipment as are the farm and the products that he produces. Unfortunately business ability is not always, perhaps not ordinarily, linked with distinguished ability as a farmer. Some of the greatest money-makers connected with agriculture have not gained distinction as farmers. Some of the best farmers in the country have never made a success in a financial way. Men are comparatively scarce who have achieved the difficult two-fold success as business farmers.

It is difficult to measure the profits in farming. There are so many factors, like the fertility of the soil and the value of various improvements in stock and equipment that cannot be inventoried. Many a farm appears to be paying when, in reality, some one branch of its annual operation may be a source of expense that greatly reduces the profits. Some seasons a farm may pay good profits, while actually it fails to show a surplus through a series of years. The real test of wisdom of farm organization and its profits is found in the gain in value of the property at the end of a decade or more, when much of the income has been invested in the business.

The cost of keeping farm records is small in comparison with the bookkeeping expense of the factory; however, it is profitable to keep a very accurate record of the cost of production. It is a vital thing for us to know how much of the products we are producing annually at a profit and which branches are paying the best returns. If there is any one question in all the realm of finance upon which a man may be, and is most likely to be, honestly mistaken, it is that of profit on the farm. If we find that the cost of producing a product is nearly as great as the selling price, then we should determine wherein we, as individuals, can lower the cost of production by a better organization of our business. If we find that the trouble is beyond our control as individuals, then we should plan to combine and attack the problem co-operatively. The time has come when we must organize not only for social improvement, not only to discuss better methods of farming, but vitally, we must organize so that we shall have more to say about what we shall get for our products and what we shall have to pay for what we buy.

If the farm is to be improved and made attractive while at the same time yielding reasonably good profits to the owner, there must be a proper balance between land and equipment. Money must be put in the business before it can be organized and placed on a money-making basis. The hunger for a broad expanse of acres has induced many men to tie up so much of their capital in land that they have not working capital enough to handle their farms properly. The idea that land is the all-important foundation of successful farming has been unduly magnified in this country. Careful investigations of various systems of successful farm management show that when the land is extensively farmed it requires about as much capital in buildings, tools and live stock as in land.

No fixed rule can be laid down as to what shall be the balance between land and equipment. Much will depend upon the location, the character of the farm, the markets and other factors surrounding the business. Suitable and comfortable buildings so arranged and located as to facilitate the handling of the crops and live stock are needed on every well-organized farm, but all unnecessary expense becomes a constant charge upon the business. It is a mistake for a farmer to invest too much of his capital in farm buildings.

Farm machinery and equipment bear a close relation to the labor problem. By the use of improved machinery much of the work of the farm may be greatly lessened. Where the conditions are favorable it means a reduced cost of production, although that does not always follow. If the use of a machine proves but a convenience and not a positive reduction of expense, it must be classed as a luxury. The invention of improved machinery has been a God-send to the hard-worked farmer, but it cannot be denied that its injudicious purchase and the needless exposure, as well as the failure to figure up the cost, has been a tremendous drain upon the resources of the farmer. Clearing the fields by removing stones, stumps, useless fences and trees and draining the low, wet places that delay plowing and planting in the spring should precede the introduction of costly machinery, that the risk of breakage and the delay of planting and cultivating be reduced to a minimum. Breaks are expensive, for to the cost of the repairs must be added the loss of valuable time. A little forethought and the employment of a few days' time will often enable a man to enlarge his fields, remove obstructions and gradually get his farm in shape for better cultivation by improved implements. Connected with this problem of improved machinery comes one of the most perplexing of all farm problems. Intelligent farm labor is becoming exceedingly hard to secure. It takes some brains to use the varied equipment on the diversified farm, but it pays to hire competent men. A man's worth at farm work depends now more upon his wits, his skill and his speed than upon his brute strength. It requires some head work to handle farm teams and equipment and waste no time during the day, and a man without some mechanical ingenuity is like an engine without a balance wheel. It is the man who has the faculty of keeping his team and implements in working order and steadily on the move each day that does the big season's work. The few odd minutes saved now and again tell greatly at the end of the season.

In organizing a system of farming carrying the largest possibilities and insuring the best returns crop rotation is inevitable. It distributes the labor of the men so regularly over the year as to greatly economize the acreage cost of tillage operations and is of aid in settling the labor problem. By growing a rational rotation of crops and feeding them to live stock on the farm it is possible to furnish employment to the same number of men the year round and place them in cottage homes with their families.

Crop rotation aids in securing and conserving soil fertility. No two plants root at the same depth. Corn is shallow rooted, wheat is deeper, and clover is still deeper rooted. Each feeds naturally upon an area of its own. The roots of the plants feed other crops. Each has its own peculiar way to gather nitrogen, phosphoric acid and potash. In the decay of the roots of a plant that can get potash easily, another plant that cannot so acquire it finds it prepared at hand. Clover gives a notable helpfulness in its nitrogen supply to other plants. Its 180 pounds of nitrogen in the roots and stubble of a large crop supplies enough of this element to grow several crops of any one of the standard farm plants. This nitrogen has been gathered from nature without the need of any artificial supply by man. The nodular growths on its roots are a center of nitrogen compounding from the air. The cost of this 180 pounds of nitrogen deposited by a large crop of clover would cost on the market, $36.00. Different crops remove different quantities of materials of growth from the soil and air. Where potatoes take thirty-five pounds of potash, it requires but eleven of phosphoric acid, yet the wheat crop takes more phosphoric acid than potash. Now if potatoes follow potatoes the supply of potash runs out quickly. Rational crop rotations exhaust the soil equitably of the elements of plant food, either in the soil or added by stable or other manure. Each plant has its special fungus enemy and its insect foe and these are not usually those of other plants. Some are above and some beneath the ground. To change the natural food supplies of these enemies and foes by changing crops disperses them. I have repeated more superficial truths than I should but for the fact that so many farmers do not appreciate crop rotation as an aid in supplying plant food and saving the time of men and teams. Crop rotation is the foundation of successful farming. All of the great agricultural regions are fairly screaming to intelligent farmers for diversification, for a change in treatment, for crop rotation.

In organizing the farm some kind of animal production should be a prominent feature of the farm management. In the absence of some kind of live stock the excuse for growing a wide variety of grass and forage crops is wanting. Feeding the soil through live stock makes it possible to secure two profits from farming, besides increasing the fertility of the soil for future crops. It is the only way of eating the cake and having it left. Crop rotation is not a sufficient means of building up the soil. It is merely a part of a complex system which involves stock feeding as its complement. Farming as a business is on a safer and more permanent basis when the bulk of the field crops grown on the farm are fed to live stock and more than two-thirds of their fertilizing value returned to the soil in the form of manure.

Only animals that have the ability to profitably utilize what is raised on the farm should be kept. The feeding of live stock without profit except the manure is a losing transaction. The animal can add nothing to the fertilizing ingredients of the food it consumes, and the increased value of the animal or its product must alone determine the profit. A glance at the thousands of scrub feeders and dairy cows sold by enterprising drovers and dealers is sufficient to prove that the farmers are, as a rule, not cognizant of the importance of feeding high-class stock. Cattle, horses, sheep and swine that have not shown any development, except possibly their horns, ears and legs, will not prove profitable receptacles of valuable feedstuffs, that we raise on high-priced lands. The indiscriminate breeding of live stock discarding the law that "like begets like" has filled the country with animals that prove themselves a source of loss rather than profit. The remedy for this condition of things must be in knowing more about the qualities of each animal and using none but well-bred animals for breeding stock and discarding every animal that does not come up to a fixed standard. In organizing the live stock departments of the farm none but high-grade females and pure-bred males should be kept for breeding purposes. It is useless to grow large crops and market them through unprofitable live stock.

In farm organization we may learn from the manufacturers to give greater attention to the utilization of the waste products. The great meat packers claim that they derive their profits from the saving of the waste products. This may seem hard to believe when buying meat, but it does not seem unreasonable when paying our fertilizer bills. The value of the manure produced by 30 well-fed cows with the usual accompaniment of other stock is about $1,000 per year at the prices we are paying for plant food in other forms. Are we losing a large part of this value by careless methods of farming and going into the markets

to buy expensive commercial fertilizers to make good the loss?

In the first place we must aim to produce on our farms those products which are best adapted to our location and soil products which, for our given conditions, will give the largest profits. If a man makes a specialty of two or three crops and studies the kinds of soil best adapted to their growth he is more certain of success than the man who blindly follows the customs of others. There is such a science growing up around the growth and perfection of every farm crop that it requires continual study and effort to keep abreast of the times. Having determined the products we can produce to the best advantage, we must give attention to evolving a system of farming whereby due care may be devoted to each branch of farming that is being followed and harmonize the whole in a general scheme that will eliminate all waste of time, labor and fertility.

Ordinarily, I do not believe we should do too many things. Any system of management which causes neglect by the individual is wrong, no matter how correct it is in principle. I know because I have had experience both ways. It is a very energetic and ambitious man who can, with a limited amount of capital, make a success of more than one or two branches of farming to which he gives his best services. It is necessary, of course, that he have other lines of work, but the other lines should be, to a certain extent, subservient to his one or two chosen specialties.

Draining Wisconsin Land

THIS autumn will see the completion of work in the Koshkonong-Mud Creek drainage district, Wisconsin, embracing parts of the townships of Cottage Grove, Deerfield and Christiania in eastern Dane county, and extending slightly over the Jefferson county line into the township of Lake Mills. Ten thousand acres of land is included in the district, 6,000 of which is wet land directly benefited by draining. This is accomplished by fourteen miles of main ditch varying from fourteen feet width on the bottom and twenty-six feet width on the top to twenty-six feet width on the bottom and forty-two feet width on the top. The depth runs from six to ten feet, depending largely upon the character of the typography.

The main ditches are principally the courses of Koshkonong and Mud creeks, the latter a tributary of the former, which were deepened and straightened by large floating dredges. Eleven miles of dredging was done on Koshkonong creek and three miles on Mud creek. To do this work it was necessary for the dredges to pass through four railroad bridges, one of them twice. The latter instance was on Mud creek where the dredge worked up-stream and then worked its way back to Koshkonong creek. The Northwestern railway co-operated with the drainage commissioners, making no charge for the privilege of going through their right-of-way, although each bridge removal cost about $1,000. These passages were made on Sunday when there would be least interference with traffic.

Twelve miles of lateral ditch were excavated, most of it by plow operated by horse capstan, and the rest by hand. The laterals varied in size averaging four feet in depth and two feet wide on the bottom and up to ten feet wide on the top. The slope of the sides was two inches to a foot.

The main canal carries the outflow from two other drainage districts, Rattlesnake district, and Rattlesnake addition No. 1 with an aggregate area of 5,000 acres. To drain Rattlesnake district No. 1 four and one-half miles of Koshkonong creek was deepened.

Two seasons' time was required to do the work which was done at a cost of about $30,000 or about $6.50 an acre. The contract price was $26,000, but administration and litigation brought the cost up to the former figure. The circuit court for Dane county granted the petition for the establishment of the district in 1908 but the legal difficulties referred to prevented the beginning of actual work before the spring of 1912.

New and imperfect drainage laws were responsible for much of the difficulty and delay. None of them had been interpreted by the supreme court and a portion of the litigation went to the supreme court of the state for final settlement. The point in question was that upper districts and landowners concentrating water in a ditch must pay for outlet through a lower district or land below them. The upper district contended that since they emptied into a natural stream they were not liable for assessment even if the stream were improved. The supreme court decided that the Rattlesnake district which discharged its outflow into Koshkonong creek was liable to assessment by the Koshkonong-Mud Creek district for benefits received from supplying it an improved outlet. Besides the litigation mentioned there were a number of lawsuits with farmers who protested against the award of benefits and damages.

In order to escape inclusion in the drainage district a number of farmers with land bordering on Goose Lake took advantage of the old common law rule that navigable waters can not legally be destroyed. Goose Lake consists of about forty acres of open water surrounded by about seven hundred acres of marsh and floating bog which makes the open water almost inaccessible. Since that time many of the objectors have repented.

Too little time has elapsed to demonstrate the benefits of drainage in the Koshkonong-Mud Creek district, other than the removal of most of the standing water, but in the older Rattlesnake district some of the lowland has been turned into corn fields with marked success, not to mention the production of valuable tame hay where only coarse wild grass grew before.

The most promising portion of the newer district is the area formerly covered by a large mill pond. This ceased to exist more than twenty years ago when a mill-dam at Kroghville was purchased by the farmers and taken out. This tract has a rich alluvial soil, the result of sedimentation from the creeks over a long period of time. The rest of the drained land is muck and peat. Where subject to seepage from higher land it will require a measure of tile draining and open ditching to make it fit for cultivation.

The Koshkonong-Mud Creek district, although one of the first to be organized in Dane county, was preceded in organization by the Starkweather district in the towns of Blooming Grove and Burke, the Badfish district in the town of Oregon, and the Nine Springs district in the town of Madison. The Door Creek district in the town of Cottage Grove is perhaps the most recently organized.

WORKING STALLIONS.

To the Editor of The Homestead:

I think it would be vastly better for the horse-breeding industry as a whole, if stallions were worked just as other horses are on the farm. It is admitted that to do his best work in the stud the stallion should be in the very best physical condition. All his functions should be working to their capacity, and in horses that condition is achieved only when work is being done. I do not mean just light work or that the animal should be put right through from morning to night. It is better to err on the side of working a stallion too hard than of not working him enough.

Coddling an animal of this kind would imply too close confinement and too little acquaintance with the great outdoors. Stuffing would imply the feeding of too much grain for the amount of exercise taken. Together the two form a combination that is bad as bad can be for any horse, stallion, mare or gelding.

Now, it is always poor policy to find fault if at the same time a remedy cannot be found. It is an awful chore to exercise a stallion every day, either riding, walking or driving him so many miles along the road. Besides, it is a job that costs money, for everyone's time is worth something in these strenuous days. It is admitted that every stallion should have abundant exercise every day. The most eminent authorities say that a draft stallion should have not less than six miles, and preferably eight miles, exercise every day of his life. Why not let him get his exercise while doing something useful?

THE COLT'S FIRST WINTER.

To the Editor of The Homestead:

The colt's first winter is a critical period in his life. Get him through the first winter in good shape and if he has good blood, he will be most certain to make a valuable animal. The colt that is taken from its mother and put on dry feed is apt to become stunted and long haired. He should have special attention when taken from the mother, and his feed must be of the right kind.

If the colt is allowed to gorge himself on roughness, he is liable to develop what is called the "pot belly." When this is developed the colt stands a fine chance to become a scrub horse. Their hair will become long and their legs wobbly and their color will have a deadness about it, showing the lack of vitality.

To prevent this and to bring the colt through the winter in first-class condition his ration should be largely of grain. Oats and barley are especially good for the colt, and if he is given a good ration of these grains he will keep in good flesh. Corn on the cob is too tough for the colt. Shell the corn and have it crushed. It will be more nourishing and easily masticated. Musty hay or grain should never be fed. It is practically devoid of nourishment and is a breeder of disease. Ten or fifteen pounds of good hay will be sufficient for the colt each day.

The colt should not be confined in a stall. Put him in a lot where he can jump and run. A good run will do the colt good. A colt may be allowed to run in the pastures during the pleasant days, but must always have, as a refuge from the storms, a good shelter to which he may have free access. Plenty of water from a well or cistern is also essential.

TALKING AGAINST WHEAT RAISING.

Agricultural professors have lately invaded central and western Kansas by special train, preaching the gospel of more kaffir corn and silos, that more live stock may be kept upon the farm. They are telling the wheat farmer of Kansas that he should cut his wheat growing in half and devote more of his time and attention to stock raising, which system of farming would have a tendency to build up his farm land. Their talk isn't sounding good to the farmer who made well out of wheat this year, the one crop that matured ahead of the drouth. At any other time, a more attentive ear might be turned toward the speaker who thus talks against wheat, but when wheat has just proven to be the most profitable crop the state has produced, talking against it is quite unpopular.

The Farmer and Stockman has always been a believer in diversified farming, meaning by this the keeping of live stock in connection with grain growing. This the wheat belt has not been doing in a general way, except in the way of the work teams necessary and a few milk cows. To keep cattle extensively has always been far from the mind of the wheat raiser. Now comes the special train, with a battery of speakers, advising the farmers of the wheat belt to cut their wheat acreage in two and to devote half their attention to the growing of drouth resisting crops that will make good silage, that more live stock may be kept upon the farms. This is sound doctrine so far as the winter feeding season is concerned, but we are not told how the cattle are to be kept through the summer in a country where pasturage is as short as it is where wheat is grown so extensively. But talking against wheat when it has just proven to be the most profitable crop of the season is talking very much against popular opinion. In the long run, though, farmers have got to quit the one-crop system, and, as one looks into the future, the advice to let down on wheat growing is sound.—[Farmer and Stockman.

Wood Shingles? No! No!! No!!!
STOP the Awful Waste
of wood shingles—the cause of disastrous fires, leaky roofs and endless expense and trouble. Use beautiful, indestructible Edwards "STEEL" Shingles. Cost less, last longer than wood—better in every way. Over 100,000 men now use Edwards "STEEL" Shingles—the shingles that never rot, rust or burn. Ten times easier to put on. Each one dipped in molten zinc after it is cut. No raw or exposed edges. Patented Edwards Interlocking Device permits contraction and expansion—makes joints water-tight FOREVER! $10,000 guarantee against lightning loss FREE.
START Saving Money By Using
Edwards STEEL Shingles
Fire-Proof! Rust-Proof! Leak-Proof!

Deafness
From All Causes, Head Noises and Other Ear Troubles Easily and Permanently Relieved!

Thousands who were formerly deaf, now hear distinctly every sound—even whispers do not escape them. Their life of loneliness has ended and all is now joy and sunshine. The impaired or lacking portions of their ear drums have been reinforced by simple little devices, scientifically constructed for that special purpose.
Wilson Common-Sense Ear Drums
often called "Little Wireless Phones for the Ears" are restoring perfect hearing in every condition of deafness or defective hearing from causes such as Catarrhal Deafness, Relaxed or Sunken Drums, Thickened Drums, Roaring and Hissing Sounds, Perforated, Wholly or Partially Destroyed Drums, Discharge from Ears, etc. No matter what the case or how long standing it is, testimonials received show marvelous results. Common-Sense Drums strengthen the nerves of the ears and concentrate the sound waves on one point of the natural drums, thus successfully restoring perfect hearing where medical skill even fails to help. They are made of a soft, sensitized material, comfortable and safe to wear. They are easily adjusted by the wearer and out of sight when worn.
What has done so much for thousands of others will help you. Don't delay. Write today for our FREE 168 page Book on Deafness—giving you full particulars.

Why Don't You Paint Your Barn NOW?

It doesn't pay to put off painting. Bare or poorly covered wood is sure to decay. That means repairing or rebuilding. Lumber and carpenter hire are expensive. Every dollar you put into painting with good paint, saves $100 later on—to say nothing of the pride you'll take in the better appearance of your place and its actual increase in value.

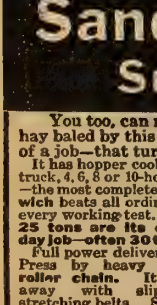
Lucas Barn Paint

outlasts all others

because of the better quality put **into** it. We know the exact value of every paint material. 64 years of experience is concentrated on the production of every can of Lucas paint. We have in Lucas Barn Paint the most perfect product for its purpose. This is true of every other Lucas paint. Every can is made according to the standard that our experience tells us is best, and that the test of service has repeatedly **proven** the best.

Every Can of Lucas Paint Matches Lucas Standard

It is one thing to have a standard—another to keep to it. You can depend upon every can of Lucas paint being up to standard. Our raw materials must pass four rigid inspections. The grinding of the colors and the mixing of the paint are performed by the most complete mill equipment in the country. The men in charge have been with us twenty-five to forty years. All of our employes are saturated with the Lucas spirit of care and thoroughness. To make mistakes is absolutely impossible. Every batch of finished paint is matched with our standard—and it must **prove perfect** in color, weight and working qualities. You can always depend on Lucas Paint to make good.



Free Book "When and How to Paint"

Tells how to judge and select the right paint for your house, barn or other buildings. Also tells how to paint, stain, varnish or enamel all sorts of thing, inside the house and out—among them furniture, walls, porches, carriages, autos, bathtubs, iron, machinery, etc. You'll always keep this book. It's highly valuable. Write for it today, giving name and address of your nearest dealer.

LEGAL DEPARTMENT

SUBSCRIBERS who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention, inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail, should remit $1.00, addressed as above. All inquiries must be signed if they are to receive attention.

PRINCIPAL AND AGENT.

The relation of principal and agent is a very important subject, and is not very well understood generally, except among lawyers. Business affairs have become so extensive and complicated that many people are obliged to deal with each other by and through agents in order to supply their wants and accomplish their purposes. The person, firm or corporation who employs an agent is called the principal and the agent is the one who represents the principal in dealing with other parties. An agent is usually a person, but a firm or corporation may be, and act as, the agent of a person, firm or corporation. The relation of principal and agent is always based upon a contract between the parties, and as a general rule the agent's powers, duties and liabilities are fixed and limited by such contract. Where an agent acts within the authority given by the principal in such contract, he is but the instrument of the principal and his acts are deemed by law to be the acts of the principal. Whatever a party has the legal right to do may be done by and through an agent, except as to matters which are personal in their nature. Every person who is legally competent to act for himself may act through an agent, and every person who is competent to act for himself is also competent to act as the agent of another. A person of unsound mind is incapable of being either a principal or an agent. He can neither lawfully appoint an agent nor act as one. This is a general rule, but there is an exception. A minor cannot act as principal; he may lawfully act as an agent, his acts in that capacity being deemed the acts of his principal. A minor's contracts in his own behalf are not actually void, but only voidable. He may upon coming of age repudiate his own contracts made during his minority. It would therefore be absurd for him to act through an agent. He cannot confer upon another the power to do valid and binding acts when his own acts are liable to be repudiated by him at maturity.

A principal is bound by the acts of his agent where such acts are within the scope of authority given by the principal to the agent. If the acts of the agent be outside of the scope of authority given him they will not, as a general rule, be binding upon the principal. However, where the acts of an agent are not expressly authorized by the contract of agency, yet if the principal has placed the agent in such a position as to lead parties with whom he deals to believe that the agent is acting within his authority, the agent's acts will be binding upon the principal.

As a general rule, a person deals with an agent at his own risk. The representation or statement of a person that he is the agent of a person, firm or corporation is not conclusive evidence of that fact. Many people are deceived by persons who claim to be agents, and have no adequate authority as such. Every person dealing with a stranger who claims to be an agent should carefully investigate his claims, and demand that he produce some evidence of his authority beyond his mere statement. A reliable agent generally has some means of establishing the fact of his agency in a satisfactory manner. If a person acts as an agent without authority or transcends his agency or departs from its provisions he is personally liable to the person with whom he deals. In signing contracts an agent should disclose his agency in the contract and name his principal. The contract should be in the name of the principal the agent signing the principal's name thus: Reed and Company, By John Doe, agent.

LAW QUESTIONS CONSIDERED.

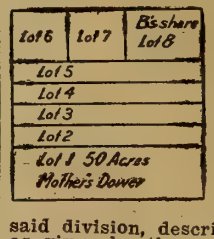
PASSING AUTOS.

A Subscriber, Carroll, Iowa.—(1) Is a person driving an automobile on the public road, required by law to give any signal when desiring to pass another auto going in the same direction? (2) On which side must an auto pass another going in the same direction? (3) When two autos are going in the same direction, and the rear one tries to pass, has the driver of the forward car, any right to leave the main track and crowd the passing auto into the ditch or against the fence? If there be an accident in such case, who is liable for damages?

Answer.—(1) No signal is required by law in such a case. (2) The law of Iowa does not specify on which side an auto must pass another going in the same direction, but the general rule of the road is to pass on the left side. (3) The forward auto driver has no right to crowd the passing car to the fence or into the ditch, and if he does so he is liable for all damages such conduct cause.

TERMINATION OF DOWER INTEREST.

A Subscriber, Hume, Ill.—A died in 1875, leaving 160 acres of land in Illinois to his wife and children. In 1878 B obtained the share of one of A's sons in his father's estate, by the foreclosure of a mortgage. In 1880 B applied to the court to set aside the dower of A's widow and divide the land which was done according to the diagram herewith given. In 1882 B sold to C the land set apart for B in said division, describing same in deed as given by the court in the division, being lot 8 as shown on accompanying diagram, but made no mention of any dower interest. B never paid taxes on it, nor collected rent, and did not appear as a party in the suit to partition the widow's dower part, in 1898. The widow of A died seventeen years ago. C farmed said lot 8 until he died three years ago, and paid taxes on it. In the settlement of C's estate, the dower question has come up to be determined. Who is the rightful owner of said son's share in the land set apart to his mother for dower?



Answer.—According to the foregoing statement, B obtained the entire share of one of A's sons in his father's estate. When B sold lot 8 to C, he did not convey to C all the interest he received from A's son, but only lot 8, the part set aside as dower for the widow describing lot 8 as given by the court—hence C has no interest whatever in the 50 acres, but B has the same interest which A's son would have had, if it had not been transferred from the son to B.

ADJOINING LANDS.—TIGHT FENCES.

A Subscriber, Council Bluffs, Iowa.—My neighbor has put in his half of the division fence between our lands, hog tight. Is there any law which requires me to make my half of the fence hog tight?

Answer.—There is. The law provides that "all partition fences may be made tight by the party desiring it, and when his portion is so completed and securely fastened to good substantial posts, set firmly in the ground not more than twenty feet apart, the adjoining property owner shall construct his portion of the adjoining fence in a like tight manner. * * Upon the application of either owner, after due notice, the fence viewers shall determine all controversies arising under the fence law, including the partition fences made sheep and swine tight."

PARTNERSHIP IN OPERATING FARM.

Mr. Chas. Schott, Donnellson, Iowa.—A owns a farm, and he and B went into partnership to operate it. Each party owns half of the stock and machinery, and each is to get half of the gain from the enterprise. Each party reserved two horses for his own private use. B's horses raised two colts. A's horses raised none. One of B's mares died, and B suffered the loss and the expense of veterniary treatment. (1) Can A lawfully claim a half interest in the colts, by paying half the service fees, taking into consideration the feed consumed by the colts? (2) How should the matter be settled?

Answer.—(1) If the mares belonged to B individually, the colts also belong to him, and A cannot lawfully claim any interest in them, but if the mares were partnership property, be-

longing to A and B, then each one has a half interest in the colts. (2) Assuming that B owned the mares, he should pay all stallion service fees, and should pay A for half the value of the feed which the colts consumed.

MARRIAGE OF FIRST COUSINS.

A Subscriber, Wagner, S. D.—Is there any state in the Union where first cousins are allowed to intermarry?

Answer.—In the state of Wisconsin first cousins may lawfully intermarry.

BACHELOR AND MAID.

A Subscriber, Pocahontas, Iowa.—Does the law of Iowa allow a bachelor living on a farm to hire a young unmarried woman to keep house for him?

Answer.—It does. There is nothing in the law that prohibits such an arrangement.

CONTRACT FOR LABOR—RENT.

A Subscriber, Toulon, Ill.—A and B made a contract by which A hired B to work by the month for one year, beginning March 1, 1913, and B was to have the use of a house and garden. In case B should have good cause to quit work, or A should have good cause to discharge B before the end of the year, would B be liable to pay for the use of the house and garden?

Answer.—B would be liable to pay for the use of the house and garden for the time he would use them, after quitting work for good cause, or being discharged for good cause.

OBSTRUCTING ROAD—INJUNCTION.

A Subscriber, Reinbeck, Iowa.—A forty-acre tract of land has had a road running across it for more than fifty years, and this road has been used as a mail route ever since we have had rural delivery. The land was sold last spring, and the purchaser proposes without any petition or legal proceedings, to put a fence around the land and shut up the road. Has he a right to do so, and how can we keep the road open?

Answer.—The owner of the land has no right to shut up the road, and you can obtain a writ of injunction from the district court restraining him from so doing. You will, of course, need a lawyer to attend to such proceedings. It is the duty of the road supervisor to remove obstructions in the public road. The road supervisor is now known as road superintendent.

RIGHT TO GRADE UP LAND.

Mr. Curtis Glessner, LaPorte City, Ia.—A owns twenty acres of land inside the city limits. Has he a right to fill in a low place on the land, and thus prevent the city from letting the waste water from the streets overflow his land during freshets?

Answer.—A has a lawful right to fill in his low land for the purpose mentioned.

DISSOLUTION OF PARTNERSHIP.

An Iowa Subscriber.—A, B, C and D are partners in the coal, grain and feed business, each one putting into the enterprise $3,000. B had nothing, but C and D, who are his brothers-in-law, either advanced his share or became security for it. A and B do the work and receive $100 per month each for such services, A is the bookkeeper. After all expenses are paid the profits go to the company. So far there have been no profits. For some time B has been drawing $200 per month, charging the extra $100 to himself. A objects to this, but is powerless to prevent it. He has imformed C and D of the fact, but they will take no action about it. (1) Is not B guilty of embezzlement? (2) What is the legal remedy for such a state of affairs?

Answer.—B is not guilty of embezzlement, because in law one partner cannot embezzle partnership funds. He can only render himself liable to an action for accounting. (2) The proper legal remedy in this case is for A to bring a suit in the district court for a dissolution of the partnership and an accounting. In such suit the court would enjoin B from receiving more than his $100 per month, and possibly from receiving any, till the final judgment, and if the facts would warrant it, the court would appoint a receiver to settle up the partnership affairs.

DIVISION OF PARTITION FENCE.

A Subscriber, Marshalltown, Iowa.—A and B owned adjoining farms in Iowa twenty-five years ago. There was a lawful partition fence between the two places. A desired to put up a board fence on the line, B gave A his share of the wire fence and A was to build all of the board fence, which he did. Ten years later A sold his farm to C, including in the sale all of the line fence. Now B has sold his farm to D without any mention being made of the line fence. In the meantime C, the new owner of A's farm, has removed the boards from the fence and put on wire instead of them. Can D hold half of the line fence and if so can C compel D to pay for half of it?

Answer.—C is the lawful owner of the entire line fence and if it is a lawful fence, C can compel D to pay for half of it. If the parties cannot agree upon the division of said fence, and the value of half of it the fence viewers should be called upon to meet and determine what portion each party is to keep in repair, and the value of the half assigned to D.

POLL TAXES IN INDIANA.

Mr. Wm. H. Ward, Fortville, Ind.—(1) Can an incorporated town in the state of Indiana compel a citizen of the town to pay what is called a privilege tax of $2? (2) Does an honorably discharged soldier from the regular United States army have to pay poll tax?

Answer.—(1) What you term privilege tax is probably poll tax. Incorporated towns in Indiana have a right to levy and collect such taxes. (2) There is no provision of law exempting such persons from the payment of poll taxes.

SETTLEMENT OF AN ESTATE.

A Nebraska Subscriber.—A, who was a bachelor, owned 400 acres of land in Nebraska, $2,000 in the bank and about $4,000 in personal property. He died leaving a will by which he gave B, a relative, a certain sum of money and the balance of his estate to his brothers and sisters. B also had a claim against the estate, which was allowed. The will was probated and six months has expired for the allowance of claims against the estate. The brothers and sisters objected to the allowance of B's claim and have appealed to the district court. They also object to the executor paying B the sum given by A's will. How long will B have to wait before she can get the money allowed by the will and what should she do to obtain it?

Answer.—The estate should be ferially settled within eighteen months after A's death—and must be settled within three years. If the personal property is sufficient to pay B and the debts, the real estate cannot be sold by the executor, but if not sufficient, then the real estate or enough of it to pay the same must be sold. The brother and sisters cannot prevent B from getting her legacy, but B may have to wait till the estate is ready to be settled by the executor. B should see that there is no unnecessary delay in such settlement, and if necessary, employ a lawyer to look after her interests, and push the matter along.

WAGES OF CHILDREN—WIDOW'S PORTION.

A Subscriber, Waldron, Mo.—(1) Can an unmarried son or daughter living at home with parents, collect wages from the estate of the parents for taking care of them during their last illness, in the state of Missouri? (2) Where a man dies leaving property and a wife and children in Missouri, what is the lawful share of the wife in the estate?

Answer.—(1) The son or daughter cannot recover wages from the estate, unless there was an agreement to that effect with the parents in their lifetime. (2) The widow is first entitled to what is called the widow's allowance, which consists of family bible and other books of value of $200. All wearing apparel, wheels, looms and other implements of industry, yarn cloth and clothing made up for family use, grain, meat, groceries and provisions for use of family for one year. Household and kitchen furniture to the value of $500. And she may choose other personal property of value of $400. All of this is clear from the debts of her husband. Then she is entitled to a child's part of all the balance of the personal property after debts are paid. In addition to the above, she is entitled to dower in all real estate of her husband, which is one-third of it during her lifetime.

ADJOINING OWNERS—PARTITION FENCE.

A Subscriber, Monroe, Iowa.—A and B own adjoining farms. The partition fence is three-quarters of a mile long and is divided between them. About a year ago when the fence was divided A wished to make his part hog tight. A now wants to turn hogs on his ground next to B's part of the fence. B wants to make a new fence on his part of the line. Is he required by law to make it hog tight?

Answer.—If A's part of the fence has been made hog-tight, B will have to make his part tight also. The law of Iowa provides that all partition fences may be made tight by the party desiring it, and when his portion is so completed, and securely fastened to good, substantial posts set firmly in the ground, not more than twenty feet apart, the adjoining property owner shall construct his portion of the fence in a like tight manner.

Government statistics show that during the fiscal year ended June 30, the value of fruit exports from the United States was more than $36,000,000, or an increase of exactly 100 per cent in ten years. American fruit is being constantly improved in quality and is commanding constantly increased prices on foreign markets. Green and ripe apples continue to be the most popular American fruit. The United Kingdom has used during the year just closed more than 1,300,000 barrels, valued at $1,000,000, and other countries 560,000 barrels, valued at $1,638,000.

CLOTHCRAFT

Why 4130 is the Most Popular Fall Suit

It is all-wool Blue Serge, guaranteed.

It is absolutely fast color, also guaranteed.

It is stylish—ten styles to choose from.

It is well made. It represents 67 years of experience in making good clothes.

It is priced at $18.50.

It carries a stronger guarantee than any other manufacturer ever put back of a suit of clothes.

Why 4130 is All Wool

Because it is a Clothcraft Suit and all Clothcraft Suits are always all wool—guaranteed. Wool makes up best, keeps its shape best and longest, holds its color best, looks best, feels best and IS best, in every sense. Everybody knows this.

Why You Need 4130

Because every man needs a good Blue Serge Suit. 4130 is special for Fall. Scientific tailoring raises the quality but not the price. You buy it on a guarantee—not on a guess. If 4130, or any other Clothcraft Suit, isn't absolutely right you need not keep it.

The Photograph *The Drawing*

Why We Show Two

There are only two ways to show Clothcraft Clothes on paper—the artist's drawing from life, and the actual photograph. We show you both here. We can give you no better demonstration in this advertisement. But you can go to the Clothcraft Store and see the real Clothcraft Clothes—see 4130 Blue Serge Special at $18.50, try it on, wear it home, and at once begin to appreciate the value of an all-wool suit that has all the other qualities that ought to be in a good suit at the same time—style, fit, looks, durability, fast colors, fine trimmings and excellent workmanship, at a moderate price.

Any of the styles below can be obtained in Clothcraft Blue Serge Special No. 4130 or any other Clothcraft Fabric

4130-Y20 4130-Y21 4130-Y22 4130-Y23 4130-Y24 4130-Y25 4130-Y26 4130-Y27 4130-M1 4130-M2

You'll Want To Show "Lots of Floor"—If You Use

Lincoln Floor Paints

Style Note: Small rugs are the fashion—exposing a greater part of the bare floor. This allows for beauty heretofore "covered up."

You will be proud of your floors—proud of their lustre, their smoothness, their perfection of surface—if you use Lincoln Floor Paint. It is easily applied—it produces a hard, sanitary, durable finish—easily kept clean and free from dirt and grease, and hard to mar with heel nails or sharp edges of furniture. Lincoln Floor Paint comes in all shades, for use in kitchens, pantries, halls, living rooms and all other rooms, to match furniture or decorations.

Farmers Not Effectively Organized.

By G. A. Christie, Purdue University.

IT IS possible to show that the farmer has pretty good reasons for not being effectively organized. Heretofore when the farmer has been called on to co-operate, it was largely done for the purpose of seeing who could make the most money out of him. The promotor that went out to organize the local creamery, of course, tried to give the idea that he was organizing that creamery to help that community and to help those farmers, when, in reality, it was to help the man who had machinery to sell. All over Indiana and, all over other western states, at almost every crossroads those promoters, whose object was to sell machinery to get some revenue for the promoter and for the company behind him, established those creameries; and they did not care anything about what became of the farmer. As a result, the creameries have gone out, and the farmer has become more suspicious and we have everywhere evidences of the reaction from those failures in the past.

Another thing: along with the creamery has come this stock ownership of animals, particularly stallions. Stock companies have been organized all over this country to sell $500 stallions for $3,500 and then immediately another man comes around with a better horse, as he says, and wants to sell him, and does sell him. Those things have been going on all over the central West until, when we find promoters talking about promotion of anything, everybody grows suspicious and goes back to the farm. Then we complain and want to know why the farmer has not been more effectively organized.

We find, too, that the farmer has been called upon to organize to sell in a co-operative way, and has again suffered. Let me offer you a little illustration. Here is the difference between the farmer and the business man today. The business man in the town takes into consideration the cost of producing an article, the cost of advertising, putting it on the market, all necessary expenses attendant throughout, and when he offers it to the farmer, he has a price which he knows he must have for that article, or he can't sell it. Take the real estate man. When the farmer is going to move into town, the farmer goes to the real estate office, and the real estate man says, "How much do you want to pay for property?" And he answers, "So much." "I have a house and lot worth $3,000, or a lot worth $800, or another one for $500." Your real estate man has put the price on his property and the farmer is called on to pay it, or he can't get it.

On the other hand, we find the stockman out in the country. He comes to town and Smith says to him, "You have got a fine lot of hogs. How much do you want for those?" and the farmer turns to him and he says, "What are the hogs worth today?" The farmer has been forced so long to accept what was offered to him that he does not think to take into consideration what it has cost him to raise a bushel of wheat or to demand that he get the price to cover the cost.

Just as soon as the farmers do form co-operative agencies they set a price on their corn, their grain, and then what happens? The court rules that they are organized in restraint of trade, and rule them out of existence. I feel as strongly as anyone can the failure of the farmers effectively to organize themselves, but I want to say that the farmer has never failed to do that which he has been called on to do.

We have not today the co-operative market that we might have for selling and buying, but we have an institution that exists all over this country that the farmers have brought about and that is our consolidated school—an institution that the farmers voted for and paid for, and it is for the benefit of the farmer, and I want to ask you if the farmer is not effectively organized in that respect? Those schools are catering to the needs of our educational system. And why were they organized? Simply because our legislators, our government, have seen the great need for such an educational institution and they have found out the way by which these farmers may organize and get that institution which will meet their needs.

So we come down to this matter of co-operation in buying and selling. Just as soon as somebody will point the way and will show the farmer that it is not a scheme to exploit him, just as soon will the farmer be ready to take it up and back it up and organize so that we can get results.

Five years ago the farmers in a certain section of Illinois were asked to contribute $10,000 to locate an expert in a certain county, so he could show them how to test corn, but the farmer said, "We don't want any of those fellows in our county." How has that changed in five years? We can't find the men to take the places that are offering $3,000, $4,000 and $5,000 to such men. The farmers are going right down into their pockets, putting up that money and organizing those associations. We have these men all over the country, going out as county agents, or advisers, whenever you call them, and the farmers are taking up that matter and making money out of it.

I believe one great reason why we have not had success in the matter of co-operation among farmers in buying and selling is because we have never had a truly co-operative scheme. The average scheme has been to organize a stock company, one man will take a thousand dollars' and another man a hundred dollars' worth. Suppose we take the co-operative elevator which we all know about. When we come to sell the grain through that elevator, the men were paid their price, and when the returns came in, we paid the running expenses and then, after we paid the running expenses, generally the scheme has been to pro-rate the profits on the stock subscribed, so that the men who have a greater amount of stock in that company get the larger dividends, while the man with a less amount of stock, who may have marketed a very much larger amount of grain, gets practically no dividend. Now, that is not true co-operation, and we cannot hold the farmers together if we continue to offer that scheme to them. If, in the case I have given, the surplus is prorated according to the amount of product that has been furnished by each member, then you will have what I call true co-operation, and when we have something like that, I think we are going to be able to hold them together.

This co-operative organization, any kind of a co-operative organization, must be built on an economic basis, both for the farmer and the people who are to get the products from the farm. Just so long as we go around telling the farmer that to do this will require the expenditure of a lot of money, we cannot work up enthusiasm for any such schemes.

We have found out that there are certain people who can go to the farmers and organize them, and there are certain others who do more harm than good by trying to do so. So, if we are going to get results from this scheme, we have got to put in the right kind of agents, men who will convince the farmers that they will be protected from the things they are afraid of, and that this matter of co-operative organization is what they need and must have. We hear very much criticism of the farmer, but I want to say in all my experience with the farmer, I have found he has been ready to back up any legitimate, right enterprise that can be shown to be for his good and for that of the community.

The farmer is slow, and you can't blame him for being that way. You cannot turn out large numbers of ideas for the farmer and get him to act on them all. He moves slowly.

The great problem before this country has been that of production. Everybody has been out to get after the farmer to produce more from his land, and I think he is responding,

that we are going to have larger production.

Now we are ready for another thing, we are ready for some organization to further this cause and if we will create the sentiment and then we will go out and plan the right method of procedure and then we will send the right man to the farmer, I believe we are going to get organization.—[Address before Marketing and Farm Credits Convention.

FAVORS CONSOLIDATED SCHOOLS

To the Editor of The Homestead:

In regard to consolidated schools I wish to say a few words, as there seems to be a difference of opinion among many of our citizens. I am satisfied that consolidation of schools is the only way that they can be made more efficient than they are at the present time. In fact, a great many of our schools, at the present time, have only from five to ten pupils enrolled and in such cases they are more expensive to keep up than the consolidated schools would be, and the farmers pay a greater tax to keep up their schools than they would if they had to hire buses to take their children to a central school. In Indiana where consolidation has been tried, I have seen the statistics furnished by a circular issued giving the cost per pupil, and it was in favor of the consolidated school.

A few years ago I visited a school in Franklin county, this state, and when I arrived at the door everything seemed so quiet that I thought that the school was closed, but on knocking, I was met by the lady teacher, who invited me in, and on doing so, imagine my surprise to find only two pupils, boys, one about thirteen years of age and the other eleven. I stayed there half a day and it was amusing to see the number of recitations that were held for those two pupils. The teacher told me that she did not expect to enroll any more for the year. I think that she told me she received forty dollars a month. Now take into consideration the amount that it took to keep the school in session for the nine months, and we can see that it was an expensive school to keep. There are many schools today in this state that do not have pupils enough to make it interesting for either the teacher or the children.

Anyone who has ever taught a country school knows that he cannot create any enthusiasm in a small school, and if we had from four to five of those schools united we could have far better work done by the pupils. The school would be graded so that there would be so much better opportunity for the pupils to advance in their work. It seems to me that no one who believes in progressive principles can be opposed to the consolidation of schools.

Again we hear some one say that the pupils are more liable to take cold when being taken in a bus, but that is far from true, as the child that is taken in a bus is well wrapped, while those who walk to school a mile or more are liable to have wet feet and are much more liable to take cold than those who ride to school. Consolidation has been tested in many states, and is proving a success. It must come, as the rural schools are not accomplishing enough for the pupils. The number of pupils are decreasing in our rural schools, due in many cases to the enlarging of farms and many people leaving for other fields. I have a niece that is having her children taken from the door every school day in a bus and delivered in the evening at home. She thinks that it is the best way to get children to school. I am aware that in many rural schools the people pay good wages and have good schools with enough pupils to make it interesting and if all of the rural schools were in this condition there would not be so much need of the consolidated schools.

I have heard the farmer argue that if we had consolidated schools he would not have his children at home nights and mornings to do the chores. It seems to me that the "anti" consolidated schools must have drawn on his imagination in writing as he did about the schools and the conveyances. I should like to know whether or not the gentleman knows the condition of our schools, and if he does not, it would pay him to put in a week or two visiting the rural schools, and it might possibly change his point of view. I know that the schools of Iowa are not what they should be, and I also know that they would be improved if we had more competent teachers, but if they were united in one large whole, fewer teachers would be necessary and 50 per cent better work would be done. Thirty-three years in the schoolroom and several years in the school furnishing business have given me an opportunity to see the failings of our rural schools.

There are four schools near this town, and those pupils could be brought to the town school where they could have the benefit of graded work. The schools have not enough pupils to make it interesting and there is plenty of room to accommodate all of them here, and it would be less expense to the taxpayers. The Buffalo Center school of this state has been a success as a consolidated one and I have heard the people of that section claim that they were more than satisfied with it.

Consolidated schools will come as they must, and when once established we shall wonder why we did not have them sooner.

James Lawrey.

Pottawattamie Co., Iowa.

It cost $7,000,000 to bottle up the water of the Colorado river for irrigation purposes, but the money appears to have been well spent. About 175,000 acres of dry waste land in the vicinity of Yuma, Ariz., will be turned from a region of fruitless barrenness into a watered fertility capable of producing corn, cotton, cattle or whatever else may be grown under temperate climatic conditions. Orange culture may possibly be one of the leading industries. A great tract of country covered with sand dunes and sage brush along the old Santa Fe trail, will soon be made to blossom the year 'round to the coaxing of distributed Colorado refreshment. Of all the irrigation schemes undertaken with the aid of the federal government this Arizona venture seems to promise the most satisfactory returns.

"PITTSBURGH PERFECT" FENCE

IT IS IN STRENGTH, safety, long life and distinctive appearance that the "Pittsburgh Perfect" line of fences and gates excel. The greatest strength is in the special-formula Open Hearth wire, the toughest, most durable and uniformly dependable wire ever used for fabricating fences and gates. Pure zinc spelter is thickly and evenly applied to the wire by the latest improved galvanizing process, and at every joint the wires are

WELDED BY ELECTRICITY

This exclusive process cuts out the useless wire and needless weight of other makes of fencing, and produces a *solid, one-piece fabric*, the EASIEST of any TO ERECT. The frames of the "Pittsburgh Perfect" Gates are also electrically welded at the joints, making one continuous frame of steel tubing, producing the strongest, most durable and satisfactory gates made.

SEE YOUR DEALER—But before buying *any* fence, get our new catalogue *telling how to test wire*, and showing many "Pittsburgh Perfect" Fences for every FIELD, FARM, RANCH, LAWN, CHICKEN, RABBIT and POULTRY YARD and GARDEN.

"Pittsburgh Perfect" Products Fully Guaranteed.

The illustration shown herewith is that of the great Poland China boar, Blue Valley 61568. This boar is at the head of the Thos. F. Walker & Sons herd and was bred by them. They have boars for sale sired by this boar. Kindly notice the advertisement on page 45.

In and Around Wisconsin

THAT tuberculosis is prevalent in some of the herds in Crawford county is evident from the fact that when a herd of fifty or sixty was recently being driven across country in the neighborhood of Petersburg, several gave out after they had gone a short distance and six died on the way. A Soldiers Grove veterinary called to make a diagnosis found that the cattle were afflicted with tuberculosis.

Chicago milk inspectors are making another round of the farms in the vicinity of Walworth in order to see if the recommendation of improvements made by them on their May rounds have been carried out. Those who have not complied by October 1st will not have their milk accepted.

The L. Starks Company has closed a contract with Frank Pollock and J. A. Porter whereby the company secures 7,000 additional acres for their potato farm in Oneida county, this giving them the largest tract for potatoes in the world. Their holding is over 18,000 acres. To utilize the pasturage on these lands Mr. St❜ks will buy 25,000 head of cattle in the spring and fatten them for market.

Shipment of sugar beets from the district east of Lake Winnebago is expected to begin within a few weeks. In many parts of both Fond du Lac and Calumet counties the beets have been ripening rapidly during the past few weeks, and they are now practically ready to dig. The crop on the whole is an excellent one, although the acreage devoted to their growth this year is not nearly so large as that of a year ago. Last year thousands of tons of beets were shipped from Brothertown Harbor across the lake to Oshkosh and were then placed on board gondola cars for shipment to the Menominee sugar factory. The shipments kept one boat busy the greater part of the fall season.

Apple trees which are blossoming for the second time are reported from Fond du Lac and Flintville, near Green Bay. There are two at Fond du Lac, one on the property of W. S. Burgess and the other in the garden of J. Marinan. The Burgess tree, which is seven years old, was in bloom as usual in the spring, and is now bearing some choice apples. The Marinan tree is about five years old and blossomed in the spring, but no apples developed. The blossoms are well developed and fragrant.

The Frank Herfort Canning Company, of Baraboo, reports that sweet corn is not turning out as well as expected from indications a month or more ago, but the quality is holding up better than usual. The corn is free from worms which is a saving to the canners.

Not less than ten thousand barrels of apples will have been shipped from Kendall before the close of the season.

A $4,000 schoolhouse for the use of five districts is to be erected in the town of Eagle Point, Chippewa county. The state is to furnish one-half of this amount. Although some of the pupils will have to come farther to attend school than before, the state allows all pupils living two miles or more from school, ten cents a day for transporting them to and from school.

The season's run at the Grantsburg pickling plant will be the largest since the plant was started. More than one thousand barrels of dill pickles have been made and there are twelve tanks containing 750 bushels each of salt pickles. The Heinz pickling station at Baraboo has closed. The season in that vicinity has been a fairly good one, although those raising cucumbers on sandy soil did not have the crop expected because of the long run of dry weather. The acreage this year set a new record and the size of the pack was correspondingly greater.

Manager E. L. Reams, of the Crex Carpet Company, which has a large tract of grass land near Grantsburg says the cut of twine grass this season will be 50 per cent of last year's cut. The dry spell in the early spring made the yield light.

Sixteen students, nine boys and seven girls, have entered the Dunn County Agricultural School for the new four-year course. Several of the students are high-school graduates while one or two have attended normal school or enrolled in the agricultural school last year. The session of the agricultural school for the four-year course opened on September 8th, while that for the two-year course opens October 6th.

An exhibit of apples grown in the state orchard in Crawford county is being shown in Madison. In the display are the McIntosh, two kinds of Greenings, Wealthy, Wolf River and other varieties. Splendid specimens come from trees but five years old and these trees have been bearing for two years. At the present time they are yielding from one bushel to a barrel a tree. The state orchard is on a hillside several hundred feet high and it is expected that in time the whole region will become famed for the quantity and quality of its fruit.

Competition for milk has become very keen in Green and LaFayette counties, the cheese factories and condensories being rivals. Few of the cheese factories manufacturing foreign brands of cheese operate during the winter months and the milk produced in the winter months goes exclusively to the condensories and creameries. The winter producers are disposed to sell to the buyer who takes their product the year round unless tempted away by higher prices.

SELECTING THE HERD BOAR.

To the Editor of The Homestead:

We must give careful consideration to the selection of a boar to mate with the herd sows; the future usefulness and development of pigs of their union require this. We cannot afford to use a scrubby or a pure-bred runt of a boar under any consideration. There are about 2,000 pigs in the first ten generations, and it is essential that we start right. Sometimes under pressure of important work requiring immediate attention, one is inclined to patronize a nearby boar that is known to be a scrub.

A litter of eight good pigs from a pure-bred boar mated with a choice sow will cost no more than a litter from an undesirable mating. When grown, the better pigs will carry fifty pounds more meat apiece than scrubby ones. This makes 400 pounds of additional meat, without any additional expense. This will apply to mating all animals on the farm, and is worthy of consideration. In buying a boar to head a herd of brood sows, the right selection often means the difference between a success and a failure for a period of years. The weak and the strong points of the sows that are to be his mates should be borne in mind.

The popularity of the boar's ancestry on both the paternal and the maternal side, coupled with a good individuality of the breed he represents, and a strong, vigorous breeder, are points that should figure prominently in the selection. As to his value, consider what he is worth to you in your individual herd; don't be led astray by another breeder's opinion, for he may not know your sows. Any boar is high priced, regardless of the price paid for him, if he cannot make good on a business basis from a breeder's standpoint. High-priced boars with popular ancestry in their pedigree must compensate their owners by reproducing for them pigs superior to former generations.

When properly cared for, I think 99 per cent of all pure-bred boars (not pure-bred runts) are breeders. One must use judgment in feeding and mating them. Always have them vigorous and in good, active condition. Never allow them to run at large with the sows. Have an individual pen and yard. One service is sufficient, and two matings a day should keep a yearling in prime condition. Nature has its limits, and one must not undertake to exceed them. Learn everything possible about his habits and individuality and conform to them as far as consistent with usefulness. Treat the boar kindly and he will not be cross; in fact, he can be taught to be handled as easily as a colt and he will be more useful for the education given him.

On many farms the matrons of the herd are the most profitable. They must have good care and a variety of food to supply their wants. They should be fed liberally and never let go hungry. They are twice as valuable when producing two litters of good pigs each year as when they produce only one. This can be accomplished by giving them care and attention at the right time. Three days after weaning their litters they will mate if the feed has been increased and they are in a thriving condition. A few days of heavy feeding with grain usually tones up their ovaries and places them in a healthy condition for the reception of the seed from the male. They will have as many pigs as there are healthy eggs impregnated. From this time on to farrowing they should be fed nitrogenous food, which will nourish the unborn successfully. Subscriber.

HOGS AFTER STEERS.

To the Editor of The Homestead:

In an experiment the Michigan station found that of whole corn fed to dairy cows 26 per cent showed up in the manure in no way changed by the digestive juices of the cow's stomach. Some of the kernels were so little affected by the digestive juices as to actually sprout. In another test 12 per cent of the oats fed to another bunch of cows re-appeared in the manure. An analysis was taken and it showed that the cows took no nutriment from these grains in either case. Now, if a dairy cow on moderate rations would waste that much grain, steers that are being fed a forcing ration will probably waste more.

We always allow a few hogs to work over the manure from the steers and when these hogs are ready for market they have been maintained on the side, as a by-product of the steer industry, as it were, since at no time do they receive any other grain. For our brood sows we would not think of such a method, since they like to lie down so much and usually select the fermenting manure heaps as a bed. There is danger, too, of their being stepped on by other stock. When they lie upon the manure it heats them and when they get up they are chilled through and through. This is not the best way of promoting good health and strong litters. Besides the ration

is not the right kind for a brood sow. Pigs are usually working around and do not lie on the manure like the brood sows do. There is such a little margin in feeding steers that at times profits would be absolutely missing if it were not for these hogs converting an otherwise waste material into a salable product.

C. J. Griffing.

MANAGEMENT OF MUCK LAND.

To the Editor of The Homestead:

The northern part of the corn belt contains thousands of acres of muck land. Some of it is in extensive marsh areas so that whole farms and even groups of farms consist of nothing but muck land, and on these areas there is a tendency to the development of highly specialized types of agriculture such as the culture of onions, peppermint and celery. This type of agriculture is doubtless well suited to the extensive marsh areas, but a considerable portion of the muck land occurs in small pond bottoms dotted here and there over the country, and on these areas the development of specialized cropping systems is not always feasible or desirable. In such cases the muck land must be made to fit into the farming system practiced on the balance of the farm or else neglected.

In the past a great many farmers have chosen to neglect the muck, but with more knowledge of how to handle it at a profit and a greater necessity to make every acre show a profit, there is now a general tendency to try to make the little patches of black land contribute to the farm income. It is generally recognized that an application of manure will make otherwise unproductive muck very fertile, but the use of the manure on the muck means rapid exhaustion of the upland soil which also needs the manure, so the plan is open to serious objections.

Muck lands invariably contain an enormous amount of nitrogen and organic matter—enough so that no more need be added for years and years—but are apt to be poorly supplied with the mineral elements of plant food, particularly potash. Manure gives good results simply because of its potash content, and the other valuable constitutents are virtually wasted on muck. Therefore, it is more economical, from every angle, to use the manure on the upland soil where it will be most fully used by the crop, than it is to use it on muck where only potash will be of value.

The use of commercial potash on muck not only renders it as productive as manure would at materially less cost, but can be made to help enrich the upland at the same time. That is, the corn and forage crops grown on the muck land by the use of potash can be fed out and the manure used on the upland and more potash purchased for the muck. In that way part of the nitrogen of the muck is transferred to the other land, which needs it, and all of the organic matter can be used where it will do the most good. This plan has two cardinal virtues to recommend it—economy and efficiency. The potash equivalent of a ton of manure costs but forty to fifty cents, and the adoption of the plan means a low fertilizer cost for the black land and an abundance of manure for the upland.

Fortunate indeed is the cattle feeder who has a good field of muck on his farm. He can grow corn on it year after year almost indefinitely simply by using a little potash, and then keep the rest of his farm as rich as cream with the manure produced from the crop grown on the muck.

SAVING PUMPKIN SEEDS.

Only a little time is required to save and cure enough pumpkin seed to plant a large field. Save seed from only the best and ripest specimens. First, in order to loosen the seeds inside, throw the selected specimens onto the ground a few times, but not with sufficient force to break them open. Then collect the seeds and wash them in water. They will cure out quicker if washed. They may then be spread on a board to dry or, better yet, on cheesecloth or a screen which being placed off the ground will permit the water and juice to drain away. This will also permit them to dry from the under side as well as the upper, and when they are placed in the sun and wind they will dry very rapidly.

If the nights are cold and frosty either take them inside or cover with a blanket. Freezing will injure their germinating qualities. Also protect the seeds from rains during the day. If the weather is very unseasonable, cure them entirely indoors. After the seeds have pretty thoroughly dried out place them in cheesecloth sacks and hang near a stove for a few weeks for further drying and there will not be any loss from mold later when they are stored in mouse-proof cans or jars. Pumpkin seeds must be kept out of the way of rats and mice at all times. Mice particularly seem to have a keen appetite for the seeds and they will destroy them as fast as one can collect them if the seeds are left within their reach.

HANDLING POTATOES FOR STORAGE

To the Editor of The Homestead:

Potatoes for storage should be handled with the greatest care from the time they are harvested till they are safe in the cellar bin or storage pit.

This careful handling should begin when the potatoes are being picked up, care being taken that they are not dropped nor thrown into pails or baskets.

In pouring potatoes from one vessel to another, never let them fall, but rather roll out gently, steadying the first few that come out with the hands till several are in the vessel, forming a sort of pad for the others to strike.

It is not the damage done at the time of bruising or peeling potatoes that makes it imperative for them to be handled with such care, but any bruises, cuts or peeled spots will prove a starting point for rot after storage, which, causing further contamination, may ruin a whole pit of potatoes.

Always have a generous padding of hay in the wagon in which potatoes are poured when harvested and hauled from the field, and keep them covered while the harvesting is in process, as the sun quickly damages surface products by "sunburn;" rendering them unfit for use. This is especially true if the potatoes are somewhat damp when dug, so that it is important for the ground not to be wet when potatoes are dug.

Potatoes must be thoroughly cured before being stored away in the cellar or outdoor pit, as dampness is one of the prime foes to successful storage. To accomplish this, we spread the potatoes out in some building where there is a free passage of air and the sun cannot strike them nor the rain reach them. Here they are scattered out as much as possible, a frequent stirring being given them for the first few days.

We keep potatoes out of storage just as long as we possibly can without their freezing. This not only insures thorough curing, but guards against the products being put away while they are warm, which would cause heat, subsequent mold, and rot. When ready to be stored, the products are carefully sorted again, all peeled, bruised, or otherwise damaged ones being rejected. They are then carried to the pit and as carefully emptied as before.

Our pit is three feet wide, eighteen to twenty-four inches deep (any length desired). Or, it may be circular in shape, four feet in diameter. It should be located on a north-side slope, where drainage is good, and where the sun will not warm up the pit in winter nor till late in the spring. We line the pit with fine weeds, grass or leaves, thus saving the hay or straw usually put in it. The lining should be thin—only sufficient to keep the products from being soiled by the dirt.

Any of the above products will serve for the first covering of the potatoes, a six-inch layer of dirt then being tossed onto it to hold it down and keep out moisture. This is covered well with old boards, roofing, oil-cloth, etc., in case of heavy rains. After this layer has been left stand till it freezes lightly, so the coldness will be near the potatoes, it is covered with a foot or more of hay, straw, manure, refuse corn-stalks, litter, etc., and another six-inch layer of dirt thrown on it. This all tends not only to prevent the cold from reaching the potatoes from the outside, but the coldness in the first layer of dirt will be retained and kept near the stored products, preserving them and yet preventing their becoming warm enough to spoil or sprout.

M. C.

The illustration shown herewith is that of Jumbo The Great, the famous Poland China boar at the head of the herd owned by Orville O. Jones, York, Neb. See field note on page 34.

John L. Griffiths, United States consul general at London, has prepared a statement showing the world's wheat crop for 1912 with comparisons. The tables are given in "quarters," a quarter being eight bushels of sixty pounds. The statement shows the 1913 wheat crop in the United States to be 752,000,000 bushels, and the world's 1913 total to be 3,376,000,000 bushels as compared with 3,150,000,000 bushels last year, or an increase of 226,000,000 bushels over last year. Canada is credited this year with less than one-third of the wheat output of the United States, which raises more than 20 per cent of the world's wheat.

The ideal way to store fodder is to shred, then it is more easily stored in less space and is much more handy for feeding. Fodder should be very dry when stored, otherwise, if large amounts are packed in one room it will sweat and mold.

DAIRY

STARTING THE FALL CALF.

To the Editor of The Homestead:

The best time to take the calf from the cow is about the fifth day, or as soon as the milk is fit for use. Nature intends for him to have this first milk and without it he is not apt to do well.

Do not attempt to feed him until he gets good and hungry. Sometimes it is well to let him miss a meal altogether so that he will better appreciate his first dish dinner. Take some fresh, warm milk direct from the cow, and wetting a finger in it insert the same within the calf's mouth, while with the palm of the hand push his nose down into the milk. Once he gets a smell and a taste of the satisfying draught he is quick to take a hold. When you are sure he is getting the milk, slip out your finger. If he stops drinking let him have it again. Have patience and be easy and the lesson will soon be over with little need of repetition. Getting cross and abusing the calf is always poor policy.

Give about two quarts and a half of warm, new milk to begin with, increasing to three after a few days. When two weeks old you can begin substituting skim milk from the separator, no more than a pint at first, but gradually increasing the amount of skim milk and decreasing the new until at four weeks of age he is subsisting altogether on skim milk.

Always be sure it is at just the right temperature (that at which it is taken from the cow) and see that all foam is removed. These are two very important items, oft neglected, to the detriment of the growth of the calf. The foam which gathers on separator milk is apt to produce bloating which not infrequently causes death, while too much milk or feeding at too low or high a temperature results in indigestion and scours. Sour milk has something of the same effect and had better be fed to the hogs. If a calf is lucky enough to survive such feeding he is generally a poor specimen, pot bellied and stunted. A little oil meal, no more than a half cupful to begin with, may be added to the separator milk. This amount can be increased half a pint, later. If some corn and oat chop is kept in a trough where he can have free access to it he will not be long in finding out what it is good for. Some bright, green hay or cured alfalfa will also prove attractive and you will be surprised how soon he will be nibbling at it. Provide salt and clean drinking water and watch your calf grow.

The fall calf has a much better chance for quick, healthy growth than the summer calf, as he escapes the ravages of flies and the sweltering heat.

TWO RECORDS—A CONTRAST.

To the Editor of The Homestead:

Certain eastern breeders of dairy cattle are inclined to ridicule Wisconsin and other central western states because they do not force their cows to the same phenomenal records. A careful examination of the records of one of the most widely exploited breeds has revealed some significant facts in defense of the western practice, however. Of the eleven A. R. daughters of a famous sire who made their records as two year olds, most have failed to repeat. The dams of these cows produced about 400 pounds of butter fat, while the daughters were forced to seven and eight hundred. A lot of dead calves is all that remains of the third generation.

Contrast another noted family of the same breed. The first cow produced four good instead of one star record. She has four daughters, each admitted to the A. R., and some with two or three records. A fifth daughter is now qualifying. Dead calves have been the exception rather than the rule.

The lesson—an obvious one—is being heeded by sane breeders. It is no longer the one cow producing a thousand pounds of butter fat or more, but generations of cows producing 500 and 600 that is being striven for. Instead of forcing her under hot-house conditions to abnormal and ruinous production, they give her every opportunity to do her best and yet continue her usefulness from year to year.

In fact, it is a pretty safe guess that those who breed for quality, such as color in milk and animal, hardiness, breeding power, and stamina will produce the cow that will be most in demand. A few millionaires may continue to gain notoriety by forcing an exceptional cow to give one extraordinary record, but this will do the breed little good other than some indirect advertising, and may do much harm by diverting the unwary breeders towards false gods.

W. A. Freehoff.

HEIFER CALVES.

To the Editor of The Homestead:

With the present high prices and scarcity of good dairy cows, it will pay every dairyman to keep all his heifer calves for future producers. If you purchase what someone else has raised you are in the dark, as to their milking and breeding qualities, while if you grow your own stock, you have a pretty good idea as to their good or bad qualities.

Of course, the good heifer calf must come from a good producing cow, and a sire of merit from a well producing dam. Before the calf is born, the cow must be fed on something that will nourish the cow and unborn calf. This feed must contain both protein and mineral matter, and enough must be furnished to supply both the cow and calf. Feeding the cow, means feeding the calf also.

Allow the calf to remain with the mother, the first two or three days after it is born, so that it may take the warm milk direct from the udder. Nothing will take the place of the natural methods of suckling for the first few days of the calf's life, as the milk from a fresh cow contains special ingredients for starting the stomach and bowels of the young calf in good working order. Many seem to think that the calf should be removed from the cow before it has taken nourishment in the natural way, when it is intended to be raised by hand. Such a notion is erroneous. The calf can be taught to drink from a pail, after it has remained with its mother for two or three days, and will hardly know that it ever knew its mother. The young heifer calf should be given all the chances possible. It should be provided with a clean, warm, and well-ventilated stall. For the first two weeks it should be fed at least three times daily, and should receive only its dam's milk. For the average calf, about two quarts at a feed will be the proper amount, but this amount must be increased as the calf grows older. When the calf is three to four weeks the whole milk may be partly replaced by skim milk and the feeding reduced to twice per day. It will begin to nibble at hay and other solid foods, after it is five to six weeks of age. It should be fed corn, oats, and clover hay, every day, after it learns to eat.

GALLOWAY ON THE BEEF SUPPLY.

The problem of how to secure an adequate supply of beef cattle in this country has always seemed comparatively simple to me," said Beverly T. Galloway, assistant secretary of agriculture and a former Missourian, who is acting head of the department in the absence of Secretary Houston.

"If the farmers of the country are assured of a fair profit they will raise sufficient beef cattle to supply the demand in this country and export large quantities. The day of the great ranges is past. The American consumer must look to the farmer for his beef supply. The farmer is not in the habit of engaging in the raising of any crop as a philanthropy. The reason there has been a falling off in the supply of cattle and other food animals is simply that the farmer cannot afford to raise them at a loss. Where a man can raise large numbers of beef cattle he can make a good profit, but the average farmer can not raise cattle in large numbers. If he raises only a few under existing conditions he is almost certain to lose money.

"One way to remedy this condition is to establish municipal abattoirs and see that they are properly and efficiently operated. There are two such abattoirs in Texas, and they are successful. In the South of Europe the municipal abattoir is an established institution. This is true also of Germany. When there is a municipal abattoir within reach the average farmer is always assured of a fair price for his beef cattle and other food animals. He can drive them to the abattoir at any time and have them slaughtered, dressed and sold for him.

"At present if a farmer drives a few head of cattle to town he probably will be sent from one dealer to another, all offering the same price for them on the hoof, and that not a fair one. Either he will sell his cattle at their price or drive them back home at a further loss. Assured of a steady market and a fair profit, the average farmer would raise beef cattle or any other product in sufficient quantities to supply the demand of the consumer.

"It is safe to say that 90 per cent of the farmers of this country today are making only a living and paying their taxes. The farmer is entitled to more than this. He is entitled to enough to live in comfort and to educate his children and have a little leisure time in

One Sharples Milker Does the Work of Three Men

SHARPLES MILKER

Represents all that is best and permanent in mechanical milking

Think of the importance—the great advantage—the economic value—and what it would mean to you in the saving of time, trouble, labor and money if you installed a Sharples Milker in your dairy—today.

It would mean that with the Milker one man could do the work of three. It would eliminate the tedious, disagreeable, slow hand milking—known as dairying drudgery. It would mean a better and more contented class of employees. It would mean that you would be able to accomplish the conditions that would *save time, trouble, labor and money.*

Still more—you would be assured a purer and more marketable product, low in bacterial count, as all stable air is entirely excluded and all milking parts are easily and quickly cleaned.

Cows take to the Sharples Milker and stand quietly and more contentedly than when milked by hand, for it always milks a cow in exactly the same way every time. It is regular and gentle. It fosters milk production by keeping the cows in better condition. The Sharples has the "teat cup with the upward squeeze."

The fact that more than fifty thousand cows are being successfully milked today by the Sharples Milker, should alone convince you that it would be to your interest to investigate.

Agencies Everywhere

Keep It Off The Cows Put It On The Fields

You can't make an old stable with dirt floors and wood partitions sanitary. Wood partitions gather dust and disease germs. Dirt floors with their tramped-in filth should never come within a stone's throw of your milk pail. When a cow gets off her feed and her milk yield falls below normal, look to your stable. It may be as clean as you can make it; but that may not be clean enough. ***Equip your stables***

The Louden Way

then profits will not fall off. The best treated cow gives the most milk—the best milk—the richest milk. She appreciates light and air, and you get your money back for making her home modern.

Put a **LOUDEN LITTER CARRIER** to work behind her. Your boys or your man will clean the barns in less time with less labor. We have been fitting up barns for fifty years. We will be glad to suggest what you need **without any expense to you.** Send for catalog; tell number of cows you have and submit rough sketch of stable.

LOUDEN MACHINERY COMPANY, 194 Broadway, Fairfield, Iowa

stead of slaving from early morning until late at night, day in and day out.

"Boys and girls leave the farm because they can get a larger return for their work in cities and towns. They will continue to leave the farm as long as this condition continues. When they find that the returns for their labor on the farm are relatively equal to the returns in the cities they will choose to remain on the farm.

"Men and women, boys and girls in cities and towns change their employment when better opportunities offer. Boys and girls and men and women in the country are entitled to do the same and that is why so many of them leave the farm and go to town.

"The intelligent farmer of today simply must 'see something coming in' if he is to devote his time to raising any given crop. For example, if he could be assured of receiving, say $1 per bushel for wheat at all times, he would raise all the wheat the population of the country would require for hundreds of years to come, and export a lot to feed people of other countries. The same rule applies to all staple crops, including beef cattle and food animals in general."

Dr. Galloway is not at all alarmed over the numerous reports that beefsteak will go to 50 cents a pound during the coming winter. Knowing that there has been a gradual falling off in the number of beef cattle raised and a steady increase in population, he is confident prices will remain high, but thinks the reports of 50 cent beef are ridiculous.

"We have recently freed 10,000 square miles in the South from the fever tick," said Dr. Galloway. "This section presents ideal conditions for raising beef cattle. Farmers in the South are beginning to wake up to the great possibilities of the live stock industry, and are organizing live stock associations to further the industry and protect each other. By this means they should be able to make a decided success of cattle raising. A business organization intelligently directed will go far toward solving the problem of a steady market and reasonable profit."

TO IMPROVE THE FRUIT MARKET.

To the Editor of The Homestead:

Preliminary steps are being taken by the fruit growers of Iowa, Kansas, Nebraska, Oklahoma, Missouri and Arkansas for bettering the fruit market and the quality of the fruit grown in the Mississippi and Missouri Valleys, the plan being to bring about co-operation between growers and buyers. A meeting was held in Kansas City during the early part of September, attended by representative fruit growers and a committee was appointed to form a permanent organization of the fruit growers of the six states mentioned. The fruit growers of each county will be organized by central boards in each state composed of members of the State Horticultural Board. The Missouri State Board of Horticulture, which represents 50,000 fruit growers, has endorsed the plan. A general convention of fruit growers will be held at Kansas City during the latter part of next January.

At this meeting the importance of spraying fruit trees during the growing season will receive a good deal of attention. All commission men and wholesale fruit dealers much prefer to handle only fruit from orchards which have been sprayed during the growing season, and it is predicted that in time commission men will refuse to handle cheap, wormy apples and other fruit from orchards which have not been properly sprayed. In this connection a significant statement was recently made by John Bland, secretary of the Missouri State Board of Horticulture, in speaking of the apple crop of the state this year, which he says will be 40 per cent less than last year. He said the small yield was due to the fact that fruit growers failed to spray their trees, rather than to the drouth.

This is the case during every drouthy summer, and it is natural that it should be so, since fruit trees stand the drouth better than annual crops, and remain green all the summer. When the corn and other growing crops are shriveling up and dying the green fruit trees naturally suffer more from the depredations of insect pests unless the trees are sprayed at proper intervals. It is therefore more necessary, if possible, to spray during an unusually dry spring and early summer than at any other time, not only because the insects give more attention to the fruit trees than during seasonable years when annual crops are green and luxuriant, but also because all fruit is higher in price during and after a drouthy summer, and it is therefore important that the quality be good, so as to secure top prices, and enable farmers to make up for the loss they have sustained by reason of the poor yield of annual crops.

Another feature of fruit marketing which could be greatly improved would be the working up of extra ripe fruit—peaches, plums, pears, etc., so as to get as good prices for fruit in this condition as when it is not quite so ripe. There is no reason why luscious freestone Elberta peaches should sell at a reduced price just when they are in the best condition for eating. They are always started from the orchards when a little hard, so that the commission firms in the city can get rid of them before they become overripe and as matters stand now they are generally sold at a sacrifice when they are in the best condition for immediate eating.

There should be a great co-operative canning and preserving plant in every large fruit market, such as St. Louis, Kansas City, Little Rock, St. Joseph, Omaha, Des Moines and Chicago, where the surplus fruit might be canned or preserved whenever the market became overstocked on certain days, and the fruit was in danger of spoiling on the dealers' hands. These canning plants should be joint stock concerns owned by the wholesale fruit men and representative growers who wished to take stock, and therefore every one would be interested in their success. Then a wholesale dealer with a heavy stock of fruit on hand which he could not dispose of quickly in the ordinary process of trade could send it to the canning factory to be worked up into delicious preserves of different kinds.

For ordinary canning, peaches and other fruit should not be too ripe, but for making jams, fruit butters and other conserves thoroughly ripe fruit is better than if unripe.. Millions of pounds of ripe fruit could be worked up in this way at an immense preserving plant, and at a fair price to the shipper. The grower should have a reasonable price for his fruit, no matter whether it is sold fresh to consumers or worked up into preserves or some other kind of finished product. It is not the fault of the grower if his fruit becomes overipe in the hands of the wholesaler, and he should have a fair profit on it just the same.

I. M. Motes.

Prompt removal of and destruction of all diseased portions of trees is the only remedy to stop infection and prevent the formation of cankers in the limbs when fireblight attacks the orchard, according to George F. Potter, horticultural expert of the University College of Agriculture. Fireblight has gained a firm hold in Wisconsin and takes its name from the peculiar scorched appearance that it causes in the twigs through the wound or prick in the soft growing tip.

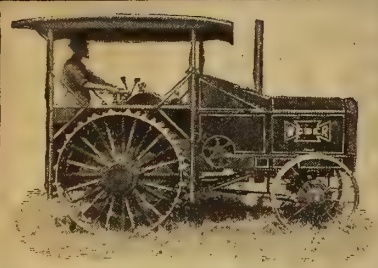
Redhead's Jersey Bulls

I CAN beat them all on price and quality on bull calves in crates. Also one mature herd bull and 2 yearlings. Geo. S. Redhead, Des Moines, Ia.

REGISTERED JERSEYS, gilt-edge butter stock. Young bulls ready for service and cows in milk. Also some fall yearling Poland China boars and sows. Call on or address E. S. Buffum, Le Roy, Decatur county, Iowa.

THE BEST JERSEYS—Some choice bulls, few females. Address H. C. Young, Lincoln, Neb.

WEBER WINS



Four Cylinder 35-H.P. Weber Tractor

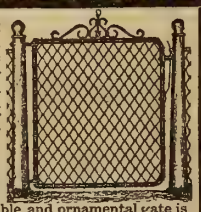
In field trials at the Fremont, Neb., Tractor Meet, Sept, 13th, the "Weber" carried off the honors from 39 competitors. **Its low price, compactness, light weight, durability, four cylinders, ball-bearings, enclosed parts and inexpensive power** earned the popular verdict. Backed by Weber's 30 years reputation. **Five years** ahead of competition. The most efficient tractor made. It proved that any farmer could

SAVE $1,000.00.

The farmer's best investment. Tractor pays for itself the first season. **Free Trial.** Full factory guarantee. Write for illustrated book.

AMERICAN GAS ENGINE CO.,
Dept. 2800 Kansas City, Mo.

$1 90 FOR THIS DANDY GATE



These gates are not a special lot built down to a low price, but are full of the same quality, satisfaction and durability which can be obtained in any of our **triple-galvanized, high-carbon steel**

Iowa Gates

The filling of this serviceable and ornamental gate is extra close diamond mesh. Gate has strong frame, patent latch, etc. Comes in all sizes; plain and fancy tops.

Style E Farm Gate, illustrated below, is another leader sold at a much lower price than asked for other gates of its kind. Painted or galvanized. All sizes.

The best lumber dealer in your town has these gates on sale. If you don't know his name, write us for booklet, name of dealer, special prices, etc.

IOWA GATE CO., 9th St., Cedar Falls, Ia.

Don't Guess—Weigh It

Grain and Stock are too high in price to be "guessed off." Whether you are buying or selling you can't lose if you weigh it on a

"McDonald Pitless" Scale

So accurate they are used for weighing U. S. Mails—accuracy guaranteed for 10 years.

Never freeze—the Patented Bearings are protected from snow, ice and dirt—cannot freeze. Require no pit—are easy to erect.

We can save you money.

BLOOMFIELD NEW JERSEY

St. Joe's Interstate Revived

Despite a Late Start, the New Management of the Interstate Fair and Live Stock Show Made a Very Creditable Showing

THE effort to put new life into the Interstate Fair and Live-stock show at St. Joseph this year, by bringing it out under a brand new management backed by the stockyards, met with fair success. At least the majority of the visitors who attended that exposition between the dates of September 22d and 27th, agreed that St. Joe had made a good beginning and that with the nucleus which they have they are in a fair way to build up the big show of which they dream. All this will, of course, take time, but backed by the packing interests and the substantial business men of St. Joseph, as is this association, it seems quite probable that their expectations will in time be realized. The attendance was at no time large, but it was representative of the Interstate territory over which St. Joseph holds sway, and was upon the big days augmented by crowds from the city itself, who were anxious to see a real cow and pig and by their presence lend support to the efforts of their fellow townsmen. The weather, too, was interstate in nature. The week opened with Kansas sunshine, which later gave way to Missouri clouds, followed by Iowa rain. Finally, however, Nebraska breezes, at times almost too cool to be comfortable, won out, and the last two days were almost ideal except for the rather muddy footing.

Any live stock exposition lives or dies according to the interest manifested in it by stockmen. The substantial cash premiums offered at St. Joe brought out some of the finest herds in the country. Most of the exhibitors were well pleased with the show and doubtless will return another year, if the inducements are sufficient. Nearly every one who strayed through the building in which were housed the agricultural exhibits was surprised at the size of the ears of corn and with the bigness of the apples. So far as the exhibits there shown indicated, there had been no dry weather in "interstate territory." Ears of Reid's yellow dent, of this year's growth, as long as are to be seen any year, were on exhibition in the fine display of grains, grasses and fruits made by Buchanan county, Missouri. The apples were equally striking. Andrew county, Mo., was represented by a small but high-class display. In this same building was a fine fertilizer exhibit made by one of the local packing companies. The exhibit of grains and grasses grown this year in upper Wisconsin, and shown by the Wisconsin Immigration Commission, received much favorable attention, which was well deserved.

Poultry fanciers from the city, as well as those who make chickens a side line to farming, were well satisfied with the small but "classy" collection of fowls which was housed on the second floor of one of the buildings and so was missed by many. E. L. McDonald was superintendent of the poultry. All of the substantial breeds and several of the fancy kinds were represented.

For some strange reason the machinery men were not much in evidence. Only seven firms were on hand. Two silos, a patent gate, a hay press, some feed grinders and two tents containing farm implements comprised the machinery section. There were a number of automobile displays. It is greatly to be regretted that there were so few exhibits of machinery. St. Joe, located as it is in the very heart of one of the finest farming sections in the entire world, naturally draws a crowd that would appreciate to the fullest extent, a good display of implements, engines and machinery. On the other hand, it would hardly justify the great expense attached to moving and setting up one of the big exhibits unless the fair were so well advertised that a large attendance would be assured. It takes time for people as well as exhibitors to form the fair-going habit and until a young fair matures it will have to be patient and put up with what it gets. There is plenty of room for growth in the machinery section at the Interstate.

The races were good and well attended despite the fact that rain made the track too heavy on two of the five days of the fair. Electric lights were strung around the track and a few night races were run, which, together with several entrants of fancy light horses and the big six-horse team of Swift & Co., comprised the program for the night shows. Auto polo, a game in imitation of regular polo, or "horse-back shinney," was one of the features of the amusements, which, owing to its novelty, attracted more than usual attention.

The one feature of this fair which deserves more universal imitation was the old fiddlers' contest. Prizes were offered for the best fiddlers on the grounds and from far and near came old-time masters of the violin—no the fiddle—there were no violins or musical professors on the grounds—just plain fiddlers. From up the river, down the river, across in the Kansas hills and from the forks of the creeks they came, each more or less the worse for the wear of time, but each with that peculiar and whimsical smile and carelessness of dress peculiar to the men who have made the music for two generations of dancers. Each under his arm carried his precious fiddle. Many needed haircuts, some evidently had but one coat and that the one, none too good, either, which was upon their backs, but each one's musical instrument was shining and in perfect condition, bespeaking the good care which it had received. Among the more than twenty-five contestants was an old negro, Uncle Ben Harrington. Uncle Ben strongly reminded one of "Uncle Ned," whose virtues are extolled in the shovel and the hoe song. At least, he played for the delighted crowds upon a fiddle of his own manufacture. The tunes with which the competitors strove to outdo each other were reminders of other days when most everybody danced square dances and tangos and trots were unheard of. When tunes such as "Money Musk," "Leather Breeches," "Sally Good," "Billy in the Low Ground," and "Arkansas Traveler" were sawed out accompanied by much stamping of feet and nodding of heads the onlookers were almost as happy as the fiddlers.

Save for one or two nasty spots the sideshows seemed to be of an especially good class. It was a great mistake, however, to place them at the entrance of the grounds in such a manner that the visitor was immediately forced to pass through the shrieking, howling spielers, whether he cared to see them or not. This arrangement was, of course, partly due to the shape and size of the grounds, but could have been avoided to some extent. The proper handling of the amusement features is one of which fair secretaries still have much to learn, though most of them seem to be making progress.

The interest which the city of St. Joe took in the fair was manifested by the displays of art and fancywork. Few state fairs have had so many oil paintings on exhibition nor as good. The needlework display was so large as to require one floor of a good-sized building to house it, as did the paintings. All things considered and with due allowance for the newness of the Interstate and the inexperience of some of the men in charge of various departments, it was a good fair. To say that it was in every way all that could be hoped for in the way of an exposition in keeping with the community which this show is supposed to represent, would be the grossest kind of misrepresentation. With all fairness, however, it must be said that at St. Joe this year was presented a fair big enough to be out of the county-fair class and well on the way towards something better. With time for growth and adequate backing and management it will become a big one. No doubt it will continue to receive the proper backing and the management. Time will do its part.

THE CATTLE SHOW.

By far the best live stock showing made at the Interstate Fair was in the beef cattle classes. All told there were 220 head exhibited, but these were the pick of the show cattle from half a dozen states. Herds from both the northern and southern circuits headed for Sedalia and the Royal, here met for the first time. It is very doubtful if a single state fair of the season has seen as high a percentage of quality cattle. Each herd was trimmed down by its owner to only those animals which had already justified their transportation by previous winnings, and so the cattle show was really and truly a good one. J. O. Bryant, of Savannah, was the superintendent. All the divisions in the Short-horn, Hereford and Aberdeen Angus classes were filled with entries. There were only two herds shown for Galloway honors and the same number in the Polled Durham class.

SHORT-HORNS.

So far as the Short-horns were concerned it was most assuredly an Interstate show. Seven different states were represented by the eight herds that were entered. This breed was not only up to their usual high standard of quality, but outnumbered all other breeds with sixty-six entries. Rees, Kane and the Farmer Farm dominated the Short-horn show, dividing most of the good monies between them.

There was some misunderstanding over a special class which was entered in the catalog as a Missouri Short-horn Special. Most of the breeders were under the impression that this was to have been an Interstate special limited to entries from Missouri, Kansas, Nebraska and Iowa as it should have been. As there was only one Missouri herd on the ground and that herd was not large enough to win all the money in this class, part of the premiums went a-begging. The Short-horn placings were decided by John Tomson, of Dover, Kan.

Exhibitors: E. M. Hall, Carthage, Mo.; the Farmer Farm, St. Paul, Minn.; Wm. Herklemann, Elwood, Iowa; Owen Kane, Wisner, Neb.; H. Rees & Sons, Pilger, Neb.; W. W. Brown, Amenia, N. D. Achenbach Bros., Washington, Kan.; Leeman Stock Farm, Hoopeston, Ill. The awards:

Bull 3 Years and Over—1st Rees on Whitehall Rosedale; 2d Leeman on Lochlin Dale; 3d the Farmer Farm on Day Breaker.

Bull 2 Years and Under 3 (2 shown)—1st Hall on Princely Sultan; 2d Brown on Village Sultan; 3d Herklemann on True Cumberland 3d.

Senior Yearling Bull (1 shown)—the Farmer Farm on Cornerstone.

Junior Yearling Bull (1 shown)—Kane on Radium.

Senior Bull Calf—1st Kane on Royal Dale; 2d Rees on Sultan Goods; 3d Hall on Village Flash; 4th Brown on Lochinvar; 5th Rees on Silver Goods 2d.

Junior Bull Calf—1st Kane on Dale Clarion; 2d Rees on Radium Goods; 3d the Farmer Farm on Lancaster Duke; 4th Hall on Hallwood Count 2d; 5th Herklemann on Sultan Goods.

Cow 3 Years and Over—1st Brown on Mabel Marshall; 2d Rees on Lady Cumberland; 3d Brown on Irene Avalon; 4th Achenbach on Lady Myrtle.

Cow or Heifer 2 Years and Under 3—1st the farmer Farm on Pleasant Mildred; 2d Rees on June Goods; 3d Brown on Christobel; 4th Herklemann on Mildred of Oakland.

Senior Yearling Heifer—1st and 2d the Farmer Farm on Sittyton Anna and Maria; 3d and 4th Hall on Choice Princess and Hallwood Golddrop.

Junior Yearling Heifer—1st the Farmer Farm on Lancaster Duchess 7th; 2d and 3d Kane on Isabella and Betty Dale; 4th Rees on Fancy Goods.

Senior Heifer Calf—1st Kane on Sweet Afton 3d; 2d Rees on Blooming Violet; 3d the Farmer Farm on Village Blythesome; 4th Hall on Hallwood Dot 3d; 5th Herklemann on Missie 4th.

Junior Heifer Calf—1st Kane on Wellington Goldie 2d; 2d Brown on Laurel; 3d Rees on Roberta's Lady; 4th and 5th Herklemann on Good Princess and Missie's Queen.

Senior and Grand Champion Bull—Rees on Whitehall Rosedale.

Junior Champion Bull—Kane on Radium.

Senior Champion Cow—the Farmer Farm on Pleasant Mildred.

Junior and Grand Champion Cow—the Farmer Farm on Lancaster Duchess 7th.

Aged Herd—1st Rees; 2d the Farmer Farm; 3d Hall.

Young Herd—1st Kane; 2d Rees; 3d the Farmer Farm.

Calf Herd—1st Kane; 2d Rees; 3d Brown.

HEREFORDS.

While there were only three herds of "white faces" present, previous winnings this season had already demonstrated their superiority. Harris, of course, carried off all the purples—which seems to be a Harris habit—but he was crowded out of a number of firsts by Tow's splendid animals. Klaus Bros. held up their corner in good shape. William Hutcheon, of Bolckow, Mo., had little trouble with the placing which was in most cases very satisfactory. All the entries in this class were in the splendid condition which they have maintained throughout the season.

Exhibitors: Cyrus A. Tow, Norway, Iowa; O. Harris & Sons, Harris, Mo.; Klaus Bros., Bendena, Kan. The awards:

Bull 3 Years and Over—1st Harris on

Prince Perfection; 2d Klaus on Beau Onward; 3d Tow on Baron Fairfax.

Senior Yearling Bull—1st and 2d Harris on Repeater 7th and Gay Lad 9th.

Junior Yearling Bull—1st Tow on Fairfax Prince; 2d Harris on Gay Lad 12th; 3d Tow on Standard 6th; 4th Klaus on Beau Onward 15th.

Senior Bull Calf—1st Tow on Distinction 2d; 2d Harris on Repeater 18th; 3d Tow on Standard 11th; 4th Harris on Gay Lad 15th.

Junior Bull Calf—1st and 2d Tow on Disturber Jr., and Distinction 4th; 3d Harris on Gay Lad 23d.

Cow 3 Years and Over—1st Harris on Disturber's Lassie 4th; 2d Tow on Miss Brae 29th; 3d Klaus on Miss Filler 24th.

Cow or Heifer 2 Years and Under 3—1st Harris on Harris' Princess 215th; 2d Tow on Defender's Lassie 4th; 3d Harris on Princess Repeater 3d; 4th Klaus on Miss Filler 37th.

Senior Yearling Heifer—1st Tow on Disturber's Lassie 6th; 2d Harris on Miss Gay Lad 7th; 3d Klaus on Miss Onward 5th.

Junior Yearling Heifer—1st Harris on Miss Repeater 11th; 2d and 3d Tow on Disturber's Lassie 8th and Disturber's Lassie 7th; 4th Klaus on Miss Onward 9th.

Senior Heifer Calf—1st Harris on Miss Gay Lad 15th; 2d and 3d Tow on Lady Standard and Disturber's Lassie 9th; 4th Harris on Miss Gay Lad 16th.

Junior Heifer Calf—1st Harris on Miss Perfection 6th; 2d Klaus on Miss Wilton 33d.

Senior Champion Bull—Harris on Prince Perfection.

Junior and Grand Champion Bull—Harris on Repeater 7th.

Senior and Grand Champion Cow—Harris on Disturber's Lassie 4th.

Junior and Grand Champion Cow—Harris on Miss Gay Lad 11th.

Aged Herd—1st Harris; 2d Tow; 3d Klaus.

Young Herd—1st Harris; 2d Tow; 3d Klaus.

Calf Herd—1st Tow; 2d Harris; 3d Klaus.

Get of Sire—1st Harris; 2d Tow; 3d Klaus.

Produce of Cow—1st and 2d Harris; 3d Klaus.

ABERDEEN ANGUS.

Two Iowa and two Missouri herds opposed each other for Angus honors. There were about fifty head all told and all were shown in the pink of condition. McHenry carried off champion bull honors with Irwin C., just as he has done so many times before. Caldwell secured the purple for the junior bull. The champion females were all shown by Catterson. Decisions were made by James McClung, of Indianola, Neb. Exhibitors: R. M. Anderson, Newell, Iowa; Omer Catterson & Son, Maryville, Mo.; W. A. McHenry, Denison, Iowa; C. D. and E. F. Caldwell, Burlington Jct., Mo. The awards:

Bull 3 Years and Over—1st McHenry on Erwin C.; 2d Catterson on Quality Lad.

Bull 2 Years and Under 3—1st Catterson on Queen's Ito Lad; 2d Caldwell on Kiahagea; 3d Anderson on Enus 3d.

Senior Yearling Bull—1st Caldwell on Ebony of A. 3d; 2d Anderson on Provo 2d; 3d Catterson on Edward Ito; 4th McHenry on Quality Prince 2d.

Junior Yearling Bull—1st Catterson on Blackbird of Beverly; 2d Caldwell well on Kiahogea; 3d Anderson on Enus 4th.

Senior Bull Calf—1st Caldwell on Black Star 2d; 2d Anderson on Prince of Elchie's; 3d and 4th Caldwell on Ebony of A. 5th and Pisgah.

Junior Bull Calf—1st Anderson on Lord Melamere; 2d Catterson on Even Ito.

Cow 3 Years and Over—1st McHenry on Black Cap McHenry 88th; 2d Anderson on Pride of Blackstone; 3d and 4th Caldwell on Pride Petite 3d and Queen Mother Johnson 5th.

Cow or Heifer 2 Years and Under 3—1st Catterson on Erica Dean; 2d and 3d McHenry on Coquette McHenry 37th and Pride of McHenry 100th; 4th Caldwell on Blackbird Chloe 2d.

Senior Yearling Heifer—1st Catterson on Maplehurst Pride 18th; 2d Caldwell on Erito C.; 3d McHenry on Pride McHenry 109th; 4th McHenry on Pride McHenry 108th.

Junior Yearling Heifer—1st Catterson on Maplehurst Queen 25th; 2d and 3d Anderson on Jilt 67th and Pride 2d; 4th Caldwell on Dutchess Ronald Lady 6th.

Senior Heifer Calf—1st Anderson on Eulima 28th; 2d Caldwell on Eritus; 3d Catterson on Blackbird's Pride.

Junior Heifer Calf—1st Anderson on Jilt 70th; 2d Catterson on Maplehurst Pride 25th; 3d Caldwell on Pride Cap Lady.

Senior and Grand Champion Bull—McHenry on Erwin C.

Junior Champion Bull—Caldwell on Ebony of A. 3d.

Senior Champion Cow—Catterson on Erica Dean.

Junior and Grand Champion Cow—Catterson on Maplehurst Pride 18th.

Aged Herd—1st McHenry; 2d Anderson; 3d Catterson.

GALLOWAYS.

Kansas alone was represented by Galloway herds. Delays in judging the other breeds and a wreck which held up the Croft herd made it necessary to postpone the placing until the latter part of the week. All things considered honors were pretty evenly distributed between the Capital View herd of Silver Lake, Kan., and S. M. Croft & Sons, Bluff City, Kan. The total number entered in both herds was about twenty-five. Mr. McClung also decided the awards in this class.

POLLED DURHAMS.

The hornless Short-horns were well represented. Achenbach Bros., Washington, Kan., made an especially fine showing and carried off a good share of the money. The Leeman Stock Farm, Hoopeston, Ill., was the only other herd with entries. As there were but ten animals in each herd not all of the divisions were filled and so the class was incomplete. Mr. Tomson presided as judge.

DAIRY CATTLE.

There were sixty head of dairy cattle entered by five exhibitors. The entries varied from some of the finest milk and butter-producing and breeding animals in the country to the family milk cow which had been brought up out of the back pasture and dedicated to the occasion. W. L. Hunter, Lincoln, Neb., was judge. Iowana Farms, Davenport, Iowa, showed twenty head of extra fine Holsteins which were the only representatives of the black and white milk breed, and so won all the places. This herd was in condition to meet stiff competition.

Fourteen head of Jerseys were entered by J. B. Smith, Platte City, Mo. Robert I. Young, St. Joseph, Mo., entered twenty-two head, but was beaten by Smith in most of the firsts and all of the championships. Mr. Roderick, St. Joseph, Mo., and Mrs. I. B. Smith, Wathena, Kan., each had two entries.

One herd of Brown Swiss, exhibited by Dohlan & Schmidt, Eldorado, Kan., completed the dairy cattle show.

FAT CATTLE.

The quality which was so much in evidence with the breeding cattle was maintained in the steer show. Only five herds had entries of butcher stuff, but these totaling something like twenty-five head were from herds that had many times sent representatives to the top at former Royals and Internationals. The "white face" breed captured the champion steer ribbon, but divided evenly with the Short-horns on the firsts. Much interest was manifested in the judging of these classes. William Hutcheon officiated.

Exhibitors: Cyrus A. Tow, Norway, Iowa; E. M. Hall, Carthage, Mo.; W. W. Brown, Amenia, N. D.; R. M. Anderson, Newell, Iowa. The awards:

Steer, Spayed or Martin Heifer, 2 Year and Under 3—1st Tow on Bonnie Brae 40th (Hereford); 2d Tow on Denver (Hereford); 3d Brown on Dick Turban (Short-horn).

Steer 1 Year and Under 2—1st Brown on Tommy (Short-horn); 2d Tow on Standard 1st (Hereford); 3d Anderson on unnamed (Angus).

Steer Under 1 Year—1st Brown on Young Harry (Short-horn); 2d Hall on Hallwood 2d (Short-horn); 3d Tow on General (Hereford).

Group consisting of one animal 2 year and under 3; one animal 1 year and under 2, and one animal under 1—1st Tow; 2d Brown; 3d Tow.

Grand Champion Steer—Tow on Bonnie Brae 40th.

THE HORSE SHOW.

Had the other draft breeds been as well represented as were the Percherons this department of the show would have been most creditable. In all there were fifty head of drafters entered by five exhibitors and save for the two Belgian stallions these were all Percherons or French Draft. The money offered in the Clydesdale and English Shire classes was not disturbed. Swift had one of his "big sixes" there, and these with the Shetland ponies made up the show.

PERCHERONS.

As the majority of the draft horses were Percherons and the remaining one-fourth French Draft entered by the same breeders most of the contesting in the horse show lay between the Percheron Importing Co., St. Joseph, Mo., and Lee Bros., Harveyville, Kan. Brown & Walker came in for a few firsts in the Percheron class, but despite the fact that their aged stallion, Helix, was the grand champion at the 1910 International he was unable to win first in the aged class against the Percheron Importing Company's Joel. This occasioned some surprise, but a careful comparison of the two horses plainly indicated that Kirk's horse, this year showing for the first time as a senior, is really in condition to make some others hustle before the season's end. J. F. Roelofson, Maryville, Mo., and P. G. McCulley, Princeton, Mo., each exhibited several head and won their share. They are deserving of especial mention, as there is nothing which adds more to the interest and value of a draft horse show than does the attendance of the man with a few native-bred animals. His presence offers competition for the big importer and breeder and lends encouragement to other men starting in the business. The horse awards were decided by John DeLancy, Northfield, Minn.

Exhibitors: Percheron Importing Co., South St. Joseph, Mo.; Lee Bros., Harveyville, Kan.; J. F. Roelofson, Maryville, Mo.; Brown & Walker, Clarinda, Iowa; P. G. McCulley, Princeton, Mo. The awards:

Stallion 4 Years and Over—1st Percheron Importing Co. on Joel; 2d Brown & Walker on Helix; 3d and 4th Percheron Importing Co. on Insolent and Jalon.

Stallion 3 Years and Under 4—1st, 2d and 3d Percheron Importing Co. on Kazo Karillon, and Keith.

Stallion 2 Years and Under 3—1st Lee on Reinhard; 2d and 3d Percheron Importing Co. on Legianaire and Logiste; 4th Roelofson on Dynamo.

Stallion 1 Year and Under 2—1st Brown & Walker on Belmont; 2d and 3d Lee on Moraine and Charamol; 4th Roelofson.

Mare 4 Years or Over—1st Lee on Beattie; 2d and 3d McCulley on Gaite and Grive.

Mare 3 Years and Under 4—1st and 2d Lee on Flora and Marceline; 3d Brown & Walker.

Mare 2 Years and Under 3—1st and 2d Lee on Lucille and Delia.

Mare 1 Year and Under 2—1st Lee on Madeline; 2d McCulley on Dorothy; 3d Brown & Walker on Miss Helix; 4th Lee on Monetta.

Foal Under 1 Year—1st McCulley on Wonder; 2d Lee on Brilliantine.

Best Five Stallions Owned by Exhibitor—1st and 3d Kirk; 2d Lee.

Best Three Mares Owned by Exhibitor—1st Lee; 2d McCulley; 3d Lee.

Two Animals Produce of One Mare—1st Lee; 2d McCulley.

Best Four Animals any Age, Get of One Sire—1st Lee.

Champion Stallion—Percheron Importing Co. on Joel.

Reserve Champion—Lee on Reinhard.

Champion Mare—Lee on Beattie.

Reserve Champion—Lee on Lucille.

INTERSTATE SPECIAL.

(Limited to Missouri, Kansas, Nebraska and Iowa-bred animals. First prize winners in open competition barred.)

Stallion 1 Year and Under 2—1st and 2d Lee on Moraine and Chramol; 3d and 4th Roelofson.

Stallion Under 1 Year—Lee on Brilliantine.

Mare 1 Year and Under 2—1st McCulley on Dorothy; 2d Brown & Walker on Miss Helix; 3d Lee on Monetta.

Mare Under 1 Year—Lee on Neta.

BELGIANS.

There were but two Belgians entered and both these were aged stallions entered for the championship ribbon. C. L. Henman, Halls, Mo., won with Fiston. The Percheron Importing Co. won the reserve ribbon with Farceur.

SWINE.

The swine show at St. Joe would have done credit to a much larger fair. There were a total of 325 animals entered, practically all the classes were filled and well-bred and well-fitted stuff was everywhere in evidence. The porkers were well quartered in the central part of the live stock section and occasioned much favorable comment. Messrs. McKelvie, Burns and Carroll acted as superintendents.

POLAND CHINAS.

Eleven breeders with a total of 113 animals made the show in the Poland China pens. The struggle for the blues was close and no one breeder succeeded in "hogging" them. John D. Lawson, Clarinda, Iowa, judged and divided the purples evenly between Phil Dawson and W. E. Epley, both of Nebraska. Practically every breeder came in for his share of the money and all agreed that it was a good show.

Exhibitors: W. Z. Baker, Rich Hill, Mo.; W. E. Willey, Steele, Neb.; E. E. Carver & Son, Guilford, Mo.; Dr. John Gildow & Sons, Jamesport, Mo.; W. A. Baker, Butler, Mo.; Phil. Dawson, Endicott, Neb.; J. C. Meese, Ord, Neb.; W. E. Epley, Diller, Neb.; J. W. Leeper, Norton, Kan.; Lloyd S. Taylor, Steele, Neb. The awards:

Boar 24 Months and Over—1st Baker; 2d Carver; 3d Willey.

Boar 18 Months and Under 24—1st Meese; 2d Baker; 3d Gildow.

Boar 12 Months and Under 18—1st Dawson; 2d Meese; 3d Carver; 4th Gildow.

Boar 6 Months and Under 12—1st Carver; 2d Meese; 3d Baker; 4th Dawson.

Boar Under 6 Months—1st and 2d Willey; 3d and 4th Meese.

Sow 24 Months and Over—1st Leeper; 2d, 3d and 4th Baker.

Sow 18 Months and Under 24—1st Epley; 2d, 3d and 4th Meese.

Sow 12 Months and Under 18—1st Gildow; 2d and 3d Meese.

Sow 6 Months and Under 12—1st Willey; 2d Meese; 3d Gildow; 4th Baker.

Sow Under 6 Months—1st Willey; 2d Taylor; 3d and 4th Meese.

Champion Boar 12 Months and Over—Phil Dawson on Dollar Mark.

Champion Boar Under 12 Months—Carver on Mammoth Expansion.

Grand Champion Boar—Dawson on Dollar Mark.

Champion Sow 12 Months and Over—Epley on Daisy.

Champion Sow Under 12 Months—Willey on Annie Price 30th.

Grand Champion Sow—Epley on Daisy.

Boar and 3 Sows Over 12 Months—1st Meese; 2d Gildow; 3d Baker.

Four Animals Any Age, Either Sex, Produce of One Sow—1st Willey; 2d Meese; 3d Gildow.

DUROC JERSEYS.

Next in numbers to the Polands came the Durocs with a total of sixty-nine head brought out by four breeders. H. B. Walter, Effingham, Kan., distributed the ribbons. B. Widle, Nebraska, won nearly all of the blues and purples except where headed off by R. W. Murphy, Missouri, who captured the boar championship and several firsts, and by Gertrude Crow, Kansas, who also won a few that were in good money. There was considerable quality among the reds and some of the aged stuff was especially attractive.

Exhibitors: R. W. Murphy, Cosby, Mo.; B. Widle, Genoa, Neb.; Gertrude Crow, Hutchison, Kan.; G. W. Briggs & Son, Clay Center, Neb. The awards:

1000% Returns From

the use of a Hercules Stump Puller. Bumper crops instead of stumps. Big money in place of taxes. $1,200 from 40 acres the first year—$750 in extra crops every year after. Get the catalog of the

CHESTER WHITES.

Only three additions showed the big white hogs, but between them they had sixty-three head of splendid specimens. Mr. Walter also refereed this contest and when the melee was over it was quite evident that Thos. F. Kent, Walnut, Iowa, had "made a cleaning," he having won all the championships and most of the blues. Waltmire, Missouri, followed closely after him, however, with some fine entries, but was unable to root him away from much of the top money.

Exhibitors: Thomas F. Kent, Walnut, Iowa; W. W. Waltmire, Peculiar, Mo.; S. D. & B. H. Frost, Kingston, Mo. The awards:

Boar 24 Months and Over—1st Kent; 2d and 4th Kent; 3d Waltmire.

Boar 18 Months and Under 24—Frost.

Boar 12 Months and Under 18—1st Frost; 2d Kent; 3d Waltmire.

Boar 6 Months and Under 12—1st Kent; 2d and 3d Frost; 4th Waltmire.

Four Animals Any Age, Either Sex, Produce of One Sow—1st Kent; 2d Frost; 3d Waltmire.

HAMPSHIRES.

There were sixty-one Hampshires in the pens, the property of three exhibitors. Again Mr. Walter made the decisions. The hogs with the white girdles made a strong showing. Brinigar, Missouri, and Fisher, Nebraska, put up the principal scramble for the firsts. Brinigar won the majority by a small margin and they divided evenly on the champsionships, the boars going to the Nebraskan and the sows to the Missouri man.

Exhibitors: G. S. Lawson, Ravenwood, Mo.; W. J. Brinigar, Blythedale, Mo.; Roy E. Fisher, Winside, Neb. The awards:

Boar 24 Months and Over—1st Fisher; 2d Brinigar.

Boar 18 Months and Under 24—1st and 3d Fisher; 2d Brinigar.

Boar 12 Months and Under 18—1st Brinigar; 2d Fisher; 3d Lawson.

Boar 6 Months and Under 12—1st Fisher; 2d and 3d Brinigar; 4th Lawson.

Boar Under 6 Months—1st Brinigar; 2d Lawson; 3d Fisher; 4th Brinigar.

Sow 24 Months and Over—1st and 2d Brinigar; 3d Fisher.

Sow 18 Months and Under 24—1st Brinigar; 2d Fisher.

Sow 12 Months and Under 18—1st Brinigar; 2d and 3d Fisher.

Sow 6 Months and Under 12—1st Fisher; 2d, 3d and 4th Brinigar.

Sow Under 6 Months—1st Lawson; 2d and 3d Brinigar; 4th Fisher.

Boar and Three Sows Over 12 Months—1st Brinigar; 2d Fisher.

Champion Boar Under 12 Months—Fisher on Fisher's King 5th.

Grand Champion Boar—Fisher on Dr. Scott.

Champion Sow 12 Months and Over—Brinigar on Blythedale Princess.

Champion Sow Under 12 Months—Fisher on Fisher's Queen 7th.

Grand Champion Sow—Brinigar on Blythedale Princess.

BERKSHIRES.

There was no excitement in the snub-nosed class. Mr. Lawson made the awards without any hesitancy, secure in the knowledge that there would be no dissatisfaction, for the eighteen Berkshires entered were all from one herd, that of the Iowana Farms, Davenport, Iowa. As far as these hogs would go around in the twenty-two divisions, they won everything. This herd was really an exceptionally good one and would have made some interesting competition had other Berkshire breeders been on the ground. Mr. Lawson placed the Berks.

SHEEP.

It was a good sheep show, although a small one, there being slightly more than 100 entries. There were Shropshires, South Downs, Cotswolds, Rambouillets, Oxford and Lincoln. Waltmire, Allen and Cook each had entries that divided the money up pretty evenly between them. James Lawson & Sons won a number of firsts with their Oxfords.

ALL TOGETHER FOR GOOD ROADS.

(Continued from page 3.)

throughout the state generally, was as follows:

Days' work with teams and graders, 144.

Days' work with teams and drivers with wheel scraper, 205.

Days' work with teams and drivers with slip scrapers, 1,083.

Days' work with teams and drivers hauling supplies, 75½.

Days' work with teams and plows, 198.

Days' work by single hands with pick and shovel, with scythes, with drills or with axes, 2,907.

Days' work with engine and grader, 13.

Pounds of dynamite used, 1,665.

Miles of road graded, 77 1-3.

Miles of brush and weeds cut, 78¼.

Hills worked on, 150.

Feet of 18-inch culvert pipe put in, 731¼.

Feet of 24-inch culvert pipe put in, 540.

Feet of 30-inch culvert pipe put in, 160.

Feet of 36-inch culvert pipe put in, 305.

Miles of road dragged, 10½.

Miles of hedge cut, 11¾.

Corners rounded, 26.

Bridges repaired, 19.

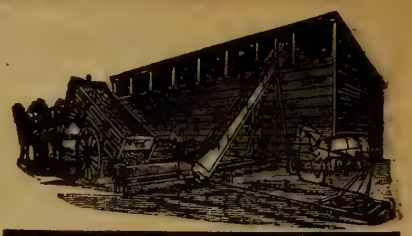
Culverts repaired, 23.

Total value of work or improvements, if paid for at the usual rates, $13,879.

Another county which rallied nobly was Pettis county (in which Sedalia is located) where the work was furthered by the bureau of agriculture, with S. M. Jordan and M. V. Carroll in command. The report of the highway engineer shows that 1,401 men worked on the roads in this county the two days. The highways were put in good condition and road sentiment was crystallized as never before in one of the most progressive and prosperous counties of the state.

The tobacco yield in the average Wisconsin field this year is medium to good, according to James Johnson, tobacco expert for the university college of agriculture. While a number of excellent crops were harvested, the general average of yields will not be as heavy as anticipated earlier because of unfavorable growing conditions during much of the season. Some crops made practically no growth after planting and inspection showed them to be badly infected with the root rot disease. It is estimated that the tobacco acreage for this year is about 40,000 acres, of which 15,000 acres is in Dane county.

Conclusive evidence that Kansas farmers are hard up, and are on the verge of bankruptcy is given in the fact that at a public sale near Independence one day last week the sales amounted to $3,500 and notes were given for less than $200, says the Kansas City Star.



CRIB CORN!

Do it the easy way! Get the facts about the "Little Giant" famous 4-wheel Green Machine. Find out how it dumps and elevates a 60 bu. load of ear corn in 3 to 5 minutes instead of 20 to 30 minutes the old way. *You take a rest*, and huskers keep on husking. No more scooping to do, no more lame backs after you get a

"LITTLE GIANT"

Men husk *20 per cent more*, when they don't have to *scoop*. They work for a quarter to a half-cent *cheaper*, when they don't have to scoop. Good huskers are *easy to get and keep* when there's no *scooping* to be done. Investigate the famous Little Giant Portable Elevator that makes *play* out of unloading and cribbing corn and all small grains! Shelled green corn and silk in the crib means rattage and molding. Our new screen feature in bottom section separates it from the ear corn and saves it for feeding.

Write for Free Book. Don't plan your fall work before you read our fine free book. Even if you are not quite ready to buy the "Little Giant," get the facts and *know* about the famous 4-wheel Green Machine when you *are ready*. A great Book of Crib Plans free if you are going to build or remodel your cribs. Write *now*. A postal will do. Address,

The Heider Tractor Again Leads Them All.

Runs Successfully on Either Gasoline, Motor Spirits or Kerosene

We have solved the fuel problem successfully. A simple device permits the use of either Gasoline, Motor Spirits or Kerosene at all speeds and puts our tractor in a class all by itself. A gallon of kerosene runs the Heider Tractor longer than a gallon of gasoline, and develops the same power, thereby doing the same work at less cost than any other tractor on the market.

Its 4-cylinder motor, light weight, great power, simple operation, economical fuel consumption, make it the best, most practical, all-purpose one-man tractor manufactured. Investigate before buying. Write today for free book on Tractor Farming.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. Thoroughly good and reliable veterinary remedies are advertised from time to time on these pages. If they were not good and reliable they could not appear in our paper. Our readers are requested to look them over. You may find here some remedy which will exactly fit your case. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

PINK EYE.

I have pink eye among my cattle and would like some advice on how to treat this disease and also precautionary measures.

Once or twice daily wash affected eyes with a 10 per cent solution of boric acid, applied on fresh swabs of cotton batting, and each other day dust the eyeballs with a mixture of equal parts of finely powdered calomel or iodoform and boric acid. Isolate affected cattle and feed them on light, laxative feed. Keep cattle off low, wet pastures.

KNUCKLING.

We have a yearling Clydesdale colt that appears to walk on its toes. The hoof is almost perpendicular in front. At one time both feet were that way, but one has returned to its normal position while the other seems to grow worse. This condition did not come on until the colt was about three months old. Have had a veterinarian trim the hoof, but he seems to do no good. The colt is a valuable draft animal and we would like to save it.

Three times a day stand the colt on a level floor and force the foot down flat on the floor, rubbing the back tendons thoroughly at the same time; then put on splints, or an ankle boot and brace to keep the fetlock in proper position. If this does not avail, after working for a month or two, the veterinarian, if a graduate, may decide to perform the operation known as tenotomy.

CONTAGIOUS OPHTHALMIA.

Some of my cattle have scums formed over their eyes. This commences with the eye becoming watery and looking dull, then the scum begins to form and keeps growing worse until the eye is covered with a white growth.

The disease is contagious, but need not cause loss of eyesight if properly treated. Isolate affected cattle and keep them for a time in a darkened shed or stable and on light, laxative or succulent feed. Wash the affected eyes twice daily with a saturated solution of boric acid, applying it each time with a fresh swab of absorbent cotton. Each other day dust the eyeballs with a mixture of equal parts of finely powdered iodoform and boric acid. If you cannot wash the eyes as advised, simply puff the powder once daily into affected eyes. Keep cattle off low, wet land.

COWPOX.

A two-year-old heifer was fresh in June. About six or seven weeks ago eruptions appeared on her udder, three or four at a time. These would break and heal up and others would take their place. These keep coming. Would her milk be safe to use?

Wash the udder twice daily with a solution of one ounce of granular hyposulphite of soda in a quart of soft water and then apply glycerine of tannin to the sores, as often as found necessary. Isolate the cow and milk her last, as the disease may be spread from cow to cow by the milker's hands. The milk may be used, provided it is unchanged in quality and the cow has no fever.

THRIFTLESS HEIFER.

A two-year-old heifer dropped her calf January 15th last and did fine until two months ago. The heat seemed to affect her and she would stand with her tongue hanging out and pant. Since the cool weather she seems to stiffen up, but is losing flesh and her hair looks rough. I have been feeding her mangels in the evening. She has been on pasture all summer. Her bowels seem to be all right and she chews her cud, but grunts most of the time as if in pain. She is to freshen again in December.

Tuberculosis probably gives rise to the symptoms described and so you should have the heifer tested with tuberculin to make sure. If the disease is present she should be destroyed.

FALL PIGS SHOULD HAVE A GOOD START.

To the Editor of The Homestead:

In order to get the most from pigs that come in the fall of the year it is necessary that they be given a good start while they are young. They must get enough growth and size to enable them to withstand the cold weather during the winter and keep up a constant growth. When the pig has stomach enough to hold a good deal of food he can resist the cold and make good progress and keep up good growth while the little fellow that has been stunted is shivering and remaining behind in growth all winter.

The mother should be in good flesh before farrowing time, and should have sufficient exercise to impart strength and vigor to her offspring. She cannot transmit to the pigs what she does not have herself and if she is thin and weak the pigs will come in like manner. She should be kept in good flesh, not fat, before farrowing, in order to do the best by her pigs.

The sow should be fed on sloppy foods for two or three days after the pigs arrive. At the end of a week she may be fed a fairly good feed of grain and sloppy feed. I consider corn too heavy a feed for sows at this time. A mixture of meal, wheat bran or middlings is good and if the sow can be given a run of grass all the time, it will be so much the better. Do not keep her too close. The pigs will remain with her, often getting too much fat and dying with the thumps as a result.

The pigs should be given a comfortable place in which to sleep. See that the pigs have an opportunity to exercise by the time they are a week old. When they are two weeks old they will begin to nip at the fresh grass, and by the time they are three weeks old they will be eating bran out of the trough with the mother.

A little trough that the pigs can get to, placed where the sow will not have access to it, and some dainty food placed therein, such as sweet milk and bread crumbs, will induce the little fellows to eat much sooner than they would otherwise. They soon smell the food and take hold of it.

The pigs may be fed two or three times a day after they have learned to eat. If any food is left in the trough let the mother clean it up. Try to give just what they will clean up, and increase the ration as their capacity increases. As the pigs grow older they may be fed on coarser material, but by all means make it palatable.

There are a number of reasons why the pigs should be fed well while young. The growth should be promoted to enable them to consume and make rapid gains. This will depend, to a great extent, upon their feeds. The weights made in pigs while young are made at less cost than can be possibly made when older. It is the sure way to encourage us to do our best by them. E. E. Rushing.

CARE AND ADJUSTMENT OF POWER MACHINERY.

To the Editor of The Homestead:

Power machinery often gives poor results for want of some very small adjustment. To keep power machinery at its greatest efficiency it is necessary that it be perfectly adjusted down to the smallest details, that its speed be steady and its bearings tight enough to prevent shafting from jerking or changing positions at high speed.

The average corn grinder should be run at 400 to 600 revolutions per minute to secure good results. Sometimes the burrs will be run so close together that a ringing, shrieking noise is thrown off and at the same time whole grains of corn will be thrown through the burrs. This shows the burrs to be out of adjustment.

There are two burrs: the stationary and the revolving. Nearly all of the stationary burrs have two lugs to adjust them and these lugs should project the same distance from the mill on both sides. Great care should be used to see that they be exactly the same if a uniform product of ground feed is desired.

The rotary burr is fastened to a revolving plate or disk. This disk is usually lathe turned and should need no adjustment, but in the cheaper mills the plates are very often out of true and to secure a uniform feed product it is necessary to put a leather or wooden wedge between the disk and burr. To get this setting correct requires some patience and the mill must be turned by hand very slowly while the nuts are adjusted until both burrs rub evenly all around. This will give a smooth even feed and require the smallest amount of power possible.

When this adjustment has been properly made the burrs may be tightened until the desired fineness is obtained and the operator need not be alarmed by the ringing noise thrown off by them.

The feed cutter should be run 350 to 550 revolutions per minute. The main knife shaft should always be kept tight, as a loose bearing may allow a knife to strike the cutting bar and cause a serious accident.

In setting these they should be set just close enough to the cutting bar that they can hardly be heard and tightened well to make sure they will not work loose. With this setting the feed will be cut perfectly.

Many farmers buy gasoline engines for one purpose only, but when they have the engine they see numerous other odd jobs it could be used for. Suppose they have an old fanning mill and do not feel justified in throwing it away to get a new power mill. In this they are right, as the old mill can easily be turned into a power mill at a few cents' cost. All that is necessary to make the change is to remove the crank, have the blacksmith weld a six-inch piece of steel on the fan shaft or supply a new one altogether. Now put a small wooden pulley on the added end of shaft of the correct size to turn fan at normal speed or just a little faster. Now if your mill has a wind board on side of fan to govern the amount of air your mill is ready for use. If not, make one and you have converted your old mill into an excellent power mill. W. H. Ruther.

$80 an acre net from peanuts via pork!

An acre of peanuts will produce three times as much pork as an acre of corn. Yet peanuts are raised by the same methods of tillage as corn, and instead of *depleting* the soil, as corn does, they enrich it.

At the Arkansas experiment station an acre of peanuts made 1,250 lbs. of gain on hogs, while an acre of corn made only 436 lbs. And 1,250 lbs. is not an extra good showing. Mr. Wright of Lufkin, Texas pastures his hogs on peanuts and makes *1500 to 1800* lbs. of pork per acre! Along the

Cotton Belt Route in Arkansas and Texas

peanuts **alone** pay big. J. M. Jones a farmer who lives 8 miles from Jonesboro, Ark., sold $953.32 worth of Spanish peanuts and peanut hay from 10 acres. Land that will yield big peanut crops can be bought **now** at $25 to $30 per acre.

Peanuts is just **one** of the money making crops of Arkansas and Texas. When you get fine land at $15 to $30 per acre; when you have a **mild short** winter and don't have to stall feed stock; when you get **all** the rain that **any** crop needs (40 to 50 inches), you'll make **big money**, no matter what you raise. With good roads, good schools, close markets, phones, **rural** delivery, churches, etc., you don't have to sacrifice **any** social advantage in Arkansas and East Texas.

Books by a farmer—free!

We got a practical farmer to travel all along the Cotton Belt Route and **talk** with the farmers themselves, get **pictures** of their farms and their **personal** statements. Because he **was** a farmer this man knew what you wanted to know about these sections and he tells you in these free books—showing **scores** of actual **photograph** pictures of the farms he visited. You must not miss seeing these books. Send me your name and address on a post card today.

CONSULTING VETERINARIAN. Advice and prescription by mail $1.

Are You Fattening Lice or Hogs?

Neglect of pens, runs and troughs makes hog lice—and disease—a probability.

The feeder who thinks unwholesome conditions harmless is, therefore, throwing away good money. The one *sure* road to profit in hog raising is by way of cleanliness and sanitation through use of

Dr. Hess Dip and Disinfectant

It destroys lice, the cholera germ, in fact, all germs of infectious diseases, when sprinkled about the premises. Powerful, harmless, easily applied. Make a solution, one gallon of dip to 70 or 100 gallons of water. Spray with this *thoroughly*. Prepare a plank-sided wallow and let the hogs roll in the dip solution. This treatment will end lice and, in addition, render hogs immune to cholera and other infectious diseases.

Dr. Hess Dip meets the Government requirement for sheep scab. Best thing known for sheep ticks and for spraying horses and cattle. Also a valuable agent for disinfecting sewers, sinks, drains and outbuildings.

Write for a free dip booklet.

DR. HESS & CLARK, Ashland, Ohio

ANTIKOL

PREVENTS AND TREATS HOG CHOLERA

A prominent hog raiser writes us: "ANTIKOL is a reliable remedy; out of I lost in all 40 head of hogs until I got ANTIKOL and haven't lost any since."

His experience can be yours if you will use ANTIKOL.

Don't wait for hog cholera to appear; use ANTIKOL NOW, according to directions, and you positively prevent it. Send to us for large package, $1.00 postpaid. Agents wanted. Danforth Chemical Co., Leominster, Mass.

DOGS.

Scottish Terriers

THE best little rat, watch, pet and stay-at-home dog on earth. From puppies to grown ones for sale. When writing please state just what you want.
S. HARR - - RIVERSIDE, IOWA

$10.00 PER DOZEN. Yearling Indian Runner ducks, Faun, also Penciled. Some winners. R. O. Dickson, Box 30, La Harpe, Illinois.

POULTRY

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be inclosed with inquiries. Address all letters relating to poultry topics to this office.

INFORMATION ABOUT FATTENING GEESE.

To the Editor of The Homestead:

The following inquiry comes from a prominent farmer of Dyer county, Tennessee:

I have read with great interest the article on "Fattening Geese." Will you please tell me in what county or counties Mr. Firke buys his geese? To what market does he ship them and what price per pound does he receive? How many geese are required to fill one car and what are the express charges per car? I am thinking of buying and shipping geese this year. We ship most of our market poultry to Chicago. Do you know of a better city to which I might ship? Memphis, Tenn., is much nearer, but I notice the market quotations are usually much lower than the Chicago market.

Mr. Firke does not confine his purchase of geese to any county or counties. He just goes into that part of Tennessee where more geese are raised than grain. Last season he purchased 4,000, oftentimes only a few in one place, and drove them sixty miles to the nearest railroad. His profit is derived not from buying and shipping alone, but by feeding and fattening. He not only adds to their weight, but to their value. A fat goose is worth vastly more per pound than a thin goose. It is impossible to say what they will bring per pound. Two years ago Mr. Firke cleared nearly $600 on one car load and last year not nearly so much on twice that number. They vary in price, depending on quality and other conditions. Mr. Firke shipped to New York. Whether it would pay you to ship to New York instead of Chicago depends on the difference in cost of transportation. Your local agent should be able to advise you in regard to this question. Mr. Firke's geese are sent by freight accompanied by an attendant. This year they were fed wholly on corn, each goose eating a pint a day. They were fed thirty days and gained an average of four pounds each. They consumed a great deal of water. Minnie G. Stearns.

FATALITY AMONG INDIAN RUNNER DUCKLINGS.

To the Editor of The Homestead:

An Ohio subscriber sends in the following inquiry:

I have a flock of about forty Indian Runner ducklings. For awhile they seem all right, then they will stagger around as if drunk and fall over dead. Some are quite large, but large and small go the same way. I am losing two or three a day. I feed screenings, cracked corn, bran and chick feed, with plenty of clean drinking water at all times. Can you tell me what is wrong with them?

This query was referred to an extensive breeder of Indian Runner ducks, whose wide experience and success makes her opinion valuable. She attributes the fatality among the ducklings to improper feeding. She says that when an Indian Runner duckling is once hatched it ought to be sure to live. No corn in any form, unless very little in a mixture, should ever be given them. The following is her formula for feeding ducklings:

Four parts bran.
Two parts shorts.
1 part cornmeal.
One-eighth part beef scraps.
One-fourth part grit.

She advises leaving the cornmeal out of this mixture in the case of our correspondent, since the little ducks are ailing from its use. She also gives an occasional feed of oatmeal by way of variety. Feed five times a day—not giving more than will be eaten up clean. Never allow food to lie around from one meal to another.

They had plenty of clean, fresh water, but it should be so arranged that they cannot get into it, as that is very injurious to the young birds. They should be able to wash their bills out thoroughly, but not to wet their bodies. With chicks as with ducks, cleanliness is indispensable.

Keeping these precautions in mind, our correspondent should achieve the success she so desires.
Mrs. S. B. Titterington.

LAWS FOR WOMEN AND CHILDREN.

To the Editor of The Homestead:

There are a number of new Iowa laws which became effective on July 4th of particular interest to women and children. The case of many of these are the work of the so-called female lobbyist of which you hear so much. The truth of it is there is a small band of splendid women working for the betterment of humanity, working for your interests and mine, for your children and mine and the patience and sweet toil they put in so unselfishly but indicates what the world may expect when women are privileged to take a direct part in the making of laws.

Therefore, the most important act of the legislative body was to pass the amendment to the state constitution granting equal suffrage. This same amendment, by virtue of this same state constitution, must be passed by the next legislature and then be ratified by the people. (We do not know just what classification we belong in, but we women folks aren't people according to the constitution).

The widow's pension law was fathered by those who saw that we were needlessly separating children from their mothers and breaking up homes—homes that should exist for their sacred influences—if financial aid was but given the mother at the right time.

According to a new law, if the court finds the mother of such dependent or neglected child is a widow, and if the court further finds that such mother is poor and unable to properly care for said child, but that she is otherwise a proper guardian, and it is for the welfare of the child to remain at home, the court may enter an order stating such facts and fixing an amount necessary to properly care for the child, and it is the duty of the county board of supervisors, through its overseer of the poor, to pay to such mother, at such times as the court may designate, the amount so specified; the amount shall not exceed $2 per week and payments shall cease when child is fourteen years of age. Any mother whose husband is an inmate of any state institution under the care of the board of control, shall, for the purpose of this act, be considered a widow, but only while such husband is so confined.

The school age of children was raised from fourteen to sixteen years of age. This means that all children must attend school until they reach the age of sixteen years, unless they have finished the grades before reaching this age. This law was intended to insure each child at least a common-school education.

A law was passed creating a number of factory inspectors, one of which shall be a woman whose duties it will be to thoroughly examine into the conditions under which women and children work in factories.

Where a husband dies leaving no will and no children a new law provides that the wife shall receive the sum of $7,500 before any division of property is made. After that sum is given the wife, the balance of the estate is divided equally between the wife and the deceased's parents. If the estate does not reach the value of $7,500, then whatever there is becomes the property of the wife.

Housewives should thoroughly master the laws pertaining to foods. There is one which says that all food sold in package form must have correct net weight or measure of contents set forth clearly on the package and untrue weight is punishable by heavy fine, and another which says contents of package must be conspicuously marked thereon.

In the pure food department there is a long list of good laws regarding weights and measures of food stuff formerly sold by measure, but which must now be sold by weight and those scales must bear an official tag proclaiming the fact that they have been state tested and are correct. Berry boxes purporting to hold a quart must do so and other size boxes must be fractions of a quart.
May McPheeters Smith.

SHORT BUTTER WEIGHTS.

A campaign against dairymen who have been sending short weight butter packages into Milwaukee was begun last week by Fred C. Janssen, city sealer of weights and measures. The first move was the issuance of a state warrant for an Elkhorn shipper who is alleged to have sent to Milwaukee packages of butter supposed to weigh a pound each, but alleged to be a half ounce short in weight.

A warrant has also been issued against a commission firm in Milwaukee, charging them with selling short weight measure of apples.

Fred P. Downing, state superintendent of weights and measures, has sworn out a complaint against a Milwaukee company charging it with selling short weight axle grease to a Madison firm. Two hundred pounds of grease were charged on the bill of lading, but Mr. Downing found that the grease had been carelessly packed and only 140 pounds of grease was found in the shipment. Mr. Downing also arrested a Madison merchant who was selling candy at five cents a pound. The candy was found to be wormy. The merchant paid a fine of $25.

Farmers Who Grind Feed Make Largest Profits

Feeding whole grain is wasteful as it is not properly digested. With high prices for grain and stock it becomes more than ordinarily profitable to grind your feed.

Fairbanks-Morse Feed Mills grind mixed grain and corn on cob at the same time, insuring an easily digested mixture. These mills have light draft, large capacity, long life. Grind fine, medium or coarse. No gears to waste power. Wearing parts renewable at small cost. Capacities: 6 to 60 bushels an hour.

Grind Cheaply—Use a Jack of all Trades Engine for power. It runs on Kerosene or Gasoline. An outfit will save its cost in a short time and will give years of service.

Write for Catalog FC603 stating your requirements.

Fairbanks, Morse & Co.

Fairbanks Scales, Oil and Gasoline Engines, Pumps, Water Systems, Electric Light Plants, Windmills, Feed Grinders
900 S. Wabash Ave., Chicago, Ill.

POULTRY PAPER 44-124 PAGE periodical, up-to-date; tells all you want to know about care and management of poultry for pleasure or profit. **Four** months for **10** cts. **POULTRY ADVOCATE, Dept. 124, Syracuse, New York.**

MINORCAS.

FOR SALE—Thoroughbred S. C. Black Minorca cockerels and pullets. Bred from best of layers and large improved stock, $1 each. Lewis Tieden, Elkader, Ia.

ANCONAS.

S. C. MOTTLED ANCONAS. To make room for winter I offer 50 pens and trios at bargain prices. Address Geo. W. Harris, Route 3, Shelby, Ohio.

PLYMOUTH ROCKS.

HIGH-Class Barred and White Rock. Breeding stock for sale, also Poland Chinas. Lone Oak Farm, Lineville, Ia., Jas. H. Duncan, Proprietor.

MISCELLANEOUS.

52 VARIETIES of chickens, ducks geese and turkeys. Birds score 90 to 96¼ by Todd. Thousands of blue ribbons and first sweepstake prize two years in succession. Largest poultry farm in northern Iowa. 4-ct stamp for catalog. E. & J. W. Trettin, Grafton, Iowa

CHOICE ORPINGTONS, pullets and cockerels, $1 to $2.50. Excellent Bronze turkeys, $3 to $5. Pekin ducks and Toulouse geese trio $4 to $6. Last notice. Mervin Deming, Cortland, Neb.

CHOICE Pure-bred Reds (either comb) yearling hens, ckls., pullets, price $1 each. Indian Runner ducks $1.50. Mrs. Laun, Riverdale Farm, Floyd, Ia.

When writing to advertisers please mention The Homestead.

Echoes From a Kansas Farm

BY HENRY HATCH

This is September 22d and it seems almost like a mild winter morning. When the weather changes suddenly from 100 degrees heat to a 50 degree chilliness, it seems colder than it really is.

We are feeding our cattle nearly a full winter ration, and they clean it all up, too. This bids fair to be the longest feeding season ever known here. Although nearly everyone has every scrap of feed saved, and the growth of fodder was fairly good, feed is going to be a scarce article before spring.

For one thing, much of our fodder is not going to feed out as fodder ordinarily does. It seems to have dried up and shrunk in the shock more than usual, and, besides, there is not the feeding value in the bulk there usually is.

There is moisture enough to start blue grass in the pastures, but the prairie grass had too nearly matured before the rains came to make any start worth mentioning. It has livened up a trifle, but not enough to furnish cattle a living in pastures that were closely cropped.

Beginning now our horses are going to have fodder once a day and hay once a day for their roughness. Hay is costly stuff, figured at $15 a ton to feed horses all winter, and fodder once a day can be made to take the place of it very nicely.

Many who have fields of kaffir corn are cutting it and feeding directly from the field. Both cattle and horses eat it greedily and seem to do well on it, yet, should cattle break into a standing field of green kaffir one might expect trouble. It is strange that to cut and feed it green never gives trouble.

Those who had plowing done before the drouth made plowing almost impossible have been doing some seeding. Moisture is sufficient for present needs, but we must have more to keep any growth made coming along. There is still danger of a dry-out of the soil and the death of the young crop.

Considerable alfalfa has been sown, particularly along the creek and river bottoms. Seed is so cheap that folks feel more like risking a seeding, for one is able to get the best of seed for $5 a bushel. There has been a great crop of seed threshed this fall and it is selling lower than we ever have known of it being sold here before.

The farmers' co-operative store in this county is growing right along, doing more and more business each week. They are now shipping in corn, selling it to the stockholders of the store company for four cents a bushel less than dealers here charge. They now talk of handling all goods needed by the farmer, even to lumber.

A good many of the lumber yards in this section of the country are going into the hands of what is commonly called the lumber trust. There are several companies owning chains of yards throughout the Southwest, some of them having in their control as high as sixty to eighty local yards. These four or five local companies are buying local yards all the time and adding them to their chains.

When these large companies get hold of a lumber yard in a small town it seems the price of lumber goes higher immediately. This starts talk of putting in another yard, by local men. Such talk is usually put to the quiet by a bluff from the big company that it will cost any local man $10,000 to buck the old yard, as the capital of a million-dolar concern will see that any local growth is put down by price cutting. This usually has the desired effect.

The other day we had occasion to use about 400 feet of No. 1 stock boards in building a board fence. The price was so high we went back with the bill the second time, thinking the dealer had made a mistake in figuring, but we soon found that lumber at $3.25 counted into money pretty fast. This is the highest price we ever remember paying for only a fair quality of boxing. But a few years ago we were able to buy the best of finish lumber for less. No doubt lumber is scarcer, but we have our suspicions that the general increase in price is not wholly justified by a lumber scarcity.

No one wants to see a frost soon, as the late forage crops are still doing some good. We find that a part of our kaffir corn is going to be worth heading, and we may get enough grain from the entire acreage to make feed for the usual number of chickens. Many are selling down close on chickens, believing that the price of grain will not justify keeping the usual flock. Two cars of hens have lately been shipped from our small town.

E. W. Day & Son's Duroc Sale.

E. W. Day & Son, Kellogg, Iowa, held their first sale of Duroc Jerseys in Newton, Iowa, September 25th. For the first sale it must be considered good, as they made an average of about $25 on thirty-eight head. The sellers were satisfied and the buyers received good values for the money expended. The sale was conducted in a straight-forward, business-like manner and Messrs. Day made many friends by so doing. The offering was in nice shape and was a credit to their ability as breeders and feeders. A list of those selling at $25 and above is appended. Col. N. G. Kraschel did the selling:

1.	C. Kirkpatrick, Newton, Iowa..	$30
2.	C. M. Bisome, Reasoner, Iowa..	40
3.	B. Luppin, Reasoner, Iowa.....	26
4.	H. Smith, Newton, Iowa.....	28
5.	G. Eggert, Newton, Iowa.....	31
6.	H. Lance, Newton, Iowa.....	29
7.	A. T. Squire, Grinnell, Iowa....	37
8.	F. J. Miles, Newton, Iowa.....	41
9.	B. Luppin	27
11.	G. E. Richardson, Gilman, Iowa	45
17.	Earl Guthrie, Reasoner, Iowa..	25
22.	E. S. Turner, Colfax, Iowa.....	29
26.	J. Sampson, Newton, Iowa.....	30
27.	Earl Guthrie	25
29.	Earl Guthrie	25
42.	J. K. Stewart, Newton, Iowa..	31
38	head sold for $902; average	$25

Cope's Poland China Sale.

J. H. Cope, Carlisle, Iowa, made a public sale of Poland Chinas at the state fair grounds of Iowa, September 26th. Owing to the light attendance the demand did not care for the entire offering. Prices ruled rather low, but Mr. Cope permitted buyers to take what they wanted at sacrifice prices. Col. W. B. Duncan disposed of three-fourths of the offering at the average of something less than $30 per head. The quality of the animals in the sale was excellent. Among the buyers were: G. W. Carner, Polk, Iowa; E. H. McDaniel, Avon, Iowa; L. Meisburger, Campbell, Iowa; Fred Randleman, Carlisle, Iowa; John Stuart, St. Charles, Iowa; F. M. Cart, Mitchellville, Iowa; R. B. Blake, Dallas Center, Iowa; H. C. Henry, Carlisle, Iowa, and J. H. Deemer, Des Moines, Iowa.

LANDS AND HOMES

Roseau County, Minnesota

ROSEAU County has again taken first premium for general farm products at this year's Minnesota State Fair. This makes four years in succession that we have taken that premium. FOR BARGAINS in real estate for sale or exchange anywhere, address Sewell Land Company, Garnett, Kansas.

FARM FOR SALE

400 ACRES, 260 in cultivation, balance in good timber. 100 acres of land in timber will make fine farm land when cleared. 360 acres under good fence, mostly woven wire. Part of the land is in the valley, but no overflow; part gently rolling, just enough for good drainage. Timber on the 100 acres will pay for clearing ready for the plow; the other 40 acres is good fruit and pasture land. The soil is a dark, sandy loam, with a clay subsoil. Produces good crops of corn, wheat, oats, millet, clover and timothy, and all of the valley land will grow good alfalfa. A self-binder or mower can be operated over all the land in cultivation, and also over the other 100 acres when cleared. There are 3 sets of buildings on the farm. One set consists of good frame 8-room two-story residence, with halls on both floors, two-story porch in front, and two large rear porches, good stone-walled cellar; new barn, 46x60 feet, 14 feet to eaves, with hay track and basement, granary, machine shed, smokehouse, poultry house, etc. One other set of buildings consists of a two-story 5-room dwelling house and necessary outbuildings; the other set consists of 4-room house with porches, goodbarn and other necessary outbuildings. There are two good bearing orchards, consisting of several different sorts of fruit—apples, peaches, pears, plums and cherries; also an abundance of all varieties of berries. Three good cisterns, good living well, and four good stock ponds. Situated in splendid neighborhood, healthful location, ¼ mile from good school and church and 1½ miles to three other churches. On main county road and within daily mail delivery. Two of the dwelling houses equipped with telephone connection. Can rent farm for ½ of all crops put in barns and stacks. Good title. Price $60 per acre, only one-fourth cash, good terms on balance. Address Box 32, Salem, Dent County, Missouri.

Irrigation

from wells. If you secure your farm in Elko County, Nevada, you are not subject to the high prices usually paid to Irrigation Companies. Sink your own well and at a cost of pumping of about $3.00 per year per acre will cover your entire expenses. There are 15,000 acres of land just north of Reno good for general farming on which water can be secured from wells. Prices range from $4 to $10 per acre. Write to me and I will give you full free information regarding these lands.

B. A. McALLASTER, Land Comm., 803C Flood Bldg., SAN FRANCISCO, CAL.

BUY FROM OWNERS

I HAVE several improved farms in the famous Red River Valley, close to towns, schools and creameries. Will sell these farms at low price, long time, easy terms. Will furnish all the milch cows and hogs that can be handled on these farms, and let you pay for same from proceeds. Five hundred dollars will handle 160 acres. **Look This Up, Mr. Renter,** also wild lands in Wisconsin and Minnesota. **LAKE STATES LAND CO.,** S. D. Works, Mgr., Improved Land Dept., 405-6 Commerce Bldg., St. Paul, Minnesota.

FOR SALE

"Mine is a Maxwell"

That's the Proud Boast

of every man who owns one of this famous line of cars.

No Matter Whether

it's a big 7-passenger "50-6," a "35-4" or the substantial "25" model---he is equally proud because he knows the difference is only in size and power---the same excellence of workmanship and the same quality of material go into all Maxwell models.

Paradoxically,

we can make a better "big car" because we make the smaller models. Why?

Because,

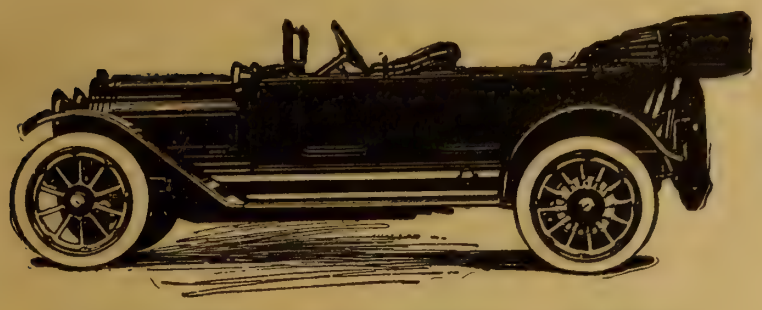
making them in tens of thousands makes it possible for us to have every pound of steel made to our specifications, enables us to install the best heat treating plants and finally distribute our "overhead" so that the big "50-6" carries only third the load.

That's Why We Say That the Maxwell "50-6"

is the best value to be found in that class of cars just as---and for the same reason---that in all the world there's no such value as is to be had in the Maxwell "25-4" at $750.

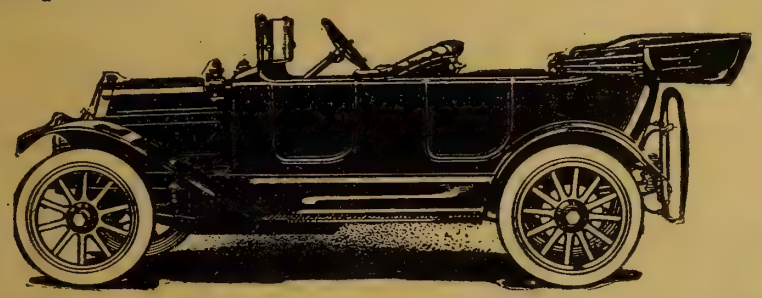
This, Maxwell Owners Know—

and so, when asked, enthusiastically proclaim, ***"Mine is a Maxwell."***
Prices---The 50-6, $1975: The 35-4, $1225, with electric starter and lighter; and the 25-4, $750 plus the freight. Send for Catalogue "A" describing this complete line of cars.



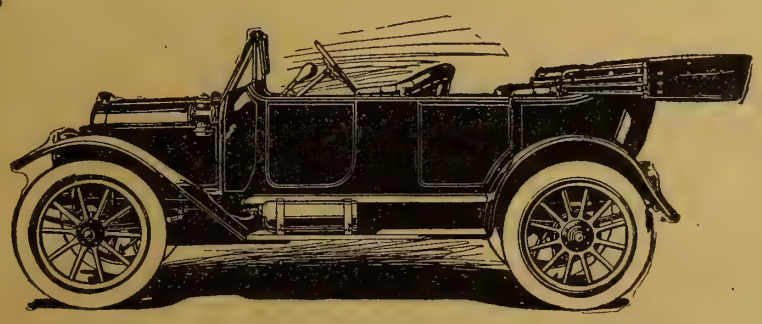
1914 Maxwell "50-6"---$1975

The sweetest running thing on wheels. Six cylinder motor, bloc-cast, 50 H. P., 130 in. wheel base; electric starter and lights; Bruce Ott body; 5-7 passengers; disappearing seats; 36 in. x 4 1-2 in. tires all 'round. Luxuriously finished, long, easy riding springs and full equipment, including ventilating windshield, top and Jiffy curtains, even an electric cigar lighter. Left or Right side drive optional.



1914 Maxwell "35-4"---$1085-$1225

Powerful, silent, sweet running, bloc-cast, 4-cylinder motor; 111 in. wheel base; 33 in. x 4 in. tires all 'round. Left hand drive, center control. Electric starter and lights, at $1225. Three-quarter elliptic springs. Bruce Ott body, ventilating windshield and full equipment, including Jiffy curtains



1914 Maxwell "25-4"---$750

The year's sensation. Four-cylinder, bloc-cast; 25 H. P. motor; magneto; weight 1600 pounds; 103 in. wheel base; 30 in. x 3 1-2 in. tires all 'round; 3 speed electric transmission; full five passenger body designed by Bruce Ott; complete equipment, including tire holders, windshield; top, Jiffy curtains.

Maxwell Motor Company, Inc., Detroit, Mich.

Dealers and Service Everywhere

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep, to this office.

PREPARING SHEEP TO WIN PRIZES.

To the Editor of The Homestead:

It is the man who has an ambition to win the best prize and who has a picture of that prize in his mind weeks before the show, who usually is the winner. It costs something in personal sacrifice to prepare a sheep for winning and the man who is not enthusiastic is not usually willing to make that sacrifice.

After work with the sheep has once begun, you must avoid setbacks. If you have your sheep nicely trimmed and they are left out-of-doors in a storm, all the work you have done will be spoiled and you will not be able to do it over, for the fleece will never again be as good as it was—at least not until the following year. Sheep must have exercise, so it means that the shepherd must camp near them and be ready to take them into shelter at the first signs of rain.

One really should take the precaution of blanketing every show sheep from the time it receives its first trimming. This keeps the wool clean and avoids accidents that might tear out a portion of the fleece just in the place where it would spoil the entire animal.

Blankets can be made at home from heavy ducking—eight or ten ounce. If no pattern is at hand, one should be made by experimenting with a piece of cheap cloth or burlap. When the pattern is once satisfactory, it should be kept for future use. The blanket should cover, not only the body, but the neck and head, especially of those breeds with wool on the face. Holes can be cut for the eyes, and if the blanket is properly made, the sheep will have no difficulty in wearing it.

Every sheep should be carefully trimmed, and trimming should begin as soon as the wool has grown long enough to be readily trimmed with the hand shears. Trimming must be done systematically and with an ideal in mind. The man who goes at it without a definite object can never produce an attractive looking animal.

Flies are usually bothersome about the time this work begins, and more than one good sheep has been kept out of the ring because of an accident in trimming due to the bother of the flies. This trouble may be forestalled by applying one of the coal tar dips to the parts of the sheep not protected with wool. This will keep the flies off and the sheep will probably stand still. A halter is quite necessary, unless you have an extra man who can take time to hold the animal. Trimming must be slow work, however, for the wrong part removed cannot be placed back on the sheep.

Of course, you may work out your own system of trimming after you have had experience, but the system here described will be suggestive to beginners. It has proven a good system with several of the most successful showmen, but that does not prove that there is no other system. The important point is—have a system; don't trim hit or miss.

First, sponge off the wool with a rag dipped in warm water. Work out any dirt that may be present and make the fleece fluffy.

Begin trimming on top of the shoulder. The first object should be to get the back straight. Be sure to have the sheep standing on level ground, or better still, on a floor. A sheep that is humped may deceive you so that you will trim a decided dip into the back.

Next trim the rear end to correspond, making the general appearance blocky. Of course you will avoid sharp corners, but make the top level and the sides perpendicular with a nice roll at the juncture.

Next trim the left side from front to back.

The right side is easiest trimmed from the thigh forward, unless you use the shears in your left hand.

Next square up the breast, then the left side of the neck and then the right side. The job is completed by putting the finishing touches on the head and neck.

One trimming will not be enough. After the sheep has gone for a few days, you will see some part that is not right. It may be that you didn't comb it out enough. At any rate, you must have your eyes always open for a place to better the trim. Even after you get to the show, you will see ways of improvement.

If any of the wool becomes dirty, even the wool on the rump, don't trim it off, wash it carefully.

John Y. Beaty.

LITTLE POINTS OF BIG IMPORTANCE.

Oversized sheep are no more likely to win prizes in the breeding classes than those undersized.

A ewe that does not furnish enough milk to raise at least one good lamb should be culled from the flock.

Heavy or forced feeding during the first year or two of a sheep's life will often make it lose its teeth between the ages of three and four.

If your sheep are irregular in eating or in chewing their cuds, it is a sign of poor teeth—examine the mouth.

Fields on which no sheep or goats have pastured for at least a year are usually free from parasites that infest the sheep. A flock is safe on such a field.

Sugar beets and mangels are dangerous feed for rams or wethers.

In buying new sheep, either for breeding or for feeding, be sure they are all entirely healthy. Diseases and parasites are readily transmitted from one flock to another by a single sheep.

Sheep are easily frightened—don't shout or move among them carelessly. It is possible to do considerable harm by being rough in the sheep pens.

The College of Agriculture of the University of Wisconsin is expecting a record-breaking attendance. Several new buildings are under construction. Extensive improvements costing $5,000 are being made on the hog barns. A new demonstration silo is also being built.

ADDITIONAL FIELD NOTES.

At the Fairmount, Neb., tractor meet held September 13th, the Weber tractor won first prize in its class. Its low price, compactness, light weight and durability will make it very popular with corn-belt farmers. The Weber tractors have been made for thirty years and back of them is an enviable reputation. More information about the Weber tractor can be learned by writing the American Gas Engine Co., Kansas City, Mo.

Walker's galvanized roofing and siding will last for an indefinite period. It is lightning proof, protects buildings from fire on the outside, cannot rot and makes insurance rates low as well as saves paint bills. It is easy to put on and can be cut to fit any shaped building. It can be bought direct from the Walker Sheet Metal Co., Council Bluffs, Iowa, at quite a saving. See advertisement on page 15.

Minnick & Nansel's Sale.

On October 17th at the Kiel Barn, in Council Bluffs, Iowa, Minnick & Nansel will make a public sale of fifty head of big-type Poland China boars and sows. Mr. Minnick will practically close out his herd, and Mr. Nansel is selling the pick of this year's crop in this sale. Included in this sale will be boars and sows sired by such well-known sires as Big Victor, I Am Big Too, Big Omaha, L.'s Quality, Big Tom, Guy's Price Last, Big John and Metal Top. Mr. Minnick is including his herd boar, Big John, a grandson of Big Orange, out of a daughter of Mischief Maker's Best, and his second dam is that famous old brood sow, Hazel's Price. He is a well bred boar and a good breeder, and he is going to be a good bargain for someone who wants a herd boar. He sells a lot of spring boars, some splendid brood sows with litters at side and some good fall sows and spring gilts. Among these good brood sows that he sells with litters is Early Girl and Queen, daughters of I Am Big Too; Pearl, a daughter of Big Tom, and Spot, a daughter of Great Prospect. These sows are also the dams of most of the young stuff that Mr. Minnick will sell in the sale. Mr. Nansel is selling some very excellent spring boars and gilts from his herd. Among the spring boars are No. 29 and 30, sired by L.'s Quality and out of Lady Kuhl by the noted show and breeding boar, Big Tom. These are especially good spring boars. He also sells some good boars sired by Big Omaha and Hadley M. A good March boar that he will sell is sired by Big Tom and out of a daughter of D.'s Defender. This will be the only Poland China sale held at the Bluffs this fall and will, therefore, be a good sale to attend. The catalog is now ready and will be sent on application to Minnick & Nansel, Council Bluffs, Iowa. Bids sent to Col. N. G. Kraschel will receive attention on sale day. Mention The Homestead when writing for catalog. See page 36.

Messenger Boy Hampshire Sale.

An important announcement to every Hampshire breeder in the corn belt should be the sale of Clayton Messenger, Keswick, Iowa, on October 14th. The sale will be held at the farm three miles east of Tilton and six miles north of Keswick. Messenger Boy has won grand championship at every state fair where shown in 1912 and has repeated the performance where shown in 1913. This is a wonderful record considering the strong competition he has met during the two years of his campaign. Few boars of any breed have been enabled to make such a show record. Mr. Messenger has refused many tempting prices running into the four figures, for this great boar and the breeders who attend this sale are bound to say that his judgment was good in retaining this boar in his herd. Messenger Boy is proving to be a remarkable sire as the show herd Mr. Messenger had out this year and the great lot of boars he will sell in his forthcoming sale will show. About seventy-five boars will be cataloged for this occasion and fifty or sixty of them will be sired by the undefeated grand champion, Messenger Boy. There will be two senior yearlings, three junior yearlings, twenty fall yearlings and thirty or thirty-five spring boars all sired by Messenger Boy. Part of them are the winners at the Iowa, Minnesota, South Dakota and Sioux City fairs this year. Mr. Messenger has refused many tempting offers on these boars while out showing, but has reserved everything for this sale as he believes in giving everyone fair treatment. Mr. Messenger has been engaged in the breeding of Hampshires for several years and his record at the leading shows has been little short of phenomenal considering the strong competition he has met. Any Hampshire breeder in need of a really high class herd boar should not miss this sale as no other sale of the year affords such a valuable opportunity to select from a great number of sons of a grand champion boar. Boars of the herd heading kind can be found here in numbers. There are sure to be many bargains when seventy-five boars are sold in one sale, so breeders should not stay away in fear of high prices. Carlos C. Palmer, Homestead representative, will attend this sale and will gladly execute any commissions to buy sent him in care of Mr. Messenger. See page 39 and write for catalog at once kindly mentioning The Homestead.

The illustration shown herewith is that of Royal Wonder 129731, the excellent Duroc boar at the head of the Cochran herd. This is one of the greatest sires in use in the West. Some excellent fall pigs by him are for sale. Address D. S. Cochran, Lincoln, Neb. See page 47.

Wyckoff's Last Call.

On Thursday, October 9th, at Kellerton, Iowa, S. C. Wyckoff will make a public sale of sixty-three head of his large-type Poland Chinas and everything that he will sell in this sale will be immune and will have been vaccinated. Everything on the Wyckoff farm has been vaccinated a month or more ago with the simultaneous method, so you will know when you buy of him you will be getting immune Poland Chinas and that is something for the man that is buying at this time. He is selling thirty-six spring boars, one yearling boar, two tried sows and twenty-four spring gilts. Most of the young things that he will offer in this sale will be sired by Kellerton King, a son of old Long King, that he formerly owned in the herd. Quite a number will be sired by his present herd boar, Good Orange, a son of Big Orange, and a number by Big Jumbo 2d, a Mouw-bred boar that he has been using, and he will offer this boar in the sale. His herd is made up of the strictly large strains of Poland Chinas, and it will be a good sale at which to buy. Write for his catalog at once and mention The Homestead.

SHEEP.

ELK GROVE SHROPSHIRES

I AM offering thirty choice rams for sale. Twenty-four yearlings, five two year olds and one five year old, bred by Henry L. Wardwell. Prices $15.00 to $50.00. Address

REGISTERED Shropshire lambs and ewes of the best breeding and quality. Williard Miller, R. 2, Anita, Iowa.

THE LIVE STOCK MARKET

Union Stock Yards, Ill., Sept. 27.—Live stock trade during the past week has been pregnant with features, among which the appearance of a record breaking week's supply of sheep and lambs, the failure of the enormous supply to depress values sharply, and the scoring of a $9.50 beef steer top under a week's cattle supply at six leading markets, nearly 30,000 larger than the week previous, have stood out conspicuously. The general market has acted after such a fashion as to lead the trade to look through optimistic glasses when viewing probable trade conditions for the winter months ahead and for the coming year.

Strictly good to prime beef steers are selling 10 to 15c higher than a week ago. Plain and medium killers have lost an early week gain, while stock and feeding grades, after selling higher Monday, have slumped back, losing 10 to 25c of their recent 25 to 50c advance, medium stockers suffering most and choice feeders the least. A swelling of the supply of range cattle of both sexes has contributed to the dullness shown toward the week-end in the butcher cattle market and last week's advance on she stuff below prime corn-fed class has been ceded back to the buying side, medium to good she stock and bulls closing 25 to 35c under a week ago. Hogs are selling much closer together than at this time last week, the spread in prices being narrower, in fact, than any preceding time this season. Packing hogs are fully 10 to 15c higher than a week ago, the best light 15c lower, with the top at $9 and the bulk on an $8.20 to $8.65 basis. Nothing in the sheep house shows more than a 25c decline from last week's closing levels, while 10 to 15c covers the loss on native classes and some good feeding lambs.

The week's receipts at six markets will total about 200,000 cattle, 295,000 hogs and 462,000 sheep, a gain of about 28,000 cattle and 35,000 hogs over the week previous, and about the same sheep total. Chicago's receipts increased 12,500 cattle, 25,000 hogs and 45,000 sheep, the sheep run at approximately 232,000 exceeding the former banner week's total by about 4,000. Receipts of sheep for September will establish a new record for September marketings by approximately 140,000 head.

A set of Jewish holidays begins next week and these events always exert a depressing influence on heavy cattle, consequently it will be well to feed the market sparingly. Cheap stuff is doing relatively better than in long-fed steers and the latter are not big money makers for feeders even at current prices.

A tourist who surveyed a bulletin at the Chicago yards announcing the arrival of approximately 80,000 cattle of six western markets on Monday, promptly pronounced beef shortage reports canards and yet the figures prevaricated. A large proportion of that 80,000 was stock cattle in process of shifting to favored localities; much of the balance was merely near-beef. Only at Chicago has good beef been available in considerable quantities this week and how killers did buy it; $9.50 being paid for both aged and yearling steers, $9.15 for slop-fed steers and $9 for a few South Dakota rangers that never knew the taste of corn. Such a market never before existed in the wake of a big corn crop. Maintain that gait and the cattle industry will soon come back. Proof that confidence in the meat-making industry has been restored is afforded by a $7 to $8 market for feeder cattle in the face of a partial corn crop failure. Any man who would veal a beef bred calf with a 9¼c yearling market available ought to have his head examined. Maintenance of present prices will prove more effective in restoring meat supply to adequate proportions than any plan conceivable.

Plenty of rain has put fall pastures in good condition in most all sections. Taken as a whole, there is an abundant crop of rough feed, especially in all the north central and eastern states. On the whole these states report a good crop of corn. The country is very short on cattle of all kinds and all would seem that this is an extra good time to buy cattle for feeding or carrying through the winter on roughness or ensilage. Cattle bought now will make good big gains from now until winter for those who have plenty of fall grass and cheapen themselves down to much less prices than it is probable that they can be bought at when winter comes.

Confident prediction of a phenomenally high hog market in 1914 is made by many traders. Prices may work a little lower in the near future, but wait until next March, they argue. For three months or more every market in the country has been flooded with pigs and immature stuff, and in the long run that must tell. Corn is usually blamed for sick pigs, but this year there was plenty of old grain and the new crop matured early, so that old arguments cannot be pressed into service. Anybody who has watched the course of market events, realizes that we will run into a shortage in 1914. Western packers here this week attending the convention coincide in this view, pointing out that the short corn crop will merely aggravate the deficiency.

There is every encouragement for the holding and maturing of beef cattle and even high prices current for feeders do not seem so prohibitive when the fat cattle market has the life it has at the present time and shows an undoubtedly upward tendency. It is a safe thing to let anything ready come right along, as the shipper can reasonably be certain of striking a good market at almost any time.

Michael Murphy, manager of the Chicago packing interests at Omaha, here this week in attendance at the packers' convention, expressed anything but a bearish position on the hog situation. He says disease is making fierce inroads on the herds of Iowa and South Dakota, and damage to the corn crop in Kansas and Nebraska will materially curtail pork production west of the Missouri during the coming year. Kansas is already converting a vast quantity of wheat into hog feed by grinding, owing to the lack of corn on which to give their hogs a good finish and this indicates a very early marketing at light weight of the season's hog crop from drouth territory.

Packers in conclave at Chicago this week concur in the view that threatened shortage of beef cattle on foot in this country is now the most ominous dark cloud rolling up from the West with a threat of disrupting the long extended period of prosperity for packing house men. The proposal of James E. Poole, one of America's most constant students of market and live stock affairs, that the government be applied to for a subsidy of $15,000,000 or more to be available through the agricultural department for the purpose of stimulating production of beef cattle and thus replenish waning supplies of beef for the benefit of the consumer, did not meet with disfavor among them.

The week's trade in hogs on the Chicago market has been done within the following extreme range of prices:

Sept.	Mixed and butchers	Heavy weights	Light weights
19	$7.85@9.15	$7.75@9.00	$8.35@9.15
20	7.90@9.25	7.80@9.00	8.35@9.15
22	8.00@9.25	7.90@9.10	8.45@9.30
23	7.95@9.15	7.85@8.95	8.30@9.20
24	7.85@9.00	7.75@8.75	8.20@9.00
25	7.95@8.90	7.85@8.80	8.20@8.92½
26	8.05@9.00	7.85@8.85	8.30@9.60

The formidable phalanx of half-fat and common grass cattle, selling anywhere from $7.00 to $7.75 when drouth was flooding the market has all but disappeared and killers are now getting very few decent steers under the 8c line. A large slice of the crop has sold this week at $8.50 to $9.25. There has been a generous showing of $9 to $9.25 cattle and a few loads of ripe $9.35 to $9.50 beeves. Liquidation of the crops of long-fed steers fattened on last year's corn has not yet been completed, however, and prediction of higher prices is all contingent on the disappearance of these cattle many of which are overdue. A few big weight cattle go a long way, but buyers are hungry for fat 900 to 1200-pound classes and anything in the shape of a good yearling, long or short, gets prompt action.

Around 90,000 head of feeding sheep and lambs have been sold on the Chicago market this week and Iowa has been a hungry buyer at Omaha. It has been a phenomenally good market considering supply figures and practically every hoof of Chicago's record week's supply has been cleaned up. Feeders are taking right well conditioned mountain lambs away from killer up to $6.50 to 6.65 and bulk of the fair to good from 52 to 60-pound feeding lambs are selling on a $6.10 to $6.35 basis. Good to choice feeding ewes are making $3.50 to $3.85 and feeding wethers are going largely at $4.00 to $4.25, though some reached $4.60 early in the week. Best fat ewes are now selling at $4.25 and best fat wethers to $4.60, while $7.15 to $7.25 is taking the top cream of the range lambs. Idaho and Nevada are about through shipping, but the October run from Montana and Wyoming promises to be heavy, despite the fact that the West will hold more stock back to feed this winter than ever before. Choice fat range lambs promise to be scarce, however, from now on and will soon begin to climb in value.

CORN AND SMALL GRAIN SHOW.

The Iowa State Corn and Small Grain Show is to be held at Ames under the direction of the Iowa Corn and Small Grain Growers' Association, formerly the Iowa Corn Growers' Association, from December 31, 1913, to January 9, 1914. Coming as it does at the same time as the farmers two weeks' short course in stock and grain judging will afford an opportunity to attend both the short-course classes and the show.

Classes are provided for corn, oats, wheat, barley, clover seed, timothy seed, corn silage and alfalfa in the sheaf. In order to give the exhibitor and the visitor the greatest possible benefit from the contest, each entry will be criticised by the judge and the criticism card attached to the sample.

As premiums for the best entries a large number of farm implements and farm equipments of various kinds have been obtained from manufacturers. Cash premiums to the amount of $1,700 have been secured. Awards will be given as far as tenth place so that many entries will be winners. Banks in nearly all counties of the state have contributed toward the bankers' county special class, the purpose of which is to encourage beginners in the show ring by limiting the competition to single counties. A special premium is to be awarded to the county having a county advisor and making the greatest winnings in the contest.

The two weeks from December 29th to January 10th, promise to be filled with good things and all who possibly can should plan to attend the short course and show and to make entry in the contest.

Show me the man whose lawn is in good condition year by year and I will show you one whose wife did well to get him. For let me tell you, friends and fellow travelers to the tomb, there are more sticks and bones, clothespins and crooked wires upon a lawn, Horatio, than are dreamed of in our philosophy. And he that cheerfully endures the slams upon the bread basket that the lawn mower hands him when its cutters clog, possesses more than Christian fortitude—it mounts up to fiftytude.—[Eugene Wood.

Leather was early known in Egypt and Greece, and thongs of manufactured hides were used for ropes, harness and the like by ancient nations. The Gordian Knot was made of leather thongs. A leather cannon was made at Edinburgh, fired three times and found useful in 1778.

Worms Will Get Your Hogs If You Don't Let Me Kill The Worms

You farmers are being advised to vaccinate your hogs as a preventive and cure of hog cholera. I've not a word to say against it. But I want to tell you this: that if you will take the simple precaution of feeding Columbian Stock Powders there will be no need for you to vaccinate **—your hogs will not be in the slightest danger of cholera.**

Listen, men! Fully nine-tenths of all hog losses are caused by worms. These parasites sap the very life blood of your hogs and so weaken them that they are easy victims of cholera or any other swine disease. How can you expect a hog to keep well and take on weight when a wriggling mass of stomach worms keep absorbing practically all the nourishment from the food the hog eats? Is it any wonder that worm-infested hogs take sick, lose their appetites, slink off and die? But remember that nine times out of ten cholera hasn't a thing to do with it.

I'll Rid Your Hogs of Worms

Yes, **your** hogs have worms, too. Practically all hogs have. That's why there are so many epidemics of swine plague—why hog losses mount up into the millions of dollars every year.

Feed **Columbian Stock Powders** and inside of 12 hours you will **see** the dead worms that have been expelled. These powders are not a food, but a **highly efficient medicated preparation** that not only positively **kills** but also **expels** all stomach, tape, intestinal and lung worms.

These are the **original** Stock Powders. They have been on the market for the past 25 years and all that time they have been recognized as the **best**—the **standard**—powders, by the largest, most progressive stock raisers of the country. They will put a speedy end to all digestive troubles in hogs, horses and sheep. They sharpen the appetite—keep the animals on their feed—so strengthen the digestive system that there is absolutely no waste of food—the fattening period is greatly shortened—your hogs will bring highest market prices—you will be constantly turning your former losses into profits.

Best Conditioner For Brood Sows

Feed **Columbian Stock Powders** to your brood sows and see the strong, thrifty litters they farrow. Keep the sows in finest condition, strong, healthy, free from fever and insures an abundant flow of pure milk.

"Hogs Dying By Hundreds—COLUMBIAN Saved Ours"

"Please ship F. W. Diehl at Shannon, Ill., 500 lbs. Columbian Stock Powder in 250-lb. lots; and Geo. Diehl, Milledgeville, Ill., 300 lbs. in 100-lb. lots. Please RUSH the above orders as the hog cholera is something fierce all over the neighborhood. Hogs are sick and dying by hundreds. Ours were sick but Columbian saved them. Yours truly. DIEHL BROS, Milledgeville, Ill."

Try Columbian Powders for 90 Days Before You Pay a Cent

I don't want you farmers and stockmen to pay me a cent until I positively prove to you that **Columbian Stock Powders** are the quickest, surest and biggest profit makers you ever tried. Just mail coupon, stating how many hogs, horses and sheep you are feeding and I'll make you a free trial offer that gives you 90 days before paying a cent.

Get My Free Book Handsomely illustrated and the most interesting and instructive book on hog and stock raising ever published. Write for your free copy.

Be sure to mail coupon today for my 90 Days Free Trial Offer.

Columbian Self Feeder

Regular price is $5; but if you will write or mail coupon, at once, we will tell you how to get one **FREE**

MAIL THIS COUPON TODAY

Columbian Hog & Cattle Powder Co., Dept. 2 Kansas City, Mo.

WITH THE EDITOR.

It begins to appear that the day of the child has really dawned in America. One of the most promising proofs of this is that at last the United States government has decided that the health of children is as important as that of hogs. A few weeks ago the press announced the publication of the first of a series of monographs for parents to be issued by the recently established children's bureau. In this pamphlet, says the Outlook, the government has made a beginning of doing for the children of the country what it has done superbly for the country's crops and herds.

Work along similar lines is already in progress under the auspices of the extension department of several of the state agricultural colleges. Iowa, for instance, has been doing admirable service of an educational character through the free distribution of its concise and exhaustive circular on "The "Care of Children" (address Agricultural Extension Department, Ames, Ia.) and the short-course classes which are held from time to time under farmers' institute management or organizations of local business men.

An even more promising sign of the times is the baby contests which have become such a popular feature at many of our state, county and other fairs. These contests, whose prizes go not to the prettiest or the best dressed, but to the most physically perfect baby of stated age, were inaugurated by Mrs. Mary Watts, of Audubon, Iowa, to whom much credit is due not alone for initiating, but for mothering a movement fraught with almost limitless possibilities for good.

Mothers take kindly to the idea of the baby contests. As one woman remarked a few weeks ago, "It was not that I expected my baby to win a prize that I entered him. I wanted to find out things about his little body so as to do better by him if I could." Another mother, after dressing her baby, came to the doctors in charge, saying, "Haven't you something to say to me? You did not give me any advice like I hear you giving to the other women."

It is in the opportunity to give friendly advice that some of the best work of the baby contest is accomplished. After the babies' measurements are made the little one clad in his skin is encouraged to play about a few moments before the examining physician, who watches the play of the muscles, the movement of the limbs, notes the texture and quality of the flesh, the brightness of the eyes, the temperature of the skin, etc. Having thus framed an idea of the health of the child the physician then asks the mother questions as to the food given the baby, its bathing, sleep, etc. In many cases it is found the mother has little or no knowledge of baby needs. This is especially the case in regard to food. The number of babies fed potato and gravy and other things unfit for infant digestion is seriously large. It will be smaller as time passes and mothers learn how important it is that their little ones be properly fed—and after the baby contest it is safe to say that mothers regard feeding the baby with altogether different eyes. If it even be measurably true that "the feeding of children is the foundation of citizenship" this is a great step forward.

The physical condition of children is partially decided by heredity, but it is also largely modified by environment. It is therefore matter for congratulation that the health of babies is looming large in public esteem and that parents are being helped as never before to do all that may be done to insure health for their children.

HOME AND HOMEMAKING.

LITTLE HELPS BY THE WAY.

Whatever may be our views about a future life the present is full of opportunity, full of hope, full of cheer. He who gives from the heart out is richer than he who takes from the fist in. The shabbiest tinsel in the world is wealth undignified by labor, and he alone is rich and worthy of regard who has worked to make his day and generation better, and who has given of his love to other men.

"If thou art blest,
Then let the sunshine of thy goodness rest
On the dark edges of each cloud which lies
Black in thy brother's skies.
If thou art sad,
Then be thou in thy brother's gladness glad."

ART OF TEAMAKING.

A good cup of tea is something too infrequently met with when one considers the prevalent use of tea as a beverage. The fault often lies less in the tea than in the manner of its making. Here are some of the rules which, if observed, will prove the quality of the product:

Don't use water that has been boiled a long time in brewing tea.

Don't use water which has not yet reached the boiling point.

Don't allow the tea to brew for more than five minutes.

Don't make tea in a cold teapot. Rinse with hot water before placing the leaves in the pot.

Don't pour a second water over the leaves when the first brew is exhausted.

Don't allow tea to grow damp in the caddy.

Don't buy too cheap a quality of tea and expect good results.

Here is the Japanese method of making a delightfully refreshing beverage: Heat the earthen or china teapot thoroughly with boiling water then empty out the water and put in the tea, pour in freshly boiled water, let it stand for five minutes and serve.

Always use a porcelain or earthenware teapot.

PUTTING UP PEACHES.

In putting up peaches it is well to sort them over carefully, taking the largest and finest for table use, the next grade for pies, the very soft overripe ones for preserves, and the inferior ones which are not spoiled, but only ripe and tedious to peel, for butters and marmalade. In this way nothing is lost, and the canned products present a fine appearance.

Table Peaches—Make a rich sirup of one cup of sugar and enough boiling water to moisten it if pint cans are used. If quarts, use double the amount. Carefully estimate from the size of the halves of the fruit what will fill a can and slip the peeled fruit into the boiling sirup. When hot through, can and cover with the boiling sirup. Seal at once. By taking one can at a time the fruit is kept a beautiful golden color and does not get mushy.

Pie Peaches—Use the broken halves and smaller fruit and cut each half in about three pieces. Make your sirup and cook the peaches only two or three minutes after bringing to a boil in the sirup. Pack closely in cans so they will not be too juicy. Seal while boiling hot.

Peach Butter—Take the small, very ripe fruit after carefully washing the peaches. Cook in a stone or granite vessel till soft with just as little water as will keep them from scorching. Put through a coarse sieve or colander and return to the fire with half as much sugar as pulp. Cook very slowly and carefully until thick and rich.

Peach Preserves—Make a heavy sirup by using one cup of sugar to each pint of peeled peaches or pound for pound if a very heavy preserve is wanted. When the sirup is boiling put in the peaches, which must not stand peeled until they are dark, and draw the pan to the back part of the range, where they will cook slowly and steadily. When clear and transparent, can in jelly glasses or small cans.

Peach Marmalade—Proceed as for butter, but when the pulp is ready to return to the fire add one-half teaspoon of ground cinnamon, nutmeg and cloves to each quart of pulp along with the sugar. Cook slowly till thick, dark and fragrant.

AMONG OURSELVES.

Although some of the crops have been a failure this year others are good and bringing such prices that farmers, on the whole, are in pretty good humor. When grain is going out and money coming in is a good time for the housewife to make her wants known. The farm housewife richly earns a share of the yield of the farm. She should have some of it in household labor savers such as Gilchrist Michigan comes to tell us about:

The art of housekeeping and homemaking has been much discussed recently and many new labor-saving appliances are on the market. In trying to estimate the relative importance of these aids, I find my allegiance divided between the fireless cooker and the

vacuum sweeper. The fireless cooker, even one of the home-made variety, such as I use, is the greatest help towards having well-cooked meals and at the same time having more of the freedom that is so needed by the farmer's wife. The most recent addition to my "working force" is the vacuum sweeper. I could scarcely realize what efficient work it was doing, as it slid easily and noiselessly over the rugs, until I saw the great quantities of gritty dust that came from its interior. However, the greatest thing about it and one bearing directly on the health of the family lies in this fact—the germ-laden dust instead of being thrown up into the air to be breathed by the worker and oftentimes by small children, is drawn into the sweeper to be burned later. While one can understand that not all women can avail themselves of the more expressive devices, it seems strange that they should need to be urged to make use of the little conveniences to be obtained at any ten-cent counter. But we all know women who pare potatoes with a butcher knife and beat eggs with a fork, simply because they have gotten into a rut. Since there are so many vacuum cleaners for the house, we hope that this Home Department will act as a sort of brain vacuum cleaner and draw out the cobwebby, old ideas of saving a dime at the expenditure of a dollar's worth of strength.

Your editor echoes that wish with all her heart. She fairly longs that the Home Department, or some other agency, should stimulate desire and strengthen purpose in the women. Among Ourselves to simplify their labors and so make it possible to give more thought and effort to the higher duties of the homemaker. Let us have labor savers and conveniences talked of until every one is eager and determined. Please write of your little conveniences too—there are still women who pare aples with a butcher knife.

Since we are in the realm of household affairs I will introduce Miss Nina S., who brings "apple ways:"

With apples rotting in the orchards, everyone wants to know new "apple ways." I find that it makes a change which my family enjoy to use cider instead of water in preparing apple sauce; I also find that cooking it in the oven gives it a different flavor. When making pancakes for breakfast I sometimes make an addition to the batter of apples chooped fine, as cabbage for cold slaw. Baked apples are always good, but one likes a change. I take the larger apples and with a corer scoop out a large-sized cavity, being careful not to make a hole clear through the apple. Into this cavity I put butter, sugar and walnut meats or raisins, both if I want the apples especially nice. The cavity should not be too full and the apples should be cooked in a moderate oven, preferably with a cover on until the skins are tender. For a change from the regular apple pie I make a deep apple pie which has no under crust. I use plenty of apples and by making a biscuit crust, which may be as rich as desired I have an appetizing dish which when eaten hot is a very good one at supper these frosty autumn evenings.

That cider hint is new to me. Speaking of cider, do the friends all know that cider may be scalded and bottled, in self sealers, and so kept for future use?

Frosty mornings make hot beverages welcome where they are not felt to be a real necessity and yet many of us object to coffee. To us comes Mrs. Nina Pratt with a recipe for a tested cereal drink:

I have a receipt for a cereal drink that we have used for years and which we would not exchange it for any boughten preparation we have ever tried—also we find it very healthful as you may judge from the ingredients: Three pints of wheat bran; one pint of rolled oats; one pint of cornmeal; one-half pint of rice; one-half cup of sorghum and one egg. Rub all thoroughly together so there will be no lumps and brown it as brown as possible without burning. The browner it is the better the flavor. Stir frequently. Cook well and serve with cream.

Sometimes these cereal drinks are voted "no good" because the cook does not take time enough to prepare them properly. Long cooking is the watch word for their success, and cream in generous quantity is almost a necessity, though some prefer hot milk and a modicum of cream.

A little woman, by name "Mrs. Lonesome," comes to us with something to which the circle is invited to give its attention:

As I am a young wife and mother I feel almost left alone in this since my beloved husband went into the raising of thoroughbred hogs. I don't know if he really thinks about how lonesome it is to sit alone during the long days and till midnight hours waiting for the trains on which he's coming back from fairs or sales. And when at last he gets here his mind is so taken up that he won't talk about or discuss anything but hogs. In these years that he's been in this business he has built up the most modern, large and convenient barns, hog houses, sheds, alfalfa pastures and pens of any farm in the county, while the dwelling house is a small, three-room building with not even a small front yard on which to plant a few flowers. But I do not complain about the house, for I'd be the happiest woman in the world in this little house, if he would only stay at home with me more and show some interest in me and the babies, for I feel as one writer says, "It is not money, position or fine clothes as much as man's love showing itself in all his actions to them and which can be seen, felt and heard, that most women long for." As this is really a breeder's paper I suppose there are many breeders' wives Among Ourselves and I wish some would write their feelings. My husband was not home twenty-four hours in one time from January 2d until March 8th, excepting the day he had his sale. During this time he had a little darling baby born to him and how very lonesome I did feel. I would sit for hours after putting the babies to sleep wondering where he was, what he was doing or thinking about and why he would rather sit in some dirty depot waiting for trains during the night hours when I sit and am so hungry for his strong arms to fold around me. To make money to keep up with his family expenses, someone says, but so far his expenses have been much more than the income; that is, the money he got more than market price. And what is more, any man with a quarter section of good land can make a good living and without that disagreeable hired help, and have things more "homey" and pleasant by doing the work himself with his wife's help in milking, feeding calves and pigs (not alone, of course, but helping) talking and building air casties while doing so.

"Mrs. Lonesome" is in need of advice, wise, sympathetic advice. I trust that our members will rise to the occasion. Please do not stand back and leave it to others to perform this kindly office. If your heart is moved by what "Mrs. Lonesome" has told us put its expression on paper and let me have it—the sooner the better.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

4th Quar. Lesson 1. Numbers 11: 4-33. Oct. 5, 1913.

MOSES' CRY FOR HELP.

One of the proverbial after-sermon grumbles was, "Why does the minister always talk about those old Jews? What have we to do with them?" The answer might have been, "Much every way!" Although they lived so long ago and so far away, the Hebrews were human beings—just men and women—with hopes, fears, and frailties like our own. Their story is a cross-section of life. It is what life is in every age and everywhere. In this instance the story is peculiarly exemplary, instructive, corrective, and inspirational. To any individual, or mass of such, seeking an ideal—ethical, social, or spiritual—this pilgrim and pillar-led march is suggestive and helpful in the last degree. In point of fact, it is just a pictorial representation of humanity's age-long quest of the "ultimate good." No progress, either of the individual or the mass, is unbroken by moral lapses, more or less shameful. How true to nature, in this instance, the stroke which represents the present ills of Israel as unbearable and magnifies the small comforts of Egypt into delicious luxuries! Pharaoh's bill-of-fare included meat, fish, cucumbers, melons, leeks, onions, and garlic. Jehovah's just mentions manna. The complainers did not have sense enough to consider which menu was the better suited to the physical conditions that then maintained and, therefore, was most sanitary. They all had to matriculate in the expensive school of experience. Fools will learn in no other. With the flesh for which they "lusted" still between their teeth, multitudes of them died. To picture an angry God as smiting the people to death is intolerably unworthy. God did not do it at all, except through the natural operation of those laws which are absolutely impartial. The soul that sins against these laws dies to-day by their natural operation. * * *The proverbial lonesomeness of moral leadership has illustration in Moses' experience. He felt that he was bearing all the people alone. And he was! Hear his pathetic cry to God: "Wherefore hast thou afflicted thy servant, and wherefore have I not found favor in thy sight, that thou layest the burden of all this people upon me? Have I conceived all this people? Have I begotten

Do You Know that The Ladies' Home Journal Will Educate Your Child And Not Cost You a Penny?

No matter at what college: if a boy at Yale or Harvard, at Princeton or Wisconsin; if a girl at Wellesley or Vassar, at Smith or Ann Arbor; anywhere, at any school or college—the finest in the land.

Over a thousand girls and boys have already been educated by *The Ladies' Home Journal*. Yet only very few people, comparatively, know of this remarkable record.

Every prominent college and musical conservatory has had its *Ladies' Home Journal* pupils, sent there by the magazine, with all expenses paid.

It is part of the personal service back of *The Ladies' Home Journal* that has taken 20 years to build up and has made the magazine an institution in American life: not a mere thing of print and paper, but a personal, living help in the lives of tens of thousands of families.

What it has been and is to these thousands it can be to you and your child, son or daughter.

If you are interested in knowing how all these young people have received education, without one cent of expense to themselves, send a postal-card of inquiry.

902 Popular Bldg., Des Moines, Iowa

them, that thou shouldst say, Carry them in thy bosom as a nursing father beareth a sucking child unto the land which thou swearest unto their fathers?" * * * The condition has at length become insufferable, but not before the psychological hour in which a partition of responsibility can safely be made. A moment earlier it would have been impossible. But seventy men can now be found who, in addition to native executive ability, share the vision and spirit of Moses to such a degree as to make them serviceable. There was arbitrary transference of Moses' spirit. It was already upon them. The call to service only quickened it and made the seventy conscious of its possession.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

OUR COUNTRY GIRLS.

(Tune: My Country, 'Tis of Thee.)
Our country girls are best;
They surely beat the rest,
Day after day.
They work from morn till night,
On cloudy days or bright,
Till everything is done just right.
Hustlers are they.

Cook dandy meals they do;
With joy the grub you chew,
And happy smile.
Why do you praise them so?
Because they're full of go.
They are not simply built for show
Nor city style. —P. A.

AUTUMN LEAF CONTEST.

Look around you. Isn't this a beautiful season? No artist can excel Nature as a painter.

Aunt Mary wants you to look for pretty autumn leaves. Find three varieties, one leaf each. Place them between a folded piece of cardboard, with slips of paper between the leaves, giving the name of the tree or shrub they grew on, and your own name, age and address.

For the set of three most perfect and prettiest leaves sent her before October 31st, Auntie offers a good story book.

Kindness and Honesty.

(First Prize.)

It is kindness that everybody should look for and give. No one should try to get revenge on some innocent person or animal for some other party's fault. There are a great many people who do things like that.

For instance, a boy received a scolding from his mother for some reason or other, and when he gets outdoors he will hit someone whom he knows he can lick. He may hit his little brother or sister; he may kick the dog, or even pull the cat's tail to make it squeal. He does not think far enough, nor realize that somebody is suffering just because he got into trouble.

A boy should take his dealings when in trouble in the right way, and not grumble and "sass" his parents for an hour or so just because he got in the wrong. The best way to be in the right and keep out of trouble is to be honest and truthful, and you will be liked and trusted by all your friends.

A good way to do this is to join the Boy Scouts of America. Learn the rules given by the scout master and follow them, and you will always be in the right, and seldom in the wrong.

Stick to this, and let it be your motto: Honesty is the best policy.

—Wm. T. Dunn, Wis., age 11.

A Trip to the Mountains in Colorado.

(Second Prize.)

It was a bright, sunny morning on the 16th day of August when we took a trip to the Flat Top Mountains. There were nine of us to go, so we rode horseback.

Just as we were going around a hill we saw a Rocky Mountain automobile, which if you had looked real closely you would have seen was a two-wheeled cart drawn by two burros.

Then as we were going on, we came to a stream of water where we got a drink. After we had gone about seven miles we found that we could go no farther with the buggy. We looked around us, and saw a stream of water running down from a mountain, and the water was ice-cold, and my! it was good! We saw trees at least 150 feet tall and three feet in diameter. We ate dinner and saddled the horses and went on up the mountains.

After we got up there we got some snow and snowballed each other; it was the first time I ever ate snow in August.

We saw a little lake and it was very pretty. It is called the Little Sand Lake. Looking away to the west we could see the Iron Mountains in Utah, about 400 miles away.

—Alice Covert, Okla., age 12.

Roly and Poly.

(Third Prize.)

This spring I offered a neighbor boy 25 cents to catch me a pair of young squirrels. He got them; and I put them in a box with a screen top. I cut a door in the box and fastened it on with leather hinges, and filled the box two-thirds full of leaves.

The little squirrels would crawl to the bottom of the leaves. I fed them milk with a spoon. I called them Roly and Poly; the two names together spell roly-poly.

One day the squirrels found a way out and fell from a high shelf to the ground, where I found them huddled together soon after. One day I found them dead. I put them in a box and buried them under a cottonwood tree.

—L. H.

Farm Life.

I have heard many people say they could not live on the farm, because there was not enough excitement. I was noticing this morning as I was weeding out the garden that there were some mocking-birds and wild canaries sitting and singing as if they knew what each others' songs were. It was so pretty and clear I couldn't help stopping and listening. Who would want sweeter music than that? I wouldn't. City people don't get out to see the beauty of the world.

—Mamie, Tex.

He Couldn't Shoot.

One day my cousin was at our place to go hunting. He didn't get any rabbits. So he wanted to shoot one of our tame ones. The rabbit looked at the gun, and then stood up on his hind legs. When my cousin came into the house, he said he couldn't shoot such nice rabbits. So he went home without any rabbits.

—Annie Dowe, age 11.

Central Wisconsin threshermen report the largest yield of grain ever harvested in that part of the state. The average yield of oats as stated by a thresherman of experience, is sixty-five to seventy-five bushels an acre, measuring by weight, or fifty bushels to the sack. Rye runs twenty to twenty-five bushels by weight. Barley was not so good, but the acreage of barley was also small, oats and corn being the principal grain crops. It is said that the grain is of exceptional quality not being damaged by heat, frost, or blight of any kind. Threshers started work this season fully a month earlier than last year. A number of farmers threshed barley and rye in early August and engaged the crews a second time to thresh oats. The yield of corn is expected to be very heavy and beyond injury by frost.

MONEY IN GRAIN.

$10.00 buys puts or calls on 10,000 bushels of wheat or corn. **No further risk.** A movement of 5c from price gives you an opportunity to take $500; 4c, $400; 3c, $300, etc. Write for particulars. **Finance Brokerage Company,** Desk 8, Finance Bldg., Kansas City, Mo.

The Greatest Picture Ever Painted

The picture that every married couple paints in their minds---the picture of a comfortable, well furnished, home-like home---the picture that is so hard to make real in these days of high costs.

Yet the realization of this picture is more certain through Montgomery Ward & Company Catalogue than in any other way. Here in this wonderful 1000 page book will be found everything for the home at prices astonishingly low. Furniture, rugs, carpets, pictures—everything needed from the kitchen to parlor.

Many young couples have, through the saving effected by dealing with Montgomery Ward & Company, made their dreams come true; have, in time, actually brought to reality this—"The greatest picture ever painted."

This, too, is your privilege—your opportunity. The 1914 Catalog of Montgomery Ward & Company points the way. It points the way to better merchandise, lower prices, fair dealings, and absolute satisfaction or money refunded.

Fill in the coupon below, cut out and mail today. The Big Bargain Book will be sent you at once.

Montgomery Ward & Company, Dept. E. E. 17

FIELD NOTES.

Will Bauer, Audubon, Iowa, advertises fifteen immune Duroc Jersey boars for sale on page 46.

If in the market for Holstein cows and heifers write W. C. Kenyon & Sons, Elgin, Ill., as per the advertisement on page 17.

Galloway cattle, both bulls, cows and heifers, are for sale by James P. Milliken, Medea, Ill., whose advertisement appears on page 43.

V. W. Harms, Fairbury, Ill., invites inspection of his imported Percheron and Belgian stallions and mares. See advertisement on page 43.

On page 22 Mervin Deming, Cortland, Neb., is offering Orpington pullets and cockerels, Bronze turkeys, Pekin ducks and Toulouse geese for sale.

Good Duroc Jersey boars are advertised for sale at $30 and $40 by R. F. Aikman, Audubon, Iowa, on page 47. These boars are all right and are well worth the money.

Forty head of immune Hampshire fall and spring boars are advertised for sale by F. O. Peterson, Galva, Iowa, on page 44. Mention The Homestead when writing him.

White Orpington hens, pullets and cockerels of the Single Comb variety are offered for sale by Mrs. Howard Niswander, Kinross, Iowa, in her advertisement on page 22.

A. A. Berry, Clarinda, Iowa, announces on page 38 that he wishes to sell his entire lot of eleven head of Shetland ponies. He will make bargain prices for the whole bunch. Write to the address named above.

Prices on good-boned Chester White boar and sow pigs are quoted in the advertisement of Will Michael, Selma, Iowa, appearing on page 46. These animals weigh from 100 to 160 pounds and are guaranteed as represented.

W. Doolittle, Woodland, Mo., breeds a type of O. I. C. hogs that meet with favor in the hands of practical hog men. He is prepared to fill your order for boars or gilts and solicits your business. Note page 46 for his advertisement.

Sykes metal roofing and siding may be obtained direct from the factory and at reduced prices as noted in the advertisement on page 8. Samples and prices will be provided free to those who write to the Sykes Metal Lath & Mfg. Co., 520 Walnut St., Niles, Ohio.

Sixty head of Duroc Jersey fall and spring boars, all vaccinated, cholera immune and ready to ship, are advertised for sale by C. R. & R. W. Steele, Ireton, Iowa, on page 47. They are pricing these at $35 and $50 and ship on approval, provided you mention The Homestead.

In sending copy for advertisement of O. I. C. and Chester White swine, that appears on page 38. Fred Ruebush, Sciota, Ill., writes: "All stock healthy and doing well. I have a choice lot of boars of different ages now ready to ship. Also spring gilts and bred gilts and sows to farrow this fall."

Climate, soil and sunshine, the great elements of successful agriculture, are boasted by the territories in Dakota, Montana, Idaho and Washington covered by the Chicago, Milwaukee & St. Paul railroad and advertised on page 14. Low rate homeseekers' tickets are on sale every month for those who wish to investigate. As a preliminary preparation, however, it would be well to obtain literature giving facts based on government reports concerning the lands in question. These may be secured without cost by writing to O. E. Shaner, Immigration Agent, 750 Marquette Bldg., Chicago, Ill.

Twenty-five Duroc Jersey boars, mostly sired by A Wonder Jr., the first-prize boar at Sioux City, Iowa, this year, are advertised for sale by H. Gruis, George, Iowa. These boars are all cholera immune and he is pricing them at $25 and $30. Mention The Homestead when writing him. See advertisement on page 47.

Chas. Escher & Son, Botna, Iowa, advertise two car loads of Aberdeen Angus cows and heifers for sale on page 43. About half of these have calves at foot. They also have thirty head of good bulls that they are making special prices on. When you write them kindly mention The Homestead.

The Des Moines Tanning Company places an announcement on page 19 which will be of interest to those who wish to purchase fur coats or robes or who have those articles which need recold weather starts is a good time to have this done. Write Des Moines Tanning Co., Dept. A, Des Moines, Iowa.

No sportsman cares to come back from a hunting trip with an empty hand. One of the best ways of insuring game is to go hunting with a supply of Remington steel line shot shells, which are advertised on page 7. They are made by the Remington Arms-Union Metallic Cartridge Co., 299 Broadway, N. Y.

The Little Giant Elevator in the advertisement on page 20 enables huskers to put in 20 per cent more corn in a day than when they have to scoop from wagon. Proof of this and other advantages of the Little Giant are given in a free book, for which write Portable Elevator Mfg. Co., 155 McClun St., Bloomington, Ill.

Forty head of Hampshire boars are advertised for sale by Roy E. Fisher, Winside, Neb., on page 44. These are all from prize-winning stock. In fact, he won forty-two prizes at the three leading fairs this fall. Don't delay your order, but write him right away. Kindly mention The Homestead when corresponding with him.

The King Aerator advertised on page 7 is a more recently perfected ventilating system for barns and stables. The advertisers assume all risk by guaranteeing this ventilator to satisfy every purchaser or money will be returned. For price list and particulars address Galvanized Steel Cupola Co., 1177 Vine St., Owatonna, Minn.

Swanson's all-steel portable grain dump and elevator is advertised on page 20. It is a steel machine, practical, indestructible and built so that it will elevate small grain, potatoes, flax seed, or any field or garden products. Catalog giving prices and terms may be obtained by writing to Swanson-St. Joseph Plow Co., St. Joseph, Mo.

Wood sawing is never a pleasing occupation, but the folding sawing machine advertised on page 13 comes as near to taking hard work away from the operation as may well be done. This saw is operated by one man and does more work than two men. For low prices and catalog A-36 write to Folding Sawing Machine Co., 161 W. Harrison St., Chicago, Ill.

Marlin repeating rifles are made in all the popular big game calibers, as well as those suited to the ordinary sportsman. The Marlin is a gun suited to every demand and it is always dependable. Catalog describing it and giving prices may be obtained by sending three cents for postage to the Marlin Fire Arms Co., 135 Willow St., New Haven, Conn. See page 6.

Quaker City feed mills are sent direct from the factory on a free trial with freight prepaid. These grinders are rapid, easy to operate and grind coarse or fine, as may be required. They are made in twenty-three styles. For particulars as to the above offer and illustrated catalog address the A. W. Straub Co., Dept. G-3723 Filbert St., Philadelphia, Pa. See page 20

Fairbanks- Morse feed mills are advertised on page 22 of this paper. The manufacturers urge that farmers grind feed, because grinding makes it more easily digested and enables the animals to assimilate a greater proportion of the food values. The Fairbanks-Morse feed mills are described in catalog FC 603 for which apply Fairbanks-Morse & Company, 900 S. Wabash Ave., Chicago, Ill.

The latest and most popular fall suits for young men are advertised on page 11. Reference is made to the Clothcraft blue serge special sold at $18.50, guaranteed all wool and fast color. The manufacturers of Clothcraft goods also supply many other styles of clothing, all of which are described in the catalog for which apply to the Joseph & Feiss Co., 628 St. Clair Ave, N. W., Cleveland, Ohio.

In an advertisement on page 21 our readers are referred to Visio as a remedy for moonblindness in horses. It often happens that horses are affected by moonblindness or other diseases of the eye, which makes them shy and dangerous drivers. Visio is offered as a means of curing and preventing eye diseases. Note that it is sold at $2 per bottle, prepaid to address. Send orders to Visio Remedy Co., 2458 Calumet Ave, Chicago, Ill.

It is asserted that in Arkansas and portions of Texas an acre of peanuts will produce three times as much pork as an acre of corn, and that, too, while it requires less tillage, a crop of peanuts does not deplete the soil as does corn. The advertisement of the Cotton Belt route on page 21 cites some things along this line. The advertisers have also prepared a number of books illustrating the advantages of Arkansas and Texas, that may be obtained free of charge by sending a postal card request to E. W. La Beaume, General Passenger Agent, 1708 Pierce Bldg., St. Louis, Mo.

An advertisement of interest to Homestead readers wishing to buy Poland Chinas will be found on page 38. Blake & Blake, Maquoketa, Iowa, are offering spring boars by Again Chief Price 192035, second-prize winner of the Iowa State Fair, 1912. They also have some large, growthy gilts of the easy-feeding type, that have plenty of length and bone. These animals will be sold at farmers' prices.

The attention of our readers is directed to the advertisement on page 44 of O. J. Satre in which he announces that he has for sale Poland China fall and spring boars. These are excellent pigs and worth much more money than the owner is offering for them. They are by a son of Big Jones, one of the most popular big-type hogs of southern Iowa. For prices or other descriptions write to O. J. Satre, Jewell, Iowa.

Lewis Lye is advertised on page 6 of this paper. Aside from its merits as a household article, Lewis Lye is exceptionally fine as a hog conditioner and preventive of disease. The manufacturers have made extensive experiments in this direction and have published a book showing its results, which is very interesting. The book may be obtained without cost by applying to the Pennsylvania Salt Mfg. Co., Philadelphia, Pa.

The season has now arrived when farmers should take every means to protect their horses from catching cold. This means that a good horse blanket should be provided for use at all times. Old Honesty blankets advertised on page 12 are made not only for the purpose of providing warmth, but are waterproof also. They are sold at very low prices and may be purchased by forwarding the amount named in the advertisement to the Bemis Blanket Co., Omaha, Neb.

Dressy, durable and comfortable shoes such as the Mayer Honorbilt shoes advertised on page 28 are well worth the price at which they are sold. The Mayer cushion shoes are made for the special purpose of providing comfort for sensitive feet. The illustration in the advertisement shows how this is done. Buyers should insist on obtaining the Mayer Honorbilt shoes from their dealers. They are made by F. Mayer Boot & Shoe Co., Milwaukee, Wis.

The Monitor double disc drills are said to be a very great insurance against losses of small grain crops. The Monitor drops all the seed in front of the bearings at the bottom of the clean, wide furrow in two rows at an even depth, and covers it with a uniform amount of moist earth. Every seed grows. The Monitor is a light draft, it is durable and it is reasonably cheap. The Monitor drill booklet and price list will be sent free on request to the Moline Plow Co., Dept. 11, Moline, Ill. See page 7.

Gradually the practice is becoming firmly established of providing some more durable material for roof coverings. As the outgrowth of this demand the Edwards steel shingles, which are advertised on page 9, have been perfected and offered to the public. They are fireproof, rustproof and leakproof. They are sold direct from the factory, freight charges prepaid. Builders should obtain a copy of the Shingle Book Catalog No. 1090. Address the Edwards Mfg. Co., 1040-1090 Lock St., Cincinnati, Ohio.

One of the greatest and most successful devices provided for the extermination of hog lice is the Hog-Joy Vermin Killer advertised and illustrated on page 38 of this paper. This is simplicity itself. It cannot break. The hog does the work, does it well and keeps himself in a healthy and comfortable condition. The device is sent on a thirty days' free trial and sold, freight prepaid, with two gallons of oil for only $10. Send orders or requests for information to the Hog-Joy Co., 301 N. 5th St., Springfield, Ill.

The Sharples milker is advertised on page 16 of this paper. It illustrates the difference between this new milker and the old plan of hand milking. The difference is too great to be overlooked. This fall thousands of farmers saw the milking machine on exhibition at state fairs and wondered that they had, up to this time, been able to get along without such a labor saving device. A great many interesting and profitable facts are noted in the Sharples Milker Book. Better get one of these from the Sharples Separator Co., West Chester, Pa.

Our readers who are in search of Chester White hogs, male or female, will be interested in the advertisement of G. O. Satre, which appears on page 46. Mr. Satre has at the head of his herd an Iowa State Fair prize winner, as well also as another of particularly excellent blood lines. The brood sows are daughters of Chief Select, now one of the best of breeding hogs in northern Iowa, and others of excellent reputation. The herd is in good condition, thrifty, healthy and right every way. Other information may be learned by writing to G. O. Satre, Jewell, Iowa.

Prices of building materials of all sorts are advertised by the Harris Bros. Company, on page 48 of this paper. The advertisement goes considerably into details with reference to low figures on lumber, roofing, wire fencing, and, in fact, everything connected with the building or furnishing of the farm home. Special pains have been taken to supply the wants of farmers by providing plans, specifications, lists of building materials and full instructions as to erection. This concern is the old Chicago House Wrecking Company and does business on the same plans. A number of catalogs are published, any or all of which

may be obtained without cost by putting check marks in the squares opposite the books wanted on the coupon which appears in the corner of the advertisement and forwarding it to Harris Bros. Company, 35th & Iron Sts., Chicago, Ill.

W. O. Douglas, Janesville, Wis., has a herd of thirty registered Jerseys that are very choice animals. His herd sire is Merry Maiden's Pilot, a son of Beaumont's Pride of Helene of Roselyn Farm. One of his females, Dutchess Calcium, made 4.49 pounds of fat in two days, which is an excellent record. The bull, Royal Fox, a son of Imp. Royal Fox, is the sire of Mr. Douglas' young animals, and they show the characteristics of this excellent animal. For further information write W. O. Douglas, Janesville, Wis. Kindly mention this paper when writing.

The Iowa Seed Company on page 9 of this paper is offering new crop clover, timothy and other grass seeds, and they are urging upon our readers early buying as prices are now quite low comparatively. There seems to be a good crop of grass seeds this year of excellent quality, and as the prices are lower than for several years past, especially on clover and alfalfa seed, it might be possible for our readers to purchase at present values. We suggest that you write the Iowa Seed Company, Des Moines, Iowa, for samples and prices of whatever grass seed you are in need of.

Maxwell cars, such as are advertised on pages 24 and 25, are each year becoming more and more popular with those who want easily operated cars with all the more recent improved devices and that sell at reasonable prices. The three styles illustrated in the advertisement range in price from $750 to $1,975. The latter is a wonderfully beautiful car, a six cylinder, fifty horse power, with electric light, electric starter and luxuriously finished. We might go on at great length in description, yet not more than half tell the story. The full story may be obtained from catalog A, for which write Maxwell Motor Car Co., Detroit, Mich.

Kaufman Bros., Moscow, Iowa, breed Shropshire sheep and advertise them on page 26. They write concerning their sheep as follows: "We are still selling Shropshires at prices that will not rob farmers or breeders. Our sheep are all in good healthy condition and are on the market at prices that will satisfy anyone who wants lambs or ewes either for foundation flock or as reinforcing. We believe buyers cannot afford to miss the rare bargains we are offering. We are in position to sell as low as any breeder, as we produced our own flock and still have a fine lot to sell from. We are not making any fairs this fall and must therefore sell all our surplus stock at private sale. We are located on the main line of the C. R. I. & P. railroad and within a short distance of the River to River automobile road, and would be glad to have sheepmen call or write and will surprise them with our low prices when breeding and quality of stock are considered." Address inquiries to Kaufman Bros., Moscow, Iowa.

At the St. Joseph Fair last week Thos. F. Kent, Walnut, Iowa, the well-known Chester White breeder won the following premiums: Aged boar, Promoter 1st; Combination I. X. L. 2d; Combination T. K. 4th. Junior yearling boar, Iowa Prince, 2d. Under 12 months, Iowa King the Second, 1st. Under 6 months, won 1st and 3d in this class. Aged sow, Iowa Delight, 1st; Kent's Kind, 2d; Iowa Nora, 4th. Senior yearling sow, Iowa Favorite 1st. Junior yearling sow, Kent's Beauty, 1st; Iowa Bond, 3d. Under 12 months, Iowa Pearl, 1st; Iowa Gem, 3d. Under 6 months, won 1st, 3d and 4th in this class. Aged herd, won 1st and 2d. Bred by exhibitor, won 1st and 2d. Young herd, won 1st. Get of sire, Iowa Protection, 1st; Ned, 2d. Produce of sow, Gustafson Choice, 1st. Champion boar over 12 months, Kent's Promoter. Champion boar under 12 months, Iowa Kingser. Grand champion boar, Kent's Promoter. Champion sow over 12 months, Iowa Delight. Under 12 months, Iowa Pearl. Grand champion sow, Iowa Delight. See page 46.

Wisconsin, although the leading dairy state of the Union, has also some of the best Short-horn cattle to be found in the United States. One of these excellent herds is to be found at Lodi, Wis., and is owned by Herr Bros. & Reynolds. They have 125 registered animals headed by three excellent bulls. One of them is Whiterock, a son of Whitehall Sultan. He won first as a calf at the Wisconsin State Fair when shown by Harding, Waukesha, Wis. A second bull is Golden Sultan, a son of Royal Sultan, that was a son of Whitehall Sultan. They were recently offered $10,000 for this bull. At the International in Chicago, he was second as a yearling, first as a two year old and reserve grand champion, and as a yearling was junior champion at the Wisconsin State Fair. There are a great many of his sons and daughters in the herd. A third bull is Cumberland's Ideal, sired by Cumberland's Last, the great Saunders bull. He was first at the Wisconsin State Fair as a calf and junior champion in 1911. Their entire show herd of twenty animals, with the exception of the aged cow, is of their own breeding. At the 1913 Wisconsin State Fair this herd won all firsts and championships on steers, both pure bred and grade, third on aged bull, fourth on senior bull calf, first and third on junior bull calf, second on aged cow, second on two-year-old heifer, second and fifth on junior yearling heifer, second and third on senior calf, first and fifth on junior heifer calves, second on aged herd, second on young herd, first on calf herd, third on get of sire, third on produce of dam. For further information concerning this herd write Herr Bros. & Reynolds, Lodi, Wis. Kindly mention this paper when writing.

Power adapted to all the needs of the farm is rapidly becoming one of the most important means of economizing in help. The gasoline engine has come to the front in a manner more remarkable than the advancement of any farm implement yet introduced. The Economy gasoline engines advertised on page 10 are true to their name. They are made in sizes ranging from one and one-half horse power for the smaller purposes of barn and house up to the ten horse power that handles the heaviest tasks. The Economy is simple and durably built. It has every improvement known to gasoline engine makers. It is equipped with an Elkhart magento which furnishes a dependable spark to ignite the charge in the engine and it will last as long as the engine itself because it is built in as a part of the machine. The Economy runs with a minimum quantity of fuel and gives a maximum of power. The smaller sizes, particularly adapted to pumping, are mounted either on skids or a small truck as the buyer may wish. A handsomely printed catalog of Economy engines illustrates the engines, the various parts, the materials from which they are made and the factories in which they are produced, as well as dozens of unique uses to which they are put. This catalog should be in the hands of every prospective buyer and may be had without cost. Write for it, asking for Engine Book No. 65-I-20. Address Sears, Roebuck & Co., Chicago, Ill.

In an advertisement on page 38, G. F. Marshall & Son, Monroe, Iowa, announce that they have six splendid fall Poland China boars, the get of Giant King and Jumbo. Writing with reference to their hogs they say: "The fall boars we are offering are the best we ever had. They are extra heavy in bone, have great length of body and unusual smoothness. They have the finish of the little show hog, but the size and quality of the real big type. Four are sired by Giant King, one of the few 1,000-pound hogs living and having a capacity to carry 1,200 pounds of fat. He has excellent finish with all his size. Giant, the largest of the fall boars has immense bone and great wide body on the best of feet, and is a litter brother to pigs sold to John Gallman and A. J. Leitel, two breeders who are greatly insistent upon size and quality. The dam of this pig is Miss Prospect, she by Big Prospect. Two of the other Giant King pigs are from Jumbo Price, she by Chief Price. These fellows are good enough for any breeder. They are extra in every way and the best I have seen this year. Their breeding is at the top. I have two good fall boars by Jumbo, he by Big Jumbo. They are out of Lady Monarch 5th, the dam of Giant King. I will ship either of these boars to any breeder on approval. I have also a few spring boars and forty head of yearling and spring gilts which will be sold, bred or not, as the buyer may wish." The Marshall herd has been noted for many years for the high quality which was combined with the size produced. The pigs which are now offered for sale are right in the same line. For descriptions and prices write

De Young Offers Immune Boars.

On page 46 A. J. De Young, Sheldon, Iowa, advertises fifty head of Duroc Jersey boars for sale, all of which have been vaccinated and are immune. Mention The Homestead when writing him.

Frank Rainier's Sale.

Those who are going to want Poland Chinas should remember the splendid offering that Frank Rainier will sell at Logan, Iowa, on Saturday, October 4th. Make it a point to be at this sale if you want a good boar or a few good sows.

Leitch's Clydesdales at Springfield.

John Leitch & Son, Lafayette, Ill., will have an exhibit of their Clydesdale horses at the Illinois State Fair this year, October 3d to 11th, and invite all old friends and prospective buyers to visit their barns at the Springfield fair grounds.

Immune Poland China Boars.

On page 38 C. W. Crees, Coon Rapids, Iowa, starts his advertisement and is offering thirty-three head of good spring boars and every one of these is immune and cholera proof. These boars were all vaccinated a couple of months ago with the simultaneous treatment and are right to go out in any herd. These boars will weigh from 175 to 200 pounds and are sired by Giant Wonder and Long King's equal 2d. He is pricing these boars at $25 to $40 and they are well worth the money. Mention The Homestead when writing him.

Immune Duroc Jersey Boars.

Eighteen choice Duroc Jersey spring boars, everyone a good one, and all cholera immune, are advertised for sale by Peter Johnson, Dickens, Iowa, on page 46. These have all been vaccinated a couple of months ago and are ready to ship. Mention The Homestead when writing Mr. Johnson.

Cope's Poland China Boars.

In the advertisement on page 38 J. H. Cope announces that he still has for sale about a dozen head of Poland China boars of spring farrow. These are big, lusty, thrifty fellows, the get of Long Mastodon and from dams of superior lines of breeding. As it is his desire to close out, special prices will be made early buyers. Address J. H. Cope, Carlisle, Iowa.

Rider's Shropshires.

Glenn F. Rider, Farmington, Iowa, is offering to ship C. O. D. within 100 miles of his town choice registered Shropshire two-year-old rams at $15 each, yearling rams at $12.50 each, ram lambs at $9 each, yearling ewes at $12.50 each, two, three and four year old ewes at $10.50 each, five and six year old ewes and ewe lambs at $9 each. This special low price is for thirty days ending November 7th. They are of the mutton type and in good condition. At this price they will be recorded and crated free. See page 26 and write Mr. Rider mentioning The Homestead.

Miller Offers Berkshire Boars.

On page 38 John C. Miller, Harlan, Iowa, begins his advertisement for fall and spring Berkshire boars and he says for us to say to Homestead readers that he has some good boars for sale and he is offering them at farmers' prices. Mr. Miller is one of the old and reliable breeders of Berkshires in the state and he will treat you right if you send him an order. Mention The Homestead when writing him.

Grade Angus Heifers For Sale.

H. H. Reed, Marengo, Iowa, has eighteen Aberdeen Angus heifers that are pure bred, but cannot be registered. All are two year olds and due to calve early next spring to the service of a registered Aberdeen Angus bull. They will average about 1,000 pounds apiece and would be a great proposition for someone wanting to raise baby beef. If interested write him for price, mentioning The Homestead.

Drake's Poland China Pigs.

C. H. Drake, Lisbon, Iowa, announces on page 38 that owing to scarcity of feed he will sell his season's crop of Poland China spring boars at remarkably low prices. These are of the strictly big-type sort, both in breeding and individuality. The Drake herd is in perfect health and there is no disease in the vicinity. Buyers who wish any should look up this advertisement and note the unusually low prices which are quoted.

Meyer Offers Chester Whites.

With this issue of The Homestead, H. Meyer, Staplehurst, Neb., starts an advertisement in which he offers Homestead readers a few extra choice Chester White spring boars. They are sired by a prize winner at the Nebraska State Fair and are extra good quality, will weigh something over 200 pounds each and are extra heavy boned. Write Mr. Meyer for prices and full particulars. Kindly mention The Homestead when you write.

Holly Williamson's Sale.

On November 5th, H. O. Williamson, Herman, Neb., will make a public sale of Poland Chinas and just take it from us he will sell one of the good offerings of the fall season. Mr. Williamson is generally there when it comes to putting up something choice and he will sell some of the best boars and sows that will be sold in eastern Nebraska this fall. He will sell forty-five head, among which will be eight sows with litters by Giant Defender. He is selling fifteen very choice spring boars and these are as good as he could make them. They are sired by Long Chief Jr., Great Mastiff, Hadley Golddust and Big Tecumseh. He is selling one splendid fall boar sired by Great Mastiff and one fall sow that is a full sister to this boar. Both of these are very good. He is also selecting fifteen of his very best spring gilts. If you are going to be on the market for a good boar or a few good sows about that time you will not make any mistake if you attend the Williamson sale. He never fails to put up a good offering. Send him a postal and ask him to send you his catalog when it is out and kindly mention The Homestead when writing for it.

Belgian and Percheron Horses.

It is somewhat to the credit of the Irvindale Farms that during a recent circuit of four state fairs, fourteen Percheron and Belgian horses were disposed of to parties who inspected them at the different fairs. Mr. Irvine advises us that he still has on hand forty head of stallions and mares and that he is making prices on them below competition. They are advertised on page 38. Buyers are requested to make personal inspection. Address Chas. Irvine, Ankeny, Iowa.

Prochaska's Polands.

J. J. Prochaska is advertising fall and spring Poland China boars at bargain prices, sired by Smooth Wonder Yet, Matchless Charmer, Pawnee Jumbo, all of the best big-type blood lines. Smooth Wonder Yet is a son of Smooth Wonder 2d, bred by Peter Mouw. Pawnee Jumbo is a hard boar to beat for size, bone and quality, weighing at eleven months 405 pounds with a ten-inch bone. He is a good prospect for a 1,000-pound boar. See page 38 and write for prices to Mr. Prochaska, Protivin, Iowa. Kindly mention The Homestead.

W. J. Steinhoff, Aberdeen Angus Breeder.

W. J. Steinhoff, Platteville, Wis., has a herd of forty Aberdeen Angus cattle that are certainly a pleasure to see. That they are excellent animals is shown by their winnings at the 1913 fairs in Wisconsin. His herd won sweepstakes over all breeds at Mineral Point, Darlington, Platteville and Monroe and won six firsts and four seconds on nine head at Madison, Wis. They are principally of the Blackbird strain. For further information concerning this herd write W. J. Steinhoff, Platteville, Wis. Kindly mention this paper when writing.

Farmers' Short-horn Bulls.

With this issue of The Homestead, Pat Kelley, Friend, Neb., is starting an advertisement on page 38 in which he offers a few really good Short-horn bulls at farmers' prices. These bulls are all sired by Improver, a good bull and a good breeder. They are out of cows sired by the noted Scotch bull, Bapton Cruick, and Victoria's Prince. These bulls are well grown, but have never been pampered in any way, and will do well on the ordinary farm under farm care. They are good and strong and of good colors. Write Mr. Kelley at once and mention The Homestead when doing so.

Poland Chinas of the Expansion Kind.

M. G. Arnold bred the Poland China hog, Expansion, that was the means of establishing a new era in Poland China breeding in Nebraska. Mr. Arnold and his son advise us that they have now for sale a lot of fall and spring boars of the Expansion kind. The bunch includes the top of the pigs of spring farrow. They are the get of Orange Boy, he a son of the noted Big Orange. In order to make room $40 and $50 values will go at from $20 to $25. Buyers should come and see these pigs. They are guaranteed to be right and to be free from disease. See the advertisement on page 38 and address M. G. Arnold & Son, Strawberry Point, Iowa.

Hanks & Bishop's Durocs.

Hanks & Bishop, New London, Iowa, are offering to sell twenty head of good Proud Col. gilts out of Model Wonder sows. These gilts are of the large, growthy kind and of the type that make great brood sows. This firm also has fifty good, big, stretchy, smooth boar pigs of spring farrow sired by Model Wonder, Proud Col. and Wonder's Model. The winnings of Hanks & Bishop at the Iowa State Fair in the few years past should be sufficient evidence of the high quality of the hogs bred and offered for sale by them. If you want to buy a good herd boar or some gilts worth the money and bred along right lines, write them as per their advertisement on page 38.

Eakle's Durocs.

S. E. Eakle & Sons, Prophetstown, Ill., inform us that they have been having an excellent trade in Duroc Jersey boars this season. Their young boars have been coming along in nice shape and their litter by Cherry Chief is extra good. There are several extra good Disturber boars left and four sons of Lucy Wonder, the dam of Disturber, that would make herd boars. There is also an extra good litter by S. E.'s Premier Col. and out of an Ohio Chief sow. There are herd boars in all of the litter above mentioned and these can be purchased at reasonable prices when you consider the excellent breeding to be found in Mr. Eakle's herd. See page 47 and write him, mentioning The Homestead.

Stevenson's Chester Whites.

On page 46 of this week's Homestead, T. A. Stevenson, Shannon, City, Iowa, begins his Chester White advertisement and he is offering a splendid lot of boars for sale. Mr. Stevenson has been one of our reliable advertisers for a number of years and he not only sends out good things, but he always prices these at a figure that anybody can afford to buy. These are March and April boars and they are sired by Ben Hur 20329, a grandson of old Chicksaw Chief and Fancy Goods 20327, a boar that he has been using with much success in his herd. Mr. Stevenson has always kept a splendid lot of brood sows in his herd and while he has never been making a great deal of noise about them, he nevertheless has been producing a good line of stuff and he sells them at a reasonable figure. He also breeds Aberdeen Angus cattle and he is offering two good Blackbird bulls for sale. We will guarantee Homestead readers one thing, and that is, if they

NEXT WEEK'S SALE PROGRAM

Monday, October 6	Short-horns, Carey Cameron, Herman, Neb. Duroc Jerseys, Cary Cameron, Herman, Neb.
Tuesday, October 7	Duroc Jerseys, O. S. Larson, Logan, Iowa. Poland Chinas, W. H. Cooper, Hedrick, Iowa.
Wednesday, October 8	Duroc Jerseys, Wm. Reed, Rose Hill, Iowa. Poland Chinas, A. Kool, Cordova, Iowa.
Thursday, October 9	Duroc Jerseys, H. W. Lineweaver, South English, Iowa. Short-horns, Miller & Northy, Morley, Iowa. Poland Chinas, S. C. Wyckoff, Kellerton, Iowa.
Friday, October 10	Hampshire Swine, C. P. Paulsen, Fremont, Neb. Short-horns, Frank T. Pemberton, Iowa Falls, Iowa. Poland Chinas, Frank T. Pemberton, Iowa Falls, Iowa. Percheron Horses, Frank T. Pemberton, Iowa Falls, Iowa.
Saturday, October 11	Herefords, Gudgell & Simpson, Independence, Mo. Poland Chinas, Wigstone Bros., Red Oak, Iowa. Poland China's, Frank Pelzer, Atlantic, Iowa.

send Mr. Stevenson an order for one of those boars or one of those Angus bulls they will get a square deal and they will be satisfied with their purchase. When writing him kindly mention The Homestead.

Marmion's Poland Chinas.

B. F. Marmion, Farmington, Iowa, is advertising Big-Type Poland Chinas on page 45. He has sixteen spring boars left for sale; three of them are extra large and sired by Cox's Wonder, a son of Rood's Giant and out of a Long King dam. There are three by Big Knox. One of the dams is L.'s Lady Hutch by Grand Look, Jr., second dam by Big Hadley. Another good sow is Chief Jumbo by R.'s Chief, dam by Model Chief. Maud's Choice is another good sow sired by Charter's Oak Model out of a dam by Expansion Blue. Mr. Marmion has seven good sow pigs sired by A. Model, the 1912 Iowa champion and out of a dam by Blake's Best, second dam by Big Knox. Anyone in need of a good boar should write Mr. Marmion, kindly mentioning The Homestead.

Sweeney Automobile School.

The wonderful popularity of the automobile lends interest to the announcement of the Sweeney Automobile School which appears on page 18. This institution is training men in the handling of automobiles. The instruction includes running, repairing and caring for automobiles of all classes. So excellent have been the results that the management has recently been obliged to erect one of the largest and most completely equipped buildings of the kind in the country. The practical ruling most effectively fits any man of usual intelligence, for the work. The management has published an interesting postal sheet giving twenty-five views of this school. For other information write Sweeney Auto School, 1118 E. 15th St., Kansas City, Mo.

Stewart's Poland China Boars.

On page 38 Andy W. Stewart, Harlan, Iowa, begins his Poland China advertisement and he offers forty-five head of boars for sale. Among these are fifteen head of good fall boars sired by Big Victor, Blain's Exception and Mammoth Prospect. He offers thirty head of spring boars and these are sired by Panama Chief, his present herd boar. This hog won second prize at the Nebraska State Fair in 1911 in a class of fifty-nine and he is out of a daughter of Wade's Jumbo. All the boars that Mr. Stewart is offering for sale are out of sows that were vaccinated last fall. He is pricing spring boars from $20 up, and fall boars from $30 to $45. There is no reason why you cannot buy a good boar from Andy Stewart, and you get him at a reasonable price. These will not last long, so you had better send him an order at once.

Bode's Chester Whites.

With this issue of The Homestead, H. L. Bode, Friend, Neb., is starting an advertisement in which he offers the choice ones of the spring crop of Chester White boars to The Homestead readers at a liberal discount from the prices formerly charged for this class of stock. As the corn crop is an entire failure in his immediate section he will not hold his February sow sale as he had planned and his gilt crop will also be for sale at private treaty and they will be sold open or bred to good sires at the option of the purchaser. Homestead readers are well acquainted with Mr. Bode and the class of hogs he produces, and the writer would only add that it seems that now is the right time to lay in foundation stock of this sort. Kindly mention The Homestead and write Mr. Bode at once. See page 46.

Zellmer's Duroc Jersey Sale Postponed.

C. A. Zellmer, Atlantic, Iowa, wishes to announce an indefinite postponement of the sale of Duroc Jersey hogs which he had planned to hold October 4th. The new date will be given later. He will then offer seven good fall boars and a lot of spring boars, gilts and sows. At the Cass County Fair last week he showed Durocs and he got three firsts, five seconds and three thirds and all of these prize winners will be sold in the sale. He will sell The Crimson Queen, his first-prize yearling sow at the fair and she should be appreciated by those who attend the sale. He also sells his first and second-prize fall boars sired by King Carlos and his first, second and third-prize gilts. Our readers will be interested in this sale as it will include not only good hogs, but those which are immune by simultaneous treatment.

Glissman's Great Holstein Sale.

One of the largest sales of registered and high-grade Holstein-Friesians that has ever been held here in the West will be made by Henry C. Glissman, South Omaha, Neb., October 21st, when he will sell 140 head. Sixty-five of these will be high-grade cows coming fresh or with calves at side. There will be fifty head of heifers from one to two years of age and fifteen heifer calves. It will be one of the greatest opportunities that has ever been offered here in the West to buy high-grade Holstein-Friesian cows and heifers, and it certainly offers a great opportunity to farmers and dairymen to buy some splendid milk cows. He is also listing ten head of registered bulls, and these will all be of serviceable age. These Holsteins are all home raised and acclimated and they will be tested by state and federal authorities, and therefore car be shipped into any state in the Union. This is an important feature of this sale as there will be no question on the part of federal or state authorities. Trouble has been brought about by unscrupulous parties who have in the past sold cattle that failed to pass, and Mr. Glissman has arranged it so that there could not be any question regarding the cattle that he is selling and therefore will have both the state and federal authorities to pass upon them. It therefore makes this sale one of the most important Holstein sales that has ever been sold in any western state. Those of our readers who are going to want some good milk cows should by all means attend this sale. Write Mr. Glissman for further particulars regarding this sale and kindly mention The Homestead.

Boyer's Chester Whites.

B. M. Boyer & Sons, Farmington, Iowa, are advertising Chester White boars on page 46. It was in this herd that the 1,260-pound boar, Sweepstakes, 28006, was used and it was this firm that exhibited him at the Iowa State Fair where he won championship in 1912. They also owned Jumbo, a 1,210-pound boar. Both of these boars died in the herd, but considerable of their get is still in Mr. Boyer's possession. Messrs. Boyer have paid special attention to size and have been breeding the Big-Type Chester Whites. They ship these boars C. O. D. and prepay express charges which gives the buyer an opportunity to look over his pig before paying for the same. This is very fair on Messrs. Boyers' part and in this manner the buyer takes no chance. This firm will hold a sale of bred sows on February 10th. Write them your wants or send them your order, mentioning The Homestead.

Chas. W. Crosier's Chester Whites.

With this issue of this paper Chas. W. Crosier, Juniata, Neb., starts an advertisement in which he offers choice spring boars and also female stock. Mr. Crosier is one of the pioneer breeders of Chester Whites in Nebraska, and his satisfied patrons are scattered over many states. Good hogs have been his aim at all times and he has bought the best breeding stock that he could find and has always sold his stock at reasonable prices. He has been a constant advertiser in this paper for many years, and is well and favorable known to a great host of its readers. The writer called on Mr. Crosier a short time ago and we wish to say that he has a good lot of stock for the season's trade, and readers need not hesitate in sending orders for this stock. They will certainly be treated right and they will also get some very fine stock from Mr. Crosier. Nearly all the spring crop is sired by Harvey's Choice, one of the real good boars of Nebraska. They are out of daughters of many noted sires, including the champion, Plainview Choice, the champion, O. K. Winner, and a few other boars nearly as well known. Kindly notice the advertisement on page 46 and write Mr. Crosier for prices immediately.

Woodlawn Farm Holstein Sale.

One hundred and forty select Holsteins will be sold at public sale at Woodlawn Farm, Sterling, Ill., October 21st and 22d. This is the second annual offering from this breeding establishment, and Manager Williams has selected for the sale one of the strongest lots of Holsteins that has yet been offered at public sale in the middle West. The Woodlawn herd is one of the best bred working dairy cattle herds to be found, and those who attend the coming sale will be in no way disappointed in the offering. One hundred cows, thirty heifers and ten bulls are cataloged, and they are a lot of cattle rich in the blood of King Segis, the Korndykes, Hengerveld De Kol, Paul Beets, Aaggie Cornucopia Johanna Lad and other of the best strains known to the breed. Many of the cows in this sale have A. R. O. records, and they are all big producers, as Manager Williams has no use for a cow that cannot show a handsome profit on her keep by her work at the pail. Ten record daughters of Sir Netherland Cornucopia bred to Prince Hengerveld Segis, form one of the attractive portions of the offering, but there are numerous other high-class propositions listed. The farmer who desires to engage in the profitable production of milk will do well to attend this sale, inspect the offering of cattle and make a study of the methods in vogue on Woodlawn Farm, where the Holstein is found in the fullness of its producing worth. Any detailed mention of this sale and the animals cataloged, therefor is unnecessary. The offering must be seen to be fully appreciated, and the farmer or dairyman interested in bettering his farming and live stock operations who does not attend this sale will be blind to his best interests. The catalog tells the story and will be sent to any address upon application. Mention The Homestead and address Woodlawn Farm, Sterling, Ill., as per the advertisement on page 17.

Choice Chester White Boars.

Attention is called to the advertisement which appears in this issue of The Homestead in which J. V. Slepicka & Sons, Wilber, Neb., offer readers of this paper the choice of the spring crop of Chester White boars. These gentlemen maintain one of the very good herds of Nebraska. They have good blood lines and they grow their hogs in splendid fashion. Readers of The Homestead looking for something will not be disappointed by sending an order to these gentlemen. Most of the boars are sired by Grand View Chief by Humbert's Choice by Combination. A few are by I Am Winner by Combination. I Am Winner was the first prize under-six-months pig at the Nebraska State Fair in 1912 and he has proven himself a good sire. Slepicka & Sons have added another good boar to the herd when they purchased Grand View Chief this season. He was first-prize senior pig at the Nebraska State Fair this season. He was got by Chief Select by Chickasaw Chief 2d. When writing Slepicka & Sons, kindly mention The Homestead. See advertisement on page 46.

The Jones Polands.

On page 15 of this week's Homestead is shown an engraving of the famous Poland China boar, Jumbo The Great. This boar is at the head of the herd owned by Orville O. Jones, York, Neb., and is without question one of the greatest boars we have knowlege of. He is of immense size, smooth, neavy boned and good footed. He breeds well and Homestead readers will do well to write for prices on boars sired by this hog. Mr. Jones also breeds Short-horn cattle and has for sale a couple of bulls. Barred Rock cockerels of the very highest order are also for sale. Mention The Homestead and address as above at once.

Fred Swan's Large-Type Durocs.

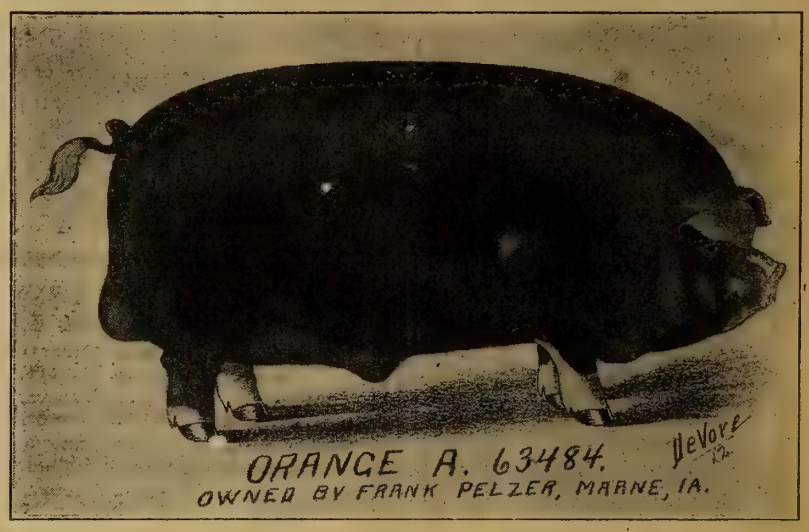
On October 17th, Fred Swan will make his fall sale at Missouri Valley, Iowa, and he will offer fifty head of the largest Duroc Jerseys that will go through a sale ring this season. Fred Swan is one of the men that gets them large and the breeders who are looking for size and quality will all have to take off their hats to him. He is one of the best feeders and caretakers today in western Iowa and he has been a buyer of the very best sows and boars that have been sold in late years. You will therefore realize that he has a line of breeding that any of our best breeders can use and no man will be disappointed with his offering when they see it. He will sell forty head of spring boars in this sale and they are sired by such well-known boars as Col. Gano, Golden Gano, Lafollette's Improver, High Ridge Muncie and Proud Iowa Chief. He formerly used a boar called King Edward at the head of his herd and after this boar was gone it was discovered what a breeder he was. However, he left on his farm a class of sows that will seldom be seen in one herd. In fact, he has daughters of this boar that had they been shown this fall at the state fairs would have won and this statement is made with a knowledge of those sows that have been shown. He is selling three splendid Col. Gano boars in this sale and they are out of O. R. Fine Sow, and she is regarded as one of the best sows in western Iowa. This sow was the top of the John Tupper sale two years ago and she sold at that time for $300 or more. You will therefore know she is good and these boars are sired by I Am Crimson Wonder 2d, the grand champion boar and these are very good with plenty of size and quality and are just the kind that will make good herd boars. Five good boars are sired by Echo's Crimson Wonder and these are very choice. In fact, he has a whole lot of boars in this sale

FRANK PELZER'S SALE

BIG-TYPE POLAND CHINAS

AT THE SWAB FEED BARN

ATLANTIC, IOWA, OCT. 11, '13



50 HEAD: 30 BOARS, 20 SOWS 50

I am selling 15 big, rugged fall boars and 15 of my very choicest spring boars. These are sired by Orange A, one of the greatest sons of Big Orange now living, and one of the largest boars of his age in the West. Also by Tom Keene, a son of the prize-winning boar Big Tom. Ten head of good fall Sows and a lot of choice spring gilts. Write for my catalog at once. Address

FRANK PELZER - - - MARNE, IOWA

Col. N. G. Kraschel, Auct. Mention Homestead when writing for catalog.

The illustration shown herewith is that of a most excellent Hampshire brood sow. She is the sort that have raised the boars that are being offered by A. D. Jones, Litchfield, Neb. Mr. Jones wishes to close out his boars at an early date and is making very low prices to move them. See advertisment on page 44.

SALE OF IMPORTED AND AMERICAN BRED PERCHERONS

MORTON, ILLINOIS, MONDAY, OCTOBER 20, 1913

40 Head---7 Imported Mares---11 Studs and Stud Colts

NO MORE reliable lot of Percherons will be offered this season than will be represented in this sale. The seven imported mares are five to seven years old, and all bred. Ten American mares, three years and up, are listed, and they are all bred, while there are three two-year-old fillies, five yearling fillies and four weanlings. The mares are a working lot, doing all the labor on an 1,100-acre farm, while last year from twenty-one mares bred we secured eighteen colts. With the exception of the seven imported mares and one American-bred filly every animal in this sale was produced on our farm, and we know they are right in every way. In this sale is the get of outstanding sires, including a large number by our herd stallion, Vermouth, one of the most noted Percheron stallions of recent years. SIX YEARLING STUDS, all by Vermouth, and four suckers, three by Vermouth and one by Rabelais, comprise the stallion portion of the offering, and among them will be found many outstanding propositions. No matter what your want may be in the way of reliable Percherons, you can find what you need at this sale, and can secure it at your own value. The animals listed will suit you, and they are reliable in every way, bred along the strongest Percheron lines and fit representatives of that great breed of draft horses. Write today for the catalog, which tells the story. Mention The Homestead and address

ROBISON BROS. - - - - MORTON, ILLINOIS

Colonels Jones, Reppert, Seeley and Carius, auctioneers. Sale at farm, five miles east of Morton, on the line of the Illinois Traction Systems. Cars each hour from Bloomington, Springfield and Peoria. Get off at Robison Road, which is right at the farm.

that are going to look good to any man who might be on the market for a good big boar this fall. Write Mr. Swan, Missouri Valley, Iowa, at once for a copy of his catalog and then mention The Homestead. M. T. White will represent The Homestead at this sale and will care for any bids sent in his care. See this page.

Hall Offers Short-horn Herd.

With this issue of The Homestead, F. M. Hall, Friend, Neb., starts an advertisement on page 38 in which he offers Homestead readers an exceptional opportunity to get started in the Short-horn business right. He is offering ten head, nine females and a bull, and they would make an ideal foundation for some one wishing to start and start right. The bull is an excellent Scotch bull, pure red and a nice individual. He is sired by Imp. Strowan Star and is out of the imported cow, Winifred 4th by the great Scottish Archer. This bull is the right kind, and will be worth a great share of what Mr. Hall will ask for the whole herd. We will not describe these cattle in detail, but we will say that they are good, we have seen them, and we would say to anyone looking for a bunch of stuff to get in touch with Mr. Hall at once, as a stockman will buy this bunch, once he sees them. Mention The Homestead when you write, or better, get on the train and see them.

Cooper's Big-Type Poland Sale.

On Tuesday, October 7th, W. H. Cooper, Hedrick, Iowa, will sell a high class lot of Big-Type Poland China boars and gilts at public auction. This is the most select lot of boars and gilts that Mr. Cooper has ever offered in a fall sale. They are the pick of over 200 head. They are sired by Big Bone 2d, Chief Leader, Big Expansion, Ideal Chief and other noted boars. Mr. Cooper has one of the best herds of sows to be found anywhere when size and quality are taken into consideration. He has sows weighing from 600 to 800 pounds and they are smooth with this immense size. Mr. Cooper does business in a straightforward manner and buyers need not be afraid to place confidence in what he says. His guarantee is as strong as it is possible to make it. If you cannot attend the sale, send a bid to Carlos C. Palmer, Homestead representative, in care of Mr. Cooper, and it will receive careful treatment. See page 45 and write for catalog, mentioning The Homestead.

Williamsburg Angus Sale.

John Cash, Jr., announces a sale of Aberdeen Angus cattle to take place in the Williamsburg, Iowa, sale pavilion on October 16th. William Cash, Williamsburg, Iowa, and P. J. Donohoe, Holbrook, Iowa, are contributing a few choice bulls and females in order to make the fifty head. John Cash, Jr., had at the head of his herd for some time Erwin C., the undefeated grand champion bull of 1913 and he left a number of excellent cattle in the herd. In the herds contributing to this sale the famous Black Woodlawn was used extensively. Many of his daughters will be found in the sale and they have always been in demand where the value of Aberdeen Angus cattle is known. Some daughters of the famous show and breeding bull Black King of Homedale 2d will be sold and this bull must be rated as one of the really good sires of the breed. The cows will be bred to Black Eagle C., by Black Woodlawn, Eran C., by Erwin C., Black King of Homedale and other bulls equally well bred. Insofar as breeding is concerned an undesirable pedigree could not be found in the breeding of the three herds contributing to this sale. The men and the cattle that they have produced are well and favorably known wherever Aberdeen Angus cattle are kept. Their methods of doing business have been open and fair to their patrons. Considering the dearth of good breeding cattle for sale we believe that a more opportune time to engage in the beef cattle business has not presented itself in many years. Pure-bred beef cattle are sure to advance in price very rapidly during the next twelve months and the man who buys good beef cattle at current prices is sure to make an excellent profit on his investment. No better place could be selected than this sale for the man who wishes to make his initial purchase of pure-bred cattle or add good breeding stock to his present herd. The breeding is right, the cattle are right and the men selling them are the kind that stand behind their goods. Every man interested in this sale should write at once to John Cash, Jr., for a catalog, mentioning The Homestead. Williamsburg is located on the Marion-Ottumwa Branch of the C. M. & St. Paul railroad. See page 38.

Foss' Duroc Sale.

The writer called on Theo. Foss, Sterling, Neb., a few days ago and looked over the Durocs that will be sold in the sale which Mr. Foss will make on October 16th. Mr. Foss has been breeding Duroc Jerseys for a few years and is getting a right good lot of sows on the place and has one of the best Prince of Col. boars we know of. He is Prince of Col. 2d and is the sire of some of the stuff that goes in this sale. There are two boars by Ohio Col. and out of a sow sired by Crimson Wonder 3d that we think are very choice. One of these pigs is extra good and a real herd-heading sort of boar for one of the leading herds. Another nice boar is a late pig by Model Top, a son of Golden Model. Model Top is a boar that is rated very highly in Kansas and Missouri and has sired a lot of extra good stuff. This boar will do some one some good. A yearling boar sired by the champion, Valley King, is also included in the sale. He is one of the real good Valley King boars that we know of. A couple of boars by High Col. are offered and they are fairly good. Two boars by Cherry Chief and out of a sow sired by Jack's Friend will be included. One of these boars would do a good breeder a lot of good. The gilts that will be offered are extra good, and should be looked after by those in need of a few sows. They will make some one some money if rightly handled. We believe that this season will be a good time to buy hogs, and those that cannot attend may send buying orders to J. C. Price, field man for The Homestead. Send all letters to J. C. Price in care of Theo. Foss, Sterling, Neb. Address Mr. Foss for the catalogs which are ready to send. Mention The Homestead when you write. See this page.

Botts' Short-horn Dispersion.

R. W. Botts will disperse his well-known Elms herd of Short-horn cattle at his farm near Plymouth, Ill., Thursday, October 16th. Mr. Botts has been actively engaged in the breeding of Short-horns for a quarter of a century and his decision to disperse his herd is brought about through a desire to lay aside some of the cares of the business and also owing to the difficulty experienced in securing help. There will be forty head in the sale, a lot of well-bred honest cattle, presented by an honest breeder and an offering that should appeal to the buying public. It is practically an all-Scotch lot of cattle, the big majority of which were bred by Mr. Botts and they will beat their own recommendation sale day. There are twenty-eight females in the sale, nineteen of them bred to pride of Linwood or Village Magnet, and when we state that every cow in the Botts herd produced a calf this year you will realize the breeding worth of these cows. Thirteen bulls are listed, all with attractive Scotch pedigrees, and among them are both head-heading and steer-getting material. Village Magnet by Bapton Magnet is a white two year old out of a Cruickshank Village Blossom dam by Golden Crown. He is well enough bred to go into any herd and his individual merit will please the critical buyer. Progress by Pride of Linwood, dam by Baron Golddust 3d, is a smooth roan two year old and well worthy of attention sale day. Mr. Botts bought the dam of this bull as a yearling for $180, has sold $1,250 worth of her produce and has nine descendants in the sale. This speaks highly for the prolificy of the herd. Elm's Diamond by Pride of Linwood, dam by Imp. Pennan Commander, is a smooth yearling, thick, short legged, with a good head and Lavender Gloster, by Pride of Linwood, out of a Lavender dam, is an extra well-turned calf of good lines. There are some other good yearlings in the sale and half a dozen toppy calves, all by Pride of Linwood and out of extra good Scotch cows. Mr. Botts is presenting an excellent offering and is deserving of the best kind of patronage sale day. In addition to

Fred Swan's Sale Big-Type

DUROC JERSEYS

Missouri Valley, Iowa

FRIDAY, OCTOBER 17,'13

50 Head---40 Spring Boars, 5 Fall Boars, 5 Sows. 50

THREE Col. Gano boars, out of O. R. Fine sow. These are extra choice. Also boars by I Am Crimson Wonder 2d, Echo's Crimson Wonder, Golden Gano, Lafollette's Improver, High Ridge Muncie and Proud Iowa Chief. If you are looking for the big-type Durocs come to my sale. Catalog now ready. Write for it. F. F. Luther, auctioneer. M. T. White, field man for The Homestead. Address

FRED SWAN, MISSOURI VALLEY, IOWA

H. W. LINEWEAVER'S SEVENTH ANNUAL

Sale Choicely Bred Duroc Jerseys

At Farm, 2 Miles East of

South English, Iowa, Thursday, Oct. 9, 13

45 HEAD, including one of my herd boars, H. & B.'s Ohio Chief, the greatest Protection-bred boar living. There will be five choice boars and five choice gilts of March and April farrow by H. & B.'s Ohio Chief. Their dams by Muncie Chief, Mayor Jr., Wonder and Col. Tientsin, others by Cherry Chief, Model Wonder, Golden Model 30th and a son of Chief Select. If you are looking for quality we have got it. We have some very choice individuals to sell and desire your presence at this sale. Write for catalog and mention that you saw my advertisement in The Homestead. Send bids to Carlos C. Palmer, in my care or to either of the auctioneers. This sale follows Wm. Reed's sale at Rose Hill, Iowa, which is only thirty miles east. N. G. Kraschel and J. L. McIlrath, auctioneers.

H. W. LINEWEAVER, SOUTH ENGLISH, IOWA

DUROC JERSEYS AND POLLED DURHAMS

At Auction From the Herd of Theo. Foss

Sterling, Nebraska, October 16, 1913

40 HEAD of Durocs, including a choice lot of herd-heading and farmers' boars and some extra choice gilts. The offering is strong in the blood of Prince of Col. 2d, Ohio Col., Select Chief, High Col., Cherry Chief and a few others. Some of these boars are absolutely toppy.

WILL SELL SIX POLLED DURHAMS and they include one four-year-old bull, extra good, one yearling bull and four cows and one calf at foot. Cols. Putman, Russell and Roberts, auctioneers. J. C. Price, field man for The Homestead. For catalog address

THEO. FOSS - STERLING, NEBRASKA

When Writing to Advertisers Please Mention The Homestead

the cattle of Mr. Botts nine head are contributed by W. B. Rigg, Mt. Sterling, Ill. Look up the advertisement of the sale on page 41 and send for a copy of the catalog to R. W. Botts, Plymouth, Ill., mentioning The Homestead when you write.

Duroc Gilt Bargains.

With the widespread shortage in meat-producing animals and the consequent high prices that are bound to prevail, it would seem that the offer of Wm. Retzlaff that will be found on page 47 of The Homestead should be of special interest. In his advertisement Mr. Retzlaff states that he has a big lot of early and late spring gilts, also some fall gilts and they go at from $15 to $30 per head, according to age and excellence. This stock is all of the very best of breeding, mostly the get of Sensation Again, a first-prize winner at Lincoln this season. They are all from sows of choicest blood lines, including daughters of the great Lincoln Wonder, Watt's Model, Golden Model 5th, A Crimson Wonder and a few others as well known. Mr. Retzlaff has a very fine spring boar and a fine Col. bred aged boar that he can breed this stuff to and for a small advance over the regular price. If interested mention The Homestead and write Mr. Retzlaff at once. Address Wm. Retzlaff, Bennett, Neb.

Pfanders' Boar Bargains.

On page 37 J. W. Pfander & Sons, Clarinda, Iowa, advertise thirty head of March and April boars for sale sired by their noted big-type boars, King of Wonders and Big Ben, and these pigs are all right and are well worth the money. Their boar, King of Wonders, is one of the most sensational big-type Poland China boars of the year and he is proving himself a great breeder. He weighed 765 pounds at eighteen months. They have an April boar sired by King of Wonders and out of their 900-pound sow, King Giantess 1st, that is an outstanding good one. They want to use this boar on a few of their sows and will let him go about the middle of November. He will make a great herd boar for somebody. They have seven March boars sired by King of Wonders and out of a Mouw-bred sow that are extra good and they are offering these at $50 each. Then there is a litter of five boars by Big Ben and out of Wray's Giantess. It will be remembered that Big Ben was the sire of the two spring boars that sold in their sale for $375 and $335 last August. These are also extra good boars and the price of these is $50 each. They have other boars by these two sires, also by Big Jumbo 2d and Big Defender that they are pricing at from $30 to $50. There are four Big Defender boars out of a sow called Patsy 4th that topped the Caverly sale at $250 and these will make good herd boars. If you will send J. W. Pfander & Son your order at once and let them pick you a boar out of the bunch you will be satisfied, and you will eventually have a herd boar that you will be proud of and will make you money. They unquestionally have one of the greatest herds of big-type Poland Chinas in the West. Write them at once and kindly mention The Homestead.

Pelzer's Poland China Sale.

On Saturday, October 11th, at the Swab feed barn, Atlantic, Iowa, Frank Pelzer, Marne, Iowa, will sell a draft of fifty of his large-type Poland Chinas and he is one of the breeders who never fails to put up a splendid offering. He is selling thirty head of fall and spring boars in this sale and twenty head of sows. Mr. Pelzer has been a good breeder and he has always had a good line of breeding, coupled with the size, and in his time has sent out a splendid lot of hogs. He formerly owned the large boar, Sampson, and he used him for a number of years at the head of his herd. This boar was a son of old Pawnee Lad and he was out of old Anna Price 2d. He did a lot for Mr. Pelzer and his herd and he afterward sold him to go to the head of the Lingford herd over in Nebraska. Many of the best brood sows in the Pelzer herd were sired by this boar and he certainly has had some good ones. Later on he secured the great young boar, Orange A., a son of Big Orange and out of Anna X. by Big Ex and he is one of the largest of all the boars today in the state of his age. He has the size and the bone and he has plenty of quality for a boar of his scale. Mr. Pelzer intends to make this boar beat the 1,000-pound mark and he can very easily do it. Many of the young things that he will offer in this sale will be sired by this boar. To begin with he is selling fifteen head of large, big-boned, rugged fall boars and these are a good lot throughout. They are all sired by Tom Keene, a son of the first-prize Nebraska State Fair boar, Big Tom, that he has used with success in his herd. There are boars in this bunch that will make 1,000-pound boars if they fall into good hands and are grown out. They have all kinds of stretch to them, plenty of bone and every one in the lot has a good-arched back. The fifteen spring boars that he will sell are all sired by Orange A., and are out of dams by Sampson and Prince Victor, the latter boar being a son of Charlie Lonergan's Big Victor. He is selling ten head of fall sows that are the same breeding as the fall boars and a few of his choicest gilts. He is selling a splendid spring boar sired by Orange A., and out of a sow he calls Silver Tip, and she is one of his best daughters of Sampson. Another good spring boar is sired by the same boar and he is out of a sow called Ruberta and she is also a daughter of Sampson. Then there are a couple of good boars by Tom Keene out of a sow called Delight. Mr. Pelzer is selling a splendid lot of large-type Poland China boars and sows and it is going to be a sale where you can buy some excellent bargains as he has the blood that they are all after and he has the size that they all want. Write Frank Pelzer, Marne, Iowa, for a copy of his catalog and remember that his sale will be made at Atlantic, Iowa, at the Swab feed barn. Col. Kraschel will be the auctioneer and he will care for any bids sent him in care of Mr. Pelzer. See page 34.

Steele's Immune Duroc Boars.

On page 47 C. R. and R. W. Steele, Ireton, Iowa, are advertising sixty head of Duroc Jersey boars for sale and these are all immune and are ready to ship. They have all been vaccinated, simply because they think that the buyers are wanting immune boars and they wanted to be in position to fill their orders. At the Interstate Fair, week before last, they won first prize on their six-months-old boar pig in one of the hottest classes in that show and this is the first time they have ever been out at the fairs showing Durocs. The most of these boars are sired by Colonel Wonder, a son of King Col., and he in turn is a son of the great Carl's Col. His dam is Lady Tientsin by Tientsin II, so you will readily see he is bred in the purple and has every right to be a good sire. These boars they are offering are in fine shape and they are ready to ship at any time. They are pricing them at $35 to $50 and will be sent on approval. They will satisfy you if you want a good boar and you can depend on it they will send you one that you will like. When writing them kindly mention The Homestead.

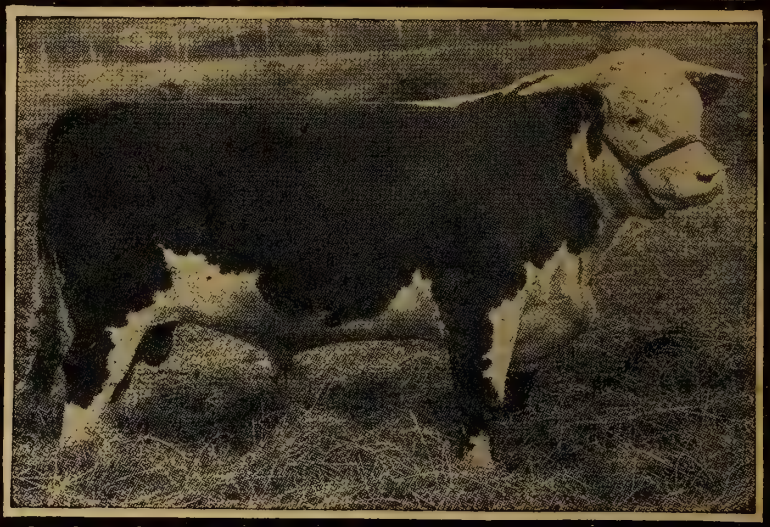
McMaster's Short-horn Sale.

Forty head of strictly good Short-horn cattle will be sold at Altona, Ill., Wednesday, October 15th, by C. J. McMaster. This is the fourth annual sale from this herd and while there have been good offerings in the past, the cattle listed for the coming sale are the best Mr. McMaster has yet sent forward. Some remarkable cows are cataloged, animals that would add strength to any herd. Mr. McMaster has never let price stand in his way when he wanted anything in the Short-horn line and as a consequence he has today an exceedingly strong herd, both as to breeding and individual merit. For the coming sale there are cataloged daughters of Whitehall Sultan, Village Silverdale, Nonpareil Crown, Masterpiece, Avondale, Lord Lenten, Maxwalton Dale and other noted sires, representatives of the Rosewood, Marr Clara, Augusta, Secret, Nonpareil and other popular tribes, the lot forming a gilt-edged collection in every way. Few of these cows sell with calves at foot by such sires as Browndale Sultan, Roan Sultan, Silverdale, Masterpiece and other bulls of equal merit. It is an opportunity for buyers to get the best Scotch blood known to the herd book, backed up by the strongest of individual merit in the animal. Five bulls are listed, including Glenview Dale 4th, a red yearling by Browndale Sultan that should be in strong demand sale day. It is a pleasure to recommend this lot of cattle to readers of The Homestead. They will bear out anything that may be said for them. Besides, they come from the herd of one of the most reliable men engaged in breeding Short-horns and a high-class gentleman, as well. Both Mr. McMaster and his cattle are worthy of the utmost consideration by the buying public. Catalogs for this event can be secured by addressing C. J. McMaster, Altona, Ill., as per the advertisement on page 41. Please mention The Homestead when you write.

Wigstone Bros.' Big Polands.

One of the strictly good offerings of strictly large-type Poland Chinas that will be sent through a sale ring this fall will be that of Wigstone Bros., who sell at Red Oak, Iowa, on October 11th. These boys breed the larger strains of Poland Chinas, and yet they have had quality sufficient that they were able to land several of the best ribbons at the Iowa State Fair a year or more ago. Their present herd boar is the great Chief Price Again 2d, and here is what they have to say for him in their catalog: "This great big-type boar was, to use a society phrase, 'brought out' at last year's Iowa State Fair, and he was the most popular 'debutante' there, some under thirty months old and weighed 1,024. He won third prize in a grand showing of extra big ones. This great boar comes by his size and quality through a line of ancestry noted for this, and is no sport or freak, but a big boar, bred big, a quality boar out of like ancestry. His sire preceded him by two years to the same fair and there won fourth and created quite a sensation, instantly putting him on the map as one of the really great big-type boars of his time. The full brother of Chief Price Again 2d won first at Iowa and went on to Nebraska and won grand championship honors there. Chief Price Again 2d was, when shown, not in show flesh, but in good breeding form only, and there was ample room for a few hundred pounds more weight without overdoing him any. He is very smooth, without a wrinkle, has very fine head, well placed ear, back well arched, is long and deep in body, absolutely smooth in shoulders, even in side and bottom lines, well marked, has immense bone and is perfect on feet. This boar has sired a lot of pigs since his arrival in our herd, that for size and smoothness have few equals. In fact, we will sell in our sale some of the largest spring gilts that we have ever seen go through a sale ring, sired by him; also spring boars that look big enough to make 1,000 pounds at maturity. Why should they not be large, sired by the biggest boar for age that is in service today in the corn belt?" Another good boar that they used in their herd was Big Jones 3d, and there is quite a bit of his get in the sale. The spring boar No. 1 of catalog is a wonderfully large and good spring boar, and he has every right to go to head some good herd. He is a son of Chief Price Again out of their great sow Giantess D., and few better spring boars will be offered this fall. Two good spring gilts out of this same litter will also be offered and they are very choice. Two good spring boars sired by Big Jones 3d and out of another one of their great sows Mammoth Lady will also be attractive and these will make excellent herd boars. Another good Chief Price Again 2d litter out of Miss Peerless is also very choice. This litter is wonderfully growthy and have

MODEL HEREFORDS
CHAMPIONSHIP WINNERS
At Auction October 22, 1913
Harris, Missouri
Thirty Bulls Forty Females



Gay Lad 9th, the Greatest Son of the Grand Champion, Gay Lad 6th.

TAKE our judgment for it—now is the time to buy. Make up your mind to buy good ones—the kind that bring higher returns on the money invested. That's what you want and that's what we are offering you. BUY NOW.

The thirty bulls in this offering are a grand bunch. Every one a good one. Such bulls as Gay Lad 9th, Gay Lad 12th, Gay Lad 13th, Repeater 12th and Repeater 20th will be sold. Show bulls as well as breeding bulls; bulls for all uses. They will make good anywhere they go. You can't help but like them because they are of the proper sort. About twenty of them are sired by our grand champion bulls, Repeater, Gay Lad 6th and Prince Perfection. I consider this the best bunch of bulls ever offered by the "MODEL FARM."

The forty females are a good, strong, even bunch. They have all of their usefulness before them. Just the kind for you. They will be offered in purely breeding condition with the exception of three or four show heifers.

Every one is safe in calf to our grand champion bulls, Repeater, Gay Lad 6th and their sons

This adds untold value. If you want heifers of the big, strong, matronly type, bred to these great sires—BUY NOW.

We want you to come to this sale. We want you to come whether you want to buy anything or not. We want to entertain you by showing you good cattle. We want to make this a day when all good breeders can get together. We want you as our guest. We are expecting you. Mail bids can be handled by any of the paper men or auctioneers. Write at once for catalog and any information you might want. Address Box C,

MINNICK & NANSEL'S SALE OF POLAND CHINAS
AT KIEL'S BARN, COUNCIL BLUFFS, IOWA, OCTOBER 17, 1913

50 Head of Boars, Sows, Gilts, 50

WE are selling a splendid lot of well bred big-type Polands sired by **Big Victor, Big Tom, Big Omaha, I Am Big Too, Big John, L's Quality** and **Metal Top.** If you are wanting bargains come to our sale. Catalog ready. Write for it. Col. N. G. Kraschel, auct.

MINNICK & NANSEL - - COUNCIL BLUFFS, IOWA

Short-horn, Percheron, Poland China Dispersion

At the Farm Near

Iowa Falls, Ia., Friday, October 10, 1913

50 Short-horns, 12 Percherons, 50 Poland Chinas

The Short-horns are an exceptionally well-bred lot, 35 of them being pure Scotch and the balance are Scotch topped. The two herd bulls, Snowflake and Favorite Goods, are good propositions. The females are a producing lot and have calves to show for their usefulness.

The Percherons include the great imported stallion, Hihi, and some imported and American bred mares.

The Poland Chinas are a good, big, heavy-boned, growthy lot. Nearly all are fall yearling boars and sows and are the kind that make money. Write me for a catalog, mentioning The Homestead.

FRANK T. PEMBERTON - - - **IOWA FALLS, IOWA**

AUCTIONEERS: H. S. DUNCAN, W. H. COOPER

Pfander's Sensational Big-type Poland China Boar Bargains

WE are offering **30 head of choice March and April boars,** sired by our sensational boar, **King of Wonders** (weight 675 lbs. at eighteen months) and **Big Ben,** the sire of the $375 and $335 spring boars in our August sale. Also some choice boars sired by **Big Jumbo 2d** and **Big Defender.** These are out of daughters of **Long King, Mammoth King** and our own noted **Giantess** sows that weigh 700 and 800 pounds. We want to sell these boars and we are pricing them at from: **$30 to $50.** We guarantee satisfaction on these boars. Send us your order at once or come and see us. When writing us kindly mention The Iowa Homestead. Address

J. W. PFANDER & SONS - - - - - - - - - **CLARINDA, IOWA**

all kinds of stretch to them. Besides the boars these boys are selling they are also listing a line of sows and gilts that will be hard to beat. They are cataloging some of the best sows that will be offered in a public sale this fall and you will say so when you go to their sale and see them. Their catalog is an unusually interesting one and it will be sent for the asking. When writing for it kindly mention The Homestead. M. T. White will represent this paper at the sale and will care for any bids sent in his care. See advertisement on page 44.

A Great Sale of Polled Durhams and Short-horns.

On October 15th, at Ord, Neb., there will be held a sale of Polled Durham and Short-horn cattle that should be of more than passing interest to nearly all stockmen throughout the central West. The beef cattle situation is one that is of real concern to the great majority of people throughout the country, for at no time in the history of America, or, in fact, in the world in the last half century has there been such a shortage in meat-producing animals as there is today. This condition has been growing annually more serious, but the fact that breeding stock, cows and calves, were being sent to market in great numbers, led many to think that there was still a big lot of cattle in the country, for receipts kept up fairly well. Then, too, the last three or four years have been very dry over a great part of the cattle-producing country of America, and the same condition existed in the Argentine and other beef-producing countries until the net result stands today as well nigh a meat famine. All classes of labor are well paid, and an appetite for meat has been created as never before, and to satisfy that appetite is going to take more cattle at greatly increased prices. With these prospects in view, these facts to consider, it does seem that those that are so situated that they can handle a few cattle, had better get them while they may be had at reasonable prices. In the sale that will be made at Ord, Neb., on October 15th, Walker Bros. will sell near fifty head of as choice Polled Durhams as will be found anywhere in the middle West. Their herd is the largest in the state and surely full of choice cattle. In making this sale they are selling all of their excellent young bulls, and dividing the best things in the female line with the buyers. A roan yearling bull by Cupbearer Prize and out of Hero Lady by Roan Hero is a bull that should be sought by the best breeders. He is a herd header of the right kind. Another nearly as good, would be liked better by some, is by Cupbearer Prize and out of Miss Charming, a winner of the blues at all the leading state fairs a couple of years ago. A red by Golden Hero Jr., and out of Queen Mabel, the grand champion cow of Nebraska in 1911, is also included, and to those looking for a red bull we will say he is the one that will please. A grand lot of choicely bred young females, stock of good ages, and of splendid thrift are offered. Taken as a whole, we believe it will average as good as any offering sold in the central West in years, if ever. You must see them to appreciate them. The Short-horns comprise the entire herd owned by L. B. Branson, Ord, Neb. He is making a change in his business, hence this sale. These cows are all big, rugged stock. They come of excellent families, and are the sort that will appeal to those looking for good beef material, although they also come of families that have been famed for their milking qualities. Some twenty-five of these cows will have calves at foot, a few are near calving and all of breeding age have been bred to good bulls. We will say more about these Short-horns next week, or if you will apply to Walker Bros., Ord, Neb., they will send you the catalog which gives many details of the offering. When writing, kindly mention The Homestead. See this page.

Akers' Dispersion of Short-horns and Polands.

F. W. Akers, Laurel, Iowa, will disperse his entire herd of Short-horn cattle and Poland China hogs on October 16th. There will be forty Short-horns and fifty Poland Chinas. Part of the Short-horns are of Scotch breeding and included in the sale is a seven-year-old herd bull, Baron Surmise by Gloster Baron and out of the Cruickshank Secret cow, Sunlight by Bapton Admiral. He has proven a very sure breeder and a sire of merit. All cows of breeding age will be safe in calf to him. He would be a good proposition for someone desirous of purchasing a tried herd bull. Lady Lavender 6th is an eight-year-old daughter of Goodwin and out of Lady Lavender 4th by Hero's Knight. Scottish Lady 3d is a six-year-old Secret cow by Lord Missie. Miss Butterfly is sired by Nonpareil King's Champion and out of a dam by Sultan. She is of the Scotch Dorothy family. The Poland Chinas include tried sows, fall yearlings and spring pigs. Everything sells in this sale as Mr. Akers is leaving the state and must dispose of all of his live stock. They have all been given the double treatment and are immune from cholera. This item alone is a big consideration in purchasing pure-bred breeding swine. Mr. Akers has been breeding Poland Chinas for fourteen years and his hogs have been winners at the Iowa State Fair for several years. If interested write for catalog mentioning The Homestead. See page 36.

American Royal Hereford Sale.

The American Royal Hereford sale to be held Thursday, October 9th, in the fine stock pavilion at the Kansas City Stock Yards, will afford prospective buyers one of the best opportunities they have had in years to purchase at their own price, some of the very best cattle that the breed has ever produced. The consignment this year is from nineteen of the leading herds of America, representing the very best of breeding, and as individuals, a lot of cattle that would be difficult to duplicate. Twenty-seven young bulls, all of serviceable age, will be offered, among which will be found several of the best show and high-class herd bull prospects that have ever been offered at public sale. They represent years of the most skillful breeding and mating by the leading breeders of America, and it will be a rare opportunity for purchasers. The cows and heifers are the tops of the herds they represent. As individuals, they will suit the most critical judges and their breeding cannot be faulted by the most discriminating breeder. The fact that this offering is made up from the tops of nineteen of the best herds in America, is itself evidence of the class of cattle that will be offered, and of the exceptional opportunity that it will afford prospective buyers to compare consignments from these various herds that it would take hundreds of miles of travel and many days of time to see, if the herds were visited at home. The entire offering will be tubercular tested before the sale and the future usefulness of each lot is fully guaranteed and most carefully inspected both as to breeding and individual merit of the entire offering represented by the following well-known herds: J. C. Allen, Bedford, Iowa; W. N. Collier, Fulton, Mo.; J. M. Curtice, Kansas City, Mo.; W. H. Curtice, Eminence, Ky.; W. A. Dallmeyer, Jefferson City, Mo.; Jas. A. Funkhouser, Plattsburg, Mo.; Jas. A. Gibson, Odessa, Mo.; Giltner Bros., Eminence, Ky.; Wallace & E. G. Good, Grandview, Mo.; Gudgell & Simpson, Independence, Mo.; Robt. H. Hazlett, Eldorado, Kan.; Wm. Hutcheon, Bolckow, Mo.; Jones Bros., Council Grove, Kan.; Jas. E. Logan, Kansas City, Mo.; Luce & Moxley, Shelbyville, Ky.; E. P. Pendleton, Princeton, Kan.; J. C. Robison & Son, Evansville, Wis.; Robt. A. Steel, Richland, Kan.; J. H. & J. W. Van Natta, Lafayette, Ind. The sale will begin promptly at one o'clock, Thursday, October 9th, and you are most cordially welcome to attend.

100 HEAD 100
POLLED DURHAMS AND SHORT-HORNS

At Auction in Sale Pavilion at

ORD, NEBRASKA, WEDNESDAY, OCT. 15, 1913

In this sale will be offered about fifty head of Double Standard Polled Durhams from the herd of Walker Bros. Ord, Neb. These cattle comprise absolutely the best lot of stock that has gone in a western sale ring in years. They are of the very highest order as to individuals and all of excellent pedigree. All of desirable ages and in the best of thrift. The great show and breeding bulls, Cupbearer Prize, Splendor, Golden Hero Jr., Roan Hero and a few others are represented. The Short-horns include the entire herd of L. B. Branson, Ord, Neb., and are a grand lot of choice beef producers. They carry the best blood of the breed and present an extraordinary chance to get a good foundation of strictly meritorious beef producing cattle. There will be eleven choice bulls in all, and those searching for herd-heading material, of either breed, will find them here. Trains leave Grand Island at 7:00 a. m. Arrive Ord at 10:00 a. m. Leave Ord, 5:00 p. m., and arrive Grand Island 8:00 p. m. Col. Z. S. Branson, Auct. For catalogs mention Homestead and address

Alban and Gibson, Auctioneers. Carlos C. Palmer, Homestead Field Man.

Van Steenberge in Europe.

A. M. Van Steenberge is now in Europe for his regular fall importation of Percheron and Belgian stallions and mares. A recent letter states that the horses bought up to date are the best obtainable in Belgium and France and will be better than any previous importation. His knowledge of the languages and the long-standing acquaintance with the best breeders of the country places at his disposal horses which others are unable to buy. This importation will be exceptionally strong in mares of both breeds, while the stallions are of unusual merit. This importation of forty head, together with the stock on hand at present will be one of the best collections of Percherons and Belgians in the country. A goodly number of home-bred horses will also be ready for trade by the time the others arrive, about November 1st. Intending purchasers will find it to their advantage and interest not to buy until having inspected these horses. You will find here what you want, a horse of the right kind, sound

AN IMPORTANT SALE OF ABERDEEN ANGUS CATTLE

TO BE HELD IN THE SALE PAVILION

WILLIAMSBURG, IA., THURSDAY, OCT. 16, '13

I AM offering many of the most desirable females in my herd in order that breeders desiring really high-class cattle will not be disappointed in the offering. William Cash, Williamsburg, Iowa, and P. J. Donohoe, Holbrook, Iowa, are contributing a few choice specimens of the breed. I take great pride in inviting every breeder and farmer interested in good beef cattle to attend this sale and pass your judgment on the value of the cattle to be sold. Many daughters and granddaughters of the noted Black Woodlawn, the undefeated Erwin C., Prince Ito, Black King of Homedale 2d and others are listed for this occasion. They are of the Blackbird, Trojan Erica, Pride and Queen Mother families. If you want a high-class herd bull or a few females to raise the average of your herd write me for a catalog at once, mentioning The Homestead.

Auctioneers, N. G. Kraschel and Fred Reppert.

JOHN CASH, JR. - - - **PARNELL, IOWA**

as a dollar and at the lowest possible price. Mr. Van Steenberge saves you interpreters' and salesmen's commissions and salaries and handles only the best in both imported and American breds. Some standard-bred trotters will also be offered for sale this coming season. For further information address A. M. Van Steenberge, Ogden, Iowa.

Cameron's Short-horn, Duroc Sale.

On October 6th, at Herman, Neb., Carey Cameron will sell a draft of thirty head of Short-horn cattle and twelve head of Duroc Jersey boars, and he is one of the good western breeders who never fails to put up a good offering. He is selling eight good young bulls in this sale and among these are several that are straight Scotch. In last week's issue we gave a detailed mention of these young bulls and we will again say that here will be a good place for a man to buy a bull and buy him right. There will be some Scotch bulls in this sale that will make good herd bulls and there will also be some extra good Scotch-topped bulls that will be good enough to go anywhere. He is also listing some good Scotch cows and some very choice young Scotch heifers. One of his best Scotch cows is Barmpton Miss, a daughter of Chas. Norton's well-known Banker's Victor, and she is just as righly bred a Cruickshank Butterfly as was ever offered either at public or private sale. A very choice red heifer out of this cow and sired by Roan Gloster will also be sold in the sale. Barmpton Snowflake is also another well-bred Norton cow—practically the same breeding as the other and she has a nice young bull in the sale. There are a very choice lot of young heifers in this sale among which are several that are sired by Royal Knight, a son of the noted March Knight. He is selling twelve Duroc Jersey boars in this sale and these are as good as we have seen in our rounds this fall. These boars will make excellent herd boars and they will have plenty of size and ample quality. In fact, there are some very promising young boars in this sale that look good enough for herd boars. Some of the best of the spring boars are sired by The Brave, a son of Red Wing's Brave, and these are very choice, both in quality and in size. There are three good spring boars in the sale that are sired by Valiant Chief, a 900-pound boar and a good one. There is also a splendid fall boar in this sale sired by Valiant Chief. He is out of Jumbo's Lass, and she was a daughter of Critic's Last, as good a boar we think as was ever owned in the state of Nebraska. Here is a fall boar that would look good at the head of any of our best herds. If you want anything in the way of Short-horns or Duroc Jersey boars make it a point to attend the Carey Cameron sale, Herman, Neb., Monday, October 6th. M. T. White will represent The Homestead at the sale and will care for any bids sent in his lare.

WANTED A few registered Red Polled heifers, bred to calve in September or October. Give price and address L. L. Woods, Grinnell, Iowa.

Harris & Sons' Greatest Sale of Hereford Cattle.

O. Harris & Sons, Harris, Mo., proprietors of the herd of model Herefords, hold a sale of thirty bulls and forty females at their farm at Harris, Mo., on Wednesday, October 22d. Every lover of the white face should arrange to attend, as at the same time the breeding herd and the show herd that has been winning so consistently, will be on exhibition. This will afford an exceptional opportunity to study the methods Harris & Sons have adopted in breeding their winners and at the same time buy from the sale either bulls or females carrying the blood of as great animals as the breed affords. Benjamin Wilton, sire of a number of the winners that made Harris & Sons herd so popular at and following the world's Fair held at St. Louis in 1904, did a great work in laying the foundation for a still greater herd. Beau Donald 5th, the bull that shared the honors with Benjamin Wilton at St. Louis, proved just the bull to cross on the get of Benjamin Wilton and to this pair of bulls Harris & Sons owe much of their success as breeders of model Herefords. To get bulls to follow so great a pair of sires was no easy matter, but in Repeater and Gay Lad 6th it is evident by their winnings and the winnings of their get, that Harris & Sons have succeeded far beyond their fondest hopes. When Repeater showed as a two-year-old, Gay Lad 6th was showing as a senior yearling and throughout that year they were the junior, senior and grand champion bulls. The following year, 1911, Gay Lad 6th was senior and grand champion bull at every show where shown. In 1912 the get of Repeater won both junior herd prizes and both junior championships were sired by him. Prince Perfection, the last herd bull added, is winning in class this season and Repeater 7th, a son of the great sire, is being made grand champion at every show. Among the thirty bulls selected for the sale each of the Harris herd bulls will be represented by sons worthy of the consideration of those looking for the best. Gay Lad 6th will be represented by Gay Lad 9th that has been standing next to the champion Repeater 7th in two seasons' shows. Gay Lad 12th, 13th, 15th, 23d and a junior calf not taken out will furnish material and attractions enough in show material for one sale. Repeater 12th and Repeater 20th will be found desirable herd header material. A dozen youngsters just turning one year old will be found as attractive a string to select herd header material from as is often found. They are sons of Repeater, Gay Lad 6th and Prince Perfection. There are also nine or ten long yearlings listed that are big, strong fellows with size bone and conformation that should appeal to stockmen looking for high class steer bulls. Thus it may be seen that Harris & Sons are putting up bulls that should appeal to all classes and the number insures an exceptional opportunity for selections. The forty females are as uniform a lot of two year olds as are found and every one is in calf to the grand champion bulls Repeater, Gay Lad 6th and their sons. Princess Repeater and Princess Repeater 3d, the former being shown in 1912 and the latter with this year's show herd afford the only opportunities to get show heifers by the champion Repeater. Princess Repeater is in calf to Gay Lad 6th and the product be it heifer or bull will be an attraction in any herd. Harris & Sons desire to send you a beautifully illustrated catalog which tells of their work as breeders of this great breed

PROTECT YOUR HOGS

HOG-JOY VERMIN KILLER

30 DAYS FREE TRIAL — USES CRUDE OIL

Your hogs can't thrive when they are lousy. A good part of the feed you give them goes to vermin instead of pork, which makes them easy prey to fatal diseases.

The Hog-Joy Machine

is a sure vermin exterminator. It destroys the lice by oiling them. Hogs will keep themselves free from lice without bother to you. Does away with the "Dip." Most perfect Hog-Oiling device on the market. Built entirely of cast iron, can't break. Only three parts, operates automatically; never out of order, winter or summer. Has no small openings to clog up; no small valves to stick. Use crude oil or any patent fluid you like. Machine doesn't waste a drop.

Endorsed By Big Hog-Raisers

JOHN SO. CULP, Superintendent Swine Dept., Illinois State Board of Agriculture: "The Hog-Joy does the work perfectly and has given me entire satisfaction."

Sent ready to set up with two gallons oil; freight paid; 30 days free trial. Price $10. Your money back if not satisfied. Send money-order, check or cash at our risk. Reference any bank in Springfield, Ill.

Agents Wanted: Write for our liberal proposition. A sure money maker with little work. A rare opportunity for you. Descriptive literature, free. Write today and get your hogs in condition to resist disease.

THE HOG JOY CO.
301 N. 5th Street
SPRINGFIELD, ILL.

of cattle and of the sale offering. Send for it now and kindly mention this paper when doing so. See page 36 for advertisement.

Larson's Immune Duroc Boars.

For the last time we want to call attention of Duroc Jersey breeders to the sale of O. S. Larson, Logan, Iowa, October 7th. He is selling forty head of boars and sows and the most of the spring boars in this sale will be sired by his noted boar, King The Cols. There is nothing in Durocs today that is attracting more attention than the King The Cols. and it will be remembered that he is the sire of those two great boars, Col. Gano and Colonel Sensation, two of the largest and best boars today in the state. He is also the grandsire of King Gano, the Osborn boar that was first-prize Iowa State Fair winner this year and was one of the strongest boars for championship honors that was seen at the fairs this fall. Well, there are some good King The Col. boars in this sale, possibly some better ones than he sold in his August sale, and the breeder who is going to want a boar to place at the head of his herd and one that will add a reputation that will mean something in the future then he will be interested in the boars that Mr. Larson is selling in this sale. Among the best of these are Nos. 3, 4, 5, 6, 10 and 12, and several others that are strictly all right. Write for the Larson catalog at once and kindly mention The Homestead. Bids sent to M. T. White, representing The Homestead in care of Mr. Larson will receive attention on day of sale.

Pederson's Poland Chinas.

C. M. Pederson, Dunlap, Iowa, now offers for sale twenty-five head of his large-type Poland China fall and spring boars for sale and he says he has some of the best boars that he has ever raised since he has engaged in the business. His fall boars are all good and weigh 350 pounds and are sired by Golddust Wonder and Long Orange. His spring boars are sired by Golddust Wonder, Long Orange and Defender Again, and these are out of 800-pound sows. Mr. Pederson certainly has a good string of boars for the trade this fall and he will be pleased to hear from Homestead readers who are going to want a good boar this fall. He will be pleased to have intending purchasers write him or, if it is possible, come and see the boars he is offering for sale, as he thinks they will then have every opportunity to pick a boar that they will want. In his letter to us he says: "Henry Big Bone, our new boar, is making for the half-ton mark and we think he is going to make one of the greatest boars in the state of Iowa. He has an eleven-inch bone and he has already proven himself a splendid breeder of large litters. My young boar, Chief of Wonders, he by old A Wonder and out of a dam by Big Joe, is a large, husky fellow and he is going to make a great herd boar when matured. These will be the main boars that I will use for my February 16th sow sale." Write Mr. Pederson at once about these boars or go and see them and make your own selection.

The Lockridge Short-horn Sale.

There is much to attract in the offering of Short-horn cattle that will be made at Chicago, Monday, October 13th, by S. F. Lockridge, the veteran breeder of Greencastle, Ind. The results of forty years of progressive breeding operations is contained in this lot of cattle, and they will give a satisfactory account of themselves when inspected by the public. From the standpoint of breeding there are few herds in the country where there is so much Cruickshank blood in evidence as is found in Mr. Lockridge's collection of cattle, a fact that should have a strong bearing on the sale. The female portion of the offering is one of outstanding merit. Sunflower 10th is a typical Scotch cow, a Cruickshank Secret, having scale, character and finish, and is safe in calf to Village Charm, is an Iantha, the good kind, with a fine heifer calf at foot. Lucile is a Broadhooks of approved breeding pattern, with a lusty bull calf at foot, and Golden Plume, a Brawith Bud, is a beautiful cow, due to calve about sale day. A fine young cow is listed in Maid of Gloster, a Cruickshank Duchess of Gloster, with a heifer calf at foot, and Sunflower 16th is an extra good cow, with a heifer calf at foot by Shamrock, an outstanding Scotch bull that is listed for the sale. Seventeen of the cows in this sale sell with calves at foot, so that one can readily see it is a strong breeding proposition. Sixteen extra good heifers are cataloged, all bred but three, and forming not the least attractive portion of the sale offering. Among the seven bulls cataloged will be found both herd-heading and steer-getting material. Shamrock, four years old, is rich in Cruickshank blood, is deep and thick, stands on short, well-made legs, has a good head and horn, and shows evidence of prepotency. He has been used some in the herd and has proven a strong sire. Royal Scot is a royally bred Secret of fine lines and strong appearance, while Game Warden is a neatly turned Brawith Bud calf that is deserving of attention sale day. There is other good bull material in this offering. Mr. Lockridge has been a stalwart supporter of the Short-horn through good weather and through bad, and no matter what the conditions he has never faltered in his allegiance to the red, white and roan. He has done much for the breed, and now that he is to make a sale of a draft from his herd he should have the hearty support of every Short-horn breeder and admirer. He deserves it, and his cattle are worthy in every respect. Every animal in the offering, with the exception of two head was bred by Mr. Lockridge, and they do him credit. The advertisement of this sale appears on page 40. Look it up and send for a copy of the catalog to S. F. Lockridge, Greencastle, Ind., mentioning The Homestead when you write.

Get a Fur Coat This Season.

When a farmer or stockman can get a really good fur coat for as little cost as one may by sending a hide to the Lincoln Tannery, Lincoln, Neb., it is strange that everyone does not have one of these most comfortable winter garments. One can spend the winter in the South and still stay right at home, if they will provide themselves with one of these great-coats and they are so well made and at so little cost as compared with their value. The Lincoln Tannery also buys hides and makes coats and robes of all kinds, and sells them at the low dollar. The work done on all of these garments is of the very highest class. They do not split and tear the hides by machinery, but on the other hand it is all done with the most skilled hand labor, made up with the best linings and trimmings of all kinds and made practically moth proof. Henry Holm, proprietor of the Lincoln Tannery, is one of the pioneer tanners of the West and it is the tanners of the old school that do the very best sort of work. If in need of a good robe, a fur coat for your self or the wife, send in a good hide or more and get them made or if you do not have the hide, write for the prices of goods already made up. Mention The Homestead and address Henry Holm, Lincoln Tannery, 917 Q. St., Lincoln, Neb.

Paulsen's Hampshire Boar Sale. Last Call.

We are this week calling attention for the last time to the sale of Hampshire boars that will be made by C. P. Paulsen, Nora, Neb., at Fremont, Neb., October 10th. This sale of Hampshires will be one of the best opportunities of years to get a really high-class Hampshire boar. Mr. Paulsen has the breeding, the individuality and all that it takes to make high-class stock. There are boars in this sale that will suit those in search of good ones. They are so marked and so bred and of such individual makeup that those in search of good ones will not be disappointed. Mr. Paulsen has been making a great fight for the Hampshires in Nebraska. He has brought the very best stock of other states to his farm, and he has never lost an opportunity to increase the prestige of the breed in this state. He is deserving of all the support that neighbor breeders can give him, and those of adjoining states may well attend the sale, for they will be able to buy hogs to their liking. There is not time enough to get the catalog now, unless you wire for it, but there is plenty of time to make arrangements to go to the sale. If unable to attend, send your buying orders to J. C. Price, field man for The Homestead and you will be well looked after. Good selections will be made for you and purchased with discretion. Address bids to J. C. Price, care of C. P. Paulsen, Fremont, Neb. See page 42.

Pemberton's Short-horn, Percheron and Poland Dispersion—Last Call.

Frank T. Pemberton, Iowa Falls, Iowa, will close out his herd of Short-horn cattle, Percheron horses and Poland China hogs at the farm near Iowa Falls on October 10th. Serious illness in the family makes it necessary for Mr. Pemberton to leave the farm and also to dispose of his pure-bred herds. Fifty Short-horns, twelve Percherons and fifty Poland Chinas make up the offering. The Short-horn end of the sale will afford excellent opportunities to those desirous of purchasing the best of Scotch blood lines coupled with good, useful cattle. The herd has been a producing herd and has been making money for Mr. Pemberton. He has spent several years and a lot of money getting these cattle together and the purchasers in this sale will get the benefit of his judgment. Thirty-five of the Short-horns are of the very best Scotch breeding and at the prices they will sell for are sure to make big profits during the next few months. Mr. Pemberton has not fitted these cattle highly for a sale, but they are selling in just good breeding condition such as any breeder would like. Favorite Goods and Snowflake, the herd bulls, are bred in the purple and are desirable. One imported cow, Strowan Buttercup 24th and several of her daughters and grandaughters are included. We have not space at command to go into detail regarding the breeding of the cattle as there are so many well bred ones. The following Scotch families are represented: Victoria, Lady Dorothy, Lavender, Secret, Duchess of Gloster, Acorn, Rose of Strathallen, Orange Blossom and others. Owing to the large number of cattle, horses and hogs to be sold in one day there are sure to be many bargains and the man who attends this sale will make some money if he makes use of the opportunity afforded. The Percherons are are all recorded in the Percheron Society of America and consist of a high class imported stallion, two three-year-old imported fillies and a number of American bred mares and fillies. The Poland Chinas are nearly all fall yearlings and are of the very best big-type breeding. This sale follows the Poland China sale of C. F. Adams, Owasa, Iowa, on October 9th and also the Short-horn sale of Miller & Northy, Morley, Iowa, on October 9th. Easy connections can be made from both sales. See page 37 and write for a catalog mentioning The Homestead.

S. F. LOCKRIDGE SELLS 40 SCOTCH SHORT-HORNS

AT CHICAGO, ILLINOIS, MONDAY, OCTOBER 13, 1913

EVERY animal in this sale, with the exception of two head, was bred by Mr. Lockridge, and they represent the results of over forty years of active breeding operations. Few herds afford as much Cruickshank blood as is found in this herd, and those who attend the sale will have an opportunity to place public sale values upon representatives of the Secret, Brawith Bud, Broadhooks, Duchess of Gloster and Forest Queen tribes that will be found right in every way. Seventeen breeding matrons are listed, and thirteen of them sell with calves at foot, while there are sixteen heifers listed, all bred but three. Seven bulls are cataloged, and among them will be found both herd heading and steer getting material of the right sort. The females in the sale are bred to either Matchless Victor, by the International winner, Imp. Cock Robin; Scottish Baron 3d, by Victor Linwood, or Shamrock, the latter a richly-bred Scotch bull of outstanding merit that is included in the sale. This is a reliable lot of cattle in every way, the natural increase of a working, producing herd, and they are offered to you in the belief that you will appreciate their worth sale day. Write for the catalog, which will be sent upon application. Mention The Homestead and address

S. F. LOCKRIDGE - - - GREENCASTLE, INDIANA

Colonels Woods and Jones, auctioneers. Attention is called to the following Short-horn sales: Thos. Stanton, Wheaton, Ill., October 14th; C. J. McMaster, Altona, Ill., October 15th; R. W. Botts, Plymouth, Ill., October 16th.

THOS. STANTON'S SALE OF SHORT-HORNS

WHEATON, ILLINOIS, TUESDAY, OCTOBER 14, 1913

45 HEAD---2 BULLS---14 COWS WITH CALVES AT FOOT

INCLUDED in this offering are fifteen head of finely-bred Scotch females, belonging to the Secret, Rose of Hope, Lavender, Goldie and other popular tribes, and thirty head of Scotch-topped Rose of Sharon, Young Mary, Duchess and Wild Eyes, all big, roomy matrons, with milking qualities strongly developed. These cattle have all several crosses of the best Scotch breeding in their pedigrees, and from the standpoint of individual worth are hard to beat. They will make plenty of money for anybody who is fortunate enough to buy them. Two bulls are listed, one by Selection and one by Masterpiece, that will stand inspection sale day.

SMITH & HEISSERER, ORAN, MO., CONTRIBUTE 15 HEAD OF HIGH-CLASS SCOTCH CATTLE

to this sale, making thirty Scotch cattle in sale, among them some top specimens of the breed. There will be cattle in this sale to suit all classes of buyers, and a cordial invitation is extended to you to be present. Send for the catalog. Mention The Homestead and address

THOS. STANTON - - - - - - - - WHEATON, ILLINOIS

Colonels Woods and Jones, auctioneers. Attention is called to the following Short-horn sales: S. F. Lockridge, Chicago, Ill., October 13th; C. J. McMaster, Altona, Ill., October 15th; R. W. Botts, Plymouth, Ill., October 16th.

Robison Bros.' Sale of Percherons.

A decidedly attractive lot of Percherons will be sugmitted at public sale at Morton, Ill., Monday, October 20th, by Robison Bros. These gentlemen have been engaged in breeding Percherons for twelve years, and in the coming sale every one of the forty head cataloged, with the exception of seven imported mares and one American-bred filly, was produced on the Robison farm. It is seldom, indeed, that the buying public has the opportunity to place values upon so many animals bred by the party making the sale, but in this instance one of the strongest kind of object lessons will be presented as to the benefits to be derived from the breeding of good horses on the farm. Robison Bros. conduct an 1,100-acre farm, all the work on which is done by the Percheron mares, and last year from twenty-one mares bred they secured eighteen living colts, a record hard to beat. There are forty head cataloged for this sale, seven imported mares, five to seven years old, all bred; ten American-bred mares, three years and up, all bred; three two-year-old fillies; five yearling fillies and four weanlings; in the stud list there are six yearling studs, including several outstanding propositions, all by Vermouth, the prize-winning stallion at the head of this stud, and five suckers, four by Vermouth and one by Rabelais. It is not our intention to go into detail regarding this lot of horses at this time. They were recently inspected by the writer, and he does not hesitate to recommend them to the readers of The Homestead. In later issues more details will be given. You will not be disappointed if you attend this sale. The animals will stand inspection. They have been raised under conditions that tend to future usefulness, are strongly bred along the very best blood lines, and should be in strong demand sale day. The advertisement appears on page 35. Look it up and write for a copy of the catalog to Robison Bros., Morton, Ill., mentioning The Homestead when you write.

Extra Choice O. I. C. Hogs.

N. R. Rogers, Peru, Neb., has for many years supplied readers of this paper with extra choice Chester White hogs, but this season he has the very best lot of early spring boars that he has raised in many years. They are all early and are strongly bred in the very biggest stuff of the breed. They are mostly from sows strong in the blood of the 1,210-pound Jumbo and are sired by Boyer's Model, one of the biggest young boars anywhere. This size is what the farmers want. They also want feeding quality with it. Right here of Mr. Rogers is the place to get that kind of a boar, and they also have plenty of good hard, flinty, bone. If you order a boar of Mr. Rogers a long step in the right direction will have been taken. See the advertisement on page 46.

White's Duroc Jersey Hogs.

Immune Duroc Jersey boars, late March and early April farrow, are offered for sale by Geo. T. White, Dallas Center, Iowa, whose advertisement will be found on page 38. A representative of The Homestead who visited Mr. White's herd last week found it in excellent condition and that the young boars now offered for sale are a husky, thrifty lot, not highly fleshed, but of great promise. There are five fall boars, one of them by H. A.'s Choice Goods 5th and the others by Jumbo Wonder. H. A.'s Choice Goods 5th is a grandson of Choice Goods. Jumbo Wonder is by Crimson Wonder Again, and his dam is H. A.'s Queen, the noted sow in the Sells herd. The H. A.'s Choice Goods 5th boar is out of a dam by Model Again. Two of the others are from Liberty Chief dams and the dams of the other two are by Zeke, that is a son of old Proud Advance. The spring pigs are nearly all by Jumbo Wonder. Their dams are daughters of Zeke, Liberty Chief, Model Again and H. A.'s Choice Goods. Liberty Chief, it will be recalled, is one of the biggest sons of Ohio Chief. Model Again is a litter brother to Golden Model 2d, that noted show hog of the Waltemeyer herd. They all may be considered immune from hog cholera. They were given the simultaneous treatmnt by a government veterinarian, who is located in Dallas county and connected with the government campaign against hog cholera which is now being prosecuted in that county. For descriptions and prices address George White, Dallas Center, Iowa.

Chas. H. Murray's Chester Whites.

With this issue of The Homestead, the well-known Chester White breeder, Chas. H. Murray, Friend, Neb., starts an advertisement in which he offers Homestead readers his entire crop of spring boars, also a few fall boars and all at attractive prices. On account of the failure of the corn crop in his immediate section, Mr. Murray will not make a winter-bred sow sale as he had planned, but will offer the greater part of the gilt crop at private treaty. Mr. Murray expects to keep the greater part of his old breeding stock over, and a few of the choice gilts, as he is of the opinion that the future of the hog business was never brighter, yet he cannot keep over all of his female stock and for that reason a fine lot of choice gilts and fall sows will now be for sale at private treaty and will be sold open or bred. It is a good time to buy good hogs and Mr. Murray will do his best to please all that apply. Kindly mention The Homestead when you write. See page 46.

Blake's Immunized Poland Chinas.

Forty-five head of immunized, double treated Poland China hogs will be sent under the auctioneer's hammer October 13th by R. R. Blake, Dallas Center, Iowa. Mr. Blake urges two strong points with reference to this consignment. The first is that the hogs are cholera proof. Last February he sold a consignment of immune hogs under absolute guarantee to replace any which died from cholera. He was not called on in a single instance. The other strong feature is that the hogs have been fed for growth and thrift, rather than for fat. They may not look as attractive to the eye as well-fitted hogs, but they are certainly of a more profitable and promising sort. And now as to the breeding. Mr. Blake founded his herd on the big-type sort that had finish, easy fitting qualities and early maturity, and in every respect the consignment is certainly most attractive. The fall boars, of which there are twelve, are of the most popular lines of breeding. Some of them are by Long King and other lines of blood with dams tracing to A Wonder, Chief Price, Smooth Wonder and equally prominent sires. The spring boars are from dams of the same lines of breeding, but their sires are of wider range of blood lines. Some are by Long King, others by L.'s Big Bone, Smooth Wonder Again, H.'s Big Bone and Big Nelson. They all show good strong bone, short pasterns and outstanding feet. There is no roughness or ungainliness, but a well-made conformation throughout that speaks volumes for their future usefulness. A limited number of fall sows have been cataloged and these are daughters of Long King, Smooth Wonder Jr. and Columbia Chief. Two only have been bred. Mr. Blake requests that all who attend the sale by rail stop at Waukee, which is the nearest railroad station and where free conveyance to and from the farm will be provided. For catalogs address R. R. Blake, Dallas Center, Iowa. See page 42.

Larson's Last Call.

If any of our readers are wanting a good King The Col. boar they should go to the O. S. Larson sale at Logan, Iowa, October 7th. He is selling fifteen head of King The Col spring boars in the sale and some of these are outstanding good ones. He also sells three choice King The Col. gilts in this sale and two good sows that sell with breeding privileges to King The Col. If you want King The Col breeding make it a point to be present on this occasion. Our Mr. M. T. White will represent this paper at the sale.

An Important Chester White Sale.

A public sale of most unusual interest, not only to Chester White breeders, as well, is that which M. W. Young will hold at Ankeny, Iowa, Tuesday, October 14th, as per the announcement on page 46. In previous issues of this paper we have given details as to the blood lines involved in this sale consignment. We wish now to give added weight to any statement that may have been made with reference to individual quality. No matter how good the blood lines of an animal may be, individual merit must be in keeping. Mr. Young has exercised discretion in the selection of typical sires and dams. In the beginning he started with a few brood sows that satisfied him in all those points which go to make up choice well-formed, well-finished Chester White hogs. From these few foundation sows have grown the present herd. It is doubtful if any like number of animals of the breed can be found in any breeding establishment, possessing the same high degree of individual excellence. This is especially true with reference to excellence of back. There is not a single animal in the sale which is subject to criticism at this point. They are full over the heart, widely ribbed out, broad over the loin, and with evenness from front to back that establishes symmetrical proportions throughout. They are strong in the matter of broad, short heads and well-set ears. They have the capacity to carry flesh enough to establish heavy weights in addition to their quality as breeding animals. It must also be said that the lot contains numerous individuals that are show animals in the rough, and need only to be developed by an experienced hand. There are matured sows, fall sows and spring gilts. But two of the older ones have been bred. There will be fall and spring boars in about equal numbers. Catalogs of this sale may be obtained by forwarding a request to M. W. Young, Ankeny, Iowa. It should not be forgotten that Ankeny is located on the Des Moines branch of the C. & N. W. Ry., and on the Fort Dodge, Des Moines & Southern Electric line, making it one of the most easily reached points in the state. Mail or wire bids may be sent to C. C. Carlin,

M'MASTER'S SALE OF SCOTCH SHORT-HORNS

ALTONA, ILLINOIS, WEDNESDAY, OCTOBER 15, 1913

40 HEAD---5 BULLS---A TOP LOT

THIS is the fourth annual offering from Glenview, and is the best lot of cattle ever sent forward from the herd, both as regards breeding and individuality. The female list includes some of the greatest breeding matrons and young cows ever presented in any sale. Ten cows will sell with calves at foot by such sires as Roan Sultan, Masterpiece, Silverdale, Browndale Sultan and other top bulls. In the bull list is Glenview Dale 4th, a red yearling by Browndale Sultan, that is a top one in any company; a good one by the champion, Avondale, and some outstanding calves. In this sale are daughters of Silverdale, Villager, Whitehall Sultan, Nonpareil Crown, Masterpiece, Lord Lenten, Avondale, Maxwalton Dale, as strong an array of sires as the breed affords. The catalog tells the story and will be sent upon application. Mention The Homestead and address

C. J. M'MASTER - - - - - ALTONA, ILLINOIS

Colonels Jones and Reppert, auctioneers. Attention is called to the following Short-horn sales: S. F. Lockridge, Chicago, Ill., October 13th; Thos. Stanton, Wheaton, Ill., October 14th; R. W. Botts, Plymouth, Ill., October 16th.

SHORT-HORN DISPERSION SALE

PLYMOUTH, ILLINOIS, THURSDAY, OCTOBER 16, 1913

40 HEAD---13 BULLS---ALL SCOTCH

TWENTY-FIVE females are listed, nineteen of them bred to Pride of Linwood or Village Magnet. There are six strong heifers by Pride of Linwood. The bull offering includes Village Magnet, a two year old by Bapton Magnet, a son of the great Silver Plate, and out of a Cruickshank Village Blossom dam; Progress, a two year old by Pride of Linwood out of an Acanthus dam by Baron Golddust 3d; Elm's Diamond, a red yearling by Pride of Linwood out of a dam by Imp. Pennan Diamond, and ten young bulls and bull calves by Pride of Linwood, all Scotch, and including many outstanding prospects. This lot of cattle will please you. Every cow in the Elms herd raised a calf this year. The families represented in this offering are Nonpareil, Acanthus, Lavender, Rosemary, Queen of Beauty, Village Blossom, Marr Mary Ann, Violet Bud and a few Scotch-topped Waterloo J.'s, a family I have bred with much success for twenty years. W. B. Rigg, Mt. Sterling, Ill., consigns nine head, eight females and one bull, all Scotch bred but two head. Attend this sale. Write for catalog, mentioning The Homestead, to

R. W. BOTTS - - - - - - - - - PLYMOUTH, ILLINOIS

Colonel Carey M. Jones, auctioneer. Sale on farm midway between Plymouth, on the C., B. & Q. road, and Bentley on the Wabash. Parties met at both points. Attention is called to the following Short-horn sales: S. F. Lockridge, Chicago, Ill., October 13th; Thos. Stanton, Wheaton, Ill., October 14th; C. J. McMaster, Altona, Ill., October 15th.

of The Homestead, in care of Mr. Young, should it be inconvenient to be at the sale.

Miller & Northy's Short-horn Dispersion.

Miller and Northy, Morley, Iowa, will disperse their select herd of Short-horn cattle on October 9th. Fifty-six head have been cataloged, ten of which are bulls and the balance females. The bulls include Diamond King, a nine-year-old bull that has been used in this herd continuously for eight years. He has proven one of the most valuable sires ever used in eastern Iowa. The females sired by him that sell in this sale are a magnificent lot and show the really high class type of cattle that this great bull has been siring. He is as sure and as active as a yearling and undoubtedly has several years of usefulness ahead of him. He is a very valuable bull in any herd. Sterling Scotty is a four-year-old son of Sterling Knight while his granddam was Imp. Flower Girl 11th by Imp. Knuckle Duster. He is an excellent bodied bull with good lines and has an impressive makeup. About the best young bull in the sale is Commander, a December calf by Lord Hampton and out of Gladys. He is an excellent roan with good lines and bids fair to develop into a valuable bull. Prince is another good roan calf sired by Lord Hampton and of the Nonpareil family. There are some other good calves suitable for the siring of market topping steers. It is doubtful if a better bunch of females will be sold at auction this year than those included in this sale. Too much cannot be said in regard to their superior merit. Roan Lady, No. 1 in the catalog, is the kind that will raise the average in any herd in the country. She is a show cow weighing 1,800 pounds and has had nothing to eat but grass. It would take more space than we have at command to call attention to the many valuable females in the herd, but we call attention to Nonpareil 4th by Lord Hampton, Red Rose 4th by Sittyton Royal, Fairy Knight 2d by Royal Banner, Eliza 16th by Diamond King, Lavender Queen 6th by Scotch Lad, Scotch Flora by Cherry Grove Banff. It will pay anyone interested in good Short-horns to write Miller & Northy for a catalog and arrange to attend this sale. See the advertisement on page 42.

Choice Fox Terrier Puppies.

N. R. Rogers, Peru, Neb., one of the best known stockmen of eastern Nebraska is starting an advertisement in The Homestead this week in which he offers some extra choice Fox Terrier puppies. The writer is familiar with the class of stuff to be found in the Rogers kennels and we wish to say that this stuff is bred from the very best of working stock and bench winners as well. Moderate prices take them and an early order is sure of a fine selection.

William Reed's Duroc Sale.

William Reed, Rose Hill, Iowa, will sell fifty high class Duroc Jersey boars and sows on October 8th at his farm adjoining town. Mr. Reed is consigning three fall boars and six fall sows to this sale that are indeed a very select lot. One of the fall boars is by Reed's Top Col. and out of a John's Ohio Chief sow. This boar is a big, rugged fellow with heavy bone, strong back and looks like he would make an impressive sire. He is as strongly bred in Col. and Ohio Chief blood lines as it would be possible to get. Among the spring boars is a pig by Chief Select and out of Fair Wonder 2d by J. C.'s Model Chief, that is every inch a show pig. He has an abundance of quality, an excellent head and ear, stands on the best of feet and legs and is smooth as a ribbon. He is a full brother to the $190 pig in Mr. Reed's last sale. The six fall sows should go into some herd and be kept as a breeding foundation. They are the kind that help build up herds and improve the quality of the breed in general. The spring gilts are an exceptionally smooth bunch with quality and would look good this winter in a bred sow sale bred to some good boar. Among the spring boars are several very desirable pigs sired by Chief Select and Reed's Top Col. Carlos C. Palmer, Homestead representative will carefully attend to any bids sent him in care of Mr. Reed. See page 42 and mention The Homestead when writing for a catalog.

Branson's Duroc Sale.

H. I. Branson, West Branch, Iowa, will hold a public sale of Duroc Jerseys at his farm on October 15th. Fifty head of boars and gilts will be sold. There will be twenty-five spring boars, fifteen spring gilts, eight fall yearling sows and two spring yearlings. The entire offering has had the simultaneous treatment and is supposed to be immune from cholera. The spring pigs are sired by Branson's Golden Model, a son of Golden Model 2d and out of Miss Wonder, the dam of Blue Ribbon Model. There will be five fall sows by Wilson's Defender, he a litter mate to Disturber, and three fall sows by H. I.'s Model, a grandson of Crimson Wonder Again. Mr. Branson has a well grown lot of pigs and can please anyone looking for size, bone and quality combined with good breeding. He will be glad to have anyone interested write him for a catalog, mentioning The Homestead. Carlos C. Palmer, Homestead representative will attend the sale and care for any bids sent in care of Mr. Branson. See page 37.

Gudgell & Simpson's Hereford Cattle Sale.

The sale of fifty head of bred Hereford heifers which Gudgell and Simpson, Independence, Mo., will hold on Saturday, October 11th, affords an opportunity to buy females that are bred right and are such individuals as will add to the attractiveness of the herds to which they go. The work of years in breeding the modern type enables these gentlemen to offer so large a number and all of one type. Those who appreciate breed, character, plenty of size, bone and quality, will not be disappointed and it is a rare thing to find so many heifers in a sale without a bad head or horn. The very best bulls that have done service in the Gudgell & Simpson herd in recent years are the sires of this string of heifers, and they are bred to bulls of the same type and character as their sires which insures the same uniformity and quality in their offspring. Those laying the foundation for a herd could do no better than to buy a string of these heifers. Twenty-two are daughters of Domino, sixteen are daughters of Beau Picture, four are daughters of Beau President, the remainder are by Britisher, Beau Modest and Bright Stanway. Two have calves at foot, the remainder are well along in calf to Bright Stanway, Beau Modest and Beau Dandy. The only chance for securing this type and kind is to improve the opportunity when they are offered, and it is indeed a rare occasion when one breeder offers such a number. Those wanting bulls should not overlook the ten head of yearlings John Lenox, Independence, Mo., contributes, as they are well bred and will make good. Remember the sale is Saturday, October 11th, American Royal week, and the cattle may be seen at any time during the week. Interurban cars run to Independence every ten minutes and Gudgell & Simpson will gladly meet you and take you out to see the cattle.

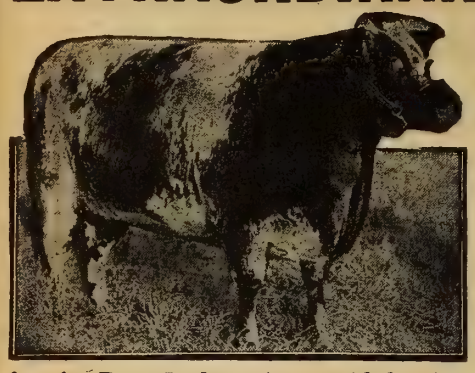
Stanton's Short-horn Sale.

Tuesday, October 14th, the day following the Lockridge sale at Chicago, Ill., Thos. Stanton will sell forty head of Short-horns at his farm near Wheaton, Ill. For this event Mr. Stanton has selected a lot of cattle that should meet with a ready appreciation. There are fifteen head of well-bred Scotch cattle in the sale and twenty-five head of Scotch-topped Rose of Sharon, Young Mary, Duchess and Wild Eyes cows. To the man who is not a stickler for pedigree, but values merit in an animal these females will certainly appeal very strongly. They are the big roomy kind, with scale and conformation, strongly developed milking qualities, regular breeders; many of them selling with calves at foot, and all having several crosses of high-class Scotch sires in their pedigrees. From the standpoint of individual excellence they form one of the most attractive lots of females offered in any sale this year. The Scotch females Mr. Stanton has listed belong to the Secret, Rose of Hope, Goldie and Lavender tribes, and need no recommendation at our hands, as they will be amply able to speak for themselves on sale day. Mr. Stanton is only offering two bulls, one by Selection and one by Masterpiece, both out of heavy-milking dams and both good ones. In addition to the cattle Mr. Stanton is selling fifteen head of Scotch-bred animals, including some outstanding propositions, are consigned by Smith & Heisserer, Oran, Mo. Catalogs for this sale can be secured by addressing Thos. Stanton, Wheaton, Ill., as per the advertisement on page 40. Kindly mention The Homestead when you write.

Kool Sells Good Hogs.

In his advertisement on page 42, A. Kool calls the attention of our readers to the fact that on October 8th he will make a sale of Poland Chinas, such as cannot fail to be pleasing to critical buyers. It includes about forty head, fall boars, fall sows, spring boars and spring sows. Through the entire lot there runs the blood of big Victor's Improver and Jumbo. Big Victor's Improver is one of the best breeding hogs in the state of Iowa, not only because his blood lines trace back to some of the most important winners of the breed, but because he has size, extra strong bone and foot and broad, well-arched, well-ribbed-out back, and a head in keeping with his other merits. As a producer he is extraordinarily good as will be noted on sale day. Jumbo is a son of Big Orphan and carries strains of blood which, it will be recalled, have been carried by the winners at the Nebraska State Fair for three successive years. Jumbo also has size and considerable other of the merits that have made the Nebraska winners so prominent. There are still other important strains of blood involved in this offering, but all of them are good. The animals to be sold are of the right sort, free from disease, in perfect health and thrift, and right from every point of view. The sale will be held at Mr. Kool's farm, which is one mile from Fifield on the Wabash railroad and three miles from Otley on the Des Moines Valley branch of the Rock Island. Mail bids can be sent to C. C. Carlin, of The Homestead, in care of A. Kool. Address requests for catalog to A. Kool, Cordova, Iowa.

EXTRAORDINARY SHORT-HORN DISPERSION SALE



TO BE HELD AT THE FARM NEAR

MORLEY, IOWA, THURSDAY, OCTOBER 9, 1913

50 HEAD: 10 BULLS 40 FEMALES 50

THE bulls include Diamond King and Sterling Scottie, the two herd bulls we have been using so successfully. Diamond King has been rated by the best of breeders and judges as one of the great sires of the breed. He will do someone a world of good as he is very vigorous and sure. Sterling Scottie is a grand young bull that should head some good herd. Among the females Roan Lady, a 4-year-old daughter of Diamond King, is rated by many as the best Short-horn cow to be sold at public auction this year. She will weigh about 1,800 pounds and is every inch a show cow. Practically the entire offering is of the very best Scotch breeding. The Red Rose, Nonpareil, Fairy Queen, Beauty, Eliza, Flora, Ury and many other equally popular Scotch families are represented. We want you to write us for our catalog at once, mentioning Homestead. Auctioneers, Woods, Burge and Brock.

MILLER & NORTHY - - - MORLEY, IOWA

William Reed's Great Duroc Sale

To be held at the farm adjoining Rose Hill, Iowa,

Wednesday, October 8, 1913

50 HEAD 50

THE offering consists of three fall boars, twenty-two spring boars, six fall sows and nineteen spring gilts. The fall boars are sired by Reed's Top Col. and Chief Select. Among the fall boars is one extra large, heavy-boned, high-backed boar with plenty of quality, sired by Reed's Top Col., that will make a herd boar. The spring boars are an extra good lot and among them is one outstanding good pig sired by Chief select and out of Fair Wonder 2d by J. C.'s Model Chief. There are six mangnificent fall sows by Reed's Top Col. and twenty extra spring gilts sired by Reed's Top Col. and Chief Select. This is by far the best offering of gilts I have ever put up. Write me for catalog mentioning The Homestead.

WILLIAM REED - - - ROSE HILL, IOWA

Auctioneers, Kraschel, Allen and Putman

KOOL'S POLAND CHINA SALE

TO BE HELD AT THE FARM NEAR

CORDOVA, IA., WEDNESDAY, OCT. 8, '13

THE sale will include three fall gilts, thirteen fall boars and twenty spring boars. The offering is almost entirely the get of Big Victor's Improver and Jumbo, but there will be one spring boar by the $1,500 Smooth Wonder 2d. The dams are mostly by Big Victor's Improver, but there are four out of Queen 1st, a 900-pound daughter of Lentz' Dandy Jim, two out of Lady Lightfoot 29th by Jumbo, five out of Lady A by Big King and five out of King's Lady 2d by Big King. The consignment is of high-class, big-type quality, in fair flesh and thrifty, growing condition. Send mail bids to C. C. Carlin, of The Homestead, in my care. Col. W. B. Duncan, auctioneer. For catalogs address.

A. KOOL - - - CORDOVA, IOWA

PAULSEN'S GREATEST HAMPSHIRE BOAR SALE

----- WILL BE HELD AT -----

FREMONT, NEBRASKA, FRIDAY, OCTOBER 10, 1913

65 BOARS GO IN THIS SALE 65

EVERY one of the sixty-five boars that go in this sale has been carefully selected, and not a thing but of exceptional value will be included. They are every one from the Paulsen herd and by sires of national reputation, among them the great Everett True 3d, Nebraska Top and Paulsen's Chief by Gen. Allen. They are out of one of the greatest lines of brood sows in America and they have all passed through the disease and are considered immune. They are all of good strong ages, being yearling and fall boars. Come to this sale if possible, or send bids to J. C. Price, representing The Homestead. Colonels Kraschel and Reppert, auctioneers. Send for catalog today. Address

C. P. PAULSEN - - - - NORA, NEBRASKA

BLAKE'S POLAND CHINA SALE

ON THE FARM NEAR

DALLAS CENTER, IOWA, OCT. 13, 1913

I AM putting into this sale a consignment of forty-five head of Poland Chinas that are just about as good as any offering of the season will contain, although their merit is not concealed by high flesh or fancy fitting. I am putting in my herd boar, Smooth Wonder Again, because I cannot use him longer to any advantage. There will be twelve fall boars by Long King, Smooth Wonder 2d Jr., and Columbia Chief 3d Jr., out of dams of Smooth Wonder, Chief Price and A Wonder breeding. There will be twenty-two spring boars by Long King, L.'s Big Bone, Smooth Wonder Again, H.'s Big Bone and Big Nelson, out of dams of Smooth Wonder, Chief Price and other popular lines of breeding. Eight fall sows are by Long King, Smooth Wonder Jr., and Columbia Chief 3d. Their dams are of much the same breeding as that already referred to. One of these will have been bred to L.'s Big Bone for October litter and the other to Woodrow Wilson, a fifth-prize Iowa State Fair winner, for a November litter. Col. H. S. Duncan, auctioneer. Send mail bids to C. C. Carlin, care of The Homestead. Free transportation from Waukee to the farm. For catalogs address.

B-U-S-T-E-D!

ROOFING LUMBER PRICES WIRE and FENCING BUILDING MATERIAL

No Money Down

Our Great FALL Announcement

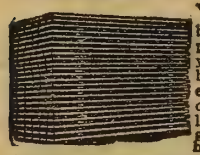
You can order a complete carload of material including everything you need to construct a building and we will ship it forward to you without you paying us a cent down.

Write Us for Our Liberal Terms

You are safe when you deal with us. Our capital stock is $10,000,000.00 and 20 years of honest dealing have earned a place for us in the public confidence that is unquestioned.

You can buy a carload of Building Material from us without paying us one cent in advance. All we want to know is that the money will be paid us as soon as the material is received, unloaded and checked up. Our terms are more liberal than anyone else offers.

Lumber Prices S-m-a-s-h-e-d



Yes, we mean smashed. Absolutely busted to pieces. That's our policy. We quote prices on lumber that will positively save you big money. If you will send your lumber bill we will send you a freight paid estimate that will mean a saving to you of from 30% to 50%. Every stick is absolutely first class, brand new and fully up-to-grade such as you would buy from any reputable house in the United States.

We have determined that the Fall of 1913 is going to be the Banner Season in our great lumber department. We have on hand 20,000,000 feet of high-grade lumber suitable for the construction of Buildings, no matter for what purpose intended. Come to our great yards in Chicago and let us show you this stuff actually in stock. No other concern in the world has a more complete stock of everything needed to build, whether Lumber, Shingles, Structural Iron, Plumbing, Heating, Doors or anything else that you may need. Do you know that lumber is getting scarcer and scarcer every year? Yet our prices are lowest and will continue so until our stock is gone. WRITE TODAY.

Shingles at Big Saving

We have a special lot of 1,000,000 5 to 2 10 inch Clear Shingles on which we are making an exceptionally low price of $2.99. Order by Lot No. M. S. 40.

This Door at 98c

Lot MS-39. Four panel painted door, size 2 ft. 6 in. x 6 ft. 6 in. 500 in stock. A high quality door for the price. This is only one of our many special bargains. Our grand Building Material Catalog and Bargain Sheets will show a full line of Inside Millwork of all kinds.

Free Building Book

A 200-page Book of Bargains in Millwork, Building Material of all kinds, including Paints, Plumbing, Heating, Structural Iron, Metal and Composition Roofing, Hardware, Carpenter's and Blacksmith's Tools, Wire Fencing. No prospective builder should be without it. It Is Free.

CHICAGO HOUSE WRECKING CO.

Now operated under the name of

HARRIS BROTHERS COMPANY

FOR twenty years the CHICAGO HOUSE WRECKING COMPANY has been well and favorably known to the public. During all these years the four Harris Brothers have been the executive officers and owners and for that reason have finally decided to operate under the name of HARRIS BROTHERS COMPANY.

There is no change in our business, except that in the future the four Harris Brothers will advertise and sell their goods, heretofore advertised and sold under the name of the CHICAGO HOUSE WRECKING COMPANY, under the new name of HARRIS BROTHERS COMPANY.

Why We are Called the Great Price Wreckers

Consider what becomes of the stock of goods, when a manufacturer or big retail merchant goes bankrupt or "busted" as the saying goes. It is estimated that about ten thousand merchants annually meet with business disaster—this is why our company exists. If the stocks are sufficiently large and the goods are new and desirable, they find their natural way to our great forty acre plant for distribution at a small added profit, to our thousands of customers, who in this way get the benefit of wonderful bargains. In many cases our prices do not even represent the original cost of production. We stand foremost in our line. We recognize no competition. That's why we are called "THE GREAT PRICE WRECKERS."

Our Binding Guarantee

We guarantee absolute and complete satisfaction. There is no half way about this guarantee. Every purchase you make from us will be exactly as represented and you will be satisfied in every way, or we will make such just amends as are within our power. We will take back any unsatisfactory article at our freight expense both ways and refund your purchase price. We refer as to our responsibility to the publisher of this or any other publication or any bank or express company and to the public at large.

We Sell Practically Everything

Our stock includes practically "everything under the sun". It's in truth, from a needle to a locomotive. No matter what your vocation, or what position in life you occupy, or what your business, or how great a merchant you are, you have use for us, and we have the goods that you can buy from us to a decided advantage. The quicker you learn to recognize this fact, the sooner you will be "putting money in your pocket."

Our stock includes Building Material, Lumber, Roofing, Sash, Doors, Millwork, Wire and Fencing, Hardware, Plumbing Material, Heating Apparatus and Supplies, Furniture, Household Goods, Rugs, Stoves and everything needed to furnish or equip your home, your club or hotel. It includes Groceries, Clothing, Dry Goods, Boots and Shoes, Furnishing Goods and every single article to clothe a man, woman or child. It includes Sporting Goods, Fishing Tackle, Hunting Outfits, Tents, Guns, Harness and Vehicles, Jewelry, Sewing Machines, Clocks; also structural iron needed in construction of buildings, bridges, etc. Machinery, gasoline, gas and electric power outfits. In fact you cannot think of a single manufactured article that we cannot supply you at a saving in price. Let us convince you—it means but little effort on your part to prove the truth of all we say. Write us to-day for our Catalogue and Literature. Fill in the coupon shown below.

THE GREAT PRICE WRECKERS

$735 Buys the Material to Build This House

This is Our House No. 6A.

A beautiful up-to-date full 2 story, 7 rooms and bath, home. Has been sold over 400 times. Copied and imitated all over the U. S., but our price and quality cannot be equaled. The price is easily 25% to 50% below local dealer's prices.

Immediate shipment right from our Chicago stocks, where you can come and see it loaded. *NO MONEY DOWN.* $2.00 buys perfect Blue Print Plans, complete specifications and detailed descriptive material list, with a refund of $1.50 if you do not like them.

Our House No. 6A.

ORIGINAL METHODS

We are the originators of a system of selling practically complete Houses direct to the consumer, at a great saving.

We eliminate all in-between profits. We sell and ship direct to you from our own stocks.

Great care and study has been given all our Plans. Economy is the watch-word both in materials and construction.

No Worry No Loss No Waste

Our Binding Guarantee both as to quality and quantity goes with every sale.

Write us for letters from people in your vicinity who have bought from us. We have thousands of unsolicited testimonials.

Special Information

If you intend building, you will lose money if you don't write us at once. Tell us what you want. We will answer you promptly and give you valuable information regarding building. Send rough pencil sketch showing the kind of house you want. We will make you a freight paid price that will save you big money on material necessary to build same. Every stick first class.

If you intend to make improvements, write us what they are, and we will help you to save money on your purchases.

Our FREE Book of Plans

Our Book of Plans contains 120 Designs of different kinds of buildings. Everything from a 2 room Portable House for $147.50 to the finest kind of a 10 room residence.

Houses are completely illustrated showing the floor plans, prices, etc. And it's free.

These Books Are My Only Salesmen

They are the best and cheapest salesmen in the world. They will save you from $50.00 to $300.00 on Gasoline Engines; $35.00 to $50.00 on Cream Separators; $25.00 to $45.00 on Manure Spreaders and from 20 to 50% on hundreds of other articles for the farm, home and family. Yes, sir; my catalogs are the best and cheapest salesmen on earth. And I can mail any one of them to you for considerably less than what a salesman ordinarily pays for a good cigar—in other words, a two or three-cent stamp pays all the traveling expenses of my Catalog Salesman. My Catalog Salesmen show you just how Galloway Machines are made, the kind of materials they are made of, the sort of high-grade, modern machinery used in their construction, and explain in simple terms our "Square Deal," direct-from-factory, one-profit only, plan of selling. You'll find all my statements and claims in "black and white" always before you. My Catalog Salesmen won't bother you or take up your valuable time when in the field or at work on some important job, but they are always at hand when you want to consult them. And best of all, they save you big money for they save you all the middlemen's profits. When you buy of Galloway you pay JUST ONE SMALL MANUFACTURER'S PROFIT in addition to the actual cost of materials and labor that enter into the construction of the machine. It's this "short cut"—"direct from factory" plan of selling that makes it possible for me to offer you as high a grade 5 h. p. gasoline engine as there is on the market today for only $99.50, or a complete manure spreader at only $69.50 and the new incomparable 500-lb. capacity Galloway Sanitary Cream Separator at only $42.50. Now, all you have to do to get the benefit of my tremendous money saving prices is to write for one of my catalogs. THEY ARE MY ONLY SALESMEN. Send for the Catalog you want today. I am making it easy for you to get these books—for all you need to do is just fill in the coupon below, tear off and mail today, for catalog wanted—or just write me a postal.

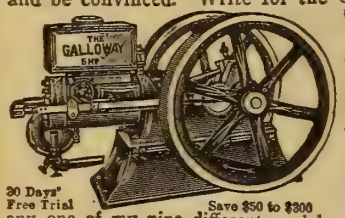
Now I am Going to tell You Some Inside Facts about My Business

I haven't any secrets about my business—the more my farmer friends know about it the better I am satisfied. My offices and factories are always open for your inspection. Thousands of my farmer friends and customers visit our big chain of factories every year and see at first hand just exactly the way we build our machines and examine the materials that are used in their construction; then go back to their homes more than ever satisfied that every statement and claim I make about Galloway Made Machines is true. I only wish every farmer in America could see just how Galloway Machines are made. If you could, my factories would have to be enlarged to ten times their present size (7½ acres of floor space) and then couldn't meet the demand. I know it. Because Galloway Made Machines have the merit—that is proven today by the fact that our satisfied customers (over 135,000) can be found in every state in the Union and in over thirty Foreign Countries. Seven years ago the name "Galloway" was practically unknown—today the "Sun never sets on Galloway Made Machines." No big business is built by accident. It's got to have something substantial back of it. Isn't that a fact?

Now, I've enlarged my line this year so that I can supply you with anything you want for the farm, home or family. My big 144-page Merchandise Book is chuck full of bargains on machinery and implements, household furnishings, rugs, carpets, tapestries, linoleums, stoves, furniture, sewing machines, buggies, harness, washing machines, clothing for men, women and children, watches and jewelry—and many other lines—all selling at regular wholesale prices. Get my big General Merchandise Book and let me save you 20 to 50 per cent on the things you buy. It is the big catalog shown at the right at top of page. Write for it today. Just use coupon below.

The Only Way is the Galloway—Selling Direct from Factory to Farm

Let me prove it to you. I want to show you just what a man can do for you when he will sell you **direct from his own factories to your farm.** I want you to see for yourself what an amazing difference it makes in prices when you don't have to pay a lot of middlemen's profits. I want to show you how simple and easy it is to buy by mail the Galloway Way. With every machine backed by a 30 to 90-day Free Trial Privilege—a strictly legal five-year warranty on materials, printed in black and white, that goes out with every machine that leaves our factories—and a $25,000 Bond that guarantees you right at the start that we will fulfill every claim and statement we make—Now, just consider this plan a minute. Read it over again. Then tell me—Did you ever buy goods of anybody where you had such a perfect guarantee of satisfaction back of them? Never! Then, best of all, I will make you practically any terms you want—on any Galloway Made Machine—terms that our competitors cannot equal and prices never before even approached by competition on strictly standard, high grade machines. That's what it means to buy the Galloway Way—that's why thousands of farmer business men will tell you the "Only Way is the Galloway—Selling Direct from Factory to Farm." Try it and be convinced. Write for the Catalog Salesman you want me to send to you today. Fill in coupon below.



30 Days' Free Trial — Save $50 to $300

The Famous Stationary Galloway 5 H. P. Engine. New Low Price Now Only $99.50

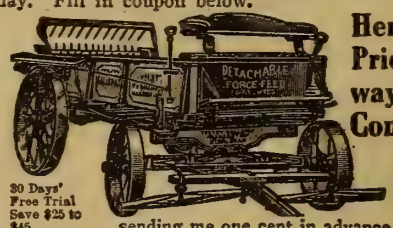
F. O. B. Waterloo, Chicago, Kansas City or St. Paul

Your choice of any size or style of the entire Galloway Line from 1¾ h. p. to 15 h. p., mounted or stationary, at prices to match this never-before-heard-of price on my Famous Galloway 5 h. p. Stationary Engine. Yes, sir; I'll let you pick out any one of my nine different models you want. I'll let you test it any way you choose right on your own farm, at my risk. I want you to compare it point by point with any style or make of gasoline engine on the market, and I don't care what the other engine costs. I'll put any Galloway engine right up against any other engine made, absolutely regardless of price, and let you keep the engine that suits you best. But, remember, when you buy of me I agree to save you from $50 to $300, depending on the size you buy.

Can you beat that offer? Never! You can't equal it anywhere. And I've been making just this sort of offer for years and my engine business has grown by leaps and bounds every year. Why? Simply because I am giving my customers a better engine for less money than any other concern in the country. When I sell an engine it helps me sell more right in that section. Remember, on my direct-from-factory plan you must be satisfied or your money will be cheerfully refunded and I will pay all the freight. You take no risk whatever and I back up this offer with a $25,000 Bond for your complete protection. But the best proof of all are my 35,000 satisfied Galloway engine users.

$172.50 Buys a Complete Galloway 5 H. P. Portable Wood Sawing Outfit

That means complete portable engine with detachable saw frame, saw blade, saw guards, belt and belt tightener and 20x6-inch friction clutch pulley. It's ready to put right to work when you get it. Not an extra to buy. All my engines are sold that way, whether stationary, portable, sawing rigs or combination outfits. If you need a fine pumping outfit, combination of engine and power washer, engine and churn, engine and small grinder and a dozen of just such combination small or large power plants, write me now. I am making special combination prices that you can't beat. Get my engine catalog today. Just fill in coupon below.



30 Days' Free Trial Save $25 to $45

Here's My New Low Price on the Galloway No. A, 50-60 Bu. Complete Spreader $69.50

F. O. B. Waterloo, Chicago, Kansas City or St. Paul

And right on top of this remarkably low price I will make you this absolutely unheard-of offer. I will send you any one of my seven styles of spreaders to your farm and let you try it absolutely at my own risk without your sending me one cent in advance or making any bank deposit. All I ask is your bank reference. This offer is open to any responsible person, anywhere. Now, that's the sort of confidence I place in my unsurpassed spreaders. Did you ever get an offer like this before from anyone? Never! But I know my spreaders will stand any test you care to give them. My confidence is not based on my own judgment alone, but on the judgment of over 40,000 satisfied Galloway Spreader customers. My new Catalog shows my new, unequalled, low-down, semi-underslung spreader. Get it.

Now is the time to write me for I've made the most phenomenal slash in manure spreader prices in history. I've simply gone the limit. I've cut 'em clear to the bone. Yes, sir; you want my spreader prices before you consider buying any other style or make. Get my Spreader Catalog Salesman. Just fill in coupon.

$42.50 That's My New Direct-from-Factory Price on the New Galloway Sanitary 500 Lbs. Cap. Separator

Now, don't be misled by other concerns making a lower price than this. Note first what the capacity of their machine is then note my price and capacity. My 500-lb. capacity machine is the smallest size I make and it's absolutely the smallest size it will pay you to buy. Then I make a 750 and 950-lb. capacity machine. Here's the cream separator you have been looking for. It's the most modern, most sanitary and closest skimming cream separator ever built. It took us three years to perfect, build and market this new incomparable Galloway Sanitary. It hasn't its equal on the market today from any standpoint, regardless of price, and yet I say to you, when you buy it I will save you positively from $35 to $50.

I am making a special 90-day Free Trial Offer on this wonderful machine because I want every man in the market to give it a good trial entirely at my risk right alongside any other separator built, you to keep the machine that does the best work and suits you best.

Get my catalog telling all about my New Sanitary, how it's built, the sort of materials used in its construction, terms, prices, etc. Just fill in coupon and mail to me today sure.

DES MOINES, IOWA, THURSDAY, OCTOBER 9, 1913.

A Campaign Against Tuberculosis

Wisconsin Recognizes Necessity of Educating Farmers to Dangers of Consumption and Methods by Which it May be Checked or Cured

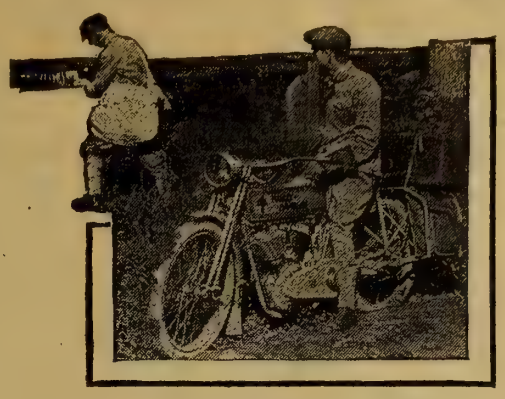
THE campaign against tuberculosis, that great scourge which is taking so many lives and wrecking so many homes, is making substantial headway in checking the disease in cities, but little attention has been paid to tuberculosis as a rural problem. In the country there is as much of the disease, per capita of population, as in the city, and much less is known regarding its nature and how to prevent it.

With one-half of its population rural, Wisconsin early recognized the obligation of extending the anti-tuberculosis crusade to the isolated residents. Different plans were tried for carrying the educational campaign to the farmer, but nothing proved practical until last summer a motorcycle was donated to the association by a generous individual, and a lecturer was sent into the country on this machine.

As a result of this experiment, the Wisconsin Anti-Tuberculosis Association is this year conducting an educational campaign which is probably the most extraordinary and unique venture of its kind ever attempted. It is a combination lecture and placarding campaign and a survey of rural conditions. Two men, a lecturer and an assistant, travel on one machine. They are absolutely independent of railways and hotels, carrying a complete camping outfit. Talks are given wherever a crowd can be assembled at a creamery, a country postoffice or crossroad. The evenings are usually spent in a small village or community center where a lecture, illustrated with stereopticon views, is the principal feature of the day's program. The work in the surrounding country during the day, which includes short talks, visits to individual farmers, and placarding the fences with signs emphasizing the principal rules of right living, serves to advertise the evening lecture to which the farmers come in from several miles around.

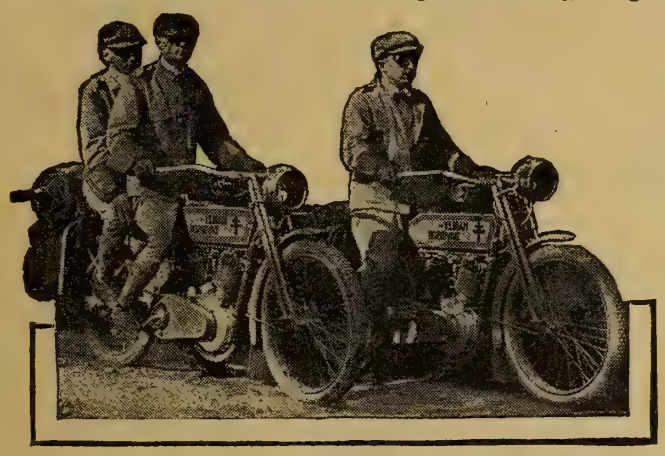
The unique arrangement of their compact equipment creates much interest and serves to draw an audience. The stereopticon machine is operated from the luggage carrier of the motorcycle and is fed by the same gas tank that supplies the headlight. The silk lumberman's tent, bed clothes and simple cooking utensils comprise the remainder of the equipment. When all of these are loaded, together with two men, on one motorcycle, they make a curious picture.

The expense of this work is comparatively small, since hotel bills are eliminated. The ground can be covered rapidly and no time is wasted waiting for trains. As many people can be reached in the country in this manner as by the ordinary lecture tour through cities. After their opening in the fall, a talk in each rural school will be made part of the program. This work can be carried on about six months of the year. It is gratifying to find that the gospel of improving health is



TACKING UP PLACARDS ADVERTISING THE MEETINGS.

being favorably received by the people of Wisconsin as indicated by the kind of interest which has been shown in the work of these two lecturers. While possibly in the beginning this interest might partly be due to curiosity, yet it is very quickly discovered that the mission performed by



THE CORPS OF LECTURERS ON THE ROAD.

these men is, after all, fundamental and that the outcome of their work will affect favorably not only the present, but even future generations. An extraordinary amount of good can be accomplished along this specific line at an almost infinitesimal cost, resulting in a large advantage that cannot in any way be computed in terms of dollars and cents. In this campaign of enlightenment the healthy as well as the sick are concerned, because of the insidious character of the enemy that is being fought.

The value of the campaign can hardly be overestimated. Notwithstanding the fact that they live where fresh air and fresh, cleanly food is accessible, it is a fact that farmers and farmers' wives are subject to tuberculosis even more than city folks. Failure to pay sufficient attention to the manner of living is one of the chief causes of the ravages of this dread disease throughout the countryside. The campaign in Wisconsin is to educate farmers in protecting themselves against the incursions of consumption and to check the disease in its incipient stage, once it secures hold on them.

The work which is thus being tried out in Wisconsin will doubtless spread to other grain-belt states, where the need is equally great. Iowa statistics show that housewives form the largest class of inmates at the state tuberculosis hospital, while farm housewives are represented in even larger number than city housewives. It is difficult to realize that this condition of affairs exists because if pure air and good food are not obtainable right out on the farm where can they be found? After all the most urgent need in the stamping out of this dreaded disease among farm people is to introduce better methods of home ventilation. We are coming right up to the time of year now when the windows in many cases will be closed for the season. In some cases, possibly for a period of five or six months, the windows of sleeping rooms will never be raised, and yet living under this condition frequently undermines health without the persons affected having the least conception of the cause. In a case of this kind it is ignorance that is costly and the toll paid is of such a cost as to justify the state in seeking methods of prevention. The success of the Wisconsin plan will be watched by every other state with a great deal of interest. While the stamping out of tuberculosis is a national problem, yet it is one that must be solved state by state and the lead that Wisconsin has taken in the matter will be followed by other states if good results are forthcoming.

If we are so to conserve health as to make the next generation superior physically to the present it is imperative that everything possible be done to stamp out the diseases, which, while intensely deadly, are preventable. Tuberculosis heads this class of ailments and the Wisconsin campaign might well be imitated in all states.

A COMBINATION OF WORK AND PLEASURE THAT IS BEARING GOOD RESULTS.

HOW HOG CHOLERA SPREADS.

It is safe to say that every swine breeder in the corn belt is taking more than the ordinary degree of precaution to prevent the infection of his premises. Breeders know that cholera is a germ disease and furthermore it is generally believed that the germ cannot travel in air. There must be some physical agent employed in spreading the disease from place to place. The infection may be carried on shoes and clothing and for this reason when cholera once makes its appearance in a community no outsider should, under any consideration, be allowed to visit the yards or even the pastures where the hogs are grazing. Other vehicles for carrying the infection are dogs, chickens, pigeons and sparrows. Many a dog that is really not worth $5.00 has cost his owner a small fortune by prowling over infected ground and bringing the disease into a healthy herd. In these times when disease is so common the dog that leaves home under any circumstances whatever should be tied up or shot. It is simply a question in that case of whether you propose to part with your dog or run the risk of losing hundreds of dollars' worth of hogs.

In discussing methods of preventing disease from entering herds the veterinarian of the North Dakota station gives this advice:

In order to avoid those sources of danger of infection as much as possible when the disease is rampant in a community, we deem it advisable to keep the hogs indoors whenever this is possible, at the same time keeping the quarters thoroughly disinfected. We realize that it is better to keep the animals in lots and pastures under ordinary circumstances, but during extensive outbreaks the confinement of hogs in buildings may be a means of protection.

While the feed in itself plays little or no part in the production of the disease there always is danger of introducing infection by the use of foodstuffs which may have been contaminated with the germs in some way or other. This may be obviated by the use of a feed cooker by which the materials fed can be exposed to sterlizing heat. Those feeding such material as hotel or restaurant offal should by all means cook it before offering it to hogs.

Another factor in the spread of hog cholera is the introduction of new hogs into the herd. Such animals may have come from an infected district or have been exposed during transit by means of infected stock cars or yards. For the same reason stock shows are liable to become means of the spread of infection.

Another factor to no small degree responsible for the spread of disease is found in the fact that on many farms hogs manifestly sick with the disease and doomed to die are permitted to linger about and to hide themselves in various out-of-the-way places. It is reasonable to suppose that this will soon, as it were, saturate a hog lot or pasture with disease and the more infection or germs are thus scattered about, the more danger it will offer to the healthy hogs in a certain district. If farmers could be induced to kill this type of animals and to destroy the carcasses by immediate burning, they undoubtedly would do a great deal toward limiting both the extent and the speed of the spread of the disease.

To this we would add one other factor: the employment of sensible feeding methods whereby the hogs are kept in a vigorous, healthy condition. It stands to reason that individuals in a herd that are run down either as a result of external or internal parasites, are the first to become infected, thereby giving the disease a start in a herd which may ultimately sweep away even the animals that are in normal health to begin with. When it is considered that approximately 10 per cent of the ordinary run of hogs are naturally immune from cholera, the conclusion must be reached that this immunity is due to natural stamina and vigor while in turn this vigor must be due to an inherent hardihood in conjunction with sensible care. By keeping all animals in the pink of condition the danger of disease getting started in the herd is reduced to a minimum.

A VISIONARY CONCEPTION OF AGRICULTURE.

A subscriber who has never had any practical experience in farm affairs contemplates locating in a western state and in order that he may be equipped to attain success right from the start he propounds the following questions:

I would like to get all the information you can give me in regard to farming, as I am about to start in a western state where the rainfall is rather light. I am told that such crops as sweet clover, alfalfa, white and red clover as well as cane and kaffir corn do well there, but as I have never had any experience I want you to tell me just how to proceed in order to obtain the best results. If you cannot give me this information I wish you would refer me to someone who can, because I don't want to make any great big blunders when I go out there.

This typically illustrates the attitude of certain classes of our people toward farm affairs. The "back to the land" movement has stirred up a great many town and city people who are made to believe that they can greatly improve their lot in life by going back to the farm. In the first place the great majority of those who are so persuaded have the hallucination that this subscriber is now passing through indicated by their firm belief in the fact that all the information needed on crop growing can be picked up, as it were, in job lots. In this case it was hoped that a single letter would lead straightway to success if the directions given were faithfully followed.

This paper has no advice to give under such circumstances as these. The individual who does not know the fundamental principles of soil tillage and who is not familiar with the general methods employed in growing the various kinds of crops is in no position to assume the obligation of operating a farm in his own right. This holds true whether he proposes to operate in a dry farming country or in a wet farming country. If the practice of agriculture were as simple as is indicated by this inquiry there would be no need of our experiment stations and agricultural colleges nor, indeed, would we have a consuming class, but all would be producers.

WINTERING BEEF BREEDING COWS.

Ten Short-horn and ten Aberdeen Angus cows were fed 140 days at the Pennsylvania station on ensilage and cottonseed meal alone. These cows consumed approximately sixty pounds of ensilage and one pound of cottonseed meal per head daily. During this period they made an average daily gain of 1.17 pounds per head.

The ensilage was fed twice a day and the cottonseed meal once daily. There was less than 1 per cent waste in feeding in this manner. These cows were allowed to run loose in a shed that was well bedded, the experiment lasting from December 1st to April 19th.

It required four tons of silage to winter each cow in this manner, this being equivalent to one-half acre of corn yielding forty bushels per acre or one-third of an acre of corn if the land produced at the rate of sixty bushels per acre. Computing ensilage at $3.50 per ton the cost of wintering the twenty cows on ensilage was $280 or $14 per head. In addition the cows consumed cottonseed meal to the value of $42. With this item included the average cost per head was approximately $16. Attention might be called to the fact that during the period covered by this experiment the weather conditions were unusually severe, the temperature falling as low as twenty-three degrees below zero at times. These cows when turned to grass made satisfactory daily gains, indicating that ensilage when fed in large quantities, as was the case in this instance, is in no manner whatever injurious.

It may be of interest to know that 8,840 pounds of manure were produced during the 140 day period by each cow. This computed at $1.50 per ton means a value of $6.63. As each cow gained 164 pounds in weight this increase of five cents a pound amounts to $8.20. It is true that this added weight has in reality no intrinsic value unless the cow is marketed, but it does mean that the cow goes onto the grass in a good fleshy condition.

Those of our readers who have a supply of ensilage at hand might profit by a perusal of the results obtained in this instance. If an experiment station can obtain these economical results on ensilage and a small amount of cottonseed meal daily there is no reason why there will not be a similar outcome if the same plan is carried out under average farm conditions.

SUGGESTIONS TO YOUNG BREEDERS.

In his recent work, "Beginnings in Animal Husbandry," Prof. C. S. Plumb offers a few suggestions which are directed in the main toward the young breeder. It is pointed out in the first place by this author that successful breeders are those who have been persistent in their efforts. In other words, they have pursued a fixed policy with the same kind of stock year after year through dull times as well as in periods of high prices. A man who is going to be frightened out by a temporary slump in values had better not undertake the breeding of pure-bred stock.

It should be kept in mind that the right kind of a reputation can come to the individual through the record of his best animals. These under all circumstances should be kept in the herd and not sold at any price. There must be a constant culling from the bottom end.

In making additions to the herd too much emphasis must not be placed on cheapness. Good individuals with meritorious blood lines seldom have to go begging even at long prices. If they are high to buy one may usually depend upon it that these are the kind that sell high. Professor Plumb points to the case of Mr. Corsa's purchase of Masterpiece, the Berkshire boar, for $2,500, an animal that proved to be exceedingly profitable even at this record-breaking price.

Under no circumstances does it pay to be niggardly in feeding pure-bred animals. Our breeds have been built up by sensible matings in conjunction with careful feeding. If the present standard is even to be maintained, to say nothing of being heightened, liberal feeding will have to be employed in the future as well as in the past.

This author advises the young breeder to undertake the breeding of the same class of stock that is grown in a community. One reason for this is that more buyers are apt to come into a section where a particular breed dominates than will be the case if there are only a few animals to select from in a very few herds. Attention should be called to the fact that one can often dispose of more males in such a locality than will be the case if there are few herds of any particular breed. In the case of hogs this is a matter that is well worth pondering over by the young breeder.

To become a successful breeder one must be a student of the business. Particularly does this apply to the study of families or strains within the breed. By associating more or less freely with men who are known to be successful as breeders a practical working knowledge will be acquired very quickly. So much the better if it is possible to co-operate with fellow breeders in promoting the live stock interests in general and your special breed in particular.

ENGINE POWER NEEDED FOR THE FARM.

A Missouri subscriber who is contemplating the purchase of a gasoline engine, asks for information in regard to the amount of horse power needed for the various farm tasks. He expects to use this engine to run his washing machine, the grindstone, the fanning mill and, in addition, he desires to use it for grinding feed and for sawing wood. While he has not yet erected a silo he intimates that this will be done some time in the future and that therefore, a gasoline engine will be required to cut the corn.

In answering this inquiry we cannot do better than call attention to what Mr. X. W. Putman has to say on this phase of the gasoline question in his recent book, "The Gasoline Engine on the Farm." Mr. Putnam believes that for most of the work about the house and dairy a one or two-horse power engine will be ample. This will pump water in moderate quantities, separate the milk, churn, run the washing machine and wringer, spray the trees, and water the flower bed and garden, wash the windows, including those of the upper story, run a dish-washer or a vacuum sweeper, supply a modern bath room and all rooms of the house with running water, run the shop lathe, grindstone, emery wheel, rip-saw and small cut-off, wash buggies, whitewash the outbuildings ten times faster than can be done by hand, sprinkle the lawn and a few other similar tasks that on the average farm are done at the price of aching backs or not at all; while in its spare time the same industrious little worker would, with the aid of a storage battery, accumulate enough electrical energy to give the farm buildings every night the same lighting conveniences enjoyed in the city residence at very little cost.

Mr. Putnam says that with a three to five horsepower the farm supply of wood could be sawed, the feed ground, hay and straw and stalks run through the cutter, grain and hay elevated, corn shelled, stock watered, and feed conveyors handled almost without hand work. An eight to ten horsepower would do practically all of the heavy work a stationary engine could be made to do upon a farm; such tasks as threshing, ensilage cutting, heavy grinding, corn husking. For a tractor, less than twelve-horse would hardly be advisable, while for real satisfactory work at the plow and harrow on, say, a 200-acre farm, less than a twenty-horse could not be advised. For smaller farms, tractors are now made of half that power that will do good work with the plow.

There is, of course, danger of having a small engine overloaded in a short time if it is installed for general farm work, but for really saving the work and sparing the health of the man and his wife the small engine is ideal. It is also best to learn with; then it can be turned over to the boys to give them a new interest in farming, and a greater love for farm life than all the grindstones in the world could ever do unaided.

A CHILD'S CRY.

I WANT to go out in the country
Away from the heat and the noise,
Where I can have daisies and bluebells
And little red roses for toys,
And wade in the puddles barefooted,
And roll on the green-velvet grass,
And pretend that the dewdrops are diamonds,
And the clouds are all angels that pass.

I want to go out in the country
Away from the dust and the smoke,
With a clean gingham apron for Sundays,
And maybe a little blue cloak.

I don't ever get any taller,
I know by my frocks—not a mite!
They say that my legs are like pipestems,
And my cheeks are all sunken and white,
The stones that they plant in the city
Never get any bigger, and so
I want to go out in the country,
The beautiful country, and *grow*.

—Minna Irving, in Leslie's.

THE PUBLISHER'S VIEWS —ON— TOPICS of THE TIME

James M. Pierce

IN THE MATTER OF LITERACY.

THE little red schoolhouse on the hilltop and the little white schoolhouse in the valley are passing. Their places are being taken by the large consolidated school, or the two- or three-room building of model construction and sanitation. In the enthusiasm of our conversion to the new ideas and the new buildings, however, we must not lose sight of the immense debt we owe to the rural school of yesterday, poor and inefficient as it now seems to many.

Out of those little red and white schoolhouses, which many are now inclined to sniff at, have gone the boys and girls who are ruling the country today, writing the books that are going to live, painting the pictures that are masterpieces, doing the big and really-worth-while things of the world. Boys and girls have gone over the hilltop, stopping a moment to look back upon the schoolhouse they were quitting, and have returned, after the lapse of many years, grown men and women, to pay homage to the old schoolma'am or master, to whom they give credit for the solid, substantial foundation of learning upon which their fame and fortune have been builded. The days of the rod and the birch are passing, but they taught boys and girls in those days so that they did not readily forget.

I am convinced that it is the rural schoolhouse to which belongs the credit for putting the grain belt ahead of the rest of the United States in the matter of literacy. Do you know that the state which has the smaller number of people, per thousand, who can neither read nor write, is the state which leads the nation in the output of corn and of hogs, the state which is typically and almost exclusively rural and agricultural: Iowa? Do you know that the second state in the nation, as regards the general intelligence of its people, is another grain-belt farming state: Nebraska? Do you know that still another one of the first five states in the Union, as regards literacy, is still another grain-belt state, famous for its wheat, alfalfa, corn, hogs and horses: Kansas? Three states out of the five leaders! There is a record of which the grain belt may well and justly be proud.

What agency contributed most to this leadership? I say, the old-fashioned country school of which many are now inclined to speak lightly. They taught the three R's there (reading, 'riting and 'rithmetic) and they taught them soundly and well. There were no frills or fads; nothing but downright, practical, common-sense education; and the child who did not learn was helped along, with an attention to individual traits rarely encountered nowadays. When an education is secured by tramping some two or three miles over poor country roads, clustering around a red-hot stove in a reeking atmosphere and digging into old, dog-eared text-books as assiduously as one digs into the ground for potatoes, the things that are learned are remembered and appreciated. There was no easy and royal road to learning in the old days, but once a thing was learned, it stuck in the mind, minus any frills or furbelows—just good common horse sense.

So let us not forget that the old-fogy schoolhouse, as so many people call it today, served a purpose and had a value which the new-fangled schoolhouse may well pray to attain if it is to prove one-half so efficient.

ONLY A DREAM.

MY GOOD friend Coburn, of Kansas, has the knack of putting things just right. Coburn, you know, used to be editor of one of my farm papers and when a man makes as big a success as he did at the difficult job of editing he is qualified to tackle anything. Of recent years it has devolved upon Coburn to keep Kansas upon the publicity map. By this I mean that he has been looked to to acquaint the rest of the world with the bigness and richness of Kansas, with the vast size of its crops and with the good work which it is carrying on along a dozen different lines. Sometimes Coburn has another job. It consists in keeping up the courage of the Kansas farmer when things aren't going just right. And I'll say this, that as a courage stimulator Coburn has no equal. He is the best man I ever knew for cheering others into keeping a stiff upper lip.

Just for instance, take this little idyl that he wrote in order to impress upon the Kansas farmer the desirability of hanging on to the home farm, even if there is a partial failure of one crop now and then, instead of chasing after the pot of gold at the foot of some illusive rainbow:

Occasionally a good man becomes dissatisfied with Kansas. The milk is too yellow or the honey too sweet, and he doesn't like to have them flow over his land anyway. So he parts with his land and sells his live stock and other things too numerous to mention and moves to Oklahoma. There he takes good Kansas money and buys a farm which today is and tomorrow is not, because the wind has blown it away. Or tries Colorado and slushes in mud trying to irrigate a strip of bottom so narrow a cow could jump across it. Then he hears of Texas and goes down to hunt the bag at the end of the rainbow. In the daytime he scratches the sandburs out of his flesh and at night centipedes crawl over his face. When his money is all gone he begins to feel like he did the first night he stayed away from home.

He yearns for good old Kansas and the yearn sticks in his throat and chokes him till the tears come in his eyes. He would give months of hard work to see the cow standing at the bars of his old Kansas farm and hear the horn for supper. Memory is a marvelous painter and paints the things we love the best. It pictures to the traveler the corn silking in the fields he used to own, the wheat yellow for harvest, the clover stretching away in a carpet of red and green, richer than the rugs of Persia. It shows to him the elms as they whispered to the children at play under them, points to the rose in the corner of the rail fence and infinite details paint a thousand things that touch the heart and prove its whimsical power. Happy is the man who wakes to find that he has wandered from Kansas only in a dream.

Now, isn't there a lesson in this for all of us, whether we live in Kansas or not? There are times when even prosperity palls. We long for a change. We leave good, secure things and set out with high hopes to follow the will-o'-the-wisp. Fortunate, indeed, is the man who, like the farmer, in Coburn's idyl, finds that his wanderings from home have been only in a dream.

There is nothing much more sorrowful to me than the way some farmers try to transplant themselves in their old age. Maybe they have good reasons for turning the old homestead over to others, for closing the barn door for the last time and quitting country lanes for city pavements. But I doubt if there is any reason good enough to warrant a man quitting home after he has become firmly rooted by a third of a century, or even a quarter of a century, of continuous life there. I remember when I was but a mere boy, back in the Ohio village where our folks lived, that after the civil war there was one street in our home town known as Widow Street. Why? Because the heads of all the families on that street had laid down their lives on the battle field. Well, today there are streets in some of our leading grain-belt cities that are Widow's streets (and whole blocks that are commonly called such) just as in that little Ohio village fifty years ago. Why? Because in their old age, and for various reasons, farmers have torn themselves from the old homestead and moved into town, there literally to die of inactivity, of changed conditions, of worry or disappointment or a dozen other causes.

So just take this word from me, because I'm an older man than many of you who read this. Remember Coburn's advice when you are tempted to leave the old home place, young or old. The time is almost sure to come when you will wish that you, like the Kansas farmer of whom Coburn wrote so eloquently and feelingly, had wandered from home "only in a dream."

James M. Pierce

THE COLT'S FIRST WINTER.

An experiment carried out at the Pennsylvania station throws a little light on the amount of grain and roughage required to take a colt through the first winter. Ten draft colts were used in this experiment, these being placed in box stalls November 12th, after which they were only turned out twice daily for water, there being no suitable enclosure for giving more exercise than could be obtained during watering periods.

These colts were at first each fed five pounds of grain daily composed of five parts shelled corn, three parts oats, two parts wheat bran and one part linseed meal. These grains were mixed in the proportion mentioned in bulk and not by weight. The amount of grain used was not changed until the end of the third month when it was increased to seven and one-half pounds per head daily. One group of these colts was fed an average of 8.2 pounds of silage daily and in addition 7.4 pounds of hay. The other group received the same grain ration but no ensilage, and in this case 10.6 pounds of hay were consumed daily by each colt. During the last three months of the winter period no ensilage was fed and the colts consumed 13.1 pounds of hay daily in addition to seven and one-half pounds of grain.

On this ration they made an average gain of 244 pounds per head during a period of 168 days. When turned to pasture in the spring these colts made satisfactory gains right from the start, indicating that the method of handling during the winter had prepared them in an ideal way for the grass period.

To those of our readers who have on hand draft colts we would especially commend the grain ration that was used in this case. It is well balanced and, furthermore, the variety that it includes means that the ration will be in the highest degree palatable and therefore easily digested.

FAVORS HOGGING DOWN CORN.

In the following communication one of our subscribers, Mr. I. L. Turner, gives his experience in hogging down corn:

This is the seventh year that I have used this method of gathering a part of the corn crop. The first year I made the mistake of turning the hogs in when the corn was just in the roasting ear stage. It made nice shoats, but was too expensive while the corn was soft. Since that I have turned in after the corn was dented or about the first week of September. I use a twenty-acre field and I find no more volunteer corn on this field in the spring than on the fields that are husked.

I always make an effort to have pasture of some kind for the shoats to run in at the same time they are in the corn. I also plant from a half acre to an acre and a half of sweet pumpkins. These are not the old-fashioned yellow Yankee pumpkins, but a good pie variety. These are planted with the corn planter the same as corn. They are very prolific, as you will see when I tell you that I harvested twenty wagon loads from an acre and a half this year. I feed as many to the hogs daily as they will clean up. They seem to relish them even when getting all the corn and alfalfa pasture they can eat.

When corn is hogged down supplemented with feeds of this kind I think, taking everything into consideration, that it cheapens corn at least eight cents per bushel and if the hogs do not gain any faster than when in a dry lot we still have this eight cents a bushel profit over gathering the corn and feeding the hogs by hand.

It seems that wherever the plan of hogging down corn has been sensibly tried it has met with most marked favor on the part of those who have adopted it. It has certainly passed the experimental stage with Mr. Turner, as it has been tried seven years in succession. The plan of using pumpkins in connection with corn handled in this way is ideal and where the pumpkins are not planted in the corn one can well afford to give up the use of an acre or two for this crop alone because pumpkins make an ideal supplement for corn when it is used for fattening hogs.

CARELESSNESS ABOUT SENDING PEDIGREES.

Men seldom meet with any marked degree of success in the raising and marketing of pure-bred stock of any kind if they are not reasonably good business men to begin with. It requires more than a knowledge of pedigrees and one must be something more than a good feeder to permanently succeed in this line of effort. We are reminded of this at regular intervals when our attention is called to a case of carelessness on the part of men who have sold and shipped pure-bred live stock through a mail order and yet who daily along for weeks and even months before sending the pedigree. To begin with this is an exceedingly poor business policy, because even though men treated in this manner are satisfied [illegible] he selection that has been m[illegible]ey become disgruntled and, in the end, the enemy of the seller.

It is not difficult to understand why a man having a pure-bred herd becomes very uneasy if he has used, for instance, a male in the herd and yet finds the weeks going by with his efforts to come into possession of a pedigree wholly unrewarded. It would mean in some instances not only a loss of hundreds, but even thousands of dollars if the pedigree is not forthcoming at some future time.

The cases where men dispose of alleged pure-bred animals when they are not able to furnish pedigrees are exceedingly rare, and when they do occur they must be dealt with as a species of dishonesty because it is simply an attempt to obtain money under false pretenses. They must be dealt with in an entirely different way than in the case of the individual who is simply slow in making out papers.

We can well understand why, in certain instances, there is more or less unavoidable delay. If, for instance, the sire or dam of the animal disposed of is not recorded it may require a few weeks to have this matter attended to and it must be attended to before the pedigree of the newly sold animal can be furnished. Because of this we believe that buyers of pure-bred stock should, at all times, exercise a reasonable degree of patience, but, on the other hand, the seller should state the facts in the first instance and assure the buyer that the pedigree is forthcoming without any question whatever.

As there will be an enormous amount of business transacted between the advertisers in this paper and our subscribers during the coming months, we hope that this matter of pedigrees will be kept in mind and that there will be no cases of misunderstanding on account of delay presented during the coming season. As we stated before, it is a bad business policy and tends in the outset to operate against the best interests of even the best breeders. The man who neglects looking after this little detail promptly will, in the end, suffer from his delinquency.

POISONOUS CORNSTALKS.

The Missouri Experiment Station has recently issued a statement warning stockmen to be careful in the feeding of cornstalks to cattle this winter. It seems that it is not possible to detect, in any way, the presence of poison in the cornstalks. However, it is well known that such conditions as have prevailed throughout a considerable part of the corn belt this year are favorable to the development of a deadly poison in the stalks. This poison generally disappears by the first of January and ordinarily there is no danger from the use of shocked fodder.

Calling attention to this matter the veterinarian of the Missouri station advises farmers to muzzle their horses while gathering corn because that is the very time when there is the most danger. Instead of pasturing the stalks during the fore part of the season and feeding the shocked fodder later, this order ought to be reversed, according to Dr. D. E. Luckey. By the time the shocked fodder is fed out or a considerable part of it, the probabilities are that the poisonous material will have completely disappeared from the standing stalks.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

The heavy auto requires more gasoline to propel it and larger tires to carry it, both of which cost money, but the heavier car has smoother action and rides easier. It is all right for the man who can afford it, but a "Jonah" to the man who cannot.

I never like the prospect of a long husking job ahead, but when corn is worth more than fifty cents a bushel husking doesn't seem half so hard. Nevertheless, when the last load is in the crib and a snow storm seems to be brewing, there is cause for rejoicing.

Once upon a time, when a young man, I husked corn for a man who never would let the sun go down with a "down row" in the field. It was his whim that the time to pick up the "down row" was right after making it.

We are enjoying a siege of good, deep, sticky mud of the real honest quality without complaining. Perhaps it isn't the mud, but the things that come with it that we enjoy.

There are still some road supervisors that labor under the delusion that they are building roads when they pile a miscellaneous assortment of sods, weeds and other trash into the place where the grade should be and leave the traveling public to find their way along the sides somewhere between the fences.

Hay was a good crop this year and conditions were almost perfect for putting corn in the shock or the silo. Those who are short of coarse feed for their stock next year should not make any excuses, just dig into their pockets and hand over the price asked by their more provident neighbor who can see a little the other side of today.

One way to make the work of filling the silo a little easier would be to have the conveyor come down the center of the silo instead of just inside of the wall. In this way of carrying the conveyor would be a snap instead of a job.

Potatoes and apples keep best to be stored in some dry outbuilding as long as the weather makes outside storage safe. Grief be to him who leaves them one day too long.

One seldom sees a wooden pump in use nowadays. When they were common I had several. All were short lived, but they certainly did lift some water when they were "at" themselves. They were ideal for the shallow well. Now folks let a windmill or gasoline engine do their pumping.

Being a tardy convert to the catalpa as post timber, I have not yet had any set long enough to test their lasting qualities alongside hedge, but, somehow, I cannot believe they will last as long as I expect to.

There are folks in this world who will keep a hired man for the express purpose of doing chores. A man ought to be compelled to do as much as his chores each day, to keep his appetite in healthy order. When I have no more than that to do I will gladly get along without help.

Don't think you are saving anything by getting along without a good shoveling endgate. The better kind, tight enough to hold all corn that shells, will pay for their difference in cost in this season of high-priced corn.

A sure enough horseless carriage has just passed. It was propelled by a single, long-eared donkey, and was making about four to five miles an hour. Even the dog was too astonished to bark.

A part of the country has raised an immense potato crop and another part would be going without, save for those shipped in. I have been told that those having to buy, although but 500 miles away from those having a surplus, will have to pay exactly double the price those get who have them to sell, and I know the transportation will not take all that. The expense of distribution seems a big item these days.

The time of year is coming when we begin to take interest in windbreaks. A good set of cedars along the west and north of the buildings is worth a good deal, and yet because such things will not spring up almost as if by magic, most folks will not make the necessary start.

Alfalfa has proven more hardy than clover, for it has survived almost everywhere that clover has died. I know of two fields alongside, one of clover, the other of alfalfa. The clover is almost dead, but since the rains the alfalfa is as green and flourishing as ever. I claim alfalfa is something of a drouth resister.

The ever-bearing strawberry "made good" this year by producing berries until frost killed the vines. We may have these and "tame" grapes on vines that need no covering through the winter if we are willing to spend a little time in planting and caring for them. Nursery men have their faults like the rest of us, but they have done and are doing a whole lot toward making life worth living in the corn belt.

Feeding the threshing machine by hand and poking back the straw from a stationary carrier are things of the past and no one is sorry to see them go. When we stop to think of the hard knocks the farmers had to take only a few years ago we need not wonder that so many of them were so anxious to leave the farm and take up other work.

TRAPPERS

You men and boys who add to your pocket money by trapping and selling furs—Listen! Our big new Book on Trapping is just off the press. We have a copy free for every man or boy who intends to trap. The most complete trapping book yet published. Tells how and when to trap—baits to use, contains game laws and a catalog of trapper's supplies. It's *free* if you write today.

FURS

of all kinds are in great demand this season. Over ten million dollars will be paid to trappers this winter. Send us every fur you can trap or buy and get your share of this big money. Write today for free book on trapping, price lists, shipping tags, etc.,

Two Money-Making Rules for Every Farmer —

Keep Out the Weeds and Worms

THIS IS—
John E. Robbins
the Successful Stock Breeder.
He has used SalTone 26 years on his stock farm.

What are YOU Going to Do About It?

Worms, like weeds, are parasites, because they live at the expense of others. They live for one thing only—to take everything and give back nothing. You can "wish" them away, but they won't go. They don't even know you want them to go, and if they did, it would make no difference. They are going to stay right on the job, living off of you as long as you let them. They put in 365 twenty-four hour days every year.

What are YOU Going to Do About It?

Who's the Boss On YOUR Farm Anyway—You, or the Worms?

Isn't it a sight the way the worms hog twenty-five to fifty million dollars of the farmer's hard earned cash every year just because they never heard there was a boss around?

Listen! Good Authorities Say:

—that worms are as common as are weeds after a summer shower; that nine farm animals in every ten are being starved, stunted and weakened by them. How much are these worms costing *you?* It's mighty hard to tell, because you cannot see them. But they are there just the same, and it would send the cold shivers down your back if you knew how much you are losing this year by them. Now, honestly, what *are* you going to do about it? Let them stay, or order them out?

Send the Coupon and Try 100 lbs. of

SALTONE
TRADE MARK

The Wormicide and Conditioner for All Farm Animals

SalTone Will Make YOU Boss

—of the worm situation on your farm. **SalTone** is guaranteed to kill and drive out the worms from the stomach and intestines of hogs, sheep, horses and cattle. **SalTone** is ready mixed, and animals take it like salt. It makes them hungry and gives them snap and life. **SalTone** is a guaranteed wormicide and conditioner. It must do the work or it costs you nothing. All **SalTone** dealers will refund the price paid if a reputable buyer returns the empty package and states that it did not remove the worms from his animals. **SalTone** makes money for you because it cuts many weeks off the feeding time, turns expensive grain into fat and muscle instead of food for worms. **SalTone** costs almost nothing—one-twelfth cent per day for a sheep or hog. Thousands of farmers, some of them your own neighbors are using it all the time, and say they would not be without it. Read some of their letters on the right.

SAL TONE Will Stop Your Worm Losses

What These Farmers Say Proves It!

I feel quite an interest in SalTone. Before buying it I bought a similar remedy, but found it not half so good as SalTone. SalTone is "A1", and I appreciate it to the highest degree, because it has made my stock look many times better than ever before. I will never be without SalTone again and will recommend it to all my neighbors.
Albert Miller, Batavia, N. Y.

I experimented with SalTone here at Bourbon Stock Yards, and the result showed abundant evidence of the true worth of this wonderful preparation. I took two "no account" calves, fed one SalTone, the other none. After one month the SalTone-fed calf was about the most vigorous looking and liveliest acting animal you ever saw—it had gained 50 pounds. The other calf, (without SalTone) gained only 15 pounds, and is still in the "no account"—3 cents a pound class. SalTone is worth many times its cost.
Phil D. Shaw, (*of Watkins, Carruthers & Co., Live Stock commission merchants,*) **Louisville, Ky.**

Our sheep exhibits at eleven fairs in 1912 won over $1100.00, being defeated in few instances in a single class. We have fed SalTone, your medicated salt, for eighteen months, and our men are very enthusiastic about it. In fact, we would not think of raising Shropshires without SalTone to keep them in perfect health and free from intestinal worms.
Zelora, Green.

I am more than satisfied with SalTone. I consider it the best stock tonic on earth. Every stockman should have a supply.
Fred N. Greiner, Branchville, Indiana.

Enclosed is my third order for SalTone. I have a car of 240 pound April barrows ready to ship. My hogs have never wintered better. I have fed SalTone long enough to know it is well worth the money, and I will recommend it to my neighbors.
Earl Rogler, Atlantic, Iowa.

Try SalTone Sixty Days at Our Risk

Send Coupon—No Money

If your dealer cannot supply you, we will send 100 lbs. on trial, with our iron-clad guarantee back of it. Use as directed for 60 days, and at the end of that time pay for it, if it is as we represent. If not, we will cancel the charge. What are you going to do about it? Will you sign the coupon and mail to us today and give **SalTone** a trial—or will you let the worms eat you out of house and home?

The Hart-Parr ONE MAN Plowing Outfit

Illustration shows how easy it is to free a single bottom of trash, without disturbing the adjustment of the rest of the plow, while tractor is in motion.

Use a Hart-Parr for Profit

The dirty, disagreeable chores created by the horse take a lot of time. After a hard day in the field, there are the horse chores to do—unharnessing, feeding, bedding, etc. Next morning, it's feed, clean and hitch up. Few farmers relish this.

It's different with a Hart-Parr Oil Tractor. When the day's work is over, merely stop the engine. Next morning, simply start it again—the work of only a few minutes in either case. There are mighty few owners who don't get a lot of genuine pleasure and profit operating a Hart-Parr Oil Tractor. And compared to horses, it delivers more power and better power at less expense. So why stick to inefficient horses when a

HART-PARR -OIL TRACTOR-

will do all the heavy farm work quicker, better and cheaper.

Right now, the outfit shown in the illustration is creating a big stir. It's the light Hart-Parr Oil Tractor with the big pull and the wonderfully simple Hart-Parr "Self-Lift" Plow—the outfit that is doing big things on 100 to 300 acre farms.

Time and again, this outfit has practically sold itself at Fairs where we have exhibited. Shrewd farmers are at once impressed with its great simplicity, marvelous strength, light weight and correctness of design.

The tractor has the power of 12 sturdy horses, only it is much steadier and absolutely tireless. An especially designed carburetor enables it to burn *cheapest kerosene* at all loads and under all conditions. The drive wheels have wonderful wave form lugs which afford 31 per cent greater surface contact than any other lugs. Drivers can be equipt with "Hold-Fast" extension lugs, the lugs with a bull dog grip in softest soil. One man operates and cares for the tractor, no matter what it is doing—plowing, harrowing, discing, seeding, harvesting, threshing, road grading, silo filling, hauling, etc.

Hart-Parr "Self-Lift" Plow is one-third lighter and has one-third less parts than any other. You operate it right from the engine platform. A slight pull on the rope attached to the clutch lever causes each bottom to lift straight out of the ground, in order. Another pull on the rope and the bottoms drop into the ground again. No back breaking labor. The trip mechanism does all the work. And you save the plowman's wages and board.

Read and study the unexcelled features of both tractor and plow, enumerated in this announcement. Learn why this outfit is a big money maker on farms of 100 to 300 acres.

Write today for special circulars fully describing both equipments, and get our fine catalog and literature on power farming costs. We build an outfit for every farm, large or small. We have a power outfit exactly suited to *your* requirements.

HART-PARR COMPANY

228 Lawler Street **Charles City Iowa**

100

Superior and Original Features of Design Found Only in the small, light Hart-Parr Tractor and Self Lift Plow.

Tractor—Lightest weight, yet great strength. Only 300 different parts—others have 800 to 1500. Main frame is a strong, one-piece casting. Drive wheels with wave form lugs, are solid steel castings—not built up or pieced. Driver lugs give 31 percent greater surface contact than any other. Can be equipt with Hart-Parr "Hold Fast" extension lugs, the lugs with a bull dog grip in soft soil. Especially designed carburetor operates efficiently on cheapest kerosene.

Plow—33⅓ percent lighter than any other and has one-third less parts. Combined automatic and hand lift. To raise or lower bottoms, merely pull a rope attached to clutch lever. Any one bottom may be raised with hand lift attachment without disturbing adjustment of rest of plow. Spring beam coupler enables plows to skid around or over obstructions and prevents breakage.

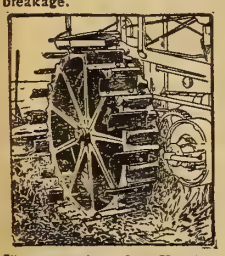

Illustration shows how Hart-Parr "Hold Fast" lugs grip the ground and pull out straight away without tearing up the soil.

Summit Knit-Nek Vest

WARM AND EASY TO WORK IN

What you need is a Summit Knit-Nek Vest—it keeps you warm without wearing a heavy coat.

It's just the thing to keep you warm and still allow you to move around with ease and comfort.

The patented Knit-Nek and wristlets protect the throat and wrists from the cold and wind.

The body is made in corduroy, whipcord, moleskin and waterproof duck, lined with leather, and leather sleeves.

Water has no hardening effect on the leather used in Summit Knit-Nek Vest—it remains soft and pliable.

CURRENT EVENTS

CONSIDERABLE sentiment was created last week at the American Road Congress held in Detroit, in favor of what is known as the "business road," which term is used in an entirely different sense than the "touring road." United States Representative D. W. Shackleford, chairman of the house committee on roads, made a strong plea for the policy by which the United States shall limit its road activities in the construction and maintenance of a few ocean to ocean highways and devote more attention to what is known as "business roads." The essential thing, according to Chairman Shackleford, is easy communication between the farms and the towns and the railroad stations so that the farmer may market his crops at less expense and the towns be able to obtain farm produce more easily and at less cost. The carrying out of this policy, it is claimed, will mean cheaper transportation and it will result in lowering the cost of living. Secretary Houston also urged good roads for the farmer in preference to great transcontinental highways for automobiles. This will mean not only the lessening of the cost of moving farm products, but it contributes to a more efficient postal delivery service and to an improvement of social conditions on the farm.

CORN DAY in the public schools of Illinois will be celebrated more extensively this fall than ever before. State Superintendent of Public Instruction Francis G. Blair is at the present time preparing an illustrated circular which will be sent to every superintendent and principal in the state. This circular will contain information on selecting and testing seed corn, and, in addition, a full program is offered which, it is supposed, the teachers will carry out on the first Friday in November, this being officially designated "Corn Day." In some counties the importance of this day will be still further emphasized by the holding of corn shows where liberal premiums will be offered for the best types of corn.

THE railway commission of Iowa has recently taken a hand in a movement to prevent accidents at railroad crossings. In a communication addressed to the state highway commission attention is called to the changed methods of travel and the constantly-increasing use of highways. This means an enormous traffic over railroad crossings and hence the necessity for enlisting the support of the county supervisors in order that they may co-operate in making crossings less dangerous. One of the great railway systems has for its slogan, "safety first," and it is believed by the Iowa Railway Commission that this slogan can be extended to cover and promote the safety of travelers on public roads as well as those on railroads.

FIVE northern states of Mexico propose to secede from the federal government, the proposal being to form themselves into the Confederate States of Mexico. Matters have already gone far enough so that the president of the new confederacy has been selected together with the cabinet officers.

THE owner of some of England's greatest newspapers, Lord Northcliffe, has given an interview since his arrival in America, in which he expresses the belief that the women of England will lose their fight for equal suffrage. He points out that there are approximately 1,700,000 more women than men of voting age in England, Scotland and Ireland and that therefore the extension of the franchise to women would transfer political authority from one sex to the other. "No self-respecting man is going to be dominated by women and the men in England will not tolerate rule by women," according to this supposedly high authority. Lord Northcliffe claims that 99 out of 100 men in England are opposed to woman suffrage and both political parties stand together in their opposition to extending the franchise, all of which simply goes to show that even great men can blunder because the handwriting is now on the wall and the women of the British Isles, as well as those of the United States, will be exercising the right of franchise within a decade. This can be the only conclusion if we study the progress that the movement has made.

AN EARTHQUAKE that rocked the frame houses in the Panama Canal district last week failed to do any damage whatever to the canal. Since the shock a trip of inspection has been made by Colonel Goethals, who reports everything in the best of condition. The shock in this instance was so severe as to cause people to rush into the streets, in many instances half clad. The residents of Colon were so terrified that many of them camped in the city parks during the remainder of the night. The last serious earthquake in that region was in 1882 when many of the best buildings in Panama City were badly damaged.

ALBERT S. BURLESON, postmaster-general, has placed himself on record as favoring the governmental ownership of telegraph and telephone lines. Impetus was given the idea of governmental

Farmers Who Grind Feed Make Largest Profits

Feeding whole grain is wasteful as it is not properly digested. With high prices for grain and stock it becomes more than ordinarily profitable to grind your feed.

Fairbanks-Morse Feed Mills grind mixed grain and corn on cob at the same time, insuring an easily digested mixture. These mills have light draft, large capacity, long life. Grind fine, medium or coarse. No gears to waste power. Wearing parts renewable at small cost. Capacities: 6 to 60 bushels an hour.

Grind Cheaply—Use a Jack of all Trades Engine for power. It runs on Kerosene or Gasoline. An outfit will save its cost in a short time and will give years of service.

Write for Catalog FC 603 stating your requirements.

absorption of telegraph and telephone business by the results obtained in a recent investigation made by the department of justice into the so-called telephone trust. Under proper regulation it is believed that where two telephone companies operate in a city or a state a merger would be justified on the grounds that an improved service would be rendered at a less cost and with less confusion. It is believed that the strong arm of the federal government is needed in the work of merging.

SURROUNDED by the leaders of a united democracy, President Wilson signed the Underwood-Simmons tariff bill on Friday of last week. Simultaneous with this action telegrams were sent to the customs collectors throughout the country by the treasury department putting into actual operation the first democratic tariff revision since 1894. At the time of signing this important doctrine President Wilson said that the journey of legislative accomplishment had only been partly completed, that a great service had been done for the rank and file of the country, but that the second step in the emancipation of business was "currency reform." He earnestly called upon his colleagues to go the "rest of the journey" with fresh impulse. A small but distinguished audience composed of democratic leaders, including Speaker Clark, Secretary Bryan, and Representative Underwood, heard the president's short speech delivered after signing the doctrine.

THE MT. PULASKI, ILL., HORSE AND CORN SHOW.

In no part of Illinois is more attention given to the raising of good draft horses than in Logan county, and when, in 1912, a number of the enterprising breeders and farmers united in the formation of a horse show to be given at Mt. Pulaski its success was assured from the start. The satisfactory outcome of last year's show spurred the management on to even greater efforts for 1913, and when they presented a premium list showing over $3,000 in cash and twenty silver plates and cups the response was prompt, and 450 head of horses were presented before the judges at this year's show.

Not alone in numbers did the show mark an improvement over 1912, but there was a decided advance in the quality. Last year's show had proven a great object lesson. Logan county is one of the richest agricultural districts in Illinois, with a very large percentage of the population of German ancestry, than whom there are no better farmers. The sturdy draft horse has always been much in evidence in this part of the country, and many of the best stallions and more of the different breeds that have been imported to the country have found a permanent home in Logan county. The results of the progressive spirit were seen in the exceptionally good lot of horses shown at the 1913 Mt. Pulaski exhibition.

In addition to the horse show there was conducted a corn exhibition that was well worthy of consideration. Logan county is in the heart of the corn belt and when one considers the fact that recent sales of land have reached well above $300 per acre, some idea may be had of the fertility of the soil. Logan county suffered from lack of rain this year, but notwithstanding this fact, the corn display was an excellent one. In addition to the corn display there was a most excellent showing of wheat, of which Logan county produced a good crop last year. Any reference to the show would not be complete without mention of the domestic science part of the affair. The ladies are certainly to be congratulated on the fine display of food and needlework given by them. Their portion of the 1913 show was by no means the least attraction.

That the people of Logan and adjoining counties are deeply interested was shown by the crowds in attendance. Fully 10,000 persons attended the show Thursday, with correspondingly good crowds on Wednesday and Friday. The exhibition was given around the public square, giving ample room for all to see each class, of which there were 104, covering both horses and mules.

There is much of historical interest connected with Mt. Pulaski. Three-quarters of a century ago it was the county seat of Logan county, and in the old courthouse, now utilized as a postoffice, were heard the pleas of Abraham Lincoln, Stephen Douglas and other great men whose names are a part of American history.

The management of the show was in most efficient hands. George J. Stoll, Chestnut, Ill., is president; John H. Tendick, Mt. Pulaski, Ill., vice-president; B. H. Keck, Mt. Pulaski, Ill., general manager; T. A. Scroggin, Mt. Pulaski, Ill., treasurer, and Chas. Schmitz, Mt. Pulaski, Ill., secretary. The show is financed entirely by contributions from the public-spirited citizens of Logan county, and everything is free to exhibition, their being no entrance fee or charges of any kind. All importers are barred from exhibiting, a fact that gives great impetus to the affair. The judges this year were: heavy horses, Edwin Hobson, Clifton, Ill.; light horses, M. Biers, Mendota, Ill.; mules, Ira G. Sharp, Sharpsburg, Ill.; household science, Mrs. H. J. McMurry, Lincoln, Ill.; grain and vegetables, Walter H. Rowe, Decatur, Ill.

Ask your neighbor to subscribe for The Homestead.

DON'T ROB PETER TO PAY PAUL

THE Port Huron Husker-Shredder will make the most of your corn crop. By making ensilage you're NOT getting the most out of the corn ears. By most methods of shredding YOU DON'T GET the most out of the fodder—because stalks are cut into short, hard, sharp-edged pieces—that stock won't eat—because it cuts their mouth. By the **Port Huron Method** of husking and shredding the stalks are **shredded** in a **soft, stringy, relishable feed** which the horses and cattle **like.** Get YOUR corn husked and shredded the **Port Huron way** and quit making sacrifices.

SUBSCRIBERS who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention, inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail, should remit $1.00, addressed as above. All inquiries must be signed if they are to receive attention.

LAW QUESTIONS CONSIDERED.

MONTHLY WAGES—HOLIDAYS—WEEDS.

A Subscriber, Marengo, Iowa.—(1) What can constitute a month's labor on a farm, twenty-six working days or from a certain date of one month to the same date of the next month? (2) Can a man hired by the month to work on a farm claim wages for legal holidays when he does not work on such days? (3) Is a land-owner required by law to destroy noxious weeds growing on the highway along his land?

Answer.—(1) When a man is hired by the month, calendar months are considered, and one month means from a certain date in a month to the same date in the next month. (2) A man hired by the month cannot recover wages for legal holidays when he does not work on such days. (3) A land-owner is not required by law to destroy noxious weeds growing upon the highway. The law requires it to be done by the township trustees and the road superintendent. It is the duty of land-owners to destroy noxious weeds growing upon their lands adjacent to public roads.

CHANGING COUNTY ROAD.

A Subscriber, Eagle Grove, Iowa.—The county board of supervisors has laid out a county road near the city which runs in an indirect course in order to pass by a farm owned by a member of the board. The other members do not wish to interfere and oppose such course against the wishes of the member who owns the land. A number of persons want the road to run directly to the city. What can they do to effect this purpose.

Answer.—This is a difficult problem. The board of supervisors have power to establish roads and when they do so, and the proceedings are regular, it is a difficult matter to make a change. If, in the establishment of a road, the supervisors act fraudulently or irregularly, their proceedings may be enjoined by the district court, but if their proceedings are legal and regular, there is no adequate remedy. The persons who want a direct road might petition for it, but with not much prospect of success.

INHERITANCE IN NEBRASKA.

A Nebraska Subscriber.—(1) A and B are husband and wife and have no children. In case A should die first, what portion of his property would his wife be entitled to under the law of Nebraska? (2) Can B claim what money she put into the property? (3) If they adopted children what share of the estate would they get? (4) Nineteen years ago a man came to this country from England leaving there a wife and daughter. He never divorced his wife and married again in this country and has here two children. The daughter who is over eighteen years old came to this country and worked for her father one year for the $60 he sent her for passage money, without further wages. Can she recover wages and what would be her share of her father's estate in case of his death without a will?

Answer.—(1) The widow would be entitled to all wearing apparel, household goods, and what property was exempt from execution, other personal property to the value of $200, and support for one year, and, besides this, one-half of the balance of the property. (2) She can. (3) One adopted child would get half the property after the widow's allowance. (4) The man is probably guilty of bigamy. His daughter cannot recover wages. If he dies without a will, she will get an equal share of his estate with the other children.

PUBLISHER OF PAPER.

A Subscriber, Anamosa, Iowa.—Last October a certain publisher sent his paper to my address, without my ordering it, or having any communication with him whatever. The mail carrier brings the paper to my door and delivers it with other mail. I have just received a letter from a collection agency demanding $3 for the paper. Can the publisher recover the amount by law?

Answer.—We are of opinion that the publisher cannot recover pay for the paper, under the state of facts set forth. When a person actually subscribes for a paper, and it continues to come to him after his subscription has expired, he should refuse to receive it, and notify the postmaster that he will not receive it, and the duty of the postmaster is to notify the publisher, but if the subscriber continues to receive the paper after the expiration of his subscription, he is liable to pay for it.

UNPAID CHECK—SUIT FOR DAMAGES.

An Iowa Subscriber.—(1) A rented a farm in Iowa to B and B borrowed a certain sum of money from C. B then held a sale of his property, intending to move to the state of Minnesota and gave C a check for the borrowed money, telling C he would let his deposit at the bank stay there for ten days. B did not remove his deposit for four weeks and C failed to cash his check during that time and B's account was then transferred to a Minnesota bank. Is said check of any value to C and who is responsible for the amount of it? (2) In the spring of 1912 A rented 270 acres of land to B. In June A sold the farm to C, reserving nothing. In September C sold the farm to D, reserving nothing and D was to take possession March 1, 1913. During the winter of 1912 B removed from the farm all the materials of a chicken house worth $50, which had been partly torn down when D bought the place. Had B any right to do this and who must bear the loss?

Answer.—(1) The check cannot now be cashed, but B is liable for the amount it calls for, and C can sue him in Minnesota and recover judgment for the amount of the check. He should first present it for payment to the bank on which it is drawn, and have it endorsed "no funds," and then send it to a lawyer in Minnesota for legal pro-

ceedings there. (2) B had no right to move said materials, and is liable to D for the value of them. D can sue B and recover judgment for the amount.

ASSUMED NAME.

An Illinois Subscriber.—A young girl came to the home of A and B about eleven months ago and was introduced by a name which was not her real name, by a young woman who came with her. She actually belonged to a disreputable family, but had the appearance of good breeding. She staid with A and B for ten weeks and always contended that the name by which she was introduced was her real name. While there she got into B's room one night and broke the seal of a letter and committed some other minor trespasses. B told these things to the young woman who had introduced the girl and she told B about the shortcomings of the girl's family. B, being an invalid, was much annoyed and worried and became more ill because of the matter. (1) Had the girl a lawful right to stay with A and B under an assumed name? (2) Can B recover damages on that account?

Answer.—(1) The girl did not commit any criminal offense by staying with A and B under an assumed name. There is no law in Illinois against such conduct. (2) B cannot recover damages against the girl on account of her using an assumed name.

RAILWAY CROSSING HIGHWAY.

A Subscriber, Mount Hamill, Iowa.—The C. B. & Q. R. R. Company has an overhead crossing above the public road near this place, being a bridge over a small stream also. The stream occupies about half of the road under the bridge. The pilings of the bridge are about twelve feet apart, leaving only one passage-way under the bridge about twelve feet wide. The highway runs east and west under the bridge and then turns south along a high embankment, and the view of the road is obstructed at this place from either direction, and several serious accidents to autos and teams have occurred by reason thereof. (1) Can the railroad company be held liable for damages in such cases? (2) What is the law concerning railroad crossings in such cases?

Answer.—(1) It is impossible to answer without more information as to the nature of the accidents and how they occurred. From what is stated our opinion is that the railroad company cannot be held liable for damages. (2) The law requires a railroad company to construct at all points where a highway crosses it, sufficient and safe crossings. You might apply to the board of railroad commissioners for relief, by a petition stating the facts, and probably they would act upon the matter.

STEPCHILDREN NOT HEIRS.

A Nebraska Subscriber.—I am the only son and child of my mother. My father died twenty-five years ago. In 1890 my mother married again and in 1895 she died. My stepfather owned a farm when he married my mother, but sold it afterwards and bought another. My mother had only about $200 when she married my stepfather. After my mother died my stepfather sold his farm, but still owns some town property. My stepfather and I could not get along well together after mother's death, and I left him. He gave me at the time a pair of mules and harness. I am married now and have a place of my own. (1) In case of my stepfather's death will I be entitled to any of his estate under the laws of Nebraska? (2) In case I should die before my stepfather, would he be entitled to any of my estate?

Answer.—(1) You would not. Stepchildren are not heirs at law of their step-parents and cannot inherit property from them. (2) Your stepfather would not be entitled to any of your estate. He is not of kin to you, and cannot be your heir.

STATE PAY FOR CATTLE—DEED.

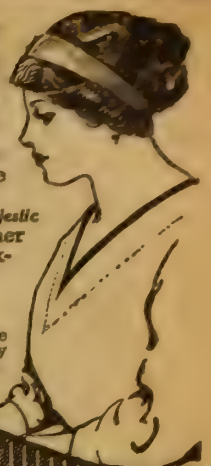
A Subscriber, Hanover, Iowa.—(1) I own a herd of Shorthorn cattle that I would like to have inspected for tuberculosis. If upon inspection it is found that cattle have to be killed by the state veterinary surgeon, does the state pay for them or does the loss fall upon the owner? (2) I own a farm in Minnesota. The deed calls for eighty acres more or less. It is 166 rods long by eighty rods wide. There is actually eighty-three acres in the tract. If I sell this land for eighty-three acres how can I give a deed for eighty-three acres when my deed is made for eighty acres?

Answer.—(1) The state veterinary surgeon and the nearest justice of the peace fix the value of cattle so killed. If they are unable to agree, they call in another justice of the peace and their judgment is final if property is not worth more than $25. If of greater value either party may appeal to the district court. The state treasurer then pays the amount fixed to the owner of the cattle upon a warrant issued by the state auditor. (2) When you sell the land you make your deed describing the boundaries thereof, and add the words, "containing eighty acres more or less," and this will cover the entire tract although there be eighty-three acres in it.

"Years of Experience Have Proven to Me That the MAJESTIC Range IS the Best

"Strange, that for years, I couldn't see that trying to get good work from an old, wornout range, merely to save the price of a new one, was *not* true economy. My *Great Majestic* has more than earned its cost in the saving of fuel alone, because the open seams and joints in my old, worn-out range where the bolts were loose and the putty had crumbled away, made me burn *twice* as much fuel as necessary.

"Talk about luck in baking—"luck" is nothing but good oven and my *Majestic* oven is simply perfect. I can depend on it absolutely every day. I believe father and the children are happier and I know we have better meals at less expense with our *Majestic*."



Don't Buy Any Range Sight Unseen

Buying a range isn't an every day transaction. To be absolutely sure of complete satisfaction—don't buy from printed descriptions—see the *Great Majestic* (dealer in nearly every county in 40 states) compare it point for point with any other range. Then you can buy intelligently and be sure of a range that will last a lifetime—the

Great Majestic Malleable and Charcoal Iron Range

A Perfect Baker—A Fuel Saver

Outwears Three Ordinary Ranges

ONLY range made of malleable iron and charcoal iron. Charcoal iron WON'T RUST LIKE STEEL—malleable iron can't break. Put together with *rivets*—joints always absolutely tight. Body lined with *pure asbestos board*, covered with iron grate—*you can see it*—insuring a *dependable* baking heat with *half* the fuel required in ordinary ranges.

All Copper Movable Reservoir—Other Exclusive Features

Reservoir in *direct contact* with fire, heats through copper pocket *pressed* from one piece—exclusive patented feature. *Oven thermometer—accurate all the time.* All doors drop down and form rigid shelves. *Open end ash pan—ventilated ash pit—ash cup.*

Contains Greatest Improvement Ever Put In a Range

—increasing strength and wear of a *Great Majestic* more than 300% at a point where other ranges are weakest. Ask about it. Best range at any price. Any *Majestic* dealer can furnish any size or style *Majestic Range* with or without legs. Write for our booklet, *"Range Comparison."*

The Range with a Reputation

It Should Be In Your Kitchen

We've often said that we believe the Hupmobile is the best car of its class in the world.

And we believe, too, that the new 1914 Hupmobile will make it even harder than before for you to side-step that self-same conviction.

Because you will find in the new Hupmobile:—

A strong and sturdy pressed steel frame.

A pressed steel Pullman body, made by the builders of steel railway cars.

A greater amount of costly aluminum than used in any other car of its class.

A greater amount of costly spring steel than used in any other car of its class.

A powerful, long-stroke motor.

An original, distinctive design.

Other features the new Hupmobile has in plenty—but these are sufficient to show that our belief in the Hupmobile is based on the actual intrinsic merit of the car itself.

The pressed steel frame, the pressed steel Pullman body, the costly aluminum, the costly spring steel, the long-stroke motor—these things, it is true, are not absolutely essential to a motor car—cars are daily built without them.

But they make for long life and strength and safety—and they are essential for the kind of service the Hupmobile is built to give.

And Hupmobile service means day-after-day work on country roads; and just as much work daily as the farmer may demand.

Send a card so that we can give you the complete details of the 1914 Hupmobile.

We'll be glad, too, to arrange for a demonstration with the nearest dealer, if you say so.

Hupp Motor Car Company, 1224 Milwaukee Avenue, Detroit, Michigan

Hog Cholera, Typhus Fever and Contagious Pneumonia.

By A. L. Beverly, D. V. M.

THE YEAR of 1913 has been a notable one in the history of Iowa's hog raising, namely, because of the large number of animals lost and of the poor results obtained from vaccination.

At no time has the serum treatment been used as generally throughout the state as in the past year. The results obtained have been far below the standard expected, consequently many farmers are condemning serum on the grounds that it is inefficient in preventing cholera. There must be a reason for the failure of this treatment in so large a number of cases. It may be due, first, to the use of poor serum; second, to good serum not administered with the proper dosage; third, to vaccinating for cholera when another disease is present.

I believe that the first two may be dispensed with as not answering the question, as it is hardly probable that these two would be so prevalent in so large a territory. The third is the one in my estimation that is the reason for the failure of the vaccination in so many cases.

There is a strong tendency among farmers to call any disease of the hog, cholera. They then proceed to vaccinate and when they do not obtain the desired result the serum treatment receives a black eye. I believe that 50 per cent of the hogs lost in Iowa this year have died of the so-called typhus fever associated with contagious pneumonia and I know that in Hamilton county the per cent will run around 75 to 90.

The disease called typhus fever resembles cholera very closely not only in the clinical symptoms, but in the post-mortem lesions. Many farmers who have had the cholera dozens of different years have been fooled by this disease, have had their hogs vaccinated when they were taken sick and have obtained no benefit from it. This has caused a great prejudice against the serum treatment in this state in the past year.

The disease, typhus fever, affects pigs of all ages, which is the opposite of cholera. The pigs affected go off feed, some of them walk around as though they were looking for something, holding their heads close to the ground; many of them burrow in an old straw pile or other litter as though they were trying to hide. They are very hard to rouse up when in this state. A good many of these animals do not go off feed, but eat heartily until they die. This is an essential difference from cholera. Sometimes the animal vomits or attempts to. The latter may throw them into muscular spasms where they grind their teeth, rear up on their hind legs and go through other unnatural performances.

The temperature runs very high, going as high as 109 F. At first there is constipation, which is later followed by a diarrhea which is of a thin, mucilaginous character with a very offensive odor. The eyes are also affected, the lids become swollen, the mucous membrane turning to a dark brown color and there is a copious discharge from the eyes. In many cases I have seen pigs go entirely blind, due to this discharge causing the lids to stick together.

Generally about three days after the disease has commenced small red spots apear on the skin in the region of the navel, thigh and about the throat. These spots are at first small and red, but they later cover the entire lower surface of the body and turn to redish purple color. These spots sometimes contain vesicles or pustules and later on the skin affected may slough or rot away. In many cases this discoloration of the skin may be entirely absent.

There is no cough to speak of, but the respiration is greatly affected. The pigs become emaciated especially about the flanks until they finally die. Most of them live about one week's time though in some severe forms they die in twenty-four hours while in some cases they live for two or three weeks.

The most important differentiation between cholera and typhus fever is the peculiar paralysis of the hind quarters which exists in the latter disease. This is generally noticed in three or four days after the pigs have taken sick. They walk with a stumbling gait, their hind quarters swerving from one side to the other. This symptom will be found in at least 80 per cent of the cases. This disease is generally found associated with a case of pneumonia and also cholera and it may be found in the same herd.

Many farmers who have had large experience in hog raising will no doubt notice the similarity of the symptoms in the typhus fever just described and in hog cholera.

I have refused many farmers vaccination because I could not find sufficient evidences of cholera to warrent it. Many of these vaccinated anyway with the result that they lost their hogs and the money paid for serum and services of the party vaccinating them. In regard to vaccinating, every farmer should vaccinate while his pigs are healthy, that is, early in the summer when they weigh around fifty pounds. Sometimes this is not possible, owing to the pigs becoming diseased before it can be accomplished, but in most cases it can be done at this time. With the use of good serum properly administered he is absolutely sure of the protection against cholera and it is also an aid in warding off the other diseases named because they are many times associated together. I have vaccinated herds this summer where there were symptoms of cholera, typhus and pneumonia. The per cent saved in these cases runs from twenty to sixty, this being due to preponderance of the cholera over the other diseases. These results cannot be obtained unless post-mortems are held on a number of animals and it has been ascertained what the disease in question is.

As for finding remedies in regard to preventing these diseases, a farmer is wasting his time and money. No doubt many hogs are wormy and when in this state they are more apt to contract any disease because of the decrease in their natural resisting powers which they should have when in good health. I have held post-mortems upon a good many hogs this summer and have not found a single one that had enough worms to affect his general health. Ninety-five per cent of these pigs were receiving or had received some sort of a worm exterminator, so this phase of the subject is hard to determine.

As to preventing these diseases keep your pigs as healthy as you can. Do this by feeding what you please, it makes no difference so long as you keep them thrifty. Keep your pens clean, use plenty of dip as a disinfectant at least once a week and burn all loose litter, etc., at regular intervals. Endeavor to keep away stray dogs and cats, although this is an almost impossible proposition, but sometimes a great deal may be gained by keeping a lookout for these animals, as they are the main distributors of these diseases. Do not fool with quack remedies, but when your hogs are taken sick consult some one who is capable of diagnosing the trouble and giving them the proper treatment.

Spring pigs by the great spotted Poland China boar are advertised on page 47 by J. D. Gates & Son, Ravenwood, Mo.

Quality must be the key note of British agriculture, as the area is far too small to enable farmers to grow the quantities of produce that the newer countries of the world can yield; and in no connection is quality of greater importance than that of the cereal crops. Wheat, oats and barley still occupy a considerable portion of the land, and the condition in which they are put on the market substantially affects the prices they realize. —[London Telegraph.

SAVE-THE-HORSE

(Trade Mark Registered.)

THE LAME HORSE is never cured whose owner reads and doubts,—BUT FAILS TO ACT—Here is a case in Point,—And what Happened to this Subscriber is Taking Place with Thousands.

Letter No. 1 Orleans, Vermont, April 26th, 1912.
Troy Chemical Co., Binghamton, N. Y.—Your adv. has given me courage to try again. I have a valuable pacer. Two years ago he went lame. I tried every remedy and Doctors have blistered three times for spavin and twice hip. The symptoms are—etc., etc. I determined to see what you think. HALE MASON.

Letter No. 2
Orleans, Vt., May 2nd, 1912.—I received your letter and book yesterday and believe you are right about its being a bone spavin. I was so encouraged I drove eight miles and bought a bottle of Fred D. Pierce, druggist at Barton, and will closely follow your special instructions. Thanking you for your quick reply to my first letter, I remain, HALE MASON.

Letter No. 3
Orleans, Vt., Oct. 2, 1912.—Perhaps you expected to hear from me before, but I have been waiting to see if any trouble would return after stopping the treatment. I am pleased to say the horse is well. I cannot thank you enough for your interest and the advice you gave. If I had known about it two years ago it would have saved me a lot of money. Yours respectfully, HALE MASON.

Save-The-Horse has stood alone and unique among veterinary remedies for over seventeen years.

Every bottle of Save-the-Horse is sold with an iron-clad contract that has $60,000 paid-up capital back of it, guaranteeing to permanently cure or refund the money no matter whether it is Bone or Bog Spavin, Tendon disease or Puffs—nor how aged, serious or complicated the lameness or blemish may be.

But write, describing your case, and we will send our—BOOK—sample contract, letters from Breeders and business men the world over, on every kind of case, and advice—all free (to horse owners and managers).

Write! AND STOP THE LOSS.

DAIRY

CALVES IN LATE SUMMER.

To the Editor of The Homestead:

On our own farm we have found that late summer is one of the most trying times of the year for calves. There are a number of reasons why this should be so. Perhaps flies do more than any other one thing to make life miserable for the young stock. As the season advances flies stick harder than ever, especially after the first mornings begin to be cool. The sunshine seems to warm the pests up during the day and cause them to burrow deep into the hair of the animal and worry him seriously.

Two or three things may be done to prevent a part, at least, of this annoyance. The calves may be kept in the stable during the day. Many farmers have made this their practice. Indeed, we have been doing so for a number of years. But where that is done, much pains needs to be taken to keep the pens clean, or not much will be gained. Wet straw must often be replaced by dry and the floors should be arranged to furnish as good drainage as possible.

If the calves are permitted to run out, some building in the yard ought to be provided for escape from flies. If this be not done, all the calves gain by the out-of-door air and exercise will be lost fighting flies. I have seen calves actually grow thin and smaller on account of such treatment, instead of making growth, as they should be doing every day.

Again, it pays to feed calves some good hay at this season of the year, whether they are out on the ground or not. Nothing is better for them than this. Grass is all right. Let them have all they want; but by no means neglect the hay. There is something about hay that tends to keep calves free from bowel troubles. The juice of dry grass appears to act as a tonic and counteract any disposition to have diarrhea.

Still another good thing for calves at this, or any other time of the year, is plenty of good, pure water. It must be that calves really suffer for lack of drink on many farms. Often it seems to be thought that if the calves have what milk they will drink, they do not need water. This is very far from the truth. Give the calves the milk they need, but neyer neglect the water. A few days' trial will convince anybody on this point. Calves will grow faster and do better in every way if they are never permitted to lack for water. A Subscriber.

WORLD'S RECORD JERSEY.

Eminent's Bess, a member of the Jersey family, so popular with many Wisconsin breeders, has broken the world's record by the production of 963 pounds of butter fat in one year. She produced 18,783 pounds of milk, the butter fat contents of which made 1,132 pounds of butter. This cow is owned by Walter S. Prickett, Sidnaw, Mich., in territory

WORLD'S CHAMPION COW, EMINENT'S BESS.

which adjoins northern Wisconsin and is similar in many respects to that country which is being used, with such success, for dairy purposes.

The test was made under the direction of the Michigan Agricultural College, of which R. S. Shaw is dean.

Mr. Prickett is the owner of one of the largest, if not the largest, farms in the upper peninsula, known as the "Roycroft Farm." His farm, it is interesting to note, is on what is called "cut-over" land.

SOURCE OF SUPPLY OF COWS.

To the Editor of The Homestead:

Ever since we came on the farm we have made it a point to raise all the heifer calves we could. The great difficulty with us has been to get these some years. Our cows would have a disposition to give us calves of the male sex, just when we wished heifers most. And we now have a fine lot of young stock, ranging from calves up to cows three or four years of age. We are beginning to realize the worth of better stock now, as these heifers are all either thoroughbreds or good grades.

And there is no reason why these young cattle should not be worth a good lot of money. In fact, they are so already. We never have offered any of them for sale, as we were intent upon building up a dairy which would be exclusively of good cows; but I have no doubt that if we were to place these young animals on the market, they would bring splendid prices, for cows of all kinds are high and all the time growing higher.

And from present appearances such stock will have a higher and higher value all the time. Even if no extra effort should be made by the farmers of this country to increase the number of their cows, the natural increase in population of the country would cause a greater demand than ever in the past for dairy cattle.

But when so many are selling off their stock as seems to be the case lately, partly on account of the dry

AUCTION SALE HIGH-GRADE HOLSTEIN-FRIESIAN COWS, HEIFERS AND BULLS AT SO. OMAHA, NEB.

LIVE STOCK PAVILION, TUESDAY. OCTOBER 21, 1913

Beginning promptly at 10 o'clock A. M.

65 COWS and heifers either just fresh or to freshen soon. A lot of heavy springers. A lot of these cows will weigh better than 1,200 and are the kind that will produce 50 to 70 pounds of milk a day, and 10,000 pounds or better a year. Positively the best lot of cows ever sold in one lot at auction. All home raised, acclimated and ready for business. Fifty heifers one to two years old, nearly all bred. Some to calve this winter. As nice a lot of milky heifers as ever were offered. Fifteen young calves of both sexes. Ten registered bulls ready for service, and well enough bred to head any herd. Every animal tested for tuberculosis by state or federal authorities, and can be shipped anywhere. Come day before sale and inspect these cattle, as on account of the large number to be sold sale will start promptly at 10 a. m. R. E. Haeger, auctioneer. For further information address

HOLSTEIN and Ayrshire bred cows and heifers $250 up. Bulls all ages. Hampshire boar pigs $15 up. William Galloway Farm, Waterloo, Iowa.

weather and partly from a desire to realize on the cows sold, it is doubly necessary that the man who has good luck should receive a good price when he parts with it. I am sorry to see farmers have to sell their cows so generally as they are now. It seems to me it will prove to be a serious and costly mistake. Suppose the price does appear attractive. What are we going to do after the cows have been sold off and eaten up, as most of those sold under pressure will be? Is it not as a matter of fact digging one's own house to pieces and selling it by the little? Soon we will find ourselves without a shelter and storm coming on.

So it seems to me to be the duty of every farmer to grow more heifer calves. There is no more urgent demand at the present time than this. It does not cost a great deal to grow a calf. Care is the principal thing; and if every farmer would grow just a few, it would not be long before the scarcity would be a thing of the past.

E. Myers, President, E. Myers Lye Company

Rid Your Hogs of WORMS and You'll Have HEALTHY Hogs

An enormous part of the swine plague known as "cholera" that sweeps over the country killing hogs and causing a loss of millions of dollars every year, is not **cholera** at all. It is stomach, intestinal or lung **worms.** The symptoms of hog worms are easy to detect. When you see a hog slinking around with his nose to the ground, hair sticking up, tail down, coughing, off his feed and losing flesh, don't jump to the conclusion that he's getting "cholera". He has **worms,** and if you don't act quickly your whole herd will have them, too. Feed all your hogs **twice daily** according to directions on every can on a ration mixed with

Merry War Powdered Lye

It destroys hog worms quicker than anything else in the world. And, even though there should be an epidemic of real hog cholera in your neighborhood, **your** hogs will be healthy and strong to resist it. MERRY WAR POWDERED LYE is the **proven preventive of hog cholera.**

The Folly of Vaccination

Vaccination may be all right for putting a hog's system in a condition to resist the cholera germ. But no amount of vaccination will cure a single hog of worms, nor will it make him well if he's sick. Vaccination will not keep him on his feed, make him fat, sleek, skin free from scurvy, and condition him so that he will be a prime hog at market time. **That's what** MERRY WAR POWDERED LYE does. Feed it to your hogs from weaning time on and you'll have healthy hogs. Cholera won't alarm you and your hogs will weigh in heavy.

Read This Convincing Evidence

C. F. NEWMAN, Lebo, Kan. "Have best results with my hogs and no sickness since I've used Merry War Powdered Lye while our neighbors have lost heavily."

Refuse Substitutes

Don't experiment with ordinary, old-fashioned lye. **It might prove dangerous.** MERRY WAR POWDERED LYE is the specially prepared lye that is **safe** to feed hogs. Experience has **proved** its worth. **Insist** on getting it. **There are no substitutes.**

E. MYERS LYE COMPANY, Dept. 80 ST. LOUIS, MO.

10c A Can—120 Feeds

MERRY WAR POWDERED LYE is for sale at most grocers, druggists and feed dealers. It is convenient to buy in case lots, 4 doz. cans, $4.80. **Order direct from us in case lots (4 doz. cans $4.80) if dealers won't supply you.**

FREE If your dealers can't supply you write us stating their names. We will see that you are supplied and also send you, **free,** a valuable booklet "How To Get The Biggest Profits From Hog Raising."

NEWS OF THE SALE RING

Horswell Angus Sale.

The first sale of Aberdeen Angus to be held this fall was that of J. R. Horswell, Estherville, Iowa, on October 1st, and it was a good one from start to finish. This was a dispersion sale, as the senior Mr. Horswell is retiring from the farm, and he disposed of sixty-four head at the splendid average of $148. Eleven bulls in the sale made an average of $195, including two young bull calves, and then there was not enough to go around. The Horswell sale was but an eye opener to the cattle situation at the present time. A few years ago Mr. Horswell went out and purchased a few good Angus cows and a good bull and from this modest beginning began the breeding of Angus cattle. The cattle were kept on the farm just the same as any other cattle and from time to time he has made annual sales. Previous sales had netted him a nice profit over and above the original purchase price and this dispersion sale almost cleared him $10,000. There was an excellent attendance from all parts of Iowa, Minnesota and Tennessee, so that buyers came from different sections of the country. The cattle had not been specially fitted for the sale, but they were in good fair breeding condition, and many had calves at foot. The decided attraction of the sale was the splendid Blackbird bull, Black Ensign, that stood at the head of this herd. After spirited bidding between Mr. Thompson, Minnesota, Mr. Hurdle, Mississippi, he was finally knocked down to P. J. Donohoe, Holbrook, Iowa, at $575. He is an outstanding good bull, is a splendid breeder and is a son of the great Black Woodlawn. In the capable hands of Pat Donohoe he has every right to become one of the most noted breeding bulls in the West. There was a very active demand for young bulls and they all brought good money. The sale was all that could be desired and was encouraging to Angus breeders and the result was very pleasing to Mr. Horswell. Col. Silas Igo cried the sale and handled it in good shape and was assited by Col. Foshier in the ring. Below we list everything selling for $100 and better:

BULLS.

Black Ensign, calved 1908; P. J. Donohoe, Holbrook, Iowa	$575
Black Belt, calved 1912; C. R. Silcox, Dunnell, Minn	200
Black Sox of Oakworth, calved 1912; H. J. Hazer, Zwingle, Iowa	135
Kingdom Pride of Oakworth, calved 1912; L. W. McCurdy, Rowan, Iowa	135
Proud Angus of Oakworth, calved 1912; Julius Bork, Germania, Iowa	100
Presto of Oakworth, calved 1912; Carl Leo, Huntington, Iowa	160
Emulator of Oakworth, calved 1912; J. O. Thompson, Dunnell, Minn	200
Palmister of Oakworth, calved 1912; Mike Wiese, Manson, Iowa	200
Imperial of Oakworth, calved 1912; Frank Lampe, Palmer, Iowa	105
Bull calf, J. H. Jensen, Sherbourne, Minn.	160
Bull calf, John Blogg, Estherville, Iowa	170

COWS.

Black Beauty of Oakworth, calved 1908; Geo. Brasted, Grundy Center, Iowa	255
Bridesmaid of Oakworth, calved 1908; C. M. Martin, Adaza, Iowa	130
Beauty of Oakworth, calved 1912; J. H. Compton, Ringsted, Iowa	120
Blackbird Lassie of Oakworth, calved 1910; W. H. Hurdle, Holly Springs, Miss.	120
Blackbird of Alla 4th, calved 1908; W. H. Hurdle	175
Blackbird of Cherokee 7th, calved 1902; H. A. Horswell, Estherville, Iowa	135

The Handley Duroc Sale.

A good fair crowd attended the E. E. Handley sale at Carroll, Iowa, October 3d, and he disposed of the offering at an average of $35.18. The top was a February boar, No. 22 of the catalog and he topped the sale at $81. No. 29, another good spring boar, went to E. E. Broeck, Avoca, Iowa, at $72, and John Meyers got a good pig in No. 30 at $51. Col. N. G. Kraschel cried the sale in his usual able manner. We list those selling for $25 and above as follows:

2.	B. A. Samuelson, Kiron, Iowa	$40
3.	E. J. Rodgers, Carroll, Iowa	51
4.	John Meyers, Carroll, Iowa	26
5.	W. W. Treglove, Carroll, Iowa	31
5¼.	John Meyers	40
5½.	B. A. Hamilton, Glidden, Iowa	45
6.	H. F. Van Glan, Breda, Iowa	56
7.	W. W. Treglove	27
8.	E. J. Rogers	29
9.	John James, Dedham, Iowa	25
11.	W. A. Kirschbourn, Defiance, Iowa	31
13.	Will Maneman, Breda, Iowa	25
16.	Henry Egan, Carroll, Iowa	30
17.	J. P. Finley, Harlan, Iowa	47
18.	Will Spiker, Carroll, Iowa	25
22.	W. S. Handley, Carroll, Iowa	81
25.	C. E. Ranworth, Glidden, Iowa	27
26.	W. A. Kirschbourn	27
29.	E. E. Broeck, Avoca, Iowa	72
30.	John Meyers	51
31.	Joe Stoll, Harlan, Iowa	56
32.	Peter Nohr, Carroll, Iowa	25
34.	Theo. Schmitz, Carroll, Iowa	28
35.	Peter Nohr	30

Waltemeyer Bros.' Duroc Sale.

The sale of Duroc Jerseys held by Waltemeyer Bros., Melbourne, Iowa, September 30th, affords material for an important chapter in the history of the breed. We do not remember of an exclusive sale of boars of this breed making such a high average at public auction. High Model, the 1908 Iowa champion, and first in class at Iowa and Nebraska, 1913, sold to W. N. Shanks at $730. High Model is one of the good individuals of the breed and at this conservative price is sure to make good in his new home. Golden Model 31st sold for $700 to Herman Tell, Nebraska. This boar has demonstrated his ability as a sire and much good stock may be expected from the herd in which he goes. Golden Model 34th, a Nebraska champion in 1913, sold for $410 to R. G. McDuff, which is a conservative price for a boar with his show-yard reputation. A spring pig that was substituted for No. 6 topped the spring pig offering, going to A. Olsen, Nebraska. M. S. Pratt, Iowa, secured an excellent pig in No. 8, at $137.50. Hanks & Bishop, and J. C. Droz secured an excellent prospect for next year's shows in No. 7 at $125. This sale is an excellent example of what perserverence and energy combined with good judgment will do in the way of building up a good herd of pure-bred swine and at the same time make handsome profits. Col. N. G. Kraschel did an excellent job of auctioneering assisted by Cols. H. S. Allen and W. N. Putnam. A list of the sales is appended:

High Model, W. M. Shanks, Worthington, Minn.	$730.00
Golden Model 31st, Herman Tell, West Point, Neb.	700.00
Golden Model 34th, R. G. McDuff, Monroe, Iowa	410.00
Tormentor, Will Thompson, Jesup, Iowa	77.50
Golden Model 35th, A. Dearinger, Reasoner, Iowa	135.00
6. A. Olson, Newman Grove, Neb.	205.00
7. Hanks & Bishop, New London, Iowa, and J. C. Droz, Fairfield, Iowa	125.00
8. M. S. Pratt, Frederika, Iowa	187.00
9. Fred Swan, Missouri Valley, Iowa	167.50
10. Wm. Sells, Indianola, Iowa	100.00
11. Swan & Ellis, Indianola, Iowa	100.00
12. J. H. Berry & Son, Iowa City, Iowa	67.50
13. John Krebs, Riverside, Iowa	92.50
14. S. S. Templeton, Monroe, Iowa	62.50
15. August Hager, Avoca, Iowa	60.00
16. Earl Moats, Missouri Valley, Iowa	42.50
17. John Bain, Aurora, Neb.	142.50
18. Geo. White, Dallas Center, Iowa	62.50
19. Albright & Son, Smith Center, Neb.	55.00
20. E. L. Busch, Tecumseh, Neb.	45.00
21. W. B. Little, Janesville, Wis.	30.00
22. Joe Sedden, Persia, Iowa	80.00
23. E. L. Busch, Syracuse, Neb.	107.50
26. Hummel Bros., Newton, Iowa	62.50
27. J. J. Fitzgerald, Colo, Iowa	62.50
29. B. F. Hersey, Parkersburg, Iowa	62.50
30. Flynn Bros., Reinbeck, Iowa	45.00
31. J. R. Walker, Parkersburg, Iowa	47.00
32. M. Kraft, Van Horn, Iowa	40.00
33. Joe Waltemeyer, Melbourne, Iowa	37.50
37. H. H. Diers, St. Olaf, Iowa	137.50
34 head	$4,365; average $128

Rickey's Duroc Sale.

On September 29th W. C. Rickey & Son, Thornburg, Iowa, held their first annual sale of Duroc Jerseys. A farm sale in that vicinity was one reason of their not being a very large crowd in attendance. Something unusual was the selling of eleven gilts from one litter to one man at an average of $22. The buyer was J. T. Sheperd, of Keswick, Iowa. He also bought a good boar to use on these gilts and it will surely make him a nice foundation for a herd. Chas. Miller, of South English, topped the sale in No. 12 at $31. The offering was in nice condition and should have brought more money, but the average of nearly $25 per head made it a paying proposition for Mr. Rickey and he will continue the breeding of Duroc Jerseys and make an effort to keep on improving his herd. N. G. Kraschel and C. C. Evans sold the offering. In all thirty-seven head were sold.

Hitch Up With Hansen

You can—easily. This Dan Patch keeps your hand free and safe from hurt, yet, with lining and without, never hinders a movement of your fingers. Flexible and strong, it seems built exactly to suit *your hand.*

Hansen's Gloves

are made of the best leathers the world affords—selected for softness and strength. In 500 styles for every hand at every work. Washable and lasting.

The Hansen line includes gloves for rough work and light chores. Special Thresherman's Gauntlet—gloves for autoist, cyclist, sportsman, etc. There are gloves for women's and boys' wear—all with the double economy of long wear and *hand-insurance.*

Send for booklet and buying information. If there is not a Hansen dealer in your town we will send a pair *on approval*—money back if not satisfactory. Address—

The Missouri 1913 State Fair

WEATHER which was apparently "made to order," thousands of happy and good-natured Missourians from all parts of the state, and Missouri's best from field, barnyard and home upon exhibition, combined to make the state fair at Sedalia last week an exposition that will long be remembered and referred to as "the great fair of 1913." It has been thirteen years since Missouri officially decided to have a fair of its own. Marvelous as has been its growth in that time when compared with the fairs of other states which have been half a century in the making, the visitor always leaves with the feeling that so great are Missouri's resources that her fair, already ranking with the best of any state, will continue to grow greater still for years to come.

Before the visitor had fairly passed through the entrance to the fair grounds this year, he realized that he was attending a fair that was unlike any other he had ever seen, a fair run solely and absolutely for the benefit of the man who paid his admission fee at the gate and not for the man with the money-making concession. Stretching before him were all the magnificent buildings and effectively arranged fair grounds, in no corner or spot of which could be found a single objectionable or unclean feature. There was not a sideshow of any sort in evidence. The shrieking dancing-girl and the fat woman, relics of the county fair days, but still retained by many state fairs, were conspicuous by their absence this year. It was a clean fair, and probably approached nearer the ideal, in this respect, than any state fair ever held. There were no fakes nor fakers. Even the peanut and ice cream boys in the grandstands were forced to sell their wares at reasonable prices, a fact which was announced and loudly cheered by the thousands assembled each day at the races. This cleanliness has been due to the determined effort and eternal vigilance of Col. W. A. Dallmeyer, president of the fair board, and Secretary John T. Stinson. Both these men, together with the board, who back them, are deserving of the combined thanks of every citizen of Missouri who appreciates cleanliness and the square deal. The efforts of the board were well expressed by Colonel Dallmeyer when one day last week he remarked, "We have constantly worked for a better and cleaner fair of a higher class. The effort has been made to eliminate every feature that was in any way undesirable and every exhibit that was mediocre in quality." How well this effort has succeeded was evidenced in the appreciative comments which one heard throughout the entire week.

The exhibition of the various breeds and classes of live stock, which is the mainspring of any state fair, was an unusually good one. The offering of a $2,900 saddle stake brought out the best light horses ever seen in either Missouri or Kentucky, for the best of both states were there. The interest was unusually keen, for Missourians certainly do have a high regard for a good horse, and whether one watched the saddle and light harness rings, stood up and shouted at the flying "ponies" as they skimmed past the grandstand and around the mile track or watched the dignified drafters swing their mighty bulk as they displayed their action in the live stock pavilion, he was constantly confronted with the horse superior. The light horses were at their best, the climax of the show being reached Friday, when, after some beautiful exhibitions of lightness, swiftness and gracefulness of the five-gaited saddler, Hazel Dawn, a Kentucky mare owned by Matlock and Shropshire, Winchester, Ky., was awarded the ribbon, the big money in the $2,900 saddle stake. My Major Dare, a Kansas City horse, won second, while Astral King, owned by Houchin and Anderson, of Jefferson City, suffered his first great defeat and went third. The fourth place was won by Lady Macey, another Kentucky horse. It was a great show, a show such as one could only see when nineteen of the world's greatest saddlers come together.

While the word quality is greatly overworked, especially when any mention is made of a live stock show, it is the only word that adequately describes the exhibition of draft horses and beef cattle. Never was there more quality seen in the Short-horn, Hereford and Angus classes of breeding cattle. Especially strong was the showing in the younger classes of these breeds, a fact which gives great promise of future cattle shows. Missouri-bred Percherons and the best which the importer could find abroad, gave the serious-minded horseman ample opportunity to study types, and filled the energetic man with the desire to emulate. The hog show was very much the same as that seen in former years. That it was appreciably better is quite possible, but it would be exaggeration to say that it was strikingly so. Many Missouri swine breeders, and some of the best ones, too, stay away from the fair and have done so for years because of the old cholera scares of a decade ago. Others have never formed the fair-going habit and will not be induced to take the road until larger purses and better inducements in the way of larger cash prizes and futurity stakes with special premiums for Missouri-bred animals are offered. Now that the fair board has raised the purse upon saddle horses to a point where, being the highest in the world, it would be unreasonable to raise it higher, it is to be hoped that the next raise in money, if one is made, will be in the hog, sheep and cattle classes. More attention must be paid the breeding animals. They are the bread-and-butter part upon which largely rests the prosperity of the state as well as that of the fair, and fine as were these classes this year, a little more attention in the way of heavier purses, more ribbons, extending at least to the sixth place, an announcer and bulletin board in the judging pavilion for the benefit of the visitor who has no catalog, with more music continuous throughout the day, will do much to improve the live stock show. Almost every person who visits the fair is interested to a greater or less degree in the breeding stock. This interest may be greatly increased with just a little effort along these lines or greatly decreased with lack of attention to the small details. Most exhibitors have learned that they cannot afford to show stock at the fair unless they derive a reasonable amount of publicity therefrom, yet there are still a few who allow their cattle to remain in their stalls throughout the entire week with no banner or placard to indicate the name of the animal or that of his owner. Fortunately, the number who neglect these details is decreasing every year.

Had a visitor of former Missouri fairs just returned from a year's stay abroad he would not have been aware that the agricultural and horticultural exhibits had come from fields which had for several weeks this season been regarded as "dry." The corn was, in quality and size, up to former years, though as is always the case with corn gathered so early, much of it was not as mature as the part of the crop which will be shown later in the season. Especially fine were the county exhibits. Greene county led with a splendid showing of grains, grasses, fruits, vegetables, and home-canned products, collected during the past season. Henry county won second ribbon and had a display selected with extremely good taste and regarded by many as being the most complete in the agricultural building. The exhibit made by Marion, awarded third prize, was by far the most artistically arranged and thoroughly prepared of any ever seen at Sedalia, but missed the blue ribbon because of the smallness of the number of entries of the various grains and grasses. As a model of a good county exhibit, however, it will be an excellent example by which other counties might profitably be guided. The apples were surprisingly good and for the first time it was possible this year for the tired person, made apple-hungry at sight of the beautiful fruit displayed, five on a plate and covered with a blue ribbon, to satisfy that immediate hunger by buying all he could eat at a reasonable price from one of the exhibitors. Needless to say this man did a "land office" business and the line of apple munchers extended almost around the agricultural building. The prize for the best 100 ears of yellow corn was awarded to B. M. Yates, of Auxvasse, Mo. For best white corn in the same class the award went to B. M. Drace, of Keytesville, while Yates with his yellow also won the sweepstake ribbon. The best ten ears of white corn

Don't Guess—Weigh It

Grain and Stock are too high in price to be "guessed off." Whether you are buying or selling you can't lose if you weigh it on a

"McDonald Pitless" Scale

So accurate they are used for weighing U. S. Mails—accuracy guaranteed for 10 years.

Never freeze—the Patented Bearings are protected from snow, ice and dirt—cannot freeze. Require no pit—are easy to erect.

HARDING'S GRAND CHAMPION SHORT-HORN BULL, VILLAGE DENMARK.

HARRIS' JUNIOR CHAMPION HEIFER, MISS REPEATER.

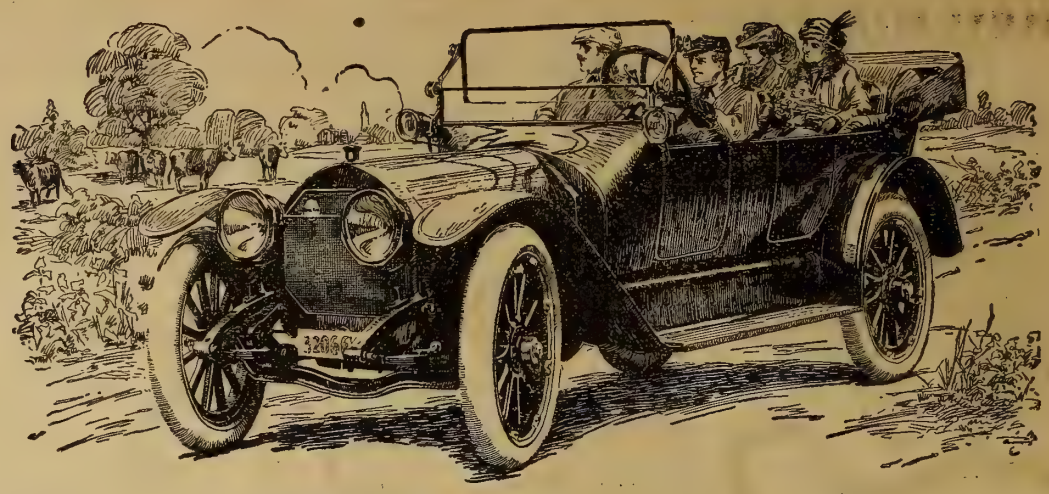
was shown by W. L Powell, of Palmyra. H. H. Taylor, of Sedalia, exhibited the best single ear. L. G. McMullen, of La Monte, had the best white ear.

There were only about twenty acres of machinery exhibited, but most of this was under cover in the three large machinery buildings where there are the best accommodations for displaying agricultural implements to be seen on any fair grounds in the country. Mammoth tractors apparently capable of moving almost anything to which they might be hitched, small engines intended for household use, including small engine and power washers which might be purchased for less than $60 and forever rob the farm woman's wash day of its terrors, and all grades and sizes of engines in between, were popping and chugging away at a rate which caused the visitor to quicken his step and begin planning new improvements for the farm—next year when that good crop comes along. Besides these, gasoline engines and the new models of kerosene-burning engines, there were all kinds of plows from the small walking twelve-inch plow to the big six-gang sixteen-inch plow, one enterprising implement company even having all the dozen or gradations between the two. Clover hullers, well-drilling machines, traction ditchers, manure spreaders, littler carriers and automobiles, supplied the progressive visitor with ideas, enabled him to make profitable comparisons, and incidentally showed the demands and needs of the modern Missourian who follows the farming profession.

The University Building and the handsome exhibits which it contained, each filled with the very cream of the experimental work of the state's greatest institution, was alone well worth the price of a trip to the fair. The needs of various Missouri soils, what they contain and what should be added to them, were here made so plain that any man at all interested in the building up of his farm could not have helped being benefited. Another university exhibit which attracted much well-deserved attention was the one made by the department of dairy husbandry. The proper way to build a comfortable and sanitary cowstall at the least expense was there shown, not with a bulletin, but with the stall itself. The difference which a little feed will make in the contents of the milk pail was demonstrated very clearly. The one-gallon cow usually receives a feed which consists of approximately eight pounds of corn on the cob; ten pounds of corn fodder without the ear corn and all the timothy hay which she will eat. This same cow, if she is of a good milking strain and properly fed, four pounds of corn; two pounds of bran; one pound of oil meal; ten pounds of alfalfa and thirty pounds of silage per day, will just about double the amount of milk, a fact which should be more widely appreciated. The difference between good and bad eggs was another one of the many striking features to be seen in the university building. Fresh eggs and all the grades of good, bad and indifferent down to "rots and spots" were to be seen just as they appear to the candler. After seeing such a demonstration, and such a simple one which even a tiny tot could understand, it became quite evident that there was little excuse why so many bad eggs should be marketed at a loss to the producer. Near the university building was the poultry show, which was much lighter this year than formerly, due, no doubt, partially to the dry weather. Some of the classes of fowls were of excellent quality, and all the important varieties were well represented. T. E. Quisenberry, of the State Poultry Experiment Station, at Mountain Grove, was there with his striking exhibit from the station, which included model poultry houses designed to meet the needs of the man with a few hens or the one with several hundred.

The domestic science and art exhibits were such as are seldom seen even at a great state fair. There was an especially good art exhibit in the Woman's Building, and in the Liberal Arts Building there was a good display of needlework, although it apparently was smaller than those shown on former years. One visitor remarked that possibly the reason for this was that the women were too busy this year making slit skirts, to devote their time to fancy designs. The canning exhibits were very numerous, no small amount of interest being taken in the girls' canning contest. Many Missouri schools were represented with the work of the pupils, which showed much careful preparation and hard, thorough work.

It seems impossible to talk about a Missouri State Fair without closing with a few words about Secretary Stinson. How much of the success of this great fair is due to this one man only those who have watched its growth since he first took charge, fully realize. Efficient, capable, thoroughly trained to the various requirements of a fair secretary, he fills the bill in a manner which is extremely comforting to the man who has had the opportunity of observing various secretaries in different states. The saddle-horse stake given this year, and the nation-wide attention which it has attracted, are due to his originality and initiative. He had handled the horsemen, who are usually a cantankerous bunch, so well that they were all singing his praises and stepping around under his direction in an admirable manner. Colonel Hughes, the veteran Kentucky horseman of national repute, says that Stinson has organized the greatest horse show he has seen in a lifetime, a strong admission to come from a Kentuckian. Without any flubdub or gush it seems but just and fitting to say that Stinson is the man for the job and that it is greatly to be hoped that he will continue to serve Missouri in this capacity for years to come.



The car that meets every demand

The KisselKar is equal to every condition of road service—a hill climber without a superior—a car that the muddiest, ruttiest roads cannot conquer. It easily meets every demand of country driving and is unequaled in comfort and convenience by any car at any price.

KISSELKAR

The roadworthiness of the KisselKar is easily explained by one look at its sturdy construction—the big steering knuckles, transmission gears, brake drums, differential and every other vital part tell the story. Then the powerful, silent KisselKar motor is one of the simplest and one of the most responsive and reliable engines ever put into an automobile.

Extra liberal wheelbase permits an unusually roomy tonneau and deep seats. The big wheels and tires make the KisselKar extraordinarily easy riding. It is perfectly balanced in constructions, every model being correctly proportioned for size and weight.

A careful comparison, point for point, with other cars will disclose the reason why the KisselKar costs less to maintain and is slow to show wear and is silent and smooth running after years of continued service.

Made in three striking models: 40 H. P. "Four", 48 H. P. "Six", and 60 H. P. "Six", from $1850 up. All are fully equipped, have left hand drive and center control and are electric lighted and started.

If you are planning to own an automobile, send for the complete KisselKar Catalog and name of nearest KisselKar distributor

THE BREEDING BEEF CATTLE.

On every side one heard stockmen talking at Sedalia last week about the excellence of the cattle show. Men as well as herds, who had during the season been upon the big fair circuits seemed to be at their best. The classes of all breeds were well filled. Some of the most striking features were the long lines of entries in the younger classes. N. H. Gentry, superintendent of the beef cattle department, had good cause to be well satisfied with the excellence of this important section of the show. "The beef cattle show is up to the standard set in former years," he remarked, "and it is as good if not the best which we have ever had here at Sedalia." Many other prominent breeders were of the same opinion. There were 218 cattle exhibited in the beef classes.

SHORT-HORNS.

One of the best Short-horn shows ever seen at the Missouri State Fair was presented to the visitors at Sedalia last week. Sixty-five animals shown by eight exhibitors made up the exhibition. All classes were well filled and keenly contested to the last place. There were no tail-enders and each presented such quality and uniformity as to give Judge J. G. Tomson, of Wakarusa, Kan., plenty of work in coming to his final decisions. One of the surprises of the season was uncovered when Monarch's Victoria, the junior yearling heifer of Purdy Bros., this season making her first showing, was declared the grand champion female of the show. This promising young animal, it must be remembered, achieved this distinction over the champions of some four or five state fairs held previous to the one at Missouri, and in competition with ten entries from the best herds from five states. Village Flower 2d, the heifer with which Anoka Farms won the championhsip at the Iowa State Fair, stood fifth in this class. Mr. Abram Renick, president of the American Short-horn Association, one of the visitors at the fair this week, remarked that this was not only an unusually fine showing of Short-horns, but that the ring of young herds was the best he had ever seen.

Exhibitors: N. H. Gentry, Sedalia, Mo.; Purdy Bros., Harris, Mo.; Anoka Farms, Waukesha, Wis.; The Farmer Farm, Farmington, Minn.; H. Rees & Sons, Pilger, Neb.; E. M. Hall, Carthage, Mo.; W. W. Brown, Amenia, N. D.; Owen Kane, Wisner, Neb. The awards:

Bull 3 Years and Over (3 shown)—1st Anoka Farms on Village Denmark; 2d Rees on Whiterose Dale; 3d The Farmer Farm on Daybreaker.

Bull 2 Years and Under 3 (3 shown)—1st Anoka Farms on Gloster Fashion; 2d Hall on Princely Sultan; 3d Brown on Village Sultan.

Senior Yearling Bull (2 shown)—1st Purdy on Orange Goods; 2d The Farmer Farm on Cornerstone.

Junior Yearling Bull (3 shown)—1st Kane on Radium; 2d and 3d Gentry & Son on Grand Master and unnamed animal.

Senior Bull Calf (9 shown)—1st Kane on Royal Dale; 2d Hall on Village Flash; 3d Anoka Farms on Royal Silver; 4th Rees on Sultan's Goods; 5th Brown on Lochinvar; 6th Purdy on Grand Goods.

Junior Bull Calf (7 shown)—1st Kane on Dale Clarion; 2d Rees on

Easy on Man and Team

There is no argument as to the value of the Manure Spreader, neither as to the saving in time and labor nor in the increase in yield, resulting from proper spreading of fertilizer.

The most profitable investment you can make is—

The Flying Dutchman Spreader

A Steel Frame, Low Down, Close Coupled, Endless Apron Spreader, of the most modern construction, greatest convenience and lightest draft.

Easy to Load—The top of the Box being only 42 inches high, it is easy and quickly loaded, without that back-breaking lift.

Runs Easy—The box being higher in front than in rear, the apron runs down hill, giving lighter draft—you know it's easier to pull a load down hill than up. It is also equipped with Roller Bearings—reducing friction.

Wheels Under the Load—Just where they should be to secure the lightest draft—most convenience in turning and plenty of traction power on the rear wheels, without the use of lugs.

Clearance—The Endless Apron has 18 inches between its lowest point and the ground—6 inches more than most others.

Steel Frame, Steel Wheels, Steel Beater, Chain Drive

No other Spreader is so strong and well built. The Apron runs on three sets of steel rollers, safely carries 5,000 pounds without sagging.

Easy to Handle—One Lever operates the entire machine—a boy can handle it as well as a man, with no chance of breaking the machine. Being close coupled, it is convenient around the barnyard.

We also build the MOLINE SPREADER which is of the same general construction, except it has a Return Apron.

Produce of Cow (5 shown)—1st Purdy; 2d The Farmer Farm; 3d Rees; 4th Anoka Farm; 5th Brown.

HEREFORDS.

A larger number of animals were entered in the Hereford show than in the classes of any other beef breed on exhibition at Sedalia. Sixty-six head were shown by seven exhibitors. The phenomenally successful record made by O. Harris' herd throughout this and past seasons was continued. Two of the grand championship ribbons and two junior championships were again taken by Mr. Harris. The deservedly famous herd of Warren D. McCray, Kentland, Ind., made the splendid showing which was to be expected of it, winning the senior championship on both cow and bull. All classes were well filled with animals that were of more than average excellence. The best herds of five states were there, each of them containing representatives which at other state fairs this year have repeatedly gone to the top. Mr. Edw. J. Taylor, of Fremont, Mich., made the judicial decisions.

Exhibitors: Overton Harris, Harris, Mo.; Cyrus A. Tow, Norway, Iowa; Warren T. McCray, Kentland, Ind.; W. H. Curtice, Eminence, Ky.; W. A. Dallmeyer, Jefferson City, Mo.; T. J. Wadsworth & Son, Monroe City, Mo. The awards:

Bull, 3 Years and Over (3 shown)—1st McCray on Corrector Fairfax; 2d Harris on Prince Perfection; 3d Tow on Byron Fairfax.

Bull 2 Years and Under 3 (3 shown)—1st and 2d McCray on Beau Fairfax and Protector Fairfax; 3d Curtice on Beau Perfection 15th.

Senior Yearling Bull (4 shown)—1st and 3d Harris on Repeater 7th and Gay Lad 9th; 2d Curtice on Beau Perfection 24th.

Junior Yearling Bull (7 shown)—1st and 3d Tow on Fairview Prince and Standard 6th; 2d Harris on Gay Lad 12th; 4th Dallmeyer on Premier Donald; 5th Wadsworth on Woodrow Wilson.

Senior Bull Calf (10 shown)—1st McCray on King Fairfax; 2d Harris on Gad Lad 15th; 3d Tow on Distinction 2d; 4th Curtice on Beau Perfection 25th; 5th McCray on Letham Fairfax; 6th Dallmeyer on Beau Dare.

Junior Bull Calf (6 shown)—1st McCray on Superior Fairfax; 2d Curtice on Beau Perfection 27th; 3d and 4th Tow on Disturber Junior and Distinction 4th; 5th Dallmeyer on Prince Dare; 6th Harris on Gay Lad 23d.

Cow 3 Years and Over (4 shown)—1st and 3d McCray on Perfection Lass and Nora Fairfax; 2d Harris on Disturber's Lassie 4th; 4th Tow on Miss Brae.

Heifer 2 Years and Under 3 (7 shown)—1st Tow on Defender's Lassie 2d; 2d and 4th McCray on Virginia Fairfax and Celandine 2d; 3d Harris on Harris' Princess 215; 5th and 6th Curtice on Belle Perfection 19th and Belle Perfection 17th.

Senior Yearling Heifer (6 shown)—1st and 2d McCray on Pearl Donald and Joan Fairfax; 3d Dallmeyer on Grace Premier; 4th Tow on Disturber's Lassie 6th; 5th Harris on Miss Gay Lad 7th; 6th Curtice on Belle Donald 182d.

Junior Yearling Heifer (6 shown)—1st Harris on Miss Repeater II; 2d and 4th Tow on Disturber's Lassie 7th and Disturber's Lassie 8th; 3d McCray on Gertrude Fairfax; 5th Dallmeyer on Dorothy Dimple; 6th Curtice on Belle Donald 191st.

Senior Heifer Calf (7 shown)—1st and 3d Harris on Miss Gay Lad 15th and Miss Gay Lad 16th; 2d Curtice on Belle Perfection 23d; 4th and 5th Tow on Lady Standard and Disturber's Lassie 9th; 6th McCray on Margaret Fairfax; 7th Dallmeyer on Twinkle.

Senior Champion Bull—McCray on Beau Fairfax.

Junior and Grand Champion Bull—Harris on Repeater 7th.

Senior Champion Cow—McCray on Perfection Lass.

Junior and Grand Champion Female—Harris on Miss Repeater II.

Aged Herd (4 shown)—1st and 3d McCray; 2d Harris; 4th Tow.

Young Herd (5 shown)—1st Harris, 2d Tow; 3d McCray, 4th Dallmeyer, 5th Curtice.

Calf Herd (5 shown)—1st Harris, 2d Tow; 3d McCray; 4th Curtice; 5th Dallmeyer.

Get of Sire (6 groups shown)—1st and 5th McCray; 2d Harris; 3d Tow; 4th Curtice; 6th Dallmeyer.

Produce of Cow (5 groups shown)—1st Harris; 2d McCray; 3d and 4th Curtice; 5th Tow; 6th McCray.

ABERDEEN ANGUS.

An even fifty head of doddies entered by four exhibitors combined to make one of the prettiest and "classiest" showings of Angus cattle ever seen at Sedalia. Every class was well filled and every entry was meritorious, according to W. W. Andrews, Maryville, who made the decisions. Several times had these herds met before this season and at Sedalia in a number of instances surprises were sprung.

Exhibitors: R. M. Anderson & Sons, Newell, Iowa; Omer Catterson & Son, Maryville, Mo.; E. F. & C. D. Caldwell, Burlington Junction, Mo; W. A. McHenry, Denison, Iowa. The awards:

Bull 3 Years and Over—(2 shown)—1st McHenry on Erwin C.; 2d Catterson on Queen's Quality Lad.

Bull 2 Years and Under 3 (3 shown)—1st Catterson on Queen's Ito Lad; 2d Caldwell on Kiahoga; 3d Anderson on Enus 3d.

Senior Yearling Bull (4 shown)—1st Caldwell on Ebony of A.; 2d Anderson on Provo 2d; 3d McHenry on Quality Prince 2d; 4th Catterson on Edward Ito.

Junior Yearling Bull (4 shown)—1st Caldwell on Quarter Master Ito; 2d Catterson on Blackbird Beverly; 3d and 4th Anderson on Enus 4th and Prince of Elchies.

Senior Bull Calf (6 shown)—1st Anderson on Prince of Elchies; 2d Caldwell on Blackcap Star; 3d McHenry on Ebony of Denison.

Junior Bull Calf (2 shown)—1st Anderson on Lord Melarvere; 2d Catterson on Even Ito.

Cow 3 Years and Over (4 shown)—1st McHenry on Blackcap McHenry 84th; 2d Anderson on Pride of Blackstone; 3d Caldwell on Pride Petite.

Cow or Heifer 2 Years and Under 3 (6 shown)—1st McHenry on Coquette McHenry; 2d Anderson on Key of Ind. 4th; 3d Caldwell on Blackbird Chloe; 4th Catterson on Erica Dean; 5th McHenry on Pride McHenry; 6th Caldwell on Queen Mother Johnson.

Senior Yearling Heifer (5 shown)—1st McHenry on Pride McHenry 109th; 2d Catterson on Maplehurst Pride; 3d Caldwell on Ento C.; 4th McHenry on Pride McHenry 108th; 5th Caldwell on Esthonia 6th.

Junior Yearling Heifer (5 shown)—1st Catterson on Queen of Maplehurst 25th; 2d McHenry on Pride McHenry; 3d Anderson on Jilt 67th; 4th Caldwell on Dutchess Ronald Lady; 5th Anderson on Pride of Newell 3d.

Senior Heifer Calf (6 shown)—1st Anderson on Eulina 28th; 2d Caldwell on Eritus; 3d McHenry on Pride of McHenry 116th; 4th McHenry on Queen McHenry 58th; 5th Caldwell on Jessie Blackeyes.

Junior Heifer Calf (3 shown)—1st Catterson on Ito's Pride C.; 2d Anderson on Jilt 70th; 3d Caldwell on Pridecap Lady.

Senior and Grand Champion Bull—McHenry on Erwin C.

Junior Champion Bull—Caldwell on Ebony of A.

Senior and Grand Champion Cow—McHenry on Blackcap McHenry 88th.

Junior Champion Cow—McHenry on Pride of McHenry 109th.

Aged Herd (4 herds shown)—1st McHenry; 2d Caldwell; 3d Catterson; 4th Anderson.

Calf Herd (4 herds shown)—1st Anderson; 2d Catterson; 3d McHenry; 4th Caldwell.

Get of Sire (4 groups shown)—1st McHenry; 2d Anderson; 3d Catterson; 4th Caldwell.

Produce of Cow (5 groups shown)—1st Anderson; 2d Catterson; 3d Catterson; 4th Caldwell; 5th Anderson.

GALLOWAYS.

There were only two herds of Galloways shown and both of these were from Kansas. Between them they had twenty-five head and divided honors about evenly. The animals shown were some of the best of this breed making the show circuit and had there been just a little more competition it would have been regarded as a strong Galloway shown. H. O. Allison, of the University of Missouri, judged the long-haired breed.

Exhibitors: Capital View Ranch, Silver Lake, Kan.; S. M. Croft & Sons, Bluffs City, Kan. The awards:

Bull 3 Years and Over (2 shown)—1st Croft on Kingsley; 3d Capital View Ranch on Carnot.

Bull 2 Years and Under 3 (1 shown)—Capital View Ranch on Casino.

Senior Yearling Bull (1 shown)—Croft on Cazonet.

Junior Yearling Bull (2 shown)—Capital View Ranch on Pelotte of C. V.; 2d Croft on Prince George Jr.

Senior Bull Calf (3 shown)—1st Capital View Ranch on Ocho of C. V.; 2d Croft on Ben; 3d Capital View Ranch on Pioneer of C. V.

Junior Bull Calf (2 shown)—1st and 2d Croft on Harvard and Joe of Bluff City.

Cow 3 Years and Over (2 shown)—1st Capital View Ranch on Daisy Dimple; 2d Croft on Florence of Meadow Lawn.

EVERLY & SLOAN'S CHESTNUT TWO-YEAR-OLD MULE TEAM.

Cow or Heifer 2 Years and Under 3 (2 shown)—1st Croft on Clara of Maples 3d; 2d Capital View Ranch on Nellie Melville.

Senior Yearling Heifer (1 shown)—Croft on Ethel of Greenbush.

Junior Yearling Heifer (3 shown)—1st and 2d Croft on Ollie of Greenbush and Gretchen of Bluff City; 3d Capital View Ranch on Capital's Belle.

Senior Heifer Calf (2 shown)—1st Capital View Ranch on Sunflower Maid; 2d Croft on Violet of Bluff City.

Junior Heifer Calf (2 shown)—1st Capital View Ranch on Mayflower; 2d Croft on Floss of Bluff City.

Senior and Grand Champion Bull (2 shown)—Croft on Kingsley.

Junior Champion Bull (1 shown)—Croft on Cazonet.

Senior and Grand Champion Cow (2 shown)—Capital View Ranch on Daisy Dimple.

Junior Champion Heifer (4 shown)—Croft on Ollie of Greenbush.

Aged Herd (2 shown)—1st Croft; 2d Capital View Ranch.

Young Herd (2 shown)—1st Croft; 2d Capital View Ranch.

Calf Herd (2 shown)—1st Croft; 2d Capital View Ranch.

Get of Sire, Four Animals, Either Sex (2 shown)—1st Capital View Ranch; 2d Croft.

DAIRY CATTLE.

While there were only fifty-nine head of dairy cattle shown at the Missouri State Fair this year these were of a trueness to type and of an individual quality which was all that could be asked for. Despite this paucity of numbers the interest in dairying and the breeding of dairy cattle is rapidly increasing in the "show me" state. The dairy show was handled with a thoroughness which was highly satisfactory to both breeders and dairymen. C. T. Graves, Maitland, Mo., in his judging, laid especial stress upon production, wherever it was possible to do so, and those familiar with dairy strains were spared the sight sometimes presented of a cow heading her class on her score card perfection when she would be unable to hold her own with anything in the ring when it came to production. This is a point which it has taken several years to emphasize and the satisfaction it gives is not small. Incidentally it will do more than any one thing to promote the showing of high producers.

JERSEYS.

The little butter cows were well represented by the twenty-nine head which five exhibitors presented to the judge. J. B. Smith, Platte City, Mo., formerly of the firm of Smith & Roberts, Beatrice, Neb., secured the major portion of the first moneys. In the opinion of Judge Graves, Warden's Proud Beauty, grand champion cow, an imported animal, was the best cow he had passed upon at any fair this season.

Exhibitors: Dr. D. R. Hill, Joplin, Mo.; W. H. Powell, Sedalia, Mo.; J. B. Smith, Platte City, Mo.; Chas. Romig, Dresden, Mo.; J. B. Stewart, Sedalia, Mo. The awards:

Bull 3 Years and Over (2 shown)—1st Smith on Stockwell's Fern Lad; 2d Romig on Sedalia Champion Lad.

Bull 2 Years and Under 3 (none shown).

Bull 1 Years and Under 2 (3 shown)—1st Smith on Stockwell's Champion; 2d Smith on Warden's Oxford Lad; 3d Hill on Fox's Plymouth Lad.

Bull Calf Under 1 Year (3 shown)—1st, 2d and 3d Smith on Waterloo Boy, Warden's Butter Boy and Stockwell's Silvermine Boy.

Cow 4 Years and Over (3 shown)—1st Smith on Warden's Proud Beauty; 2d on Plymouth Springtime; 3d Fousler on Agatha's Eminent.

Cow 3 Years and Under 4 (2 shown)—1st Smith on Belmont Silvermine; 2d Fousler on Baby Fairfield.

Heifer 2 Years and Under 3 (2 shown)—1st Hill on Majestic Sweet Buttercup; 2d Smith on King's May Fountain.

Heifer 1 Year and Under 2d (3 shown)—1st and 2d Smith on Stockwell's Gem and Stockwell's Signet; 3d Hill on Fox's Plymouth Violets.

Heifer Calf Under 1 Year (3 shown)—1st Hill on Fox's Plymouth Princess; 2d and 3d Smith on Stockwell's Flute and Princess Lady.

Senior Champion Bull—Smith on Stockwell's Fern Lad.

Junior and Grand Champion Bull—Smith on Waterloo Boy.

Senior and Grand Champion Cow—Smith on Warden's Proud Beauty.

Junior Champion Cow—Smith on Stockwell's Gem.

HOLSTEIN-FRIESIAN.

Two exhibitors with twenty-one entries made up the show of big black and white milk producers. The larger number of animals was shown in the junior classes. The quality was all that might be asked throughout. All of the excellent animals shown were from out of the state, the Iowana Farms, Davenport, Iowa, and Dr. M. W. Downing, Waukesha, Wis., being the two enterprising breeders who carried off the money and ribbons. Since some of the world's finest Holsteins have been bred and produced in Missouri it is greatly to be hoped that another year will bring out some entries of the great milking breed from this state. All of the champion awards and all but one of the nine blue ribbons were carried away by the Iowana Farms.

FAT CATTLE.

The University of Missouri monopolized the fat cattle show this year, winning ten firsts, three purples and the grand championship on their steer, Secret. There were but thirty-three fat cattle shown and while this number was slightly fewer than last year's steer aggregation, it was composed of entries from nine of the best herds in the country. The university's winnings were upon Short-horn and Angus entries. Mr. Arthur Rhys, that very efficient herdsman, never had the university herd in better shape and naturally had good cause to be elated over the showing which his finely fitted animals made. W. W. Andrews, Maryville, Mo., judged the Angus; J. G. Tomson, Wakarusa, Kan., judged the Short-horns, and Edward J. Taylor, Fremont, Mich., passed upon the Herefords. These three together decided the grand championship.

Exhibitors: R. M. Anderson & Sons, Newell, Iowa; C. D. & E. F. Caldwell, Burlington Junction, Mo.; Cyrus A Tow, Norway, Iowa; O. Harris & Sons, Harris, Mo.; W. A. Dallmeyer, Jefferson City, Mo.; E. M. Hall, Carthage, Mo.; H. Rees & Son, Pilger, Neb.; W. W. Brown, Amenia, N. D.; University of Missouri, Columbia, Mo. The awards:

SHORT-HORNS.

Steer or Spayed Heifer, 2 Years and Under 3 (1 shown)—Brown on Dick Turpin.

Steer or Spayed Heifer, Senior Yearling (1 shown)—Brown on Tommy.

Steer or Spayed Heifer, Junior Yearling (none shown).

Steer or Spayed Heifer, Senior Calf (3 shown)—1st University of Missouri on Secret; 2d Brown on Young Harry; 3d Hall on Hallwood 2d.

Steer or Spayed Heifer, Junior Calf (none shown).

Champion Group (one group shown)—Brown.

Champion Steer—University of Missouri on Secret.

Steer or Spayed Heifer, 2 Years and Under 3 (2 shown)—1st Tow on Bonnie Brae; 2d Dallmeyer on King Brummel.

Steer or Spayed Heifer, Senior Yearling (3 shown)—Tow on Standard 1st; 2d Harris on Heir at Law; 3d Dallmeyer on Sure Shot.

Steer or Spayed Heifer, Junior Yearling (none shown).

Steer or Spayed Heifer, Senior Calf (2 shown)—1st University of Missouri on Baxter; 2d Dallmeyer on Major Dare.

Champion Group (2 groups shown)—1st Tow; 2d Dallmeyer.

Champion Steer—Tow on Bonnie Brae.

ABERDEEN ANGUS.

Steer or Spayed Heifer, 2 Years and Under 3 (2 shown)—1st University of Missouri on Backward 2d; 2d Caldwell on Dr. Hendricks.

Steer or Spayed Heifer, Senior Yearling (1 shown)—University of Missouri on Lord Roberts.

Steer or Spayed Heifer, Junior Yearling (2 shown)—1st University of Missouri on Queen's Councilor; 2d Anderson on Riverdale Perfection.

Steer or Spayed Heifer, Senior Calf (1 shown)—University of Missouri on Prince of View Point 10th.

Champion Group (1 group shown)—University of Missouri.

Champion Steer (3 shown)—University of Missouri on Blackwell 2d.

GRADES AND CROSSBREDS.

Steer or Spayed Heifer, 2 Years and Under 3 (1 shown)—Tow on Denver.

Steer or Spayed Heifer, Senior Yearling (none shown).

Steer or Spayed Heifer, Junior Yearling (3 shown)—1st Tow on At Last; 2d Rees on Straight Goods; 3d Hall on Billy.

Grand Champion Steer—University of Missouri on Secret.

THE HORSE SHOW.

The number of heavy horses shown at Sedalia this year was not impressive, as there were only sixty entries, but it is very doubtful if Missouri ever witnessed a better horse show at a state fair. There was much quality in evidence and what is best, most of this was Missouri quality, as the majority of the horses shown were bred in Missouri or imported by Missouri men. Of the fourteen exhibitors only three were from neighboring states. The Percherons made up four-fifths of the show, while the Clyde and Belgian breeds were represented by a few choice animals. As there was only one exhibitor of Clydes and three showing Belgians the heavy horse show was mostly Percheron. "This year's horse show is in many respects as good as any ever seen at a Missouri State Fair," said E. A. Trowbridge, superintendent of the heavy horse show. "The prevalence and good showing of Missouri bred drafters," he continued, "clearly shows that the draft horse has come to stay in this state. What is better still, it indicates an increase in numbers and a stronger show next year." The opinion of Mr. Trowbridge was held by other prominent horsemen who were closely following the horse show. Dean C. F. Curtiss, Iowa College of Agriculture, placed all of the draft classes.

PERCHERONS.

While the Percherons are always leaders at a state fair, never at Sedalia have they so completely dominated the heavy horse classes as this year. Kirk was there with a number of his imported beauties and Roelofson, McCulley and others who are striving to improve Missouri draft horses in other ways besides talking about them, were there with specimens of their own breeding. Joel, the Percheron Horse

Get Your Canadian Home From the Canadian Pacific

WE will make you a long-time loan—you will have 20 years to pay for the land and repay the loan—you can move on the land at once—and your Canadian farm will *make you independent.*

20 Years to Pay

Rich Canadian land for from $11 to $30 per acre. You pay only one-twentieth down—balance in 19 equal annual payments. Long before your final payment comes due your farm will have paid for itself over and over. This advertisement is directed only to farmers or to men who will occupy or improve the land.

We Lend You $2000

for erecting your buildings, fencing, sinking well and breaking. You have twenty years in which to repay this loan. You pay only the banking interest of 6 per cent.

Advance of Live Stock on Loan Basis

The Company, in case of approved land purchaser who is in a position and has the knowledge to take care of his stock, will advance cattle sheep and hogs up to the value of $1,000 on a loan basis, so as to enable the settler to get started from the first on the right basis of mixed farming. If you do not want to wait until you can complete your own buildings and cultivate your farm, select one of our Ready-Made farms—developed by C. P. R. Agricultural Experts—with buildings complete, land cultivated and in crop, and pay for it in 20 years. We give the valuable assistance of great demonstration farms—free.

This Great Offer Based On Good Land

Ask for our handsome illustrated books on Manitoba, Saskatchewan and Alberta—mention the one you wish. Also maps. Write today.

PURDY BROS.' GRAND CHAMPION SHORT-HORN HEIFER, VICTORIA'S MONARCH.

OWEN KANE'S JUNIOR CHAMPION YEARLING SHORT-HORN BULL, RADIUM.

Importing Company's stallion, which last year won the blue as a three year old, was brought out this year by Mr. Kirk as an aged stallion, and as such he succeeded in beating Helix, Brown & Walker's big black, that won the International grand championship ribbon in 1910. This was the second time this season the two horses had met and many horsemen are of the belief that Joel is destined to keep on climbing during the rest of the season. He is a magnificent fellow with much more weight and size than last year, but still retaining much of the bloom and snap of the youngster, features which undoubtedly are much in his favor when shown against show-ring veterans as Helix. The forty-two Percherons shown were the entries of ten different exhibitors, only two of whom were from outside the state. This alone would have made it an inspiring show even had the quality, everywhere so much in evidence, been lacking.

Exhibitors: P. G. McCulley, Princeton, Mo.; N. S. Cox & Sons, Pattonsburg, Mo.; M. D. Alcorn, Sedalia, Mo.; O. C. Davis, Saline, Mo.; Percheron Importing Company, South St. Joseph, Mo.; Brown & Walker, Clarinda, Iowa; J. F. Roelofson, Maryville, Mo.; J. H. Smith, Sedalia, Mo.; J. A. Howell, Paris, Mo.; D. B. Koger, Pattonsburg, Mo.; Lee Bros., Harveyville, Kan. The awards:

Stallion 4 Years and Over (3 shown)—1st Percheron Importing Company on Joel; 2d Brown & Walker on Helix; 3d Percheron Importing Company on Insolent.

Stallion 3 Years and Under 4 (2 shown)—1st and 2d Percheron Importing Company on Kazo and Karillon.

Stallion 2 Years and Under 3 (5 shown)—1st Lee on Reinhard; 2d and 4th Percheron Importing Company on Logosite and Legionaire; 3d Roelofson on Dynamo; 5th Alcorn on Ronflant 2d.

Mare 4 Years and Over (5 shown)—1st and 3d McCulley on Gaite and Grive; 2d Lee on Beattie; 4th Alcorn on Kate Ross; 5th Davis on Dora.

Mare 3 Years and Under 4 (4 shown)—1st and 2d Lee on Flora and Marcellene; 3d Cox on Paris Lady; 4th Davis on Loretta.

Mare 2 Years and Under 3 (5 shown)—1st and 3d Lee on Lucile and Delia; 2d Cox on Lady Coliberte; 4th Davis on Ioalatha; 5th Koger on Lady Alice.

Group 5 Stallions (2 groups shown)—1st Percheron Importing Company; 2d Lee.

Group 3 Mares (4 groups shown)—1st and 3d Lee; 2d McCulley; 4th Davis.

Group Stallion and 4 Mares (2 groups shown)—1st and 2d Lee.

Get of Sire (1 group shown)—Lee.

Produce of Mare (4 groups shown)—Lee on Moraine.

Champion Stallion (3 shown)—Percheron Importing Company on Joel.

Reserve Stallion—Lee on Reinhard.

Champion Mare (3 shown)—McCulley on Gaite.

Reserve Mare—Lee on Flora.

MISSOURI-BRED CLASSES.

Stallion 2 Years and Over (2 shown)—1st Roelofson on Dynamo; 2d Alcorn on Ronflant 2d.

Stallion 1 Year and Under 2 (2 shown)—1st Roelofson on Tableau; 2d Davis on Gamin Jr.

Mare 2 Years and Over (5 shown)—1st and 2d Cox on Lady Colibert and Paris Lady; 3d Davis on Iolatha; 4th Koger on Lady Alice; 5th Alcorn on Kate Ross.

Mare 1 Year and Under 2 (2 shown)—1st and 2d McCulley on Dorothy and Fanny.

Foal Either Sex Under 1 Year (3 shown)—1st McCulley on Wonder; 2d Alcorn on Brilliant; 3d Davis on Jim Ornisby.

Mare and Foal (1 shown)—Alcorn on Kate Ross and foal.

Produce of Mare (3 groups shown)—1st Davis; 2d McCulley; 3d Alcorn.

Champion Stallion—Roelofson on Tableau.

Champion Mare—Cox on Lady Colibert.

PERCHERON SPECIALS.

Stallion Under 3 Years Bred and Owned by Exhibitor (4 shown)—1st Roelofson on Tableau; 2d Lee on Moraine; 3d Roelofson on Dynamo; 4th McCulley on Wonder.

Five Stallions Owned by Exhibitor (2 shown)—1st Percheron Importing Company; 2d Lee.

Mare 3 Years and Over Bred by Exhibitor (2 shown)—1st Lee on Marcellene; 2d Cox on Paris Lady.

Mare Under 3 Years Bred by Exhibitor (3 shown)—1st and 2d Lee on Madeline and Monita.

Champion Stallion (3 shown)—Percheron Importing Company on Joel.

Reserve Stallion—Lee on Reinhard.

Champion Stallion Bred by Exhibitor—Roelofson.

Champion Mare Bred by Exhibitor—Lee.

Tire Prices Down

Now the Costliest Tires—No-Rim-Cut Tires Cost You No More Than Others

Goodyear No-Rim-Cut tires used to cost one-fifth more than other standard tires. The reasons are told below.

These tires, despite that extra cost, came to outsell any other. As our output grew the cost came down.

Now you pay no more for No-Rim-Cut tires than for any other standard tire. Yet notice what you get.

Rim-Cutting Ended

You save in these tires all the ruin of rim-cutting. And that's an enormous item.

We had public accountants lately gather statistics. They examined thousands of ruined clincher tires—the old-type hooked-base tires. And they found that 31.8 per cent had been discarded for rim-cutting only.

That's almost one in three.

No-Rim-Cut tires, made by a costly method which we control, end that loss completely. That we guarantee.

Save Blow-Outs

We give these tires the "On-Air Cure." That is, they are final-vulcanized on air bags shaped like inner tubes.

That's to save wrinkling the fabric.

All other tires are vulcanized on iron cores alone. The fabric often buckles. And that buckled fabric leads to countless blow-outs.

This "On-Air Cure," which we alone employ, adds to our tire cost $1,500 per day.

Save Loose Treads

We use another costly method to prevent tread separation. The rights to it cost us $50,000.

Millions of dollars have been lost to tire users through the loosening of the treads. No other tire in the world employs the effective method we use to combat it.

Yet No Extra Price

You get all these savings in No-Rim-Cut tires. All these features used by no one else. Yet no other standard tire today costs less than No-Rim-Cut tires.

The reasons are mammoth output, new factories, new equipment. In one item alone—in overhead cost—we have saved 24 per cent.

Another reason is that we keep our profits within 8½ per cent.

Judge for yourself if tires lacking these features are worth the Goodyear price.

Our dealers are everywhere.

Five Stallions (2 groups shown)—1st Percheron Importing Company; 2d Lee.

CLYDESDALES.

While F. L. Crosby, Mexico, Mo., was the only exhibitor of Clydes he had nine head of beautiful animals that deserved some competition in order to prove their excellence, already so plainly evident. Mr. Crosby was awarded all the ribbons in the classes in which he showed, and it was universally agreed that his entries not only deserved them, but would have held their own in any company.

BELGIANS.

There were but three exhibitors of Belgians and only seven head entered. C. L. Henman, Halls, Mo., won first in the aged class and champion ribbons with his stallion, Fiston. Joseph M. Nolan, Paola, Kan., and J. A. Winebrenner, Tipton, Mo., were the other exhibitors.

There were no Shires exhibited. One German Coach entry completed the heavy horse show.

JACKS.

Naturally the jack show at Missouri this year was all that a show representing a state such as Missouri, already the leading mule state in the Union, should be. As everyone knows the superiority of the Missouri mule is largely due to the greatness of his sires. Some number of jacks were exhibited by a number of exhibitors. L. Monsees, of Smithton, was not showing this year, a fact that was commented upon by practically all of the jack men. Col. Monsees' absence as an exhibitor was more than made up by his presence in the ring as a judge.

Exhibitors: Louis Knoop, Cole Camp, Mo.; W. S. & G. V. Sneed, Sedalia, Mo.; Diereling & Otto, Queen City, Mo.; J. A. Winebrenner, Tipton, Mo.; Bradley Bros., Warrensburg, Mo.; J. W. Givens, Fayette, Mo.; Frank Barkley, Blairstown, Mo. The awards:

Jack 4 Years or Over (5 shown)—1st, Sneed on Limestone Henry; 2d Diereling & Otto on London; 3d Knoop on Squire Harris; 4th Diereling & Otto on Grand I Am.

Jack 3 Years and Under 4 (3 shown)—1st Diereling & Otto on Missouri

GRAND CHAMPION GALLOWAY COW, OWNED BY CAPITAL VIEW RANCH.

M'HENRY'S GRAND CHAMPION ANGUS COW, BLACKCAP.

Giant; 2d and 3d Bradley Bros. on Joe Knox and Bradley's Jumbo.

Jack 2 Years and Under 3 (10 shown)—1st Givens on Longfellow; 2d and 3d Dierling & Otto on Demonstrator and Dierling's Lightning.

Jack 1 Year and Under 2 (5 shown)—1st Bradley on Aristocrat; 2d and 3d Diereling & Otto on Eastern Star and Missouri Senator

Jack Under 1 Year (1 shown)—Diereling & Otto on unnamed foal.

Jennet 3 Years and Over (5 shown)—1st Barkley on Missouri Queen; 2d Knoop on Queen Victoria.

Jennet 2 Years and Under 3 (none shown).

Jennet 1 Year and Under 2 (1 shown)—Barkley on Anneboelyn.

Champion Jennet—Barkley on Missouri Queen.

Champion Jack—Givens on Longfellow.

MULES.

As was to be expected, the mule show was an exceptionally good one, the various classes being filled with numerous entries of mules such as only Missouri farms can produce. J. W. Warren, Paris, Mo., was judge. Probably the most attractive show of mules was that of the two year olds.

Exhibitors: Midge Marshall, Renick, Mo.; D. H. Hutchison, California, Mo.; Mose Holloway, Clarksburg, Mo.; Snider Bros., Lowry City, Mo.; Carl Shrader, Paris, Mo.; W. R. Hall, Warsaw, Mo.; J. R. English, Windsor, Mo.; T. J. Burris, Prairie Home, Mo.; Everly & Sloan, Coffey, Mo.; Ira Sharp, Sharpsburg, Ill.; C. J. Irvine, Marshall, Mo. The awards:

Mule 4 Years or Over (11 shown)—1st and 2d Sharp; 3d Hutchison.

Mule 3 Years and Under 4 (4 shown)—1st and 3d Sharp; 2d Marshall.

Mule 2 Years and Under 3 (8 shown)—1st Snyder Bros.; 2d and 3d Sharp.

Mule 1 Year and Under 2 (11 shown)—1st Everly & Sloan; 2d Snider Bros.; 3d Sharp.

Colt Under 1 Year (8 shown)—1st and 3d Snider Bros.; 2d Irvin.

Grand Champion Mule—Sharp on Queen.

Pair Shown to Wagon—1st Sharp; 2d Marshall.

Pair Mules Over 4 Years—1st Sharp; 2d Hutchison; 3d Shrader.

Herd of 5 Mules—1st Sharp; 2d Everly & Sloan; 3d Snider Bros.

THE SWINE SHOW.

Compared with former years the swine show at Sedalia was a very successful one, there being on exhibition a total of 433 head. In numbers the Duroc Jerseys took the lead, closely followed by the Poland Chinas, with Chester Whites standing third, there being on the grounds practically as many white hogs as Berkshires and Hampshires combined. Not only were the above breeds well represented, but the quality was up to standard and there was much comment on the improvement on the character of exhibits. The mule foots and the Yorkshires were light in numbers. Owing to season and epidemics of previous years, this year's swine show was lighter than it would otherwise have been, but it was up to former years and considered by all hogmen to have been an all-around good show.

POLAND CHINAS.

Twelve exhibitors. all Missourians, came together with the pick of their breeding pens and with 118 head made up the Poland show. The usual quality maintained by this breed was in evidence. There was also the usual variation of type such as has characterized every Missouri swine show held within recent years.

The aged boar showing was very light, as only two came before Judge Lloyd Mugg, Kokomo, Ind. These two animals differed radically in type, one being of the kind styled medium, the other of decidedly the big-type strain. Baker's King Hadley won the decision, Baker also won the first in the senior yearling class with King John. Porter's Golden E. L., the second-prize winner, showed a world of type and quality, but was smaller when compared with the first-prize boar. There were a goodly number of junior yearlings presented, but the same wide variation as to type was in evidence. H. T. Hall won first on Orator, a boar with excellent width, depth and remarkable quality. A blocky, compact animal of medium type of good quality shown by J. R. Young, came next. The Hall boar, however, showed considerably more stretch than did his closest competitor. Perhaps the best class shown was that composed of pigs under twelve months. At least it excelled in numbers and quality. An unnamed boar by Golden Harvest won this class and while he was of the medium type he showed good scale even though lacking considerably in condition. Apparently he won on his stretch, quality and smoothness, despite lack of fat.

In the aged sow class Hadley's Beauty 2d, another big-type animal, went to the top because of her remarkable smoothness and quality combined with such great scale. The medium type again came up when Burks won first and second in the junior yearlings, with two sows carrying an abundance of type, quality and finish. Ten entries made up the senior female pig class and again the judge showed his preference for size where quality was also to be had. The winner of the junior pig class was one of the good individuals of the show, a fact later emphasized by her winning the junior championship.

Exhibitors: Dr. John Gildow & Sons, Jamesport, Mo.; S. Y. Burks, Bolivar, Mo.; G. M. Curnutt, Montserrat, Mo.; W. A. Baker, Butler, Mo.; G. M. Hoadley, Sedalia, Mo.; W. F. Wheaton, Dresden, Mo.; L. C. Buford & Sons, Monticello, Mo.; H. T. Hall, Kirksville, Mo.; Thomas McKone, Monticello, Mo.; M. D. Porter, Vandalia, Mo.; Joe Young, Richards, Mo.; W. Z. Baker, Rich Hill, Mo. The awards:

Boar 24 Months and Over (2 shown)—1st W. Z. Baker on King Hadley; 2d Hoadley on Lavender Chief.

Boar 18 Months and Under 24 (3 shown)—1st W. Z. Baker on King John; 2d Porter on Golden E. L.; 3d Gildow on Pawnee's Equal.

Boar 12 Months and Under 18 (6 shown)—1st Hall on Orator; 2d Young on Star of the West; 3d Burks on Stylish Perfection.

Boar 6 Months and Under 12 (11 shown)—1st Porter on unnamed boar by Golden Harvest; 2d Gildow on Masterpiece; 3d Burks on Broadway.

Boar Under 6 Months (12 shown)—1st Porter on unnamed boar by Golden Glory; 2d Baker on Big Blain; 3d Hoadley on unnamed.

Sow 24 Months and Over (5 shown)—1st W. Z. Baker on Hadley's Beauty 2d; 2d Burks on Topsy; 3d Hoadley on Ideal.

Sow 18 Months and Under 24 (2 shown)—1st and 2d Gildow on Mammoth Girl and Mammoth Maid.

Sow 12 Months and Under 18 (4 shown)—1st and 2d Burks on Trixie and Nixie; 3d Gildow on May Expansion.

Sow 6 Months and Under 12 (10 shown)—1st W. Z. Baker on Rosebud Hadley; 2d Hoadley on High Mark; 3d Wheaton on Maid of Honor.

Sow Under 6 Months (17 shown)—1st McKone on unnamed pig by Prince of Durham; 2d Hoadley on unnamed; 3. W. Z. Baker on Bessie Blain.

Senior and Grand Champion Boar 12 Months and Over—Hall on Orator.

Junior Champion Boar—Porter on unnamed boar by Golden Harvest.

Senior and Grand Champion Sow 12 Months and Over—W. Z. Baker on Hadley's Beauty 2d.

Junior Champion Sow—McKone on unnamed gilt by Prince of Durham.

Boar and 3 Sows Over 12 Months (3 shown)—1st W. Z. Baker; 2d Burks.

Boar and 3 Sows Over 12 Months, Bred by Exhibitor (3 shown)—1st Burks; 2d Gildow.

Boar and 3 Sows Under 12 Months (8 shown)—1st McKone; 2d Hoadley.

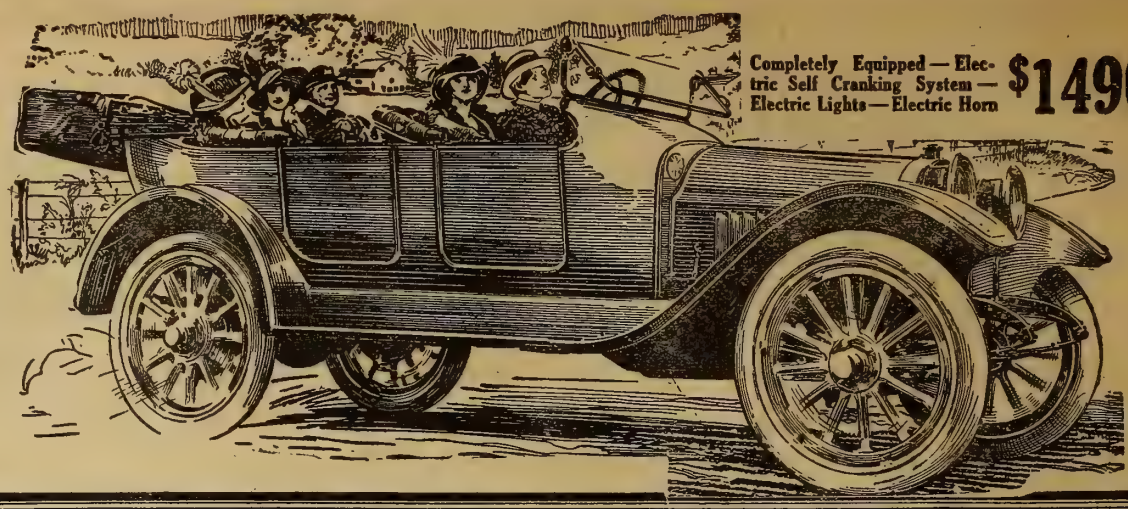
Boar and 3 Sows Under 12 Months Bred by Exhibitor (8 shown)—1st McKone; 2d Hoadley.

Get of Boar (9 shown)—1st W. Z. Baker on get of King Hadley; 2d Porter on get of Golden Harvest.

Produce of Sow (6 shown)—1st W. Z. Baker on produce of Big Beauty 6th; 2d McKone on produce of Black Beauty.

DUROC JERSEYS.

There were more Durocs shown at Sedalia this year than of any other breed of swine. The 112 head exhibited were the property of eleven exhibitors. Only one of these elven was from without the state. Most of the entries showed the usual quality and the gathering of the reds was regarded by the hogmen as being an exceptionally good one. The bulk of the ribbons went to Charles L. Taylor, B. W. Harned, McFarland Bros. and W. R. Crow. In placing the three aged boars, Judge Geo. W. Trone, Rushville, Ill.,



Completely Equipped—Electric Self Cranking System—Electric Lights—Electric Horn $1490

Beautiful New Auburn Now on Exhibit

Go See 1914's Startling Motor Car Value — It Is on Display Now. Each Year Some Manufacturer Brings Out the "Season's Best Buy"—a New Advancement in Value Giving. He Sets the Pace by Producing a New Value-Standard. Buyers Who Overlook the Year's Value-Sensation Do Not Get All That Their Money Can Purchase. So Do Not Buy Any Automobile Without First Inspecting This.

FOR NOW we present 1914's new standard of motor car value—a large, beautiful, superbly finished automobile of 120-inch wheel base. It has all the roominess of high priced cars. It is *fully* equipped with every comfort, convenience, and feature motorists can want.

Is not this 1914's biggest surprise in values?

Observe This Striking Beauty

NOTE in this new car, the handsome sweep of the "stream" lines. Note how they slope from the radiator to the back of the car. See the graceful sweep of the cowl, how it rakishly slants from the hood to the base of the windshield. Please observe also how the flush sides and broad back of the car emphasize its general distinctiveness.

Left Drive Center Control

IN town left hand drive gives the convenience of alighting directly onto the curb. It is unnecessary to face oncoming cars in stepping into the street when alighting.

Center control with the levers out of the way is another 1914 Auburn feature.

Electrically Self-Cranking Electric Lighted

AT no extra cost the new Auburn "40" is electrically self-cranked; it is electric lighted. It is also equipped with an electric horn. Our electric self-cranking system *spins* the motor. That ends a motor car fault, that of revolving the motor too slowly to secure combustion.

Note some of the other costly features we include in this big car:

Rain Vision Ventilating Windshield
36x4 Tires; Demountable Rims
Full Floating Rear Axle
Cowl Dash
Turkish Type Upholstery — Finest of Leathers
Wide Doors (with Concealed Hinges) as on 1914 European Cars
Dustproof En Bloc T Head Motor
Extra Roomy Tonneau — 29 Inches Foot Room
Tire Irons with Extra Demountable Rim.

This is the Auburn Automobile Company's 14th successful year manufacturing automobiles. We have never created an unsuccessful model.

Now On Exhibit

GO see these two cars at our dealers' show rooms. The visit will show you the startling motor car value of 1914. Then gauge all cars you are considering by this new standard of value.

Models: "40"—5-passenger, $1490; 6-passenger, $1590; "45"—(6-cylinder) 5-passenger, $2000; 6-passenger, $2100 (all fully equipped).

And right now write for the full story of this wonderful value. Just say: "Send the new folder."

Auburn Automobile Co., Auburn, Ind.

(18)

had little trouble deciding upon Taylor's Col. Wonder. Select Col. II showed more length, but was lacking in width and depth and in condition. There was also little difference of opinion in the senior yearling class where Chief of Colonels, owned by C. C. Boyd, was the conceded winner. It looked more like a show in the junior yearling class of boars, the tie finally made going to Whiskey and Faith, the largest boar in the bunch. Some surprises were unearthed in the aged sow class where a vote of the ringside would have probably put the first sow third, for while she was a sow of great scale and excellent at both ends, she was lacking in spring of ribs and very bad in her feet. This same opinion would also have placed second a sow left entirely out of the money. The same discrepancy was commented upon in the junior yearling class where two of the best sows were left out of the money entirely. The surprises continued to the end, the question even arising as to whether or not the gilt winning first in the under-six-months class had any right to even be in the money.

Exhibitors: McFarland Bros., Sedalia, Mo.; C. C. Boyd, Centralia, Mo.; R. R. Sellers, Pleasant Hill, Mo.; B. W. Harned, Beaman, Mo.; Chas. W. Finley, Otterville, Mo.; W. R. Crow, Hutchinson, Kan.; L. C. Burford, Monticello, Mo.; Chas. L. Taylor, Olean, Mo.; L. M. Fish, Bolivar, Mo.; B. H. Emison, Napton, Mo.; J. L. Taylor, Olean, Mo. The awards:

Boar 24 Months and Over (3 shown)—1st Taylor on Col Wonder; 2d Boyd on Select Col. II; 3d Crow on W. R.'s Wonder.

Boar 18 Months and Under 24 (3 shown)—1st Boyd on Chief of Col.; 2d Crow on Crow's Model; 3d Emison on Second Heirloom.

Boar 12 Months and Under 18 (4 shown)—1st Taylor on Whiskey and Faith; 2d Harned on Proud Wonder; 3d Crow on Champion Crow; 4th Sellers on Red Tom.

Boar 6 Months and Under 12 (2 shown)—1st Harned on Major Dare; 2d Taylor on Firestone.

Boar Under 6 Months (10 shown)—1st McFarland on unnamed sired by Climax A.; 2d and 3d Taylor on Col. Wonder II and full brother unnamed.

Sow 24 Months and Over (6 shown)—1st Finley on Dotie Queen; 2d Taylor on Miss Crimson Wonder; 3d Crow on Ideal Queen.

Sow 18 Months and Under 24 (2 shown)—1st Taylor on Lady Flotilla; 2d Crow on Bessie Crow.

Sow 12 Months and Under 18 (3 shown)—1st and 2d Crow on Katherine and H. M. Crow; 3d Taylor on Belle of Chiefs.

Sow 6 Months and Under 12 (11 shown)—1st Harned on Lady Dare; 2d Taylor on unnamed sired by Col. Wonder; 3d Harned on unnamed by Guiding Star.

Sow Under 6 Months (6 shown)—1st Crow on Belle Wonder; 2d Taylor on Belle of Missouri; 3d McFarland on unnamed.

Champion Boar Over 12 Months—Taylor on Col. Wonder.

Champion Boar Under 12 Months—Harned on Major Dare.

Grand Champion Boar—Taylor on Col. Wonder.

Champion Sow Over 12 Months—Finley on Dottie Queen.

Champion Sow Under 12 Months—Harned on Lady Dare.

Grand Champion Sow—Finley on Dotie Queen.

Boar and 3 Sows Over 12 Months (2 shown)—1st Taylor; 2d Crow.

Boar and 3 Sows Over 12 Months Bred by Exhibitor (1 shown)—Crow.

Boar and 3 Sows Under 12 Months (4 shown)—1st Harned; 2d Taylor.

Boar and 3 Sows Under 12 Months Bred by Exhibitor (2 shown)—1st Harned; 2d Taylor.

Produce of Sow (4 shown)—1st Harned on produce of Lady Searchlight; 2d on produce of Belle of Cols.

Get of Boar (4 shown)—1st Harned on get of Guiding Star; 2d Taylor on get of Col. Wonder.

AMERICAN ASSOCIATION SPECIALS.

Young Herd Bred by Exhibitor (2 shown)—1st Harned; 2d Taylor.

Young Herd Bred by Exhibitor (3 shown)—1st Harned; 2d Taylor.

NATIONAL ASSOCIATION SPECIALS FOR MISSOURI BREEDERS.

Herd Any Age (3 shown)—1st Taylor; 2d Harned; 3d McFarland.

CHESTER WHITES.

Four exhibitors with a total number of eighty-six head made up the Chester White aggregation. Most of the classes were well filled and the uniformity of the exhibit was a notable feature. In the main the decisions of Judge Trone were very satisfactory. The bulk of the ribbons were taken away by Kent and Buxton. However, a remarkable showing was made by Nunnelly, whose custom it is to show only in the under-six-months class and in these classes most of the ribbons, including both the junior champions and the young herd, went to his entries.

Boar 24 Months and Over (5 shown)—1st Buxton on Contractor; 2d and 3d Kent on Kent's Promotor and Combination I. X. L. 1st.

Boar 18 Months and Under 24 (1 shown)—Buxton on Buxton's Jim.

Boar 12 Months and Under 18 (3 shown)—1st Kent on Iowa Prince; 2d Buxton on Contractor Jr.; 3d Waltmire on Raymore Prince.

Boar 6 Months and Under 12 (7 shown)—1st Kent on Iowa King 2d; 2 Buxton on Wilson; 3d Nunnelly on Callaway Combination.

Boar Under 6 Months (10 shown)—1st and 2d Nunnelly on unnamed pigs sired by Hulligan; 3d Buxton on unnamed sired by Contractor.

Sow 24 Months and Over (5 shown)—1st and 2d Kent on Kent's Kind and Iowa Delight; 3d Waltmire on Callaway Pet.

Sow 18 Months and Under 24 (2 shown)—1st Buxton on Buxton's Jim; 2d Kent on Iowa Favorite.

Sow 12 Months and Under 18 (7 shown)—1st and 3d Kent on Kent's Beauty and Iowa Bond; 2d Buxton.

Sow 6 Months and Under 12 (8 shown)—1st, 2d and 3d Kent on Iowa Pearl, Iowa Gem and Iowa Ruby.

Sow Under 6 Months (9 shown)—1st, 2d and 3d Nunnelly on unnamed pigs sired by Hulligan.

Champion Boar 12 Months and Over—Buxton on Contractor.

Champion Boar Under 12 Months—Nunnelly on unnamed pig sired by Hulligan.

Grand Champion Boar—Buxton on Contractor.

Champion Sow 12 Months and Over—Kent on Kent's Kind.

Champion Sow Under 12 Months—Nunnelly on pig sired by Hulligan.

Grand Champion Sow—Kent on Kent's Kind.

Boar and 3 Sows Over 12 Months (4 shown)—1st Kent; 2d Buxton.

Boar and 3 Sows Over 12 Months Bred by Exhibitor (4 shown)—1st Kent; 2d Buxton.

Boar and 3 Sows Under 12 Months (3 shown)—1st Nunnelly; 2d Kent.

Boar and 3 Sows Under 12 Months Bred by Exhibitor (3 shown)—1st Nunnelly; 2d Kent.

Produce of Sow (3 shown)—1st Kent on produce of Gustafson's Choice; 2d Nunnelly on produce of Daisy.

Get of Boar (4 shown)—1st Kent on get of Iowa Protection; 2d Kent on get of Ned.

NATIONAL O. I. C. CHESTER WHITE SPECIAL.

Boar 6 Months and Under 12—Nunnelly.

Sow 6 Months and Under 12—Waltmire.

Boar Under 6 Months—Nunnelly.

Sow Under 6 Months—Nunnelly.

BERKSHIRES.

A light showing was made in the Berkshire classes, there being scarcely any competition on many of them. Four exhibitors with forty-one entries made up the show. The most interest was created by the entry of Gentry & Son in the six months and under twelve months' class of boars. The scale, smoothness and quality of this animal easily made him winner in this class and held him at the top for both the junior and grand championship ribbons. More competition was evidenced in the sow classes, the most noticeable being in the sow class under twelve months. In the senior champion class Ravenwood Duchess 121st won over an under-fitted senior yearling sow, showing remarkable length combined with quality and smoothness. There was no sow in the ring which excelled the daughter of Baron Duke 125th. Ravenwood Duchess 121st won the grand championship handily by her greater length and smoother showing when compared with her junior rival.

Exhibitors: S. Y. Burks, Bolivar, Mo.; N. H. Gentry & Son, Sedalia, Mo.; Ralph Creighton, Creighton, Mo.; Iowana Farms, Davenport, Iowa. The awards:

Boar 24 Months and Over (1 shown)—Iowana Farms on Baron Premier 102d.

Boar 18 Months and Under 24 (1 shown)—Creighton on Berry's Choice Jr.

Boar 12 Months and Under 18 (1 shown)—Iowana Farms on Iowana Baron 3d.

Boar 6 Months and Under 12 (3 shown)—1st Gentry on boar sired by Baron Duke 100th; 2d and 3d Iowana Farms on Iowana Majesty and Ames Rival 36th.

Boar Under 6 Months (3 shown)—1st Burks on Duke Dale; 2d and 3d Creighton on unnamed pigs sired by Berry's Choice Jr.

Sow 24 Months and Over (2 shown)—1st and 2d Iowana Farms on Ravenwood Dutchess 121st and Rival's Dutchess 23d.

Sow 18 Months and Under 24 (4 shown)—1st Gentry on sow sired by Baron Duke 125th; 2d and 3d Iowana Farms on Rookwood Laurel 14th and Rookwood Lady 52d.

Sow 12 Months and Under 18 (3 shown)—1st, 2d and 3d Iowana Farms on Rival's Jewel Dee 2d, Rival's Jewel Dee and Rival's Jewel 6th.

Sow 6 Months and Under 12 (7 shown)—1st, 2d and 3d Gentry on sows sired by Baron Duke 100th and a Royal Beauty boar.

Sow Under 6 Months (4 shown)—1st and 2d Creighton on unnamed pigs sired by Berry's Choice Jr.; 3d Burk on Duke Lady.

Senior Champion Boar—Iowana Farms on Baron Premier 102d.

Junior and Grand Champion Boar—Gentry on Boar sired by Baron Duke 100th.

Senior and Grand Champion Sow—Iowana Farms on Ravenwood Dutchess 121st.

Junior Champion Sow—Gentry on sow sired by Grand Duke 100th.

Boar and 3 Sows Over 12 Months (2 shown)—Iowana Farms 1st and 2d.

Boar and 3 Sows Over 12 Months Bred by Exhibitor (none shown).

Boar and 3 Sows Under 12 Months (3 shown)—1st Gentry; 2d Iowana Farms.

Boar and 3 Sows Under 12 Months Bred by Exhibitor (3 shown)—1st Gentry; 2d Iowana Farms.

Four Swine Produce of Same Sow (2 shown)—1st Gentry on produce of Charmer's 117th; 2d Burks on produce of Southland Superior.

Four Swine Get of Same Boar (4 shown)—1st Gentry on get of Baron Duke 100th; 2d Iowana Farms on get of Rival's Champion's Best.

Hampshires.

The rapidly increasing popularity of the Hampshire was clearly shown by the number of this breed on exhibition at Sedalia. Their total of forty-six was greater than that of the Berkshires although there were but three herds represented. Most of the classes were well filled and the competition was keen. The bulk of the top ribbons went to W. J. Brinigar & Son. The aged boar class brought out three entries. Hampshire men agreed that the two of these belonging to Brinigar & Son should have been reversed, Teddy B being the smoother and showing better type and quality with as much scale. In fact he was very similar in type to Lancaster Duke, the winner of the grand championship. No better example of the improvement of the breed within the last few years was shown than in the class of aged sows, as well as in practically all of the female classes. It would be hard to find better sows of any breed than of best females shown here. Fisher's grand champion sow showed early maturity unequaled by gilts of like age in any breed at the Missouri swine show.

Exhibitors.—W. J. Brinigar & Son, Blythedale, Mo.; G. S. Lawson, Ravenwood, Mo.; Roy E. Fisher, Winside, Neb. The awards:

Boar 2 Years and Over (3 shown)—1st and 2d, Brinigar & Son on Horace and Teddy B; 3d Fisher on Dr. Scott.

Boar 18 Months and Under 24 (3 shown)—1st and 3d Fisher on Fisher's King 4th and Danube 3d; 2d Brinigar on unnamed by Blythedale Jim.

Boar 12 Months and Under 18 (2 shown)—1st Brinigar on Lancaster Duke; 2d Fisher on Catro Messenger.

Boar 6 Months and Under 12 (3 shown)—1st and 3d Brinigar & Son on Blythedale Lad 1st and Blythedale 2d; 2d Fisher on Winside King.

Boar Under 6 Months (4 shown)—1st Lawson on Carl; 2d Brinigar & Son on Blythedale Jim; 3d Fisher on pig by Winside Star.

Sow 2 Years and Over (3 shown)—1st and 2d Brinigar & Son on Blythedale Princess and Missouri Beauty; 3d Fisher on Hamburg Beil.

Sow 18 Months and Under 24 (2 shown)—1st Brinigar & Son on Blythedale Beauty; 2d Fisher on Fisher's Queen 2d.

Sow 12 Months and Under 18 (6 shown)—1st Brinigar & Son on Miss Fancy; 2d and 3d Fisher on Fisher's Queen 4th and Fisher's Queen 3d.

Sow 6 Months and Under 12 (6 shown)—1st Fisher on Fisher's Queen 6th; 2d and 3d Brinigar & Son on gilts sired by Blythedale Lad.

Sow Under 6 Months (7 shown)—1st Brinigar & Son on unnamed sired by Blythedale Jim; 2d Lawson on Helena; 3d Fisher on son of Winside Star.

Champion Boar 1 Year and Over—Brinigar & Son on Lancaster Duke.

Champion Boar Under 1 Year—Lawson on Carl.

Champion Sow Over 1 Year—Brinigar & Son on Blythedale Princess.

Champion Sow Under 1 Year—Fisher on Fisher's Queen 6th.

Grand Champion Boar—Brinigar & Son on Lancaster Duke.

Grand Champion Sow—Brinigar & Son on Blythedale Princess.

Boar and 3 Sows Over 1 Year (2 shown)—1st Brinigar & Son; 2d Fisher.

Boar and 3 Sows Over 1 Year Bred by Exhibitor (2 shown)—1st Brinigar & Son; 2d Fisher.

Boar and 3 Sows Under 1 Year (3 shown)—1st Brinigar & Son; 2d Fisher.

Boar and 3 Sows Under 1 Year Bred by Exhibitor (3 shown)—1st Brinigar & Son; 2d Fisher.

Get of Boar (5 shown)—1st and 2d Brinigar & Son on get of Blythedale Duke 2d and Blythedale Lad.

Produce of Sow (3 shown)—1st Brinigar & Son on produce of Miss Fancy 2d; 2d Fisher on produce of Hamburg Belle.

MISSOURI HAMPSHIRE BREEDER'S SPECIAL.

Four Pigs Either Sex Under 6 Months (5 shown)—1st Lawson; 2d Brinigar & Son.

SHEEP.

The sheep show at the Missouri fair was about like that of former years. There were a total of 362 head entered. H. A. Hackecorn, of Columbia, Mo.; E. D. King, of Burlington, Kan., and J. O. Groves, judged the various classes. Sheep fanciers pronounced this show one that had come up to expectations and was in general very satisfactory.

SHROPSHIRES.

Exhibitors: J. O. Graves, Tipton, Mo.; Anoka Farms, Waukesha, Wis.; Geo. Allen & Son, Lexington, Neb.; W. S. & G. V. Sneed, Sedalia, Mo.; Geo. McKerrow & Son, Pewaukee, Wis.

Ram 2 Years or Over—1st and 3d Mckerrow & Son; 2d Anoka Farms.

Ram 1 Year and Under 2—1st Anoka Farms; 2d and 3d McKerrow & Son.

Ram Lamb Under 1 Year—1st Anoka Farms; 2d Mckerrow & Son; 3d Allen & Son.

Ewe 2 Years or Over—1st and 2d McKerrow & Son; 3d Anoka Farms.

Ewe 1 Year and Under 2—1st and 2d McKerrow & Son; 3d Anoka Farms.

Ewe Lamb Under 1 Year—1st Anoka Farms; 2d and 3d McKerrow & Son.

Flock—1st McKerrow & Son; 2d Anoka Farms.

Pen—1st Groves; 2d Allen & Son.

Ram Any Age—1st McKerrow & Son.

Ewe Any Age—1st McKerrow & Son.

Lanpher Mackinaws Jumped At Once Into Popular Favor

THEIR warmth, comfortable roominess, low cost and wide variety of attractive colorings make a strong appeal to young men and young women everywhere.

Mackinaws are becoming more popular every year. They are seen more and more in the country and on the streets of towns and large cities. They are made from the extraordinary wool mackinaw cloth, which, though very warm, is also very light in weight. As a coat for skating, skiing, hunting, coasting and all winter sports, it is ideal.

Older men and women as well as the young people are wearing Lanpher Mackinaws. They make a very practical coat for work as well as for dress, being very serviceable and durable. In fact, the use of the mackinaw originated with the lumberjacks of the northern woods.

Lanpher Mackinaws are made in the modern Lanpher tailoring shops by skilled tailors of long experience. They give you a perfect fit, snappy styles, mannish lines, good looks. Lanpher Mackinaws are put together to stay together, to give you **service** as well as comfort and looks.

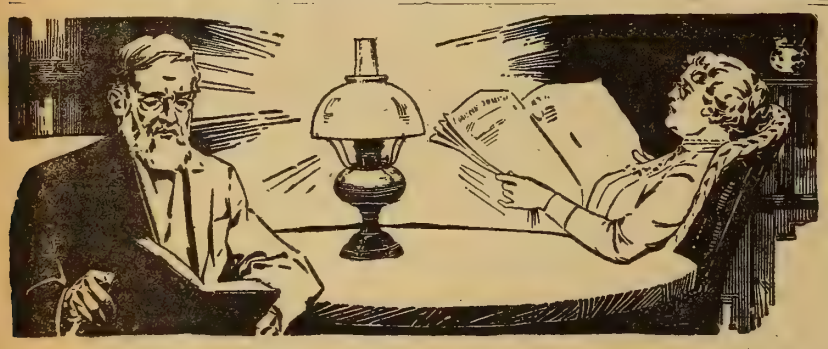
Try on a Lanpher Mackinaw at the store of the nearest Lanpher dealer. It will be a revelation to you.

Write for the Lanpher Book of 1913-14 styles, if you want to know more about Lanpher men's and women's clothing for outdoor wear, and where to buy them in your neighborhood.

Lanpher, Skinner & Company

SAINT PAUL, : : : : MINNESOTA.

Ladies: Remember Lanpher Furs are guaranteed The Lanpher book mentioned above will guide you in the selection of becoming models. You can **see** them at your dealers' before buying.



Save Your Eyes!—Enjoy Good Light

Rayo lamps shed soft, mellow, steady light. No glare or flicker to strain the eyes. Best for reading. Best for studying. The best lamp in the world, as is proven by more than three million of them now in use.

See the above-illustrated model at your dealer's. Get our booklet, illustrating and describing them.

WITH THE EDITOR.

"Happiness was born a twin.
They who joy would win must share it."

False ideas as well as low ideals are responsible for much of the pain and woe with which we are afflicted. For instance, the world's idea about happiness is that it is something to be caught and bound, something to be raced and chased after. Perhaps, yes, undoubtedly, we have all been engaged in the "pursuit of happiness."

Perhaps even yet we have not learned, with Mytil and Tiltil in Maurice Maeterlinck's story, "The Bluebird," that while we hunt around the world, back into the past, or into the future for the wonderful bluebird, Happiness, it was not there, but so very likely to be right at home within reach of our hands, within sound of our voice!

Happiness can be lost as quickly as it was snatched—if obtained in that way. Such is but a mockery of the real kind. Others can take away that kind of happiness from the person who has clutched it. And again, the world believes that those who have the power of giving happiness to one's life may refuse to do so, and then there is a definite end to one's hope of obtaining this desired condition. Another false notion: It makes happiness such a transient affair, subject to the "stand and deliver" of every traveler we meet on life's highway.

Happiness exists, we know, for we have seen it at times and in lives where we least expected it. It was not a transient, temporary thing; it was not a passing phase as of an April day, but it was such a beautiful condition of permanency that we desired earnestly to re-engage in the search for it.

But such happiness was not attained by "pursuit." There was no idea of acquiring, of getting, in the heart of the fortunate possessor. Such a person was not a happiness-getter, but a happiness-giver, and by continual giving had come into possession of something over which circumstances had no control, no power to take away. There is no possibility of loss. Its presence lends an almost immortal serenity to its possessor.

Would we irradiate our hearts with such abiding joy? Then we must be true happiness givers, of that company who, not content with the small circle of well-loved ones, gives cheerfully to all, even to the churlish and the low-minded.

"The world would be better and brighter if people were taught the duty of being happy, as well as the happiness of doing their duty. To be happy ourselves is a most effectual contribution to the happiness of others."

HOME AND HOMEMAKING.

LITTLE HELPS BY THE WAY.

Live truly, and thy life shall be
A great and noble creed.

Life is not so short but that there is always time for courtesy.

Be gentle; the sea is held in check not by a wall of rock, but by a beach of sand.

Not what you do, but how you do it, is the test of your capacity.

Teach the small boys and girls to be little gentlemen and ladies, for the time is quickly approaching when they must make their own pathway through sunshine or shadow, and the path will be much easier traveled by kind deeds and thoughts for the aged.

KEEP THE COLOR SCHEME IN MIND.

Keep always in mind the color scheme of your wardrobe, and select everything that you get with regard to what you already have, and what you expect to buy later. Perhaps you see a brown hat that strikes your fancy. Don't purchase it unless you will have other things of brown to go with it. While black and dark blue are staple colors they are not to be recommended unqualifiedly for all wearers. Many a woman of sallow complexion makes the mistake of confining herself to black, when, in reality, black is the worst thing she can wear. The Oxford grays for service, and the lighter grays for dress wear, are very becoming to many elderly women. It is impossible to lay down rules as to what colors and shades are best for the various ages, complexions and figures. Each woman should keep within the range of what is becoming to her, leaving alone the things that may be pretty in themselves, but not adapted to her.

FOR THE COOK.

Red Pepper Relish.—Take twelve mango peppers (red, green or mixed) six good-sized onions and two roots of horseradish and chop all fine. Add two tablespoons of celery seed, two tablespoons white mustard seed, one tablespoon salt, one quart vinegar, one quart water. Cook all ten minutes, add one-fourth pound brown sugar and cook one hour.

Sour Peach Pickle.—Peel the peaches and sprinkle lightly with salt. Let them stand one hour, then wash them quickly in cold water. Place in jars and pour over good apple vinegar, with half a teacup each of spice and cloves to one gallon of pickle.

Sweet Pickle Peaches.—Peel the peaches, stick in each at intervals half dozen cloves, place in jars and pour over them boiling vinegar, sweetened with one pound of sugar to one quart of vinegar. Seal while hot.

Another Sweet Pickle.—Peel half a bushel of clingstone peaches, almost ripe. One gallon of good apple vinegar, eight pounds of sugar, half a teacup of cloves and three sticks of cinnamon. Boil the vinegar and spices together five minutes, put in the peaches and let them get hot through, remove from the fire and place in self-sealing jars, if convenient; if not, seal the jars with brown paper (three layers) and thick flour paste.

Green Tomato and Pepper Relish.—Chop fine one peck of green tomatoes, three large onions, six green peppers with the seeds removed; boil them three minutes in two quarts of weak vinegar, drain and turn into glass jars. Scald three quarts of vinegar with two cupfuls of brown sugar, one cupful of white mustard seed, one tablespoonful each of cinnamon, cloves and allspices, three tablespoonfuls of salt and one teaspoonful of celery seed. When this is boiling, pour it over the chopped ingredients and seal the jars.

AMONG OURSELVES.

"Aunt Eliza" brings us some verse entitled "If I Had But a Day." It is verse which has a message for us who are busy and anxious sometimes and sometimes tempted to be regretful if not fretful:

We should fill the hours with the sweetest things
If we had but a day;
We should drink alone at the purest springs
In our upward way;
We should love with a lifetime's love in an hour
If the hours were few;
We should rest, not for dreams, but for fresher power
To be and to do.
We should guard our wayward or wearied wills
By the clearest light;
We should keep our eyes on the heavenly hills
If they lay in sight;
We should trample the pride and the discontent
Beneath our feet;
We should take whatever a good God sent
With a trust complete.
We should waste no moment in weak regret
If the day were but one,
If what we remember and what we forget
Went out with the sun.
We should be from our clamorous selves set free
To work or to pray,
And to be what the Father would have us to be
If we had but a day.

Somewhere I once read of a life which was governed, day by day, by the thought that the day which was being lived might be the last day. It would be well for some of us to experiment along this line. The woman of whom I read found it a road to peace and happiness.

As the larger number of our circle are farm folks a tribute to the farmer and farming as an occupation will be enjoyed. It is brought to us by "Nameless:"

From the beginning, the cultivation of the earth has been honored, the Sovereign Planter chose the great ancestor of our race as a husbandman. The pursuit of agriculture has been honored by the great of all ages—princely patriarchs, kings, prophets and philosophers. The dignity of the farmer's calling is full of moral grandeur. He supports the world, is a

partner of nature and a co-worker with God. No one loses by his successes. Health attends his toils and the philosophy of nature exercises and exalts the intellect of the intelligent farmer. His moral powers are enobled by the manifestations of supreme love and wisdom in everything around him, and the season, "Almighty Father! these, as they roll are full of Thee."

The question arises, does the average farmer—if such a term be permissible—live up to his privileges? Is he a student of nature and a philosopher striving to rise above the material things of life? Is he not more often a man wrestling with all his might, either to earn a living, or to buy more land to raise more corn to feed more hogs, to buy more land, and so on? This summer I have asked myself a number of times if the farmer and the farmer's family get out of life what they might. I wish the circle members would tell me what they think about it.

Miss McCoy will talk to us about "Reading for the Family:"

One of the best things that parents can do for their children is to cultivate in them a taste for good literature. This alone is sometimes equal to a liberal education. Bright children will have something to read, and, if good books and papers are not supplied to meet their needs they will accept almost anything. This matter can not safely be allowed to take care of itself. Many men and women who justly take rank among the best informed owe more to their thorough and systematic reading than to any school or college. Interesting books are desirable for family reading on winter evenings, books that are alike interesting to old and young. Young children can be interested in novels, when read aloud, but such mental fare is not nearly so wholesome for growing children as the fairy tales of science and history. Novels are more or less love stories and they furnish a stimulus not the most desirable for unfolding childhood. Moreover, there is danger that when the mind has begun to feed upon novels, its tone will be so far impaired as to produce a morbid craving for reading of an exciting nature. It is safer to cultivate in youth an interest in useful facts about the world we live in. Fiction has its place, and a useful one, but it is so easy to take, so attractive to most minds, that it is not necessary to labor to cultivate a taste for it.

We are indebted to Miss McCoy for this admirable book talk. We pay our debt by saying, "Come again, please." Book talks are so often asked for and are such welcome offerings that I wonder we do not have more of them. Perhaps we shall, now the days are less crowded.

"Mrs. M. S." brings handy hints for the kitchen, a subject sure to cause housewives to give extra close attention:

Modern science has revolutionized the management of the culinary department in our American homes. Formerly all that pertained to the home commissary meant drudgery of a more or less arduous nature. Today, handy devices and ingenious inventions, relatively inexpensive when one considers the proportion in which they lighten the housewife's duties, render domestic work comparatively simple and decidedly attractive. Efficient washing machines, electric flat irons, gas and electric stoves and alcohol ovens are exceedingly practical, where the farm or suburban home is provided with gas or electric power. Even in the country dwelling where the local heat, light and water supply problems have been successfully solved, there are many useful hints which can be advantageously practiced by the progressive housewife. Relatively few women appreciate the necessity of efficiently caring for the eggs in the home kitchen. Many eggs that reach the kitchen in good condition are allowed to deteriorate in a warm room before the cook finds occasion to use them. Right here comes in the great value of water glass for preserving eggs. This solution of sodium silicate is not only useful in keeping eggs in good condition for short periods, but it can also be advantageously employed as a means of preserving eggs for winter use in the home; that is, by obtaining a large supply of eggs at the period of abundance when the price is low and preserving them in water glass, which is more efficient for this purpose than expensive systems of cold storage, until the supply is limited and the price inflated. Water glass as a preservative is reliable, comparatively cheap and easily prepared. It can be purchased at the average drug store for $1 to $1.25 a gallon—one gallon of water glass will make ten gallons of preserving fluid. This mixture should be made from clean water that has been boiled and allowed to cool. To every nine quarts of water add one quart of water glass, stirring thoroughly to insure a proper mixture. If properly mixed the water glass seals the eggs and with a temperature comparatively low the egg is preserved. Carefully place the eggs in a sanitary stone jar containing this fluid, examining each egg to see that it is clean and not cracked. Keep the eggs well covered with the solution by adding a small quantity of boiled water when necessary. Do not allow the sun's rays to fall directly on the receptacle containing eggs. It is economical to use water glass eggs for cooking purposes after the price of eggs have reached the original price plus the price of preserving, usually not more than two to three cents per dozen. A cellar affords the preferable place in which to store the eggs, although any darkened room whose temperature does not exceed 60 degrees will be satisfactory. The average egg soon spoils, but those treated in this manner may be preserved for ten to fourteen months and still be fit for human consumption.

With the price of eggs mounting and sure to mount still higher that water glass hint should prove decidedly valuable. I wish other of the friends would feel constrained to pass on their experiences. A circle like ours can only prosper as its members give of their stores, whatever those may be.

Next week our program will be made up of the prize-money essays on the subject of "Our Garden and Orchard—Why We Think Them Worth While."

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

TOPICS THIS TIME.

This week we will give you a topic to write on, and the prizes will be given for the best three on the topic. We want you this time to relate some true incident of your life in connection with school. It must be true. Write on one side of your paper only, and be sure to give your complete address, as well as pen-name, if you use one. Use for the title of your letter, "That Day at School."

A Spell-down.

Some write carelessly; others do not know how to spell correctly; among them all a good many misspelled words appear in the letters of the young folks. How many of you can give the correct spelling of the following list of words, taken from your letters this week? Try it.

Write out the list correctly, sign your name, age, and address, and send it to Aunt Mary.

Did you ever play Roodles? This fine game will be sent as a prize for the neatest correct list received before November 1st. Here are the words: Augist, ant, accross, allmost, beleved, becuse, bugy, belive, befor, Chirstmas, confirts, dident, dich, dieded, horizen, heared, haveing, injoyed, layed, medcine, nineth, ninty, oclok, recieved, rember, resess, shetilan, sence, stoped, succeded, studie, thier, verey, wrohtless, whoes.

The Ideal Citizen.

(First Prize.)

An ideal citizen is a citizen that has good ideas, conservative and progressive at once. He is always satisfied with the methods of government, but as soon as he finds out that the new government is as good or better than the old, he is perfectly willing to do well in its service. His habits are good, he will not gamble, drink alcoholic drinks, smoke, play cards, or anything of that kind. If he has debts to pay he will pay them, and do what he thinks is right. When it is time to vote, he will vote, if he can get away to the polls. If he is a democrat or republican he will not vote for a person of his party who is not fit for the office nor let himself be persuaded to vote for a bad person, for a drink of beer or whisky, but will always vote for a man of good character, and one that is worthy of the position. He will not lose his temper, but has a good character, and will be loving and kind to his fellowmen, have malice and envy toward none, but charity to all, especially to his working men and his own family. He is careful of how he speaks and of whom he speaks, so that he will not hurt anybody's feelings. He will be an example to all those that are around him. He is also a man of good behavior, good sense, always respectful, and neither rude nor selfish. He will not let his manners be corrupted by evil communications or jesting and joking, but will always talk in a decent way. He is a man of exact cleanliness and neatness, having his clothes always neat and clean, without unnecessary articles to adorn himself. He only buys those things which

We Have Given Ideas for 30,000 Home Parties and Church Socials in Three Years

For girls at home who wanted to entertain their set: for young people's church societies: for ladies' aids: for women in frontier towns who wanted to entertain women who "never had a party in their lives": for women in the great cities who had run out of ideas and wanted new ones for luncheons and teas: for the minister's wife who wanted to raise money for the church—for everybody, in fact, young and old, in city and country.

And we have given ideas for these thousands of happy-time occasions without a penny's charge.

It is part of the personal service that has been building for twenty years back of *The Ladies' Home Journal*, and every subscriber or reader is entitled to the service without a penny's cost. An editor with two or three assistants does practically nothing else but travel, buy, and collect the newest ideas for all kinds of good times, and pass them on.

It is worth knowing about. A booklet, entitled "The Story of 600,000 Invisible Hands," tells something about this service. A postal-card request will bring a copy.

A year's subscription to *The Ladies' Home Journal*, by mail, costs $1.50, or it may be bought from any Newsdealer or Boy Agent at 15 cents a copy.

are necessary, so that he is never in want. He generally has a home of his own, and keeps his things in order, so that he knows where to find them. He has his children so trained, that they are obedient to him, and help him in all that he undertakes to do. He is a proper example to be imitated, by his children, or whoever he may come in contact with, because he is always brave and courageous in all his undertakings.

—Hettie Gibble, age 15.

[While there is a great deal of good in this portrait of an ideal man, there are several points in which Aunt Mary would not agree with Hettie. She would like to hear what the young folks think about it.]

The Beautiful Sky.

(Second Prize.)

How many of you have realized the beauty of the sky? The beauties of the day help to beautify the scenery on earth. Each day the sky is different, just like the pages of a story book. Sometimes it is clear and cloudless, and at other times gray and cloudy. Have you noted the many different shapes and colors of the clouds? Some evening at twilight, when small clouds are floating in the air, watch them and see them change shape as they float along. Sometimes the clouds are black, sometimes gray, and even white, reddish and greenish hues are put upon them. The sky itself is not always the same shade of blue. At night the moon and stars beautify the sky and in daytime the sun lights and beautifies the sky and earth. The sun or moon rising or setting in a cloudy horizon makes a very beautiful scene. Look at the sky a little each day and you will soon note its varied beauties, which each and all help to beautify the scenery on earth. Indeed the sky is like a vast picture book with its various scenery.

—Little Fairy, age 15.

The Playground of Europe.

(Third Prize.)

In school we have been reading of a little country over in Europe called "The Playground of Europe," or Switzerland, and I thought you might like to hear something about it. The playground, as it is called, is only about one-third as large as the state of New York, but it is a very beautiful country and many tourists and people that go for health go to look at its beautiful scenery. Nearly two-thirds of Switzerland consists of lakes and mountains. The highest peaks of the Alps are in Switzerland; they are always covered with snow. The farms are very small. Only one-ninth of the land is tilled, and there is a population of 3,119,635 to be fed. Great storms tear down buildings almost as fast as the people can build them. The summers are short and the crops often fail to ripen as they should, but the Swiss are very thrifty people and make a good living, although many times with great difficulty. The people make a living mostly by entertaining the visitors from other parts of Europe and from America. Innkeeping is one of the leading occupations. The people make money out of their lakes, mountains and glaciers. They build splendid hotels in every mountain nook on their blue lakes, and invite the whole world to come and look at their beautiful scenery. There are over 1,400 hotels. During the long winter months many people are employed in making souvenirs to sell to the visitors and in preparing to act as guides for the people who wish to climb the mountains during the summer months. In May the people begin to come, and continue to come by thousands until October, when the cold weather drives them away. The Swiss people are glad to see them come and sorry to see them leave, for from these visitors the Swiss people reap a harvest of $20,000,000 every year. We are to learn some more about the Swiss people, but this is all we have learned so far.

—Martha Froh.

The Wisconsin shepherd, Frank Kleinheinz, was called to Memphis, Tenn., to judge exhibits of sheep at the Tennessee State Fair. While there he gave a series of demonstrations showing what are the most profitable types of sheep.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

4th Quar. Lesson 8. Numbers 12. Oct. 12, 1913.

JEALOUSY AND ENVY PUNISHED.

It is a marvel of literature, the fidelity with which the Bible pictures the faults of its heroes. No effort is made to create a series of ideally perfect characters. That is what would have happened if it had been a strictly human production. The Bible gives us its people exactly as they are, without effort to gloss or extenuate—Noah drunk—Abraham lying—Jacob deceiving—David an adulterer—Peter denying—Thomas doubting. So, in this instance, Aaron has been his brother's mate from the very inception of the Exodus—has shared his honors and responsibilities. He is the very incarnation of ecclesiasticism—the embodiment of objective religion as it expresses itself in ritual. On the other hand, Miriam, Moses' sister, is the Virgin Mary of the Old Testament—the foremost woman—organizing and voicing the praise of the people on the deliverance from Pharoah and the Red Sea. But, with terrible fidelity, the Bible pictures the fall of brother and sister from their high estate. And the cause of it is so very human. They are envious and jealous. Miriam has been the "first lady of the land," and has liked being it! But Moses' wife has arrived in camp, and Miriam, with a woman's quick intuition, sees herself about to be displaced. The only way in which she can retain her laurels is to make herself equal to her brother Moses. This she proceeds to do by disparaging him and exalting herself. Her claim is that God has spoken by her as well as by Moses. Aaron follows Miriam in her folly. That the younger brother should be primate seems always to have stuck in his craw. It has led him into trouble before. It is another instance where "base envy withers another's joy and hates the excellence it can not reach." God nipped the insurrection in the bud. He dealt with it swiftly and directly. In unmistakable terms he established and confirmed Moses' pri-

macy. He punished Miriam with the tell-tale disease of the Orient. Aaron goes far toward restoring himself in good graces of the reader by the promptness with which he shared his sister's guilt and cries to the very brother of whom he had been so jealous, "Lay not the sin upon us wherein we have done foolishly!" Like a mediator he pleads for his sister. The Bible does not afford finer illustration of contrition, confession, and supplication than that of Aaron and Miriam. Their hearts were broken for and from their sin. They did not hesitate to offer the honorable amend to Moses and thus, as far as possible, make restitution. The joy and blessedness of those whose sins are forgiven has bright example in this instance.

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect-fitting, seam-allowing patterns at 10 cents each, postage prepaid. Full directions for making, as well as the amount of material required, accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

5938 Ladies' Coat.—This coat can be made in either the 44 or 56½-inch length. The high or low collar can be used. Serge, cheviot or broadcloth can be used to make this coat with the collar and cuffs of contrasting material.

The pattern 5938 is cut in sizes 32 to 42 inches bust measure. Medium size requires 4 yards of 44-inch material wtih 1⅛ yards of 27-inch contrasting goods. Price of pattern ten cents.

6319 Ladies' Dress.—A novel style with coat blouse which also has the drop shoulder and an open front with a handsome collar. The two-piece skirt may have either the high or the normal waistline. This style is suitable for linen, gingham, ratine, silk, crepe and serge or other light-weight woolens.

The dress pattern, 6319 is cut in sizes 34 to 42 inches bust measure. Medium size requires 5⅞ yards of 36-inch material. Price of pattern ten cents.

6297 Ladies' Three-Gored Skirt.—This model shows one of the newer styles for tailored skirts. It opens in front, where the material is slightly draped at about knee depth. A small V-shaped piecing fills in the opening at the foot. Not only tailored goods, but also soft silks and crepe materials will make up well in this style.

The skirt pattern 6297 is cut in sizes 22 to 30 inches waist measure. Medium size requires 2⅞ yards of 44-inch material. Price of pattern ten cents.

6188 Ladies' Dressing Sacque.—Any of the pretty crepe materials can be used to make this dressing sacque. The flowing or gathered sleeves can be used.

The pattern 6188 is cut in sizes 34 to 42 inches bust measure. Medium size requires 2⅛ yards of 36-inch material with 5 yards of ribbon for the trimming. Price of pattern ten cents.

6232 Girls' Dress.—This pretty frock has a box plait from the shoulder to the hem at each side of the front and of the back. There is also a small underturned plait at each of the side seams. The general cut of the dress is in sacque style, with no division at the belt. Poplin, linen or pique can be used to make this dress.

The pattern 6232 is cut in sizes 4, 6, 8, 10 and 12 years. Medium size requires 3⅞ yards of 36-inch material. Price of pattern ten cents.

COAL Direct From The Mines

Keep Dealer's and Jobber's Profits In YOUR Pocket

DO you know that wherever you live *you* can now buy coal straight from the mines at wholesale prices, the prices your *dealer* has to pay?

Do you know that this winter you can save from $50 to $100 on your coal supply—have it delivered promptly—the cleanest, best heat-producing coal you ever used?

It is literally throwing your money away and adding to the high cost of living *with a vengeance* to continue to pay local prices for coal.

Our great mines near Vincennes, Indiana, produce enormous quantities of the finest coal in the country—the coal that is famous for its remarkable heat unit efficiency. We ship everywhere direct from mines in carload lots this splendid guaranteed fuel.

Tecumseh Coal

Save $50 to $100

on your winter's coal supply. We know that seems too good to be true, but it is an absolute fact that hundreds of people far and near are already buying Tecumseh Coal from us at wholesale and making this marvelous saving.

Not only is Tecumseh the best heat giving coal—but it is *all coal*—cleaned at the mines by the most perfect system ever installed.

No matter how big your coal bills have been in the past—no matter how much you have fattened the jobber's and dealer's profits—the time to turn your back on the old costly round-about way of buying is now. Begin with *this* winter to make this real saving.

It is plain common sense for you to save money by dealing *direct with the mines.* You owe it to yourself to find out the facts and prices—to learn more about Tecumseh Coal. All we ask is the opportunity to quote you prices—to prove in actual figures the splendid saving you can make.

This should interest you whether or not you intend to buy a full car of coal.

Club with Your Neighbors

If you cannot use a whole car—25 to 40 tons—you can easily arrange with your neighbors to divide up the shipment and still make this handsome saving on your winter's coal.

This money-saving plan is too important to be set aside. The amount of waste money you have been paying your dealer belongs in your own pocket. Keep it there. Right now take the first step. It obligates you to nothing. Just fill out and mail us the coupon in this advertisement. The prices we quote will positively surprise you. But do it now before the matter slips your mind. Address

STOCK-JUDGING CONTEST.

Thirty-four young men mostly from the agricultural college competed for prizes offered for the best judges of live stock under twenty-five years of age. The young men were asked to place various classes of live stock and give their reasons for so doing. H. O. Allison, of the college, had charge of this work.

The standing of the students in the various classes of stock judged was as follows:

Hogs—1st, J. D. Dickerson, Shelbina, Mo.; 2d, Chas. Caldwell, Burlington Junction, Mo.; 3d Carl Gillispie, Albany, Mo.

Sheep—1st, J. W. Arnold, Lewistown, Mo.; 2d, W. W. Fuqua, Monroe City, Mo.; 3d, Chas. Caldwell, Burlington Junction, Mo.

Beef Cattle—1st, Chas. Caldwell, Burlington Junction, Mo.; 2d, Grant Goodson, New Cambria, Mo.; 3d Carl Gillispie, Albany, Mo.

Horses and Mules—1st, J. W. Arnold, Lewistown, Mo.; 2d, A. R. Troxell, Columbia, Mo.; 3d, Grant Goodson, New Cambria, Mo.

Dairy Cattle—1st J. D. Dickerson, Shelbina, Mo.; 2d, A. J. Neal, Bolivar, Mo.; 3d, W. W. Fuqua, Monroe City, Mo.

Standing in Finals—1st, J. W. Arnold, Lewistown, Mo., score 878; 2d, J. D. Dickerson, Shelbina, Mo., 865; 3d, Chas. Caldwell, Burlington Junction, Mo., 862; 4th W. W. Fuqua, Monroe City, Mo., 837; 5th A. R. Troxell, Columbia, Mo., 834.

Fred Meyers, Nevada, Mo., was awarded the scholarship for the short course at the university.

WHY YOUNG MEN SHOULD STAY ON THE FARM.

To the Editor of The Homestead:

I presume that every young man has this important question to decide—whether or not he shall stay on the farm. Much depends upon his decision. His decision will not only affect himself, but that portion of the human family which he shall represent. It seems that any young man ought to make his decision easily in favor of the farm, but quite the reverse. Even the name of "farm" is disgusting to some boys. Why? Because they have been taught to consider it in that light.

Many a farmer, who has a farm paid for and quite a bit of stock around him, concludes that the rural school is not sufficient for his children, so he rents the old farm and moves to town. The school is all right for the ones who need it, but it is not what the boy needs who expects to become a farmer. Then the sons who are moved into town have comparatively nothing to do, compared with their work on the farm and they grow up with merchants' and bankers' sons; see them wearing nice clothes and doing work that seems much more pleasant than the work of the farm. They grow up to know nothing about the realities of either city or country life.

The boy that is brought up on the farm sees more operations carried to a successful end than any other class of boys. He not only sees, but is aiding in these operations, in many instances owning an interest in some stock or field of grain.

Man lives more naturally on the farm. He is not in a great whirl of business like his city friend. The farmer's business is situated in such manner that he can get away occasionally and this broadens his view of matters. He can have his rural mail delivery and telephone, and get the news of the country almost as soon as the city man. The farmer is kept in direct touch with the latest.

If the young man has desires and longings for political and social distinctions, this desire can be more easily gratified in the country than elsewhere, for in no place is a man so completely lost as in the city. The successful farmer is not only highly respected, but is frequently asked to take prominent positions. A goodly number of our lawmakers have once been farmers, and as time goes on, the demand for this kind of citizens to make our laws is going to increase. To accomplish these ends, the young farmer must equip himself with a good agricultural education.

There is not the chance on the farm for the boy to become suddenly wealthy, but there is a splendid opportunity to live out one's ideals, enjoy life and at the same time lay by something for declining years.

Subscriber.

The Wisconsin Potato Growers' Association will hold its annual convention at Rhinelander, November 13th to 14th, and preliminary announcements have been mailed to large numbers of potato men in all parts of the state. Definite steps will be taken toward an improvement of the potato stock of the state. Many growers are selecting their exhibit stock for the potato show that will be held in conjunction with the convention. The premium list will be so arranged as to encourage the growing of standard varieties. Lectures will be given on the best varieties of potatoes, and on cultural, and harvesting methods. Exhibition space will be free and all reputable potato-growing interests applying, will, if possible, receive allotments in the exhibition hall.

LANDS AND HOMES

OHIO FARM FOR SALE

LAKEVIEW farm of 167 acres, located in Fairfield county, twenty-eight miles east of Columbus, the Capital of the State. All black land—well adapted to raising corn and general farming. Farm is leased for gas, having one very strong producing well, which affords free gas for the farmhouse besides an annual revenue. Will sell with farm, crops and implements and a fine span of young Percheron mares. Price $150.00 per acre including gas lease. Correspondence solicited from interested parties.

OSCAR BAKER, Owner, 204 Lincoln Ave., Delaware, Ohio

BARGAIN --IN-- Nebraska Corn Land

$4,000 DOWN and time on the balance at 5% interest will buy a 600-acre farm, we have for sale in the North Platte Country, Nebraska. It joins a railroad right-of-way, is near beet dump, has good house, barn and improvements. 100 acres in corn this year will go 30 to 40 bushels. 35 acres in alfalfa has produced three crops. Subject to irrigation Price $40 per acre. The soil is exceptionally good and this is a rare bargain. Address

ALL KINDS OF FARMS FOR all kinds of people, Free Catalogues. Hall's Farm Agency, Owego, Tioga County, New York.

TYPE VERSUS BREED.

THERE is no best breed of live stock for all purposes, but there is a best type for each distinct purpose. The choice herds and flocks have not been produced by chance, but are the results of careful selection, proper care and liberal feeding. All of these conditions, when properly fulfilled, mean a good animal, or a better animal than when either is absent. An expert judge can select his animals, but if he does not know how and what to feed, the result will be a pure-bred scrub. If he selects a poor, off-type animal, care for it as he may, the result will be the same, as nature did not intend otherwise.

The best type within the breed and the best methods known to retain this type should concern every breeder of pure-bred live stock in the United States. Breeds have been originated by men who had in mind ideal animals for distinct purposes. They have improved these animals by adhering to distinct types in the breeds. A scrub of the worst type may be improved, by the use of pure-bred sires of the proper type, as we all know, until a high grade is secured. In general appearance and conformation, it is frequently superior to many of the pure-breds of the breed. With horses, for example, advantage is taken of this condition by owners of grade stallions, and comparisons as to individuality are made, which usually result in the condemnation of the pure-bred. Record associations have been organized to record animals possessing other requirements for entry than that of known ancestry for many generations. In South Dakota alone, spurious pedigrees of many stallions have been discovered by the Stallion Registration Board, and, instead of being licensed as pure-breds, were placed usually in the "no-grade" class, or a stallion of no known breeding. By this the mare owner is given an opportunity of knowing something of the breeding of the stallion he selects to patronize. When the mare owner uses a pure-bred stallion he has in mind the type of horse he desires to produce on his farm, probably because of the notoriety of the type of that breed.

As judge of live stock for the past seventeen years at state and county fairs, and in purchasing the foundation stock for fifteen different herds and flocks for the agricultural college of South Dakota, and attending to the details of making the nine different combination sales of horses, cattle, sheep and swine for the stockmen of the state, my experience has been that quite a large majority of the so-called breeders are not breeders, but merely mixers. For example, the Short-horn is the most popular breed of cattle in the United States. This popularity must be credited to the fact that as a breed it comes nearer filling the dual-purpose capacity than any other. The cows are fairly good milkers, and when fat make good beef. Now, I do not claim this breed is as good for milk production as one specially developed along dairy lines, but some are extra good milkers and some are extra good beef cattle. I believe there is a greater variation in type in this breed than with any of the leading breeds. Hardly a square deal to expect Short-horns to be as uniform as the Aberdeen Angus or the Herefords for beef production, because they were improved in both the beef and dairy lines. The pure Bates strain of the Short-horn is a better milk producer than the pure Cruickshank strain. The "Scotch strain," if we might be permitted so to call it, does not necessarily belong to either the Bates or the Cruickshank type, although the Cruickshanks are Scotch cattle. Many of the pure Scotch strain are good milkers, but the majority of the pure-bred herds have been crossed with Scotch bulls until the Bates and Cruickshank families are badly mixed with Scotch blood. However, there are a few breeders who have ben wise enough to stand pat with the Bates and the Cruickshank families, and have maintained their respective types.

Again, a Holstein cow is usually black and white, and probably either recorded or eligible to record in her respective record association. These facts alone do not indicate that she is of any value as a milk and butter producer. Her character as a cow, and the records of the performances of her ancestors on both sides, her conformation, and temperament, have greater value than the fact that she is a pure-bred. She may not yield enough to pay for her board, and yet be a pure-bred Holstein-Friesian. As a rule, she must be of the dairy type so easily recognized as a milk producer, and not of the beef type. Unless this type is adhered to in both the sire and the dam, a first-class dairy herd cannot be established. The breed can be increased in numbers, but the desired type, in a few generations will be lost by mixing within the breed.

There are three distinct classes of men who keep pure-bred live stock—the breeder, the mixer and the dealer. Men of the first class are the only ones worthy of the name, providing they know the details of their business, and discard, and not record as pure-bred, all the progeny of pure-bred ancestry. Such men thereby maintain the type desired by the market, as this is the final destination of the majority of our animals.

The mixers are men who rely entirely on the judgment of others, who may be mixers also, for their sires, year after year, without ever making a selection. The animal purchased may be sired by Jones' Prize Winner and yet be a very inferior individual. However, having paid the price asked for the sire, ninety-nine times out of a hundred he will be used on the herd or flock. This mixer in turn will dispose of the offspring by referring to the record of the grandsire in the show ring. In fact, many of the catalogs of public sales today have prominent foot notes describing in detail the wonderful prices received for some of the ancestry many and many years ago. By figuring the actual per cent of blood in the veins of the animals to be sold, in most cases it is very small, indeed. Now, if we had some evidence of the type of this high-priced animal, and also if we had some indication that the type in the successive generations had been maintained, the animal in existense would be of greater value to us as a breeder.

The third class of breeders are those who buy and sell continually for the dollar that is made. This class will never do our breeds any good, and they may be tempted to make substitutions of grade or animals of no breeding for the pure breds. It requires years of selection to rid a herd or a flock of the undesirable characteristics caused by using a poor sire. Then why do we do it? It is because we have in mind a breed and not a type. Too much of this mixing is practiced today for the good of the breeds.

I have often been tempted to ask the following questions: In your judgment, does the type of the pure-bred you are keeping have as much weight with you as the breed? Did you purchase your foundation from a breeder, a dealer or a mixer? Do you select your animals according to the score card for the breed, or did you rely on a mail order, or have someone make your selection? If you had some one make your selection were you sure he had knowledge of the defects in your herd or flock and the requirements for the ideal animal in the markets? I have known so-called breeders to purchase inferior-typed sires because they were a few dollars less in price. Many of our farmer friends breed their mares to an inferior-bred stallion because the service fee is a few dollars less. The dollar seems to play an important part with the improvement of our live stock, and probably will until the breeders are educated to the point that the best type, at any price, is none too good. In this connection many of the states are doing a wonderful work in educating the youth along live-stock lines at the agricultural colleges, and by providing for state and county fairs.—[J. W. Wilson before Kansas Agricultural Convention.

SHEEP.

ELK GROVE SHROPSHIRES

I AM offering thirty choice rams for sale. Twenty four yearlings, five two year olds and one five year old, bred by Henry L. Wardwell. Prices $25.00 to $50.00. Address
FRANK RAINIER - - - - - - - - - LOGAN, IOWA

Echoes From a Kansas Farm

BY HENRY HATCH

The state, except for a few locations, has now been well soaked. The wheat belt, where rain was needed most, has had plenty.

Those with feed shortage are now expecting help from wheat pasture. Here is hoping that they get it, but we never have yet seen a winter so mild that stock may be wintered entirely on the wheat fields. But half enough from the wheat fields will be sufficient to pull many through in fine shape.

A local banker tells us his bank has more money to loan than ever before. Instead of coming in and asking for time extensions and larger loans, he says most of their customers are paying off their old obligations and are not making new ones. A shut-down on speculation is one probable reason for "paying up," as few are going into cattle feeding this fall.

Usually, at this season of the year, every bank in this section of Kansas has from one to two customers who invest heavily in feeding cattle. A great share of the cattle feeding is done on borrowed capital, and, inasmuch as few are as yet tackling the cattle feeding proposition, the demand for money is not great.

The first public sale of any size was held in the county last week. Everything brought old-time prices, so the pessimist who was having the country gone to the bow-wows has another guess coming. Everything sold well, but cattle exceptionally well. Ordinary milk cows brought from $75 to $85. Steers sold proportionally high.

We are feeding the first cut fodder first, having found that the more drouth stricken the fodder the more it weathers in the shock. We shall stack some of the more crinkled shocks, then during cold, stormy days the team will not have to go to the fields for the feed. Pulling fodder out of a field of mud is equally as unpleasant, so some stacked close around the feed lots comes in handy.

The sale just mentioned footed up to $3,200 anad all but $525 of it was paid in cash, so the reader can see that buying for future payment was not indulged in to any extent. Somehow, when a man pays spot cash we think he exercises more judgment and is not so apt to pay too much for an article just because of the auctioneer's urging.

The manure-hauling season has arrived and with no corn to husk, the Kansas farmer will have no excuse for leaving the yards knee deep for the cattle to wallow in when there is too much rain. This work goes off best when there is chill enough in the air to make a man work to keep comfortably warm. A man can then get out a good deal in a day, with a good spreader to unload it—and he can also eat a good deal when he comes to the table.

There has lately been a good deal of buying of second-hand autos in this section. Men will go to the cities and hunt for bargain cars, then bring them out to the country to sell at a profit. In some cases, with $50 or $100 added by the traders, the purchasers get cheap autos, then again they get stung. A trader's auto is like a trader's horse, it may not behave according to appearance.

A man with a mortgage tacked on any of his property has no business buying an auto. Pay off the mortgage first, then if there is enough left that is not particularly needed, buy an auto. It is common talk that many have autos who owe bills at the grocery of two and three years' standing. With the groceryman himself not able to own a machine, naturally he is impressed with the inequality of things as he looks out on the street and sees his tardy customer flash by in his luxurious machine.

Farm machinery sold well, contrary to the common belief. Before this sale we heard one man say that it would be possible to buy machines at sales this fall that were worth $30 for a mere $6 or $8, but the outcome of this sale proved that assertion radically wrong. Even a quite old walking cultivator brought $7.50.

The ten to twelve acres of creek timber on this farm is going to furnish considerable fire wood for the coming winter, as the dry season has put a quick finish on most of the trees that were apparently dying a slow death. We'll have the time to get the wood out and in shape for the stove, thus having no corn to husk will serve to cut down on the coal bill—no great loss without some small gain, as the saying goes.

I SHIP C. O. D.

FOR distance of 100 miles, choice registered Shropshire sheep; yearling ewes, $12.00; 2, 3 and 4 year old ewes, $10.00; 5 and 6 year old ewes $9; ewe lambs, $9. This special low price for thirty days, ending November 7th. Are of mutton type and in good condition. Crated and recorded in your name free. Some ewes bred for early lambs. Address

SHROPSHIRE RAMS Imported and home bred. Address James H. Heald, Tipton, Iowa.

THE LIVE STOCK MARKET

Union Stock Lards, Chicago, Ill., Oct. 4.—A new free trade area has been inaugurated by the signing of the tariff bill by President Wilson and the live stock trade is now face to face with a condition, not a theory. According to Canadian advices a lot of cattle have been held up in Ontario awaiting opportunity to cross the line free of duty. Should shippers use bad judgment and flood Buffalo and other Eastern markets next week, trouble will be the lot of local salesmen, as Eastern demand here will be sharply curtailed. Toronto also reports an accumulation of stock cattle awaiting elimination of the duty. These are held at the Toronto stock yards and will be cut loose en masse. The readjustment process which free trade will necessitate will not be effected instantly and will involve more or less upheaval, uncertainty and confusion. The immediate prospect is uncertain. Ultimately values in Canada will be lifted to a parity with quotations at United States markets, but no one can predict what will happen meanwhile and there exists a practical certainty that the arrival of any considerable quantity of low-grade foreign frozen and chilled beef and mutton will exert an adverse influence on values of cheap steers, butcher cattle and sheep, but prime fat cattle and lamb values are not expected to suffer, even momentarily, from this condition.

The selling side has been put over severe bumps in the cattle trade since high time last week. In the beef steer trade cattle selling at $8 to $8.75 have been hit hardest, by virtue of the fact that swelling receipts have carried an excess of that kind. Most cattle selling within that range are 50c lower than the high spot last week, while under the 8c line declines are 25 to 40c. Good heavy cattle have had a 25c setback, plenty of $9 cattle this week being the kind eligible to $9.25 a week ago. A few choice handy-weight and yearling steers have suffered only 10 to 15c but these are specialties in the strictest sense of the term. The whole list has been scaled down, a combination of adverse influences having been effective. Jewish holidays of ten-day duration, liquidation, a logical reaction after two weeks of steady appreciation and heavy marketing of Eastern cattle have all been adverse influences.

Nothing discourages producers more than unstable markets and a trade that is alternately 50c higher or lower within a few days is calculated to repress rather than increase production. A cattle feeder who was in the Chicago market ths week to find a 40c lower trade than a week ago, announced that he would not accept the gamblng chance necessitated by winter feeding operations, but would dispose of his corn and hay crops. If packers really intend to spend $500,000 in encouraging meat production no more effective methods could be devised than maintaining a stable market. Fluctuations in retail and wholesale quotations are rare, while stock yard prices are as erratic as the weather.

While the country may not be in the mood to convert corn into beef in wholesale quantities during the coming winter, it manifests no lack of confidence in the future of beef making. Whenever a report of a break in the values of stock cattle leaves market centers a mad rush to sit in at the bargain sale results. Hundreds of "railbirds" congregated at the Chicago yards Thursday and Friday owing to a slight drop in the values of stock and cattle earlier in the week. The fact is that every section of the United States is woefully short of young cattle and while the feed problem may simplify itself next year, cattle scarcity will become more acute. Many of the stock cattle now going to the country will not be made fit for beef during the winter, as was the case last year, but will be roughed and finished on grass next summer. It is a storage proposition and the less stock cattle weigh the more rapidly they sell. Iowa has been a greedy buyer all summer, and yet that state is 40 per cent short of a normal cattle supply. Distribution is unusually wide at present, Montana and Texas having been buyers at Kansas City recently, while Ontario stockers are going into Pennsylvania by the thousand.

A few loads of selected feeding cattle of strong weight have gone to the country this week at $7.75 to $7.90 and a breedy class of steer yearlings up to $7.65, but most of the strictly good to choice 500 to 800 pound yearling and two-year-old steers are selling at $7.25 to $7.50, a fair to good kind of like weights and plain to medium feeders at $6.50 to $7.10. Inferior mixed stockers ranged down to $5.90 and $5.25, but only a common and plain light sort went at $5.50 to $6.00. Well-fleshed 900 to 1,050 pound feeders of good quality have sold largely at $7.40 to $7.60. Stock and feeding cows are selling largely at $5.00 to $5.50, a choice young feeder class up to $5.75 while a spread of from $5.75 to $6.25 took the bulk of the stock heifers though a choice to extra class of feeding heifers sold as high as $6.60 to $7. Some inferior dairy-bred thin heifers sell down to $4.50 to $5.00.

Actual receipts of hogs at six leading western markets for September were 1,320,621, or 368,072 more than in September, 1912. Chicago alone had 587,877 of the grand total, being 399,430 more than any other western market. The first nine months of this year six western markets received a total of 13,724,045 hogs, against 14,358,401 like period last year and 13,969,180 corresponding period of 1911.

Close to 1,000,000 cattle registered in the aggregate at six western markets during the month of September, or 46,401 more than September, 1912. The nine months total at these markets is 5,421,206, or 163,164 more than like period last year, due to the rush of drouth refugees out of the Southwest to Kansas City. These supply figures do not lend credence to beef scarcity alarm, nor veracity to predictions of dollar beef steak cuts, but elsewhere than Chicago, marketings of the past three months have been mainly of "near-beef" and stockers and much of the big movement of August and September has merely represented shifting of immature cattle from drouth districts to more favored sections.

A surprising decrease in the number of cattle and hogs on feed, as compared with last year, is shown by reports to the Price Current. Kansas, Nebraska and Missouri make the poorest showing owing to the loss of their corn crops. Ohio has 88 per cent as many cattle on feed as a year ago and 97 per cent as many hogs while Indiana has 84 per cent cattle and 86 per cent as many hogs as a year ago. Cattle feeding in Illinois is 83 per cent of last year's and hogs 88 per cent, while in Iowa there are 83 per cent as many cattle and 75 per cent as many hogs. Kansas reports only 24 per cent as many cattle and 43 per cent as many hogs as a year ago. In Nebraska cattle are 51 per cent and hogs 62 per cent; in Oklahoma cattle 76 per cent and hogs 85; Missouri 45 per cent cattle and 62 per cent as many hogs as last year.

Health conditions for swine in the country at large are not the best, and facing the highest priced corn situation for fall and winter feeding that has confronted them in years, farmers are more inclined to sacrifice their young hogs at light weight than usual at this time of year. This has resulted in a big wave in supply the last week, indicating a total but little short of 150,000 head against 137,412 last week and only 82,541 head one year ago this week. This drawing against future supplies, it is held, can mean for the winter market only acute scarcity of good hogs and attendant high prices. Of this condition nearly every old-timer in the trade feels confident. An average weight of hogs for September down to 222 pounds, the lightest at this market since March, 1912, tells the story of sacrifice of many thousands of hogs at light weight, this average standing thirteen pounds lighter than for the same month last year and thirty-seven pounds lighter than for September, 1910.

Pigs, most of them fifty to 100 pound averages, have formed close to 25 per cent of Chicago porcine receipts this week. Within the past few weeks a draft has been made on the winter and spring hog supply that cannot but be reflected by scarcity and high prices later on. The little fellows are meeting a broad demand to supply fresh meat trade. Fully one-third of the 20,000 head of porcine stock here Friday consisted of pigs. More of them sold at $5.50 than at any other prices. Choice light hogs reached $8.80 to $9, but sales above $8.85 were on the "scratch" order. A good class of heavy packing hogs sold at $8.25 to $8.40 and desirable mixed at $8.30 to $8.60, while butcher and shipping grades, ranged from $8.60 to $9.00, few above $8.80.

Responding to sharply curtailed marketings, everything ovine has sold to better advantage here this week. Sheep, which have probably been in the lightest supply within years for this time of the year, advanced 25 to 50c and lambs gained 15 to 25c in value. Feeders show as much advance as fat classes. Some choice-fed wethers reached $5.10 toward week end and Montana grass wethers $5, the highest prices reached since July. Choice range ewes reached $4.60 and natives $4.75. A scarcity of fat sheep is indicated from now on and fewer fat range lambs are scheduled to arrive the balance of the western shipping season. Some "fed" western lambs are already being returned to the shambles. None of it appearing thus far has had enough feed and could not be sold to as good advantage as feeders fresh from the range. Traders fear that the high cost of grain will prompt the marketing of many sheep and lambs that have left central markets of late prematurely, especially when the weather turns bad. Best fat lambs are now selling at $7.40 to $7.50, the bulk at $6.90 to $7.35, with fair to choice feeding lambs going at $6.25 to $6.75.

Receipts of sheep at six western markets for the month of September reached the unprecedented September totals of 2,009,575 head, or 369,408 more than the same month last year. Both Chicago and Omaha set up new September records, and the Omaha supply was the largest ever received at that market. The big supply reduced the year's deficiency in sheep and lamb receipts for 9 months at six markets to 72,993 head. October promises to produce a lighter supply, however, than any October within the last three or four years, as the range movement out of Idaho and Nevada is now practically over and Wyoming and Montana will hold back more stock this fall to winter feed in the West than ever before. Receipts of sheep at six markts this week have decreased nearly 100,000 head from the big run of the week previous and another light supply is in sight for the coming week.

Worms Will Get Your Hogs If You Don't Let Me Kill The Worms

Fully nine-tenths of all hog losses are caused by worms. These parasites sap the very life blood of your hogs, rob them of nourishment, and so weaken them that they are easy victims of cholera or any other swine disease. Get your hogs worm-free and keep their digestive organs in proper working order and they will be **Cholera proof.**

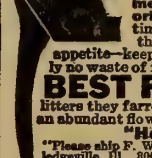
I'll Rid Your Hogs of Worms!

Feed **Columbian Stock Powders** to your hogs and inside of 12 hours you will **see** the dead worms that have been expelled. These powders are not a food but a highly efficient **medicated** preparation that not only **kills** but also **expels** all worms. These are the **original** Stock Powders. They have been on the market for the past 25 years and all that time they have been recognized as **best** by the largest, most progressive stock raisers of the country. They will put a speedy end to all digestive troubles in hogs, sharpen the appetite—keep the animals on their feed—so strengthen the digestive system that there is absolutely no waste of food—greatly shorten the fattening period with 25 per cent less feed.

BEST FOR BROOD SOWS Feed **Columbian Stock Powders** to your brood sows and see the strong thrifty litters they farrow. Keeps the sows in finest condition, strong, healthy, free from fever and insures an abundant flow of pure milk.

"Hogs Dying By Hundreds—COLUMBIAN Saved Ours"

"Please ship F. W. Diehl at Shannon, Ill., 500 lbs. Columbian Stock Powders in 250-lb. lots; and Geo. Diehl, Milledgeville, Ill., 300 lbs. in 100-lb. lots. Please RUSH the above orders as the hog cholera is something fierce all over the neighborhood. Hogs are sick and dying by hundreds. Ours were sick but Columbian saved them.
Yours truly, DIEHL BROS., Milledgeville, Ill.



90 Days Use Before You Pay a Cent

I don't want you to pay me a cent until I positively prove to you that **Columbian Stock Powders** are the quickest, surest and biggest profit makers you ever tried. Just mail coupon, stating how many hogs you are feeding and I'll make a free trial offer that gives you 90 days' feeding before paying a cent.

Columbian Self Feeder FREE!

Regular price is $5; but if you will write or mail the coupon at once, I will tell you how to get one **FREE.**

Free Book Most interesting and instructive book on stock raising ever published. Finely illustrated. Write for your free copy.

Agents Wanted—a few responsible farmers to represent me in every community. Big money and easy work. Get particulars.

Address, FRANK R. McDERMAND, Pres.

ROOTING CURRANTS AND GOOSEBERRIES.

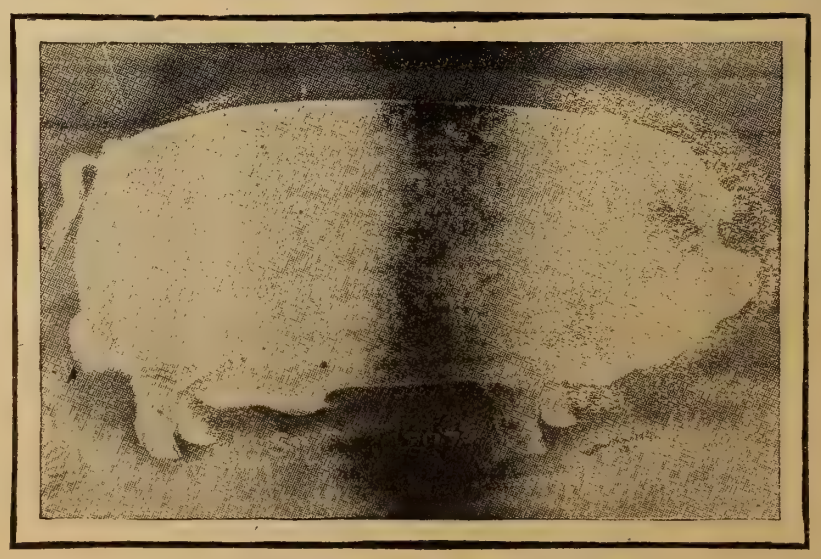
To the Editor of The Homestead:

I am classing these together, not because the treatment is the same, but because it is done in the fall, and we usually think of them together, somehow. The currant is one of the easiest fruits to propagate, and the hardest to get to produce, except in favored localities, especially south and west of the Missouri river. The gooseberry generally is a pretty good producer, easy to grow when once established, but it is difficult to grow from cuttings, though it starts more freely from layers, which is the method I am describing.

The currant should be propagated from cuttings, which can be taken at any time in the fall after the leaves fall off. Cut to six or eight inches in length, and set in rows eighteen inches apart, and two inches apart in the row. Give a good watering if it does not rain some soon after you set them unless the soil is pretty moist, for they should not get dry enough so the bark will wither any. Do not plant them when the soil is wet enough so it will cake, and press it firmly around the base of the cutting. As soon as severe cold sets in, mulch them, but not deep enough to prevent air reaching the cuttings freely, or the bark will rot on them. During the following summer cultivate thoroughly, and transplant to where you want them to grow, either the next fall, or following spring.

Gooseberries are best propagated from layering, which is done in the fall at almost any time. Clear out the leaves and trash from the base of the clump, and fill in with soil, packing it well, and drawing soil to the outside until you have a hill about six inches deep. As a usual thing the shoots will root well by the next fall, but I have known cases where there would not be a root. You can make the rooting more certain by partially severing the stems as low as possible before hilling, or you can beat them sharply, or cut a gash in the side, anything to make a wound, for roots will form at the wound readily. Be sure you have the wound covered with soil deep enough so it will be always moist.

These layers should be left until the following fall, when they can be removed and set where they are wanted. Cultivate well the first season they are planted out, but after that do not stir the ground in the spring until after the fruit has matured, or at least got pretty large, for any disturbance of the roots when fruit is setting will cause it to blast almost every time. A good cultivation after the fruit is gathered, and a heavy mulch applied will help them to make a good growth and insure a good crop the next year. L. H. Cobb.



A GRAND CHAMPION CHESTER WHITE.

The herd boar owned by **M. W. Young,** Ankeny, Iowa. See field note on page 34.

The Alart & McGuire Company has decided to continue its Wisconsin and Michigan pickling stations. The company is now operating in Wisconsin twenty-two salting stations as feeders to the Green Bay plant and employs from seventy-five to 100 people during the entire year. This force will be increased.

DATES FOR LIVE STOCK SALES.

FIELD MEN.

M. T. White, western Iowa and Nebraska (north of the Platte river). Address 4015 Izard St., Omaha, Neb.

Carlos C. Palmer, eastern half of Iowa and Minnesota and swine division in Illinois. Address 2714 High St., Des Moines, Iowa.

Fred V. Johnson, Wisconsin, Illinois, Indiana, Ohio, Michigan and Kentucky. Address 924 Hearst Bldg., Chicago, Ill.

A. T. Cole, Missouri, Kansas and Oklahoma. Address 3900 Holmes St., Kansas City, Mo.

John C. Halderman, Kansas. Address 4347 Harrison St., Kansas City, Mo.

J. C. Price, southern and western Nebraska. Address 145 So. 28th St., Lincoln, Neb.

C. C. Carlin, special assignments in central, southern and northern Iowa. Address 715 Clinton Ave., Des Moines, Iowa.

H. S. Hoard, Wisconsin. Address Room 201 Washington Building, Madison, Wis.

FIELD NOTES.

Forty head of Hampshire boars are advertised for sale by Roy E. Fisher, Winside, Iowa, on page 44. Mention The Homestead when writing him.

On page 27 S. I. Ring, Center Point, Iowa, is offering thoroughbred Barred Plymouth Rock, White Leghorn, Rock Island Reds and one pheasant male for sale.

Thirty-four yearling and twenty registered Shropshire ram lambs are advertised for sale on page 29 of this issue by S. Bennington's Sons, Elkader, Iowa.

Good Poland China boars at from $20 to $45 are advertised for sale by A. W. Stewart, Harlan, Iowa, on page 47. Write him about these at once and mention The Homestead.

John C. Miller, Harlan, Iowa, offers a good bunch of Berkshire fall and spring boars at farmers' prices on page 44. Mention The Homestead when writing him about these boars.

Before selecting Chester White boars those that want to buy will do well to investigate the merits of the spring and fall boars advertised by Harry Hurless, Ogden, Iowa, on page 46.

Registered Shropshire rams of all ages and of the best of breeding are offered for sale by E. N. Sterner, Agency, Iowa, in his advertisement that appears on page 29 of this issue.

Jas. H. Heald, Tipton, Iowa, imports and breeds Shropshire sheep, and on page 29 announces that he has for sale both imported and home-bred rams. Write him for prices and descriptions.

Forty choice Hampshire boars of all ages and sired by his noted prize-winning boars, are advertised for sale by Roy E. Fisher, Winside, Neb. Read his advertisement on page 44 and mention The Homestead when writing him.

The Dandy Iowa gates are high carbon steel, triple galvanized, made in the strongest possible manner and are sold at lower prices than most gates. They are made in all sizes. Write for booklet of special prices. Address Iowa Gate Co., 9th St., Cedar Falls, Iowa. See page 6.

Guns and traps are sold at factory cost by E. W. Biggs & Company, whose advertisement appears on page 6. They also sell trappers' supplies and pay the highest prices for furs. Write for catalog and trapper's guide. Address E. W. Biggs & Co., 138 Biggs Bldg., Kansas City, Mo.

Trappers are advised that the Rogers Fur Company, advertised on page 17, are prepared to pay top prices for coon, mink, skunk, muskrat and other furs at highest prices. Price and shipping tags may be obtained on application to the Rogers Fur Co., 190 N. Main St., St. Louis, Mo.

This office is in receipt of a communication from G. A. Ford, Parker, S. D., advising us of his arrival by the steamer, Etonian, with a importation of forty head of Percheron and Belgian stallions. The consignment includes many prize winners and animals of excellent draft horse merit.

Every year the need of a farm scale becomes more and more apparent. A good, durable, accurate scale will save its price nearly every year on the farm. The McDonald pitless scale belongs to this class. It is advertised on page 15 and a descriptive circular and price list may be obtained by writing Moline Plow Co., Dept. 11, Moline, Ill.

There is and always has been a romance connected with the business of trapping. Now more than ever, we believe, there is pleasing profit in the business, and that in almost any territory it seems that fur-bearing animals are increasing. In practically all of the prairie country it is possible for any farm boy to catch enough by trapping in the winter time to more than equal the amount he has made in the summer time by work. Victor traps are recognized as the best to use. They are advertised on page 6 and manufacturers have prepared an important book on the subject of trapping which every farm boy should own. It is to be had without cost by sending to the Oneida Community, Ltd., Oneida, N. Y., 8 Kenwood Ave.

Henry H. Johnson, Avoca, Iowa, wants to sell one extra heavy-boned, big-type Poland China yearling boar sired by Chief Wonder. See advertisement on page 38.

Don't forget Blake's public sale of Poland China hogs at Dallas Center, Iowa, Monday, October 13th. It includes size and quality together with immunity from double treatment.

W. T. Barr, Ames, Iowa, advertises his Chester White herd on page 46. This is the same herd which last year made a record-breaking public sale of brood sows. The pigs offered for sale now carry the same blood as that offering.

On page 46 Mrs. W. E. Zimmerman, Neola, Iowa, announces that she has for sale a large number of Single Comb Buff Orpington hens and cockerels at reasonable prices. She has also mammoth Pekin ducks at very low figures.

The advertisement of John M. Hall, Williams, Iowa, appears on page 27 this issue. Readers wishing to purchase White Wyandotte cocks or cockerels should avail themselves of this offer at once, as Mr. Hall has only a few to spare.

Porter's growthy Duroc Jerseys are the kind that always please buyers. They have popular blood as well as popular quality, plenty of bone, size and finish. Write for prices to J. C. Porter, Ogden, Iowa. See advertisemetn on page 45.

Farmers who want to buy Duroc Jersey hogs or gilts will do well to consult the advertisement of L. L. Woods, Grinnell, Iowa, as it appears on page 44 of this paper. Mr. Woods has April pigs, thrifty, stretchy fellows that carry the best lines of breeding.

G. O. Satre, Jewell, Iowa, makes a change in his Chester White advertisement on page 38 which should interest prospective buyers. Mr. Satre has a choice lot of spring pigs for sale and is quoting reasonable prices on them. He has quality as well as blood lines in his herd.

In an advertisement on page 44 Edward Dooley, Selma, Iowa, advises readers of this paper that he has for sale Hampshire hogs of both sexes and that he wants to sell in particular one heavy-boned yearling boar that weighs 400 pounds. Write him for prices and descriptions.

We wish to call the attention of live stock men who contemplate the making of public sales to the advertisement of Col. S. S. Templeton, Monroe, Iowa. Colonel Templeton is a practical auctioneer, a graduate of a prominent school and will do good service for his patrons. He solicits dates. Address as above.

Grant Lynn, proprietor of the Evergreen Spruce herd of Duroc Jersey hogs at Spirit Lake, Iowa, advises us that he wishes temporarily to discontinue his advertisement because of the fact that he is giving his hogs the double treatment. After thirty days he will resume his announcement and offer immune hogs for sale.

That the Berkshires owned by M. A. O'Brien, Reedsville, Wis., are top notchers is verified by all those who see them. He has twenty-five spring pigs of which he is exceptionally proud, which he is offering for sale. His stock is large, heavy boned and smoothly fleshed and of the most popular prize-winning families.

Enterprise sausage-making machinery is advertised on page 24 and arguments offered showing that every farmer would profit by this machine. The manufacturers have prepared a new book of household receipts entitled "The Enterprising Housekeeper." It describes more than 200 tasty dishes. Every reader of this paper may secure it by sending four cents in stamps to the Enterprise Mfg. Co., Dept. 83, Philadelphia, Pa.

Fur-bearing animals have increased so rapidly that men and boys make a good deal of pocket money every winter by trapping. Those who contemplate doing so this winter should read the advertisement of F. C. Taylor & Company on page 6. This firm buys furs of all sorts. They are glad to send catalog, price list and book on trapping free to any reader of this paper. Address F. C. Taylor & Co., 125 Fur Exchange Bldg., St. Louis, Mo.

Manufacturers of the Letz feed mill have brought out a new and important device in connection with that grinder. It is now a self-sharpening grinder and has an immense capacity. It is economical to the last limit. The fact that it is a self-sharpening grinder is a guarantee that it will not need so much attention as grinders that do not possess this merit. A ten days' free trial is given. For further details write to the Letz Mfg. Co., 206 East Road, Crown Point, Ind. See page 8.

Holstein cattle and Lake Mills, speaking of the latter almost implies the former. The Lake Mills Sales Company have had a great share in establishing this reputation by their successful sales of Holstein cattle. On October 29, 1913, they hold their eighth semi-annual sale, and from the quality of the cattle entered it should be one of the most successful sales in the United States. Their entry requirements are very strict, in fact, too strict for many breeders, and an animal may be barred from the sale up to the time of entering the sales ring, if anything unfavorable has developed. It will pay lovers and breeders of Holstein cattle to attend this sale, for so uniformly good lot of cattle is seldom offered. Write Frank Fargo, Lake Mills, Wis., for a catalog of the entries. When writing kindly mention this paper.

The Monarch steel stump puller advertised on page 10 is guaranteed seven hundred horse power and pulls stumps up to seven feet in diameter. It is guaranteed for five years. Descriptive catalog and prices can be obtained by writing Zimmerman Steel Co., Lone Tree, Iowa.

Sherwin-Williams paints and varnishes are advertised on page 10. The particular excellent properties of these paints are fully described in a book entitled, "Paints and Varnishes for the Farm." It is mailed free to any one who will address Sherwin-Williams Co., 683 Canal Road, Cleveland, Ohio.

The use of storage tanks for water has become more and more advisable and the interest in the best tanks is growing. The American Ingot Iron rust resisting tank is built for rough usage. It is advertised on page 6. You can get a copy of catalog J-5 if you mention the name of your dealer, when writing Dixie Culvert & Metal Co., Middletown, Ohio.

B. R. Burt, in an advertisement on page 38 offers a number of first-class Chester White boars at reasonable prices. He has also a few gilts and some fall pigs. These pigs are all guaranteed to be right. They are strong, thrifty, in good condition and carry the best and most popular lines of breeding. Address inquiries to B. R. Burt, Coggon, Iowa.

The Witte sawrig illustrated in the advertisement on page 17 is wonderfully economical and easilly operated. As a wood saw it stands without a peer. Many purchasers have cleared from $5 to $10 per day profit. For five-year guarantee and special prices address Ed H. Witte, Witte Iron Works Co., 1506 Oakland Ave., Kansas City, Mo.

"The car that meets every demand," is the heading used in the advertisement of the Kissel Kar on page 16. The manufacturers believe it to be best adapted to the use on the farm. It is economical, is easily operated, is up to date and well made. They solicit the investigation of prospective buyers. For catalog address Kissel Motor Co., 305 Kissel Ave, Hartford, Wis.

The well-known firm of Duroc Jersey hog breeders, J. W. Troy & Bros., place an announcement on page 38 in which they inform our readers that they have for sale male pigs of February, March and April farrow. These are, of course, of popular lines of breeding and have the same excellence of quality that distinguish the Troy stock. Address inquiries to J. W. Troy & Bros., Rose Hill, Iowa.

Mrs. Will Michael, Selma, Iowa, in sending copy for her advertisements found on page 27, writes: "All stock offered are in good thrifty condition. My Single Comb Brown Leghorns are fine in shape and color and bred from large, selected hens for many years. My ducks are in full feather, large, true Indian Runner shape, and bred from a record strain of layers. All stock guaranteed as represented."

Port Huron Machinery Company makes some statements in their advertisement on page 9 that have reference to the Port Huron husker shredder and are offered as proofs of the immense value of that machine to farmers. The last paragraph of the advertisement offers to give a handsome watch fob and a one dollar bill to readers of this paper under certain conditions. For further particulars address Port Huron Mach. Co., Des Moines, or Minneapolis, Minn.

For winter wear nothing can excel the Lanpher Sheep-lined coat advertised on page 22. It affords warmth and comfort and withstands the rough usage to which the farm coat is necessarily subjected. The line of Lanpher goods also includes a full line of clothing of all sorts that are particularly adapted to the use of the farm. The Lanpher book of styles of the season for both men and women will be sent on request by Lanpher, Skinner & Co., St. Paul, Minn.

Karl Ehlers, Gretna, Neb., White Wyandotte fancier exclusively for the past eight years, has eighty-six choice one-year-old Wyandotte hens and five one-year-old cock birds related to his first-prize cock at the Nebraska State Fair, 1913, which he is offering for sale at prices named in his advertisement on page 27. He also has a large number of White Wyandotte cockerels which he will sell at $1 each. After November 1st the prices on these cockerels will be raised. Write him for any information desired.

Waukesha County (Wisconsin) one of the great dairy counties of the state, is also the home of many excellent herds of pure-bred cattle. Among these is the Ayrshire herd of Lewis Roberts & Sons, Waukesha, Wis. Their herd consists of over forty of these red and white beauties. There are two herd bulls in service, one of which is Duke of Spencer 10737, a fine type of the breed. He won second in the 1913 Wisconsin State Fair, being defeated only by Bergenoch Cavalier, the world's champion Ayrshire bull. He has not yet been defeated at any county fair where shown. His sire is King's Chief Hillsdale 9137, one of the leading bulls of the breed and his dam is Hillsdale Violet 19697, a cow of wonderful milking ability. Roberts' Cavalier, the other herd bull, is a son of Bergenoch Gay Cavilier 1981, the world's champion Aryshire bull, and imported recently from Scotland. His dam, Barcheskie Cora 276666 is also an imported animal. They maintain a fine show herd of eighteen animals, every one of which was tested for tuberculosis only a week before starting on the circuit. Jack Roberts, who was graduated from the University of Wis-

consin Agricultural short course in 1910, is the active member of the firm and expects to develop one of the greatest Aryshire herds in the middle West. For further information write to Lewis Roberts & Sons, Waukesha, Wis. When writing kindly mention this paper.

The advertisement of the Fairbanks-Morse portable engines on page 8 presents a little idea with reference to the production of power to various kinds of work on the farm. The Fairbanks-Morse may be operated with kerosene, gasoline or low-grade distillates. It is economical and is made in sizes from four to twenty-five horse power. Catalog FC 603 tells all about them and can be secured by addressing Fairbanks-Morse & Co., 900 S. Wabash Ave., Chicago, Ill.

W. J. Hartung, advertises his Oak Lawn Duroc Jersey hogs on page 38. At the present time he has fifty spring pigs, male and female, which he is offering at remarkably low prices. It goes without saying that the Hartung herd carries blood as good as the breed affords, because Mr. Hartung has always followed that plan. He guarantees everything to be as represented and is certain to please customers as he has always done in the past. He ships only the choice of his herd. Write to W. J. Hartung, Maxwell, Iowa.

Hansen gloves which are the subject of an announcement on page 15 are particularly adapted to the rough work of the farm, because they are made of the best leather obtainable, and thus afford double economy of long wear and hand insurance. A catalogue and price list which may be had without cost takes special pains to describe Hansen's Glad Hand, a high quality buckskin, strong and soft, and a standby from every point of quality and service. Send to O. C. Hansen Mfg. Co., 137 Detroit St., Milwaukee, Wis., for a book.

Majestic ranges are advertised on page 11. The engraving in the advertisement shows the handsome appearance of this range. The Majestic is a malleable, which insure the maximum of lasting quality. It will not break or rust out, joints are absolutely tight and the manner of construction insures best heating. It has a copper reservoir and other features to make it the best kind of a stove. A book that describes this stove to the last detail can be had by writing to the Majestic Mfg. Co., Dept. 30, St. Louis, Mo.

T. S. Simpson & Sons, who advertise Shetland ponies on page 42, inform us that they made unusual winnings with their ponies at the recent Wisconsin State Fair. At the Kentucky fair they took first and third on aged stallion, first on three-year-old stallion, second on two-year-old stallion and a whole string of ribbons on females. Their ponies are this week on exhibition at the Virginia State Fair held at Richmond. Both Shetland and Welch ponies are offered for sale and at reasonable prices. Address T. S. Simpson & Sons, Aurora, Ill.

J. J. Edgerton, What Cheer, Iowa, announces a closing out sale of his herds of Polled Durham cattle and Duroc Jersey hogs. The event will take place on Wednesday, October 15th, as per announcement on page 38 of this paper. In particular Mr. Edgerton calls the attention of our readers to the fact that the sale includes a yearling herd bull of unusual lines of breeding, and two herd boars whose blood lines are of the most popular sort. Note that trains will be met at Gibson, Iowa. Any further information may be obtained by writing to J. J. Edgerton, What Cheer, Iowa.

Roofing for the house or barn is one of the most compulsory subjects, because without a good water-tight roof, any such building is not performing the use for which it was built. The Genasco roofing advertisement on page 10 gives lasting protection to all buildings. The manufacturing is a peculiar one, because the employment of Trinidad Lake asphalt serves to keep life in the roof through all kinds of weather. It is very cheap and may be applied by anyone. Sample and other information may be secured by writing the Barber Asphalt Paving Co., Philadelphia, Pa.

The more general use of automobiles throughout the country is demanding urgently that those who operate them receive at least sufficient training to do so with safety to the passengers and to others who travel the same roads. Such training is provided by the automobile training school, an advertisement of which appears on page 48 of this paper. This school goes still further, however, in that it gives so thorough and complete instructions and experience as to fit the graduates for positions as repair men, salesmen, garage managers, demonstrators, drivers or tractor experts. When men of inteligence have completed the course of training provided by this school they are fitted to earn salaries ranging from $75 to $200 per month. The equipment of the school is complete. The building is big, modern, fire proof and complete in every sense. It contains cars ranging in cost from $700 to $10,000 each. There is a lecture room in which competent instructors explain in detail all of the principles of the work. Then there are practical experiments and trainings in every feature of automobile construction, repairing or operating. After the student has completed the work in all departments he is given driving lessons which consist of actual experience on the streets in and around Kansas City. These lessons are given under the direct supervision of instructors until such time as the student has become proficient. Diplomas are issued to those who complete the course in its entirety and only to those who have done their work with the proper degree of accuracy. At the present time the managers are making a special offer in which they give their tractor course free. Information concerning this special offer and a copy of the big free catalog may be obtained by filling out the coupon in the advertisement and forwarding it to Automobile Training School, 1052 Locust St., Kansas City, Mo. See page 48.

F. F. & V. G. Warner, Bloomfield, Iowa, advertise sheep and hogs on page 29 of this paper. In a note concerning their stock they say: "We have an extra fine lot of Polled Delaine Merino lambs for sale, also some good ewes. All are recorded and of the best breeding. The have long, fine fleeces and are very large. We have bred for Polled lambs for fifteen years and are now producing extra good ones. Our Poland China hogs are of a very prolific strain, have good, heavy bone and are of the best of breeding. They are sired by Warner's Look, he by Big Look 2d, and other noted sires. We have had no cholera in our county and our hogs are strong and vigorous. We can please the most exacting."

The Shamrock Stock Farm, Farmington, Iowa, is prepared to supply Chester White spring and fall pigs of either sex. Writing under recent date the proprietor says: "My herd is headed by St. Patrick 22353. His dam was Lady Perfection, a Hoover-bred hog that was an Iowa State Fair winner in 1911. My brood sows are direct descendants of Umpire 3d and Clark County Bell, which were both ribbon winners. These hogs have extra good backs, excellent heads and ears, good bone and strong feet. They are the kind that make big hogs. I have never lost a hog with cholera or any contagious disease. My hogs are gentle as kittens. They have the greatest prepotency and their produce are uniformly white, no matter what the color of the dams may be. I do not put stress on the great amount of fat carried by my hogs, but on their merit as breeders. I do not want them so fat as to injure their prolificness. I furnish pedigree recorded in the American Chester White Association with all pigs sold and furnish crate free. Visitors are always welcome at the Shamrock Farm." For prices and additional descriptions write to L. I. Handlon, R. F. D. 3, Farmington, Iowa. See page 46.

W. J. Bernd, New Richmond, Wis., is a breeder of Short-horn cattle and Poland China hogs. His cattle are second to none when it comes to breeding, for they carry the blood of some of the greatest individuals of the breed. His herd consists of seventy-five head of pure breds, headed by the bull, Highland Sultan, a son of Orange Sultan, which was sired by the world's famous Whitehall Sultan. His dam was Mars Missie, of the Mars strain. She sold for $1,000 when she carried this bull, and his sire sold for the same price. He has never been defeated at the county fairs where shown and his sire won third at the 1911 International. He is pure white in color, four years of age and weighs 2,300 pounds. Among the females are several which have given fifty pounds or more of milk per day. One of these is Fancy's Best, from White Fancy and sired by Rosebud, a champion bull. He has both pure Scotch and Scotch-top breeding. Another female is Lady Levell 4th that won second at the 1909 Wisconsin State Fair and third at the American Royal. Her sire was Prince Arthur, one of Wisconsin's famous Short-horn bulls. In Poland Chinas he has over 100 head headed by the famous big-type boar, Wonder of Maurs, of Iowa breeding. His grandsire won second at the Minnesota State Fair and although he weighed over 1,000 pounds was a remarkably smooth, fine quality animal. The herd traces mostly to the sow, Big Feeny, that won second at the Wisconsin and Minnesota State Fairs in 1908. She weighed 700 pounds and carried smooth, firm flesh. His fall boar, Jumbo Wonder, which is shown as a senior yearling, weighs between 500 and 600 pounds. His sire was Wonder and his dam was of Matchless breeding. One of his sows, Mrs. Perfection, won sweepstakes over five breeds at the Watertown, (Wisconsin) Fair. She farrowed seventeen pigs and raised twelve last spring. His other herd boar is Magnet. The full brother and full sister of his sire took both championships at the Wisconsin State Fair and first-prize herd. His own dam won third at Minnesota State Fair with Commodore Chief by Iowa Model and out of a dam by Muncie Chief. He also has a few by Col. Crimson Wonder by Smith's Crimson Wonder, out of a dam by Royal Colonel. Mr. Woods has been breeding Duroc Jerseys for a number of years and has been raising the kind that make good in the breeding pen. See page 44 and write him at once, mentioning The Homestead.

twenty-three in the ring. For further information write to W. J. Bernd, New Richmond, Wis. Kindly mention this paper when writing.

Some man who wants to buy some good registered Holstein-Friesians should go and see Sol Frank, Sioux City, Iowa. He has fourteen head of well-bred registered cows, heifers and young bulls and he wants to close them out, as he has not got room to keep them. Among the cows is a daughter of Korndyke Mercedes De Kol and a daughter of Maplecroft Twist De Kol, together with some very choice heifers and three young bulls. There is a bargain in this bunch of cattle. He wants to sell the whole lot and you will find these are bargains at the figure he is asking for them. When writing him kindly mention The Homestead.

An instance showing the extraordinary value of a real good brood sow is that of the Duroc Jersey sow, Crimson Duchess, owned by H. Gilbert, Perry, Iowa. This sow was bred by John Justice, Ankeny, Iowa, and farrowed March 30, 1908. Her sire was a son of that extraordinary hog, Crimson Wonder Again, and her dam a granddaughter of Ohio Chief. The dam of Crimson Duchess was a sixth-prize winner of the Iowa State Fair of 1907. Mr. Gilbert has kept accurate record of the produce of this sow. In nine litters she produced 125 pigs, ninety-nine of which were raised. Every one of these ninety-nine, so far as known, has been retained as a breeding animal, and they have been distributed to herds over a wide range of country. Last winter eleven of her gilts sold at a public sale at an average price of $51.25 each. Mr. Gilbert says Crimson Duchess is not a pretty sow as she is extremely long and if fattened would easily weigh 900 pounds.

L. L. Woods' Durocs.

L. L. Woods, Grinnell, Iowa, is offering for sale a fine lot of spring and fall Duroc Jersey boars sired by

NEXT WEEK'S SALE PROGRAM

Friday, October 17	Duroc Jerseys, Fred Swan, Missouri Valley, Iowa. Poland Chinas, Minnick & Nansel, Council Bluffs, Iowa.

Ruebel Bros.' Immune Boars.

A splendid lot of big-type Poland China boars are advertised for sale by Ruebel Bros., Marathon, Iowa, on page 47 and the beauty of it is, they are not only sired by some of the most noted boars of the breed, but they are good boars and they are immune. The boys write us and tell us they never had a better line up of boars than they are offering this fall and they would like to have Homestead readers who are going to want a boar to call and see them. The boys will treat you right on the boar question if you will only go and see them. They can fill your order no matter what you are looking for. Read their advertisement and when writing them kindly mention The Homestead.

J. D. Judge's Short-horn Sale.

On December 17th, J. D. Judge, Carroll, Iowa, will make a public sale of forty-five head of Scotch and Scotch topped Short-horns at his farm adjoining town, and he will put up one of the best offerings of cattle that he has ever listed for a sale since he has been in the business. The major portion of his offering will be Scotch cattle of the very best sorts, and many of the cows will sell with calves at foot. He is selling twelve head of young bulls in the sale, all of which are Scotch and nearly all are sired by his present herd bull, Sultan Standard, a bull that he secured from Frank Harding at a long price a few years ago. Mr. Judge is selling an unusually good bunch of Scotch bulls in this sale, and there are several that are good enough to lead any of our best herds. He is selling a splendid white bull by Sultan Standard that is an outstanding good bull, is bred in the purple, is a grand, good individual, and is just such a bull as breeders are looking for to put at the head of their herd. He is listing one of his present herd bulls, a big roan yearling that he secured from Mr. Kilgour to breed his Sultan Standard heifers to and he is a splendid bull. Then there are several others that are bred along the same lines and are the making of very promising bulls. The Judge sale will follow the C. A. Saunders Omaha sale, and parties can come direct from Omaha that night or the next morning. Drop Mr. Judge a card and have him place your name on his list for a catalog and kindly mention The Homestead when doing so.

Angus Cows for Sale.

If any of our readers are thinking of purchasing some good Aberdeen Angus cows and heifers we would suggest they write Chas. Escher & Son, Botna, Iowa. They have two car loads for sale, half of which have calves at foot. They also have thirty choice young bulls for sale, many of which will make good herd bulls. Write them or go and see these cattle. They have some splendid bargains to offer and you will find their prices are right. When writing them kindly mention The Homestead.

A Good Herd Boar for Sale.

Some of our substantial Poland China breeders who are looking for a good herd boar might be interested a splendid yearling that C. L. Thuirer, Fostoria, Iowa, is offering for sale. He is a son of Barker's Hadley, he by Hadley Golddust by Big Hadley. His dam is Thuirer's Sunshine by Orange Pride by Big Orange. He is an outstanding good one and he can be bought for $100. He is one of the best bargains we know of at the price and some wide-awake man who gets his order to Mr. Thuirer early will get a snap in this boar. Kindly mention The Homestead when writing him.

Ellerbrocks' Poland Boars.

On page 38 will be found the Poland China boar advertisement of Mrs. Peter Ellerboek & Sons, Sheldon, Iowa, who are offering thirty head of large, stretchy spring boars for sale and they have some good ones. Some of these are sired by old A Wonder, the boar that for several years stood at the head of their herd. Others are sired by Longfellow Again and Peter's Jumbo and they are out of the very best sows they have on their farm. They are pricing these boars at from $35 to $50 and a few choice ones for $60. However, you can get a good boar at a reasonable price and if you will only go and see these boars you will never leave the place without one. When writing them kindly mention The Homestead.

Honeywell's Berkshires and Jerseys.

One of the nicely bred herds of utility Berkshire swine in Nebraska is the herd owned by J. K. Honeywell, of Lincoln. Mr. Honeywell is a pioneer in the Berkshire business and it is but fitting that he should at this time have a nice lot of stuff bred mostly from stock of his own raising. The blood of prominent sires is to be found in liberal quantity in this herd and an item of much interest is that this stock may this year be purchased at as small or less cost as the ordinary kind usualy sells for. Homestead readers that need a good boar or that are looking for some good gilt stock may be supplied from this herd. Interested parties should address Mr. Honeywell at once. High class Jerseys are also bred on Honeywell farms and a few Jersey bulls are now for sale. When writing Mr. Honeywell address him at Lincoln, Neb. See the advertisement on page 38.

Prize-Winning Hampshire Boars.

C. S. Bratt, Araphoe, Neb., one of the best known stockmen of the western part of the state, starts an advertisement in this issue in which he offers some prize-winning Hampshire boars. Some of these boars were in the second-prize litter at the Nebraska State Fair, and were first-prize litter at Colorado State Fair. These pigs also won prizes in their single classes. They come of extra good breeding stock, are good in every respect and will now be sold at prices that represent only a part of their value. Mr. Bratt is extremely short on corn son, and in order to save a couple of months' feed he will cut the price in the middle. The man that needs a boar will find this the opportunity that he has been waiting for, and should write at once, as Mr. Bratt is positively going to sell them. Kindly mention this paper and address at once, C. S. Bratt, Arapahoe, Neb. See page 38.

Messenger's Grand Champion Hampshire Sale.

Clayton Messenger, Keswick, Iowa, will hold his first sale of Hampshire swine on October 14th. At that time he will sell seventy-five boars, about two-thirds of which will be sired by his undefeated grand champion, Messenger Boy, the boar that has won every grand championship at every state fair where shown during the years 1912-13. It is a record that few boars of any breed have been able to make. Not only has he proven a show boar, but as a sire he is making good. His sons and daughters were prominent winners at the leading state fairs this year and those who attend Mr. Messenger's sale and look over his offering are bound to say that Messenger Boy is one of the greatest sires of the breed. There will be two senior yearlings, three junior yearlings, twenty fall yearlings and about thirty-five spring pigs in the sale, all sired by Messenger Boy. Among the yearlings are some that have won first place at either the Iowa, Minnesota, South Dakota or Sioux City Fairs. It will be a great opportunity for someone to get a prize-winning herd boar sired by an undefeated grand champion. Mr. Messenger has made every effort to get together a high-class bunch of boars for this sale and he invites every man interested in this breed of swine to attend this sale and pay him a visit. No matter what kind of a herd boar you are looking for, you can find him among the large number in this offering. Send bids to Carlos C. Palmer,

Homestead representative, in care of Mr. Messenger and they will receive careful attention. See page 38 and write for catalog mentioning The Homestead.

Brouhard's Chester Whites.

In an advertisement on page 38 O. J. Brouhard asks the attention of those who are in the market for Chester White boars of spring farrow. Mr. Brouhard has but recently established his herd, but he very sensibly secured his start from the Dunbar and Parr herds. He took the choicest brooding sows to be found in it. One of these sows which is dam of several pigs which are to be sold, was winner of first prize as junior at the Iowa State Fair, 1912. Another was a winner at Sioux City. The sire of the pigs was also a ribbon winner. Mr. Brouhard's pigs have size, good bone and a lot of finish and should sell at remarkably low prices. Address O. J. Brouhard, Colo, Iowa.

Russell Offers Angus Bulls.

On page 38 Chas. M. Russell, Carroll, Iowa, advertises twenty head of good young Aberdeen Angus bulls for sale and these are sired by his noted Blackbird bull, Blackbird Barney, and Elfin of Homedale. These are Blackbirds, Trojan Ericas and the several other noted tribes that have helped make Angus history. Mr. Russell desires to sell these bulls and he is making the price on these where they will sell. He has bulls that will make splendid herd headers and he has some that will make good farmers' bulls. However, he wants to sell these bulls and as bulls are not very plentiful it behooves those of our readers who want bulls to go and see these at once and get one before they are all gone. When writing him kindly mention The Homestead.

Hanks & Bishop's Duroc Boars.

Hanks & Bishop, New London, Iowa, are advertising spring boars for sale on page 38. A representative of this paper recently visited the herd and found that they were in position to supply big, strong, heavy-boned boars at reasonable prices. These boars are sired by Proud Colonel, Wonder's Model, and Model Wonder, all three of which have been prize winners at the Iowa State Fair. Very few herds can boast of three boars at the head that are the equal as sires of the three boars at the head of Hanks & Bishop's herd. The young boars are in fine breeding condition and it will pay anyone interested to write these gentlemen for prices and descriptions before buying. When writing kindly mention The Homestead

Minnick & Nansel Sale.

On October 17th, Minnick & Nansel, will make a public sale of fifty head of large-type Poland Chinas at the Kiel barn, Council Bluffs, Iowa. There will be a good herd boar in this sale from the Minnick herd called Big John and he is a grandson of Big Orange. As Mr. Minnick has disposed of his farm he is therefore selling everything, including brood sows with litters, fall sows and spring gilts. Among these are sons and daughters of Big Victor, I Am Big Too, Big Tom, Big Omaha, Metal Top and other noted sires. Mr. Nansel has selected his very best spring boars and gilts, and he is selling some good ones. He is selling some very excellent spring boars that are sired by Big Tom and Big Omaha and some good things by a boar called Hadley N. It will be a splendid sale for those who are looking for some good bargains in Poland Chinas. Write Minnick & Nansel, Council Bluffs, Iowa, for catalog and mention The Homestead. Bids sent to Col. N. G. Kraschel will receive attention on day of sale. See page 39.

Walker Bros. & Branson Short-horn and Polled Durham Sale—Last Call.

With this issue of The Homestead we are calling attention for the last time to the sale of Polled Durham and Short-horn cattle that will be held by Walker Bros. and L. B. Branson, Ord, Neb., on October 15th. This sale will consist of the greatest lot of Polled Durham cattle that have ever been sold in the West and will also include the entire herd of cattle owned by L. P. Branson. Most of Mr. Branson's cattle are Short-horns, but he has a few Polled Durhams. Rarely such a great number of cattle are cataloged for an afternoon sale and it will probably mark the selling of many bargains. No less than thirteen bulls are listed for this sale, and among them are herd heading bulls for top herds. The bulls that have been in use in the Branson herd will be offered, as this entire herd will go without reserve of any kind. The young bulls offered from the Walker herd contain three or four as good bulls as have been sold in the West in some time. One of the best herd-heading prospects that we have seen sell in the Polled Durham line in a long time is a roan January bull by Cupbearer Prize, and his dam is Hero's Lady by the celebrated Roan Hero. This bull is well enough bred and good enough individually to please those looking for something first class. There are a couple of reds and another roan that are almost as good, that by some might be liked better, and they are all of good size for their ages and will mature into thick, beefy bulls with plenty of scale. The Polled Durham cows comprise one of the very best lots of cows that have been sold in the middle West in a long time. They are exceptionally thick and smooth, and among the number are many that have already done well in the show rings, and others that look pleasing possibilities. The Short-horn part of the sale comprises some Scotch cattle and a nice lot of extra thick Scotch topped stock, and all are regular and good breeders. Mr. Branson states that not a thing but the regular producing sort are listed, and practically everything of breeding age will have calves in the sale to show for them. We want to urge Homestead readers to attend this sale if possible. There is sure a lot of fine stuff to be offered, and there has never been a time in the history of this country when good cattle were really worth as much money to the buyer as they are right now. It is our firm conviction that these cattle will advance very materially within the next twelve months. If you have not the catalog, wire for one immediately, or at any rate plan to attend this sale. Parties that are unable to attend, may send their orders to J. C. Price of The Homestead and such commissions will be handled with the utmost care. If writing, mention The Homestead. See page 43.

Glissman's Holstein Sale.

On October 21st, at South Omaha, Neb., Henry C. Glissman, owner of the celebrated Rock Brook Holstein Farm, and one of the most noted authorities on dairy cattle in the West, will make a public sale of 140 head of Holstein-Friesian cows, heifers and young bulls. It is one of the greatest sales of its kind that has ever been offered here in the West and it is going to be a great place for farmers and dairymen to buy some splendid milk cows. He is selling sixty-five head of good cows that are coming fresh or will have calves at foot, and among these are some great milk cows that will be great money-makers for anybody who buys them. Quite a few of these cows will have calves at foot. There will also be fifty head of one and two-year-old heifers in the sale and these are going to make splendid milk and butter cows when matured. Then there will be fifteen head of heifer calves in the sale. Altogether it is the greatest sale of high-grade Holstein-Friesian cows and heifers that has ever been sold here in the West. He will also sell ten head of registered young bulls in this sale and these are splendid individuals and they are sired by some of the most noted bulls in this country. Another feature of the Glissman sale that will appeal to every man who is thinking of buying a cow and that is that these cattle are all tested by both state and federal authorities and they can be shipped into any state in the Union without any question. These cattle are all acclimated and home grown, and that is another feature that will appeal to all western buyers. It will be unquestionably the great dairy sale of the fall season in this western country, and if any of The Homestead readers are going to want some splendid milk cows they cannot afford to miss this sale. Write Henry C. Glissman, Station B, Omaha, Neb., for further particulars about this sale and kindly mention The Homestead. See page 13.

Rude & Son's Duroc Sale.

On October 22d, Rude & Son, Moorehead, Iowa, will make a public sale of forty head of Duroc Jersey boars and sows and they have a splendid lineup for the breeders in this sale. They are listing thirty-five head of boars for this sale and among this number are nine head of fall boars and two herd boars. One of these is the great Iowa Col., a son of the well-known Tippy Col., and he is out of a dam by the Great Orion Chief. This boar is one of the largest boars in the West and he is an excellent breeding boar. He was a third-prize winner at the Interstate Fair at Sioux City in 1912, and he has done a great work in the Rude herd in siring extreme size with plenty of bone. Quite a few of the spring boars that will be sold in this sale will be sired by him. Another richly bred boar they are selling is Rude's C. W. I. Am, a son of the old and original Crimson Wonder I Am, and out of Proud Helen, she by Proud Col. They have used this boar in their herd and he is a good breeder and somebody who wants a good Crimson Wonder boar will be pleased with this fellow. The only reason the Rudes are selling these two boars is because they have too many boars now on the place and as they have so much of the great of these they have decided to let them go. The nine fall boars they are offering are large, big-boned fellows and are sired by Iowa Col., I Am A Golden Model and Brilliant Wonder. The spring boars are sired by their great breeding boar, High Chief, and you will find these to be as good boars as you have ever seen coming from the Rude herd. This boar was a first-prize winner at the Iowa State Fair in 1912 and was a winner all around the circuit of state fairs. They bought him from the Waltemeyer Bros. after he had made a successful campaign, and he is now coming forward and demonstrating his ability as a most excellent breeding boar. Some of the best boar pigs in this sale will be sired by him. Among these are four that are out of Rude's Golden Queen, and she is a daughter of the well-known boar, Model Wonder. These are of the outstanding kind and they will make splendid herd headers. Three other splendid High Chief boars are out of a dam by Freed's Col., and two other good ones are out of a dam by Tientsin. They are listing four or five of their good sows that will sell with litters at side by their well-known herd boars. Write for their catalog at once and kindly mention The Homestead. Bids sent to M. T. White, Homestead representative, in care of Rude & Son will receive attention on day of sale. See page 36

J. R. Blackburn's Duroc Sale.

A really choice herd of Durocs are owned by J. R. Blackburn, Ord, Neb., and on November 5th a selected lot of boars from this herd will be sold at auction. Mr. Blackburn is newly located at Ord, but he is not a new man in the Duroc business, as he was formerly at Royal, Neb., and showed many prize winners including the champion boar at Sioux City in 1911 when Proud Col. won that honor. The herd today contains much of the blood of Proud Col.—a son, Crusader Col., having been much used. Proud Col. is a full brother to Freed's Col., the Iowa State Fair champion, and it might be assumed that championships sort of run in the family. Practically the entire spring pig crop is the get of Crusader Col., and we want to say that they are as uniform a lot of pigs as we have seen this season. They are all a bit late, but are nicely grown. There are some real heard heading boars among the thirty-five to be sold. A pair of boars from a sow by Uneeda Crimson Wonder are very choice. Some others from a sow by Golden Model 15th are about as good. Still some others of exceptional merit are from a daughter of Wallace's Wonder. Sows by Queen's Wonder, the O. G. Smith boar, Red Chief Wonder, Belle's Crimson Wonder, Col. Tippy, Improver's Best and Defiance, all have litters and among them are many choice ones. Readers of The Homestead that will be in the market for a good boar should keep this sale in mind. The sale comes at a time when those that will need a boar will have immediate use for him. Keep this sale date in mind and if interested send name today to Mr. Blackburn that he may forward a catalog to you as soon as off the press. When writing kindly mention The Homestead.

Of Interest to Trappers.

With this issue of The Homestead the Lincoln Hide & Fur Co., 1014 Q St., Lincoln, Neb., are starting an advertisement that is particuluarly interesting to the farm boy that would like to earn a little extra money, or to the man that makes the winter trapping of fur-bearing animals a business. This company is one of the largest and best known anywhere and their scale of grading and prices have brought them thousands of satisfied customers each season. These gentlemen are prepared to pay the highest prices for all sorts of furs and in addition they handle all other kinds of hides. They will tan and make up into robes or coats all kinds of hides, and their prices are as low as the lowest and the quality of workmanship first class. Kindly notice the advertisement of this company that appears on page 12, and be sure and send for their price list and shipping tags without delay. When writing address the Lincoln Hide & Fur Co., 1014 Q St., Lincoln, Neb.

Akers' Poland China and Short-horn Dispersion.

F. W. Akers, Laurel, Iowa, will disperse his herds of Short-horn cattle and Poland China hogs on October 16th. The sale will take place in Gilman, Iowa. Mr. Akers has sold his farm which makes it necessary for him to dispose of his pure-bred herds. Forty Short-horns and fifty Poland Chinas make up the offering. There will be included in the Short-horns the herd bull Baron Surmise, three bull calves and the balance are females. Baron Surmise is sired by Gloster Baron and out of a Secret cow by Bapton Admiral. All of the cows of breeding age will have calves at foot or be bred to Baron Surmise. Pride's Lady is a good eight-year-old red cow sired by Baron Kear 2d and comes from the Queen of Beauty family that have done so much good in the herd of Owens Bros. Two of the young bulls in the sale will be about twelve months of age and both are sired by Baron Surmise. One of them is a Lavender and the other a Queen of Beauty. Rosebud 7th is a good three-year-old heifer sired by Choice of Archers and out of a Rose of Autumn cow by Peerless Archer. Autumn Violet 5th is an extra good two-year-old heifer sired by Baron Surmise and comes from the Autumn Lady family. Beauty 2d is a three-year-old Queen of Beauty sired by Cumberland Brough. The Poland Chinas consist of five brood sows, fall yearlings and spring boars and gilts. Mr. Akers' Poland Chinas have been the useful kind, having lots of size and bone and are bred along big type lines. See page 34 and write Mr. Akers for a catalog kindly mentioning The Homestead.

Burgus Poland Chinas.

Harry E. Burgus, Osceola, Iowa, makes his initial bid for patronage as a breeder of Poland China hogs in an advertisement on page 38 of this paper Mr. Burgus is a young breeder, but he has started with stock of a popular class and is adopting plans of sale that are certainly out of the ordinary. The pigs which he offers are by Big Spot, he is a grandson of the noted A Wonder, and their dams are of equally popular Mastodon strains. Big Spot weighed 800 pounds as a two year old and the brood sows were equally notable because of their size. Do not fail to read the remarkable proposition made in his advertisement. Additional particulars may be learned by writing to H. E. Burgus, Route 6, Osceola, Iowa.

Blake's Last Call.

In previous issues of this paper we have gone somewhat into detail with reference to the blood lines of the offering of forty-five head of Poland China hogs to be sold at Mr. Blake's farm near Dallas Center, Iowa, Monday, October 13th. At this time we wish only to add that the consignment is a worthy one from every point of view. Its usefulness is unquestioned, blood lines are satisfactory and immunity from disease has been provided through early treatment by the simultaneous method. Catalogs may yet be obtained by writing to R. R. Blake, Dallas Center, Iowa. Readers of this paper who are unable to attend may forward bids to C. C. Carlin, care of Mr. Blake, and they will be given unusual attention.

Pelzer's Poland China Sale.

On Saturday, October 11th, at Atlantic, Iowa, Frank Pelzer will make his annual fall sale of big-type Poland China boars and sows and he is selling one of his characteristic offerings, and those who know Frank, know that this means that he is selling some good ones. He is selling fifteen large, rugged, fall boars, about as good as we have seen in our rounds this fall. When it comes to size he has them big enough for anybody. These fall boars are all sired by Tom Keene, a son of the Nebraska prize-winning boar, Big Tom, and quite a few of them are out of daughters of old Sampson, a boar that practically made the Pelzer herd. He has a great line up of spring boars and these are sired by his new boar, Orange A., one of the greatest living sons of the noted Big Orange. He is also selling some splendid sows in this sale. The sale will be held right in town at the Swab Feed Yards, and good railroad connections can be had from any direction. Remember this sale will be held on Saturday of this week so make it a point to go. It will be an excellent place to buy your boar or a few sows.

Williams Bros.' Great Poland Sale.

If you want to see a great offering of well-bred Poland China boars and sows, the thing you will have to do is to go to the sale of Williams Bros., at Villisca, Iowa, on October 23d. These boys have lined up a great offering for this sale and they are the pick of over 300 head that they have now on the farm. They are cataloging forty boars and ten sows in this sale and when you consider the size and the quality of their offering you will admit there is no better than they will sell at this time. They are selling twenty-five head of boars in this sale that are sired by their great hog Pawnee Nelson, and the breeder or the farmer that cannot get a herd boar out of this bunch is indeed hard to suit. They also sell quite a number by their other big boars, Big Sampson and A Jumbo, and there are some very attractive boars in this bunch. They will sell three or four spring gilts, three aged sows and four yearling sows, and these are the pick of the bunch. We mean by this that these sows and gilts are among the very best they have and they would be a credit to any herd, we care not where they go. The yearling sows are sired by Bib Sampson, Pawnee Nelson and one by A Jumbo. The gilts they have selected for this occasion are all daughters of Pawnee Nelson, and it is needless for us to say they are good ones. There will be six boars in the sale that are sired by Big Sampson, a few by A Jumbo and the remainder will be sired by Pawnee Nelson. It will be to all intents and purposes practically a Pawnee Nelson sale. In other words there will be about twenty-five head of Pawnee Nelson boars in the sale. Among the best of these will be five boars out of Villisca Belle 2d. Three of these are very choice, and any one of these will make splendid herd boars. Two very thick, large, spring boars are out of Nodaway Belle 2d and two very choice boars and one gilt are out of a sow called Lady Fashion. All of these are extra good and no man will go wrong that buys any one of these. Some other good Pawnee Nelson spring boars are out of Sweet Look and Monarch Lady, two of the best sows they have had in the herd. The boys are certainly putting up a great offering and we will stand by everything we have said for it and when the buyers go to their sale and see their line up for this sale they will agree with us that it is all that we have said it is. There may be some larger herds, but there are no better herds, and theirs is as large as any of them. These boys can trot out for you some of the largest and best sows you ever saw, and while they do not do a great deal of talking—possibly not enough

CONGRATULATIONS ON RESULTS OF EFFICIENCY

FRANK S. WEST & SON are importers and breeders of Percheron and Belgian horses at Wood River, Neb. They advertised in The Homestead. They were pleased. This is what they wrote: "We wish to congratulate you on the results that your paper attains, and also to compliment the field man who covers this territory." The same service can be secured by other reputable breeders of good stock. Write for rates.

HOMESTEAD CO. - - DES MOINES, IOWA

for their own good—they nevertheless have the goods to show, and they will show you one of the best offerings you have seen this fall. We, therefore, urge you to attend their sale if you are going to want a right good boar or a few good sows. Write for their great catalog at once and kindly mention The Homestead. M. T. White will represent The Homestead at their sale and will look after any bids sent in his care.

Branson's Duroc Sale.

H. I. Branson, West Branch, Iowa, will hold a sale of Duroc Jerseys at his farm October 15th. He will sell fifty head, consisting of twenty-five spring boars, fifteen spring gilts and ten spring and fall yearling sows. The entire herd has been vaccinated with the double treatment and, therefore, is immune from cholera. The spring pigs are nearly all by Branson's Golden Model by Golden Model 2d and out of Miss Wonder, making him a full brother to Blue Ribbon Model, the first prize pig at the Iowa and Nebraska State Fairs in 1911. There will be five fall sows sired by Wilson's Defender, a full brother to Mr. Browning's noted Disturber. There will be five fall sows sired by Wilson's Defender, a full brother to Mr. Browning's noted Disturber. There will also be three fall sows sired by H. I.'s Model, a grandson of Crimson Wonder Again. Two yearling sows will be sired by Beachy Commodore. The spring pigs have plenty of size and are well grown. They are just the kind that farmers and breeders are looking for. Carlos C. Palmer, Homestead representative, will attend the sale and care for any bids sent in his care. See page 35 and write for a catalog mentioning The Homestead.

Cold's Short-horn Dispersion Sale.

C. J. C. Cold, Berlin, Iowa, will close out his entire herd of Scotch and Scotch topped Short-horn cattle at the farm on October 21st. Mr. Cold has sold his farm, which necessitates his dispersing his Short-horns. He will sell forty-five head, consisting of ten bulls and thirty-five females. There will be sixteen cows, either with calves at foot or safe in calf, and a fine bunch of yearling and two-year-old heifers. His four-year-old herd bull, Royal Patience by Keystone and out of Imp. Patience, is a good red bull that has been used in the herd and has proven a good breeding bull. Roan Marshal is a good yearling sired by Perfection Marshal and traces to Imp. Dalmeny Princess. These two bulls will be sold and the cows will either halve calves at foot or be safe in calf to them. Lady Lavender is a seven-year-old Lavender cow sired by Ringmaster that has proven an excellent investment for Mr. Cold. Lavender Lassie is an excellent two-year-old heifer out of Lady Lavender and is sired by Challenge Mysie. There will also be a good yearling heifer and a good heifer calf out of Lady Lavender sired by Royal Patience. Faith is a good cow of the Gwendoline family sired by Advertiser. Helen of Center is a good eight-year-old cow sired by Golden Diamond and her grandam is the imported cow, Lady Helen. There will be several cows in the sale sired by Fancy's Choice. This sale will afford an opportunity to secure good, well-bred cattle in breeding condition at conservative prices. Mention The Homestead when writing for a catalog and arrange to attend the sale. See page 36.

Pfander & McClelland's Sale.

On Saturday, October 25th, at Clarinda, Iowa, Pfander & McClelland will make a public sale of forty-five head of their big, stretchy Duroc Jerseys, and they are certainly selling a splendid offering this year. They are selling three excellent fall boars, a lot of good spring boars, some good sows with litters and some very excellent spring gilts. These breeders have at the head of their herd the great boar, Golden Col., and he is not only one of the largest boars in the state and the West, but he is also one of the very best breeding boars we know of anywhere. He has done wonders in these two herds and they are selling some things in this sale that are sired by this boar that would be a credit to any herd in the land. There will be three head of fall boars in this sale, all sired by Golden Col. These are all good boars, but one of them is better than the rest and this boar is one of the largest, meliowest and best herd-boar propositions that we have seen this fall among all of the fall boars we have looked at. Now, this is a statement that we mean to back up on the day of the sale, and those who go after him will say the same. The spring boars are sired by Golden Col., Big Col., Critic B., Crimson Col., Queen's Col., and a son of Lahr's Col. There are seven Big Col. spring boars in the sale out of a daughter of Special Jr., and a Belle's Echo sow, and they are quite good. Three Crimson Col. boars out of a Col. Gano sow are all right. Six boars sired by Golden Col. out of Mabel Gano, their well-known Col. Gano sow, are among the very best things they will offer. This is an April litter, but they are far better than the average March litter that we see in many of the sales. Another splendid spring boar by Golden Col. is out of a Medoc Echo sow and another good one is out of a sow called Crimson Climax. Four sisters of this last pig go and they are all good. Three extra good Golden Col. boars are out of Lady Echo and these are strictly choice boars. These breeders are selling some splendid fall sows in this sale sired by Golden Col., also some good sows with litters, and a July yearling show sow by Golden Col., that they won first prize on at the county fair. Size is one of the characteristic things of their herd and they are selling spring boars in this sale that are just as large as you will find anywhere. It will, therefore, be a good place for you to go after your boar. Write for their catalog and mention The Homestead. Bids sent to M. T. White, Homestead representative, in care of the above breeders will receive attention on day of sale. See page 37.

Wigstone Bros.' Last Call.

On Saturday, October 11th, Wigstone Bros. will make their annual fall sale of large-type Poland China boars and sows at Red Oak, Iowa, and this will be an offering that any of the breeders will look up to as an unusually good one. They are selling some grand good spring boars in this sale and they are going to be as large as you will find them in any sale this fall. They are also selling a grand good lot of sows and no sale offering will have any better this year. Make it a point to be at their sale at Red Oak, Iowa, Saturday October 11th, and if you are going to want a big boar or some choice sows they will have them for you in this sale. M. T. White will represent The Homestead at their sale.

Some Sure Big Poland Chinas.

Orville O. Jones, York, Neb., is the owner of the great Poland China boar, Jumbo the Great, and a few days ago he was placed on the scale in really light flesh and weighed 820 pounds. This boar would weigh in good breeding flesh an easy 1,000, and could be fitted away beyond that weight. He is sure some big hog, and a mighty good one. Big King, the yearling boar, weighed 620 and looks like as big a boar as Jumbo the Great at the same age. These boars are the kind to tie to, and a boar sired by either of them will do much for the Poland China herd of the average breeder. Mr. Jones has some choice spring boars by either sire for sale. They have been given the double serum treatment and are immune. There are two boars here that are full brothers to Melbourne Jumbe, the boar that is making such a hit in Kansas, and these look as good as he did at the same age. Mr. Jones also has some Short-horn bulls for sale and some of the most choicely bred Barred Rock cockerels. When writing kindly mention The Homestead. See the advertisement on page 47.

Harris' Model Hereford Sale.

The sale of thirty bulls and forty females on October 22d, from the model herd of Hereford cattle owned by O. Harris & Sons, Harris, Mo., is a sale that everyone desiring to purchase a herd bull, a very desirable stock bull, or choice young females in calf to the champion bulls, Repeater and Gay Lad 6th and their sons, should arrange to attend. Harris & Sons have selected the very top bulls of their ages for this sale, they also selected the top two-year-old heifers and are giving the purchaser the benefit of the best they produce. Those desiring show material in either bulls or females will not be disappointed in those Harris & Sons will sell. It will be an opportunity unexcelled to secure young females with all their lives of usefulness before them. They also will produce calves that are brothers and sisters to the young things on which Harris & Sons have this year won so many premiums in class, in young herd, calf herd, get of sire and produce of cow. A number are in calf to Repeater, sire of the yearling bull, Repeater 7th, that is winning in class and being made champion at every show where shown. Others are in calf to Gay Lad 6th, also a champion and sire of a large number of the show herd. Special attention is directed to Gay Lad 9th, Gay Lad 12th, Gay Lad 13th, Repeater 12th and Repeater 20th, as they are show bulls as well as breeding bulls. A January bull calf by Gay Lad should be appreciated and it is questioned if a better junior has been produced in the herd this year. There are a dozen youngsters just rounding one year of age that will furnish ample opportunity for selection from a string of all good ones. These are by the champions, Repeater, Gay Lad 6th and Prince Perfection, the undefeated three year old. There are also listed a most desirable string of eighteen-month-old bulls that are valuable stock bulls. The great string of two-year-old heifers is where those looking for money-making propositions should land. The calves they are carrying will at weaning time enable the purchaser to show handsome profits on their investment and as they are bred right who can tell but that a future champion will be found among them? Harris & Sons never before have parted with so uniform and good a string of females and they should be appreciated. The catalog tells the complete story of the breeding and the sale. Send for it now and kindly mention this paper. See page 39.

Henry Beck's Great Sale of Draft Horses, Jacks and Jennets.

We wish to call attention to the sale of draft stallions and mares and mammoth jacks and jennets that will be sold by Henry Beck, Litchfield, Neb., at Loup City, Neb., October 23d. This sale will consist of a choice lot of young stallions and some excellent young mares, also a few mares of producing ages that have raised colts the past season. The leading draft breeds will be represented, and those looking for big, rugged stock will be able to find them here. The imported stock are leaders of their different breeds and the home-raised stock have been grown in one of the best horse-raising sections of the country. The fact that these horses have been grown in the uplands of north central Nebraska, where the native grasses are regarded as the very best anywhere for horse growing, and the fact that they have been grown in the open will add much to their value as breeders. The jacks and jennets are all of mammoth breeding and many of them are extra big. They have been money-makers for Mr. Beck, and they should prove profitable for buyers. Mr. Beck knows well the value of this stock, but he raises them to sell and that is why they are in this sale. Interested parties will be able to get further information concerning this stock by writing Mr. Beck at once. Address Henry Beck, Litchfield, Neb., and mention The Homestead when you write. See page 35.

Four of the good brood mares included in the Robison Bros. sale of Percherons at Morton, Ill., Monday, October 20th. See advertisement on page 40.

A Grand Champion Chester White.

The illustration of St. John on page 30 presents the artist's idea of the grand champion Chester White hog at the head of the herd of M. W. Young, of Akeny, Iowa. St. John was a grand champion at the Minnesota State Fair of 1912, junior champion at the Wisconsin and Illinois fairs the same year. The picture shows him in his show-yard bloom. Today, while he has gained in more mature form, his proportions are just as good and his general appearance just as attractive. St. John is the son of St. Elmo, a hog which had the honor of winning grand championship at the Iowa State Fair when he was under six months old. This was an unusual performance and one which very seldom takes place, and then only when the pig shows more than remarkable breed characteristics and uniform excellence. The particular interest invested in St. John at the present time is the fact that on Tuesday, October 14th, Mr. Young's public sale will include a large number of sons and daughters of this hog. In previous issues we have gone somewhat into detail with reference to the breeding of this consignment. At the present time

Williams Bros.' Sale

Large-Type Poland Chinas

40 Boars, 10 Sows

Villisca, Iowa, October 23, 1913

WE are selling 25 head of boars sired by our great PAWNEE NELSON, regarded as one of the greatest breeding boars now living. BECK'S GREAT SALE

DRAFT STALLIONS AND MARES

MAMMOTH JACKS AND JENNETS

WILL BE HELD IN SALE PAVILION IN

Loup City, Neb., Thursday, Oct. 23

IN THIS sale will be offered one of the greatest lots of useful, money-making draft stallions and mares and Mammoth jacks and jennets that have gone through a sale in the West in years. The stallions and mares consist of imported and home-bred stock, and are of good ages and good individuality, as well as good pedigree. They are in shape to make money for the buyers. The home-grown stock are the big-boned, rugged sort that positively make good. They have been raised in the open in what is probably the best horse-growing section of the entire country. The jacks and jennets are equally well grown and developed. They come of excellent stock and are big and heavy boned. The sale will be held in Loup City and may be reached from the Burlington and Union Pacific railroads. Make your plans to be on hand and come early. Col. Z. S. Branson, auctioneer. Mention The Homestead and write for further information to

HENRY BECK, LITCHFIELD, NEB.

we can only urge our readers to attend the sale because it contains Chester Whites that are good enough for anybody's foundation material. Catalogs may yet be obtained by writing to M. W. Young, Ankeny, Iowa.

Calkins' Immune Duroc Boars.

In a recent letter from E. A. Calkins, Ruthven, Iowa, he says: "I am writing you to say I had my whole herd vaccinated with the simultaneous method in August and they have done well and I am now booking orders for shipment of some of the best spring boars I have ever raised. I also have some good fall boars and they are well bred and are doing well. You can just say to Homestead readers that my boars are all immune and that I have some of the best blood known to the breed. I have boars that are sired by Prince The Cols., Freed's Col., Volunteer, Wonderful Crimson Again, Model Advancer, Dusty Wonder, Royal Col., and Wonderful Crimson Lad, and out of daughters of Prince of Cols., Chief's Col., Freed's Col., Crimson Wonder I Am, B. & C.'s Col., Superba, Shafer's Col., King The Col., and Model Advancer. I am offering these boars at from $25 to $50 and I know that better bargains cannot be offered elsewhere when you consider the quality and the breeding of the boars that I am offering." Write Mr. Calkins at once and have him book your order for one of these immune boars. See page 38.

Hancher's Immune Boars.

On page 38 we begin the Poland China boar advertisement of that well-known breeder, M. P. Hancher, Rolfe, Iowa, who now offers fifty head of big, stretchy, big-boned, immune spring boars. These boars are right to go into any herd, as they have been vaccinated since June and are right to go into any herd, notwithstanding disease has been there before. Just recently Mr. Benson came down from Sheldon and purchased a boar and notwithstanding he had trouble in his herd he took this boar home and he went right through without a bobble. We therefore say when you buy one of these Hancher boars you can feel that you have an immune hog and it does not make any difference where you place him. These boars are sired by his noted old 1,000-pound hog, Smooth Wonder 2d, one of the most famous sires today in the West. Then he has some splendid boars by the Nebraska State Fair grand champion boar, Chief Again Price, Chief Price Jr., Long Wonder and Long Price. Among these boars are many indeed that will make excellent herd boars when grown out and they now show every promise of making good herd headers. He has two splendid Smooth Wonder 2d boars out of Long Molly, one of the best sows he has in the herd. These are March boars and are very choice. Three by Chief Again Price out of Model Wonder, she by Smooth Wonder 2d, are all good. These boars are unusually smooth, stretchy, good boars and are evenly balanced. They have every reason to make herd boars that will command attention later on. A right good pig by Chief Price Again is out of Long Molly 2d, and another good one by the same sire is out of Price Model 3d. One of his choicest Smooth Wonder 2d boars is out of Long Susie by Iowa Lad and he was by old Pawnee Lad. There are a lot of others that are or will be just as good and if you want a boar now is a splendid time to get one. He is pricing these boars at from $30 to $50 just to move them. Write him your order and send him a draft for one of these boars and leave it to him to do the selecting. He will also sell Chief Price Jr., his 900-pound herd boar, as he can spare him and he is not only a large hog, but he is a good one and an excellent breeder. You will be satisfied if you do and he will send you a good one. Kindly mention The Homestead when writing Mr. Hancher.

Roup's Tamworths.

C. C. Roup, the veteran breeder of Tamworth swine, Kalona, Iowa, is advertising for sale boars and gilts of his favorite breed. The boars and gilts are of March and April farrow and sired by Thorndale Jim 3d and Knoll Slope Delmar, the former being a prize winner and a grandson of the noted boar, Hudson 1562. The latter boar is a descendant of Quick Fall Pride and is an excellent individual. The aged brood sows in Mr. Roup's herd need no introduction to American Tamworth breeders. Knowle Sultana 6th has a litter sired by Delmar. Knoll Slope Belfast 2d has a litter of thirteen by Thorndale Jim. Knoll Slope Sultana, Miss Bliss and Knoll Slope Empress are sows of proven worth. The herd is immune from hog cholera, having been vaccinated September 3d with the simultaneous treatment. Mr. Roup believes from actual experience that this treatment is absolutely reliable. See page 38 and write him your wants, mentioning The Homestead.

Halford's Big-Type Boars.

On page 38 we begin the advertisement of R. W. Halford, Manning, Iowa, who now offers twenty head of his great big Poland China fall and spring boars for sale and he is offering some very good ones. Fifteen of these are fall boars and five are spring boars. They are sired by his great show and breeding boar, Mabel's Wonder, a boar that was shown at the Iowa and Nebraska State Fairs and he was the champion boar at the latter show. He has been siring a lot of good stuff and Mr. Halford has some very excellent boars for sale that are sired by him. The others are sired by Long Jumbo and Chief Price 2d, and they are out of dams by Long Wonder, Long Chief and Big Chief. These boars are now ready to ship at any time and he has quite a number that are good enough to head good herds. He is making reasonable prices on these as he wants to move them, and he will be pleased to have Homestead readers write him about them or he would rather that they call and see them and make their own selection. Mr. Halford says he can certainly suit boar buyers this year, both in price and quality. When writing him kindly mention The Homestead.

Smith & Heisserer Short-horn Offering.

Smith & Heisserer, Oran, Mo., will sell fifteen head of Scotch Short-horn cattle in the sale with Thos. Stanton at Wheaton, Ill., Tuesday, October 14th. These cattle were selected regardless of cost by Mr. Heisserer as foundation stock for a herd, but owing to a dissolution of the partnership it has been decided to sell the cattle. Regarding these cattle Mr. Heisserer, who is a reliable and conservative gentleman, writes: "We are listing some mighty good cattle in the sale. However, they are not in the highest condition, in fact, we have not fitted them any, and whatever flesh they are carrying is pasture only. Shadewell Golddrop is a red cow with a heifer calf at foot and barn lots full of such individuals are not found. She is a good one, thick and low to the ground and worthy of praise. Roan Lass is another good one, coming three years old, and due to calve in November to the service of Brawith Baron. This cow will amply bear out any statement that may be made regarding her. Missie Valentine is a roan cow, very large and roomy, and the kind that are only parted with in dispersion sales. She has a heifer calf at foot. Lady Martha is a very good individual, and has a heifer calf at foot that is a show proposition. Augusta 115th has a heifer calf at foot by Silverdale, which is certainly sufficient endorsement. Sweet Violet is a roan, and has a heifer calf at foot. Too much cannot be said for her. No calf can take all her milk at a reasonable age, and she is good otherwise. She will have two calves in the sale, one of October 20, 1912, and one at foot of September 2, 1913. This should speak for her as a breeder. Villa Grove Beauty is a good individual, and will weigh a ton in good flesh. Her sort should command a good price. Roan Beauty is another good one, and has at foot an extra good heifer calf by Brawith Baron. There are two heifers, one by Secret Goods and one by Roan Sultan, that are both good ones. We are listing three bulls, one by Royal Sultan, out of Sweet Violet, that is the making of a good one. He is thick, smooth, close to the ground, and in fair flesh. Southern Goods, by

BRANSON'S DUROC JERSEY SALE

At the Farm Near

West Branch, Iowa, Wed., Oct. 15, 1913

50 Head, 25 Boars, 25 Sows and Gilts

THE offering consists of 25 extra growthy spring boars, 15 spring gilts, 8 good fall yearling gilts and 2 yearling sows by Peachie Commodore; spring pigs by Branson's Golden Model by Golden Model II. The fall sows are by Wilson's Defender and H. I.'s Model. The entire herd has had the double treatment and are immune from cholera.

Prize-winning Poland Chinas

From the Herds of W. A. Lingford, Dannebrog, Neb., and L. F. Reilly, St. Paul, Neb., will be sold at Auction in sale Pavilion in

St. Paul, Nebraska, Friday, October 24, 1913

NEVER before from our herds have we listed so many high-class boars as we will offer at this time. They are sired by the great Golddust Hadley, without question one of the very best sires of the breed, Sampson by Pawnee Lad and Combination by the great Blue Valley Quality. Each of these boars have sent first prize winners to the Nebraska State Fair, the greatest Poland China show in America. There are boars listed for this sale that will win at Chicago this winter, or will make excellent prospects for next season's fairs. D.'s Monarch, the noted son of Golddust Hadley, is also the sire of some stuff of the greatest merit ever sold. We want you to see these hogs, and if you see you will buy. Send for catalog immediately. Col. H. S. Duncan, auctioneer. J. C. Price field man. Mention The Homestead and send for catalog to

W. A. Lingford - - Dannebrog, Neb.

DISPERSION SALE OF SCOTCH AND SCOTCH-TOPPED

SHORT-HORNS

To be held at the farm adjoining

BERLIN, IOWA

TUESDAY, OCTOBER 21, 1913

44 Head. 10 Bulls, 34 Females. 44

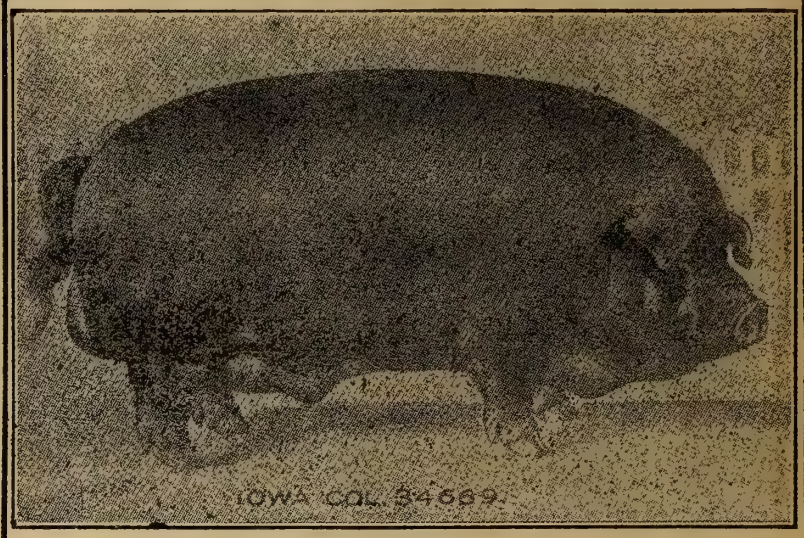
I HAVE sold my farm and for this reason must disperse my entire herd of Scotch and Scotch-topped Short-horn cattle. The sale includes my two herd bulls, Royal Patience by Keystone, dam Imp. Patience; and Roan Marshall by Perfection Marshall, dam tracing to Imp. Dalmeny Princess. There are a mber of royally bred Scotch females that will sell and should prove valuable investments. The herd is in excellent breeding condition and has always produced excellent profits for me. It is with regret that I part with these cattle, but the buyers will get the benefit of my years of experience in building up this herd. I have used nothing but the best Scotch bulls and there will be sixteen cows with calves at foot or safe in calf to my Scotch herd bulls. The balance of the females are yearling and two-year-old heifers and they are a very attractive lot. Carey M. Jones, auctioneer. Write me for catalog, mentioning The Homestead. Address

C. J. C. COLD - - - BERLIN, IOWA

Rude & Son's Sale

DUROC JERSEY BOARS AND SOWS

MOORHEAD, IOWA, WEDNESDAY, OCT. 22, '13



Iowa Col., the 900-pound boar to be sold in the sale.

40 HEAD. 35 BOARS, 5 SOWS WITH LITTERS. 40

WE are selling our great herd boar, Iowa Col., the 900-pound son of Tippy Col. in sale; also Rude's Crimson Wonder I Am, a splendid son of old Crimson Wonder I Am. Nine good fall boars will be sold and 26 choice spring boars sired by our noted show and breeding boar, High Chief, Iowa Col., Jumbo Col., Sensation Wonder and Misouri Model Top. Five high-class sows, mostly with litters at side. Col. N. G. Kraschel, auct., M. T. White, fieldman for Homestead. Write for catalog and mention Iowa Homestead. Address

RUDE & SON - MOORHEAD, IOWA

Secret Goods, a grandson of Choice Goods, with the proper care will make a bull to compete in the best of company, and not easily defeated in the show ring. You cannot say too much about this bull. He is not in the condition that he should be, but take it from me, he is a good one. We are also listing a bull out of Rosa Hope, the cow that I bought in Canada two years ago. He is by Gainsford Marquis, is a good individual, and some good breeder should buy him." The advertisement can be secured by addressing Thos. Stanton, Wheaton, Ill. Kindly mention The Homestead when you write. See page 40.

Barker Bros. & Crowell's Durocs.

On October 24th, at Riverton, Iowa, Barker Bros. & Crowell will make their annual sale of forty head of Duroc Jersey boars and these are the breeders that have been making a great hit with their large-type Durocs. They made their first annual fall sale last year and they sent out several boars that became herd headers, and some of these today stand at the head of some of the best herds in the West. In their forthcoming sale they will sell forty head and this offering will measure up with the high standard maintained by these young breeders. There will be twenty-five head of corking good spring boars in this sale and they are not only well bred, but they are grown out well and have plenty of size. Quite a few of these are sired by their great breeding boar, Valley King 2d, the best boar they have ever used in their herd and one of the best breeding boars today in western Iowa. Then they have some Col. High, a boar that they have also used, Jim's Mogul, the boar at the head of the Jim Isaac herd, and a number by a son of Col. Gano. There will be ten head of their very best spring gilts in this sale and these will be the same breeding as the boars. There will be one fall boar and one winter boar in the sale. Among the spring litters are one boar and two gilts that are sired by a boar called Red Oak and out of Valley King Princess, a daughter of Valley King 2d. Another litter by the same boar is out of a sow called Model Nell, and she is a daughter of the great boar, Model Wonder. Both of these litters are especially fine and the boars are good enough to head good herds and the gilts are good enough to go anywhere. Two April boars sired by Valley King 2d and out of Proud May are very good and while these are a trifle late they are nevertheless good size for their age and will round out into about as good things as will go into the sale. Three gilts and one boar sired by a son of Col. Gano and out of Clover Lawn Lady are very choice. The dam of this litter has never failed to produce their very best sellers. There is a good litter of three boars and one gilt by Jim's Mogul, the large boar that heads the Jim Issac herd at Red Oak. There is a splendid fall boar and a fall sow sired by Valley King 2d and out of a High Col. dam that will bear watching, as they are strictly good and both stand on the best of feet. Two other good fall yearling sows sired by the same boar and out of Standard Queen are very choice and these will make splendid brood sows for any man that buys them. Another good fall sow is sired by Cherry Prince and she is out of a daughter of The Professor. There will be two good fall sows by Valley King 2d out of a daughter of Inventor Lad and a few sows that will sell with litters at side. Their offering is a strictly choice one and you will not be disappointed if you go to their sale. Write them at once for their catalog and kindly mention The Homestead. Bids sent to M. T. White, Homestead representative, in their care will be properly attended to on day of sale. See page 37.

Foss' Duroc Jersey Sale—Last Call.

We are this week making the last call for the sale of Duroc Jersey swine that will be made by Theo. Foss, Sterling, Neb., October 16th. At this time Mr. Foss will put up a fine offering of boars and also a few females. The boars consist of a few fall boars, one a son of the champion, Valley King, and a fine lot of spring boars by different sires, among them being Prince of Col. 2d, Cherry Chief, Ohio Col., Model Top and another or two. Some of these boars are really first class, being in the real herd boar class, and the remainder are good strong farmers' boars of the very best blood lines. The gilts that will be sold are extra good, in fact, a couple of fall gilts that sell are really too good for the ordinary fall sale. They are the sort that would be appreciated if bred to a first-class boar and put in a sow sale. They will be good property for breeders that do not have enough to fill out their sales, for these gilts will do well for them. The writer would like to see a good attendence at this sale, and those that have not the time to attend, may send bids to J. C. Price, the field man for The Homestead, and the same will be well looked after. Address all bids to J. C. Price in care of Theo Foss, Sterling, Neb. See page 41.

Fred Swan's Large-Type Durocs.

When it comes to breeding the larger type of Duroc Jerseys they will all have to take off their hats to Fred Swan, Missouri Valley, Iowa, who will make a public sale on October 17th. There isn't any better feeder or caretaker in western Iowa than is Fred Swan and we will prove this to you on the day of his sale. He is selling forty head of boars in this sale and these are the select of the 300 that he now has on the place. Among the spring boars that he will offer are some that are sired by some of the most noted boars of the present day. Among these will be sons of the great Col. Gano, and there are some good ones by him in this sale. Then you will find sons of Crimson Wonder 3d, Golden Gano, Crimson Col., I Am A Crimson Wonder 2d, King Edward, High Ridge Muncie, Crimson Wonder Chief, Osborn's Crimson Wonder, and several other very noted sires. In our last week's issue we gave a detailed description of the various pigs that he would sell in this sale and we are going to let it go at that, but we do want to impress upon our readers and especially those who are going to want a large, stretchy boar that they cannot afford to miss this sale of Fred Swan. All things considered it is one of the best offerings of strictly large-type Duroc Jersey boars that will be offered in western Iowa this fall. Write Mr. Swan at once for a copy of his catalog and kindly mention The Homestead. M. T. White will represent this paper at the sale and will look after any bids sent in his care. See page 41.

The illustration herewith shown was taken on the farm of Theo. Foss, Sterling, Neb., and shows a bunch of breeding stock from his Duroc Jersey herd. Mr. Foss makes a public sale oon October 16th. See field on this page and sale advertisement on page 41.

Economy Farm Duroc Sale.

One of the very attractive Duroc Jersey sales that will be held this fall will be that of the Economy Farm, Shenandoah, Iowa, October 29th, when they will sell forty head of high-class boars and sows. Among the number will be five sows that will sell with breeding privilege to their new grand champion Iowa State Fair boar, Big Wonder. One of these will be a daughter of King The Col., one by Col. Gano, one by Highland Chief and the two under-year sows that they won third on at the Iowa State Fair and the other one that was in the fourth-prize young herd. Two choice gilts that will be listed are sired by Highland Chief and Chief's Col., dam by Defender out of Chief's Jewel. They will sell Highland Chief, one of the very best herd boars they have on the farm, and also Top Col. Fifteen fall boars and seventeen spring boars go in, five of the latter being sired by the great boar, Chief Col. If you will only send your name on a postal card to the Economy Farm, Shenandoah, Iowa, and mention The Homestead your name will be placed on their mailing list and you will in return receive one of the most up-to-date catalogs you have ever seen. Watch next week's paper for further particulars regarding this sale.

Seckington & Hilfiker's Poland China Sale.

On October 23d Ed Seckington and C. B. Hilfiker, of North English, Iowa, will hold a sale of fifty Poland Chinas of the big type. The offering will consist of about twenty boars and thirty sows. Mr. Seckington's consignment will consist of some good fall boars and gilts sired by Big Bone I. X. L. by Giant Leader and out of Lady Big Bone by Big Bone. This boar was the top of R. M. Cassell's sale in 1911. Mr. Seckington will also sell some extra good spring pigs sired by Black Jumbo by Big Bone and by Chief Jumbo. The dams are sired by Chief Price 3d, Osborn Perfection, Chief Look Superior and others. There will be a fall and spring litter out of the noted brood sow, Osborn Maid. There will also be a litter sired by Grand Chief and out of a dam by Big Halvor. Mr. Hilfiker will sell some good fall gilts sired by Young Expansion by P.'s Mastodon and a fine lot of spring pigs sired by Blue Valley Chief 2d, he by Blue Valley Chief and out of Model Expansion by Dorr's Expansion; Long Expansion by Big Expansion out of Hazel Price and Victor Prince by Big Victor. The offering will be in nice condition and well grown out. Buyers in the market for something good

Pfander & McClelland's Sale

DUROC JERSEY BOARS, SOWS

Clarinda, Iowa

SATURDAY, OCTOBER 25, '13

45 HEAD. 30 BOARS, 15 SOWS. 45

WE are selling 3 choice fall boars, one outstanding good one; 27 good spring boars, many of which are good enough to head best of herds. These are sired by our 900-pound boar **Golden Col.**, regarded as one of the very best in Southern Iowa; also a few sired by **Critic B, Big Col., Crimson Col.** and **Queen's Col.**; 5 **good fall sows** sired by Golden Col. and also our **1st prize Golden Col. Yearling show sow.** We are offering a great lot of boars and sows in this sale. Col. N. G. Kraschel, auct. M. T. White, fieldman for Homestead. Write for our great catalog and mention Iowa Homestead.

PFANDER & M'CLELLAND - CLARINDA, IOWA

individually with the best of breeding should not miss this sale. Bids sent to Carlos C. Palmer, Homestead representative, in care of either of these gentlemen, will be properly taken care of. Write for catalog, kindly mentioning The Homestead. See page 35.

Lingford & Reilly's Poland China Sale.

On October 24th at St. Paul, Neb., W. A. Lingford, Dannebrog, Neb., and L. F. Reilly, St. Paul, Neb., will sell one of the most important lots of big Polands that will be sold this season. This offering is of particular importance on account of the number of herd heading boars that will be offered. There will be about fifteen boars that are real herd headers. We do not mean that these are passably good boars, but that they are herd-heading boars in every sense of the word, and we believe that we know a good Poland China. A September yearling by D.'s Monarch is one of the best boars ever bred by Mr. Lingford. He is a boar that we positively think would win a good place at the International this winter, and Homestead readers that contemplate going to Chicago this winter would find that this boar would materially strengthen their herd. Another boar by Gold Dust Hadley is nearly as good. Still another by Combination is a good probability for that show. The spring boars have not been well enough fitted to make a good showing at Chicago, but there is at least a half dozen that should be money winners in the best shows of the corn belt next fall. The nice thing about these Lingford and Reilly Polands, is that they are big enough for most anyone and then too they can meet and outshow the small type stuff. These are surely the big hogs with quality that many say that they have, and these men sure have them. Two years ago Mr. Lingford won more prizes than anyone else at the Nebraska State Fair. At the same time Mr. Reilly won first on under six months pig and that boar is now one of the most highly prized boars in Iowa, being at the head of the John Schneider herd at Remsen. One of the boars that won at Nebraska went to Sioux City the next year and was first again. The next season the winnings from these herds was nearly as great. This year the champion sow was shown by Mr. Lingford. She is by Sampson and from a Gold Dust Hadley sow. Another nice thing about these hogs is that they raise pigs. No breeder in the West raises any more pigs per sow than these men. Their show sows come right home and farrow and raise good litters. We saw one with nine live pigs on our recent visit from a litter of eleven. Another sow with seven from a litter of nine and one or two more to farrow. The first prize sow two years ago raised the champion sow this season. This is the sort of stuff that you get from these herds. Men from Illinois, Iowa, Nebraska, and in fact all the corn belt states have bought from these herds and they have absolutely given satisfaction. We would like for Homestead readers to send for the catalog of this offering without delay, look it over carefully and plan to attend this sale. If unable to attend, send bids to C. Price, of The Homestead. He is familiar with every animal in the herd. Knows the very best strains in these herds and will make a good selection and will buy as cheaply as possible. These hogs are worth paying express on a good long way, and we want you to have them. Mention The Homesetad when you write. See page 35.

Thompson Bros.' Herefords.

On a recent visit to West Point, Neb., we saw what we think one of the best foundation herds of Herefords we have seen in a long time. We refer to the herd owned by Thompson Bros. of that place. This herd has for future assurance, not alone good cattle, but it has a still more important factor in the most capable, careful and enthusiastic of caretakers any herd might possess. This feature is more than half the herd, but the other part of this particular herd is also well founded, for they are in most cases excellent stock. This is the home of the noted Duke Real 388816, the $2,000 calf sold last spring in the McCoy sale. This is a really good calf,

The Chester White gilt shown is four months of age. She is from the notice his advertisement on page 46.

E OF HEREFORD CATTLE

HARRIS' MODEL HEREFORDS

At Auction

HARRIS, MISSOURI, OCTOBER 22, 1913

THIRTY BULLS FORTY FEMALES

Gay Lad 12th, Son of Gay Lad 6th, Has Been An Easy Winner at Most Every Show This Year.

THE fall shows have again proven, beyond the shadow of a doubt, the superiority of the Model Herefords. We have again won more than all our competitors combined. Read that over because it means something.

It means much, because we are offering the same blood lines in our sale. In fact, about twenty of the thirty bulls are sired by our championship bulls, Repeater, Gay Lad 6th and Prince Perfection. There is no better time to buy a herd bull than at this sale. You can't be disappointed in them because they are the proper sort. Quality will pay—and this is a sale of Model Herefords; which means quality Herefords. The heifers, forty of them, are a grand bunch. Just a good, strong, even bunch full of quality. We used the utmost care in selecting them and I feel that there is no chance for you to be disappointed. I want to start more men in the Hereford cattle business and have selected these heifers to do it with. I have used the best bulls we have on them and every one is safe in calf to our grand champions, Repeater, Gay Lad 6th and Prince Perfection. If you want the kind that pay be sure to come to the sale.

Dry weather doesn't stop the Herefords—they thrive just the same. Plan to come. We want you to. An illustrated catalog will be sent upon request. Address,

O. HARRIS & SONS,

WE are selling a splendid lot of well bred big-type Polands sired by **Big Victor, Big Tom, Big Omaha, I Am Big Too, Big John, I.'s Quality** and **Metal Top.** If you are wanting bargains come to our sale. Catalog ready. Write for it. Col. N. G. Kraschel, auct.

MINNICK & NANSEL - - COUNCIL BLUFFS, IOWA

THOS. STANTON'S SALE OF GOOD SHORT-HORNS

AT SITTYTON GROVE FARM, WHEATON, ILLINOIS, TUESDAY, OCTOBER 14, 1913

55 head. 8 bulls, 47 females, including a select draft of 15 Scotch cattle from Smith & Heisserer, Oran, Mo.

MR. STANTON WILL SELL a strong collection of Scotch, Bates and Scotch-topped cattle. The Scotch-bred specimens include some outstanding good ones belonging to the Rosemary, Secret, Goldie, Lavender and Jilt tribes, while the balance of the offering comprises a choice lot of the beef and milk class of cattle, broad backed, fine matrons that will look well on any farm. They belong to the Bates and Wild Eyes strains, and it has been many years since there has been offered in a public sale so much value in this class of cattle.

SMITH & HEISSERER SELL all of their Scotch-bred Short-horns, fifteen head, of the Missie, Violet Bud, Augusta, Butterfly, Rose of Autumn, Rosa Hope and Golden Drop families. These cattle were selected regardless of price as foundation stock, and are only offered now owing to a dissolution of partnership. Three bulls are in the list, one by Gainsford Marquis, one by Royal Selection and one by a grandson of Choice Goods. This is a most desirable lot of cattle, strongly bred, and valuable to anybody. Send for the catalog of this sale. Mention The Homestead and address

THOS. STANTON - - - - - - - WHEATON, ILLINOIS

Colonels Woods and Jones, auctioneers. Attention is called to the following Short-horn sales: S. F. Lockridge, Chicago, October 13th; C. J. McMaster, Altona, Ill., October 15th; R. W. Botts, Plymouth, Ill., October 17th.

IF YOU ARE INTERESTED IN GOOD PERCHERONS

You Will Find What You Want in the

ROBISON BROS. SALE, MORTON, ILLINOIS, MONDAY, OCT. 20, '13

When Forty Head of Good Ones Will be Sold

TWENTY mares, two years old and over; seven imported mares; nine fillies, yearlings and weanlings; six yearling stallions; five weanling studs. A thoroughly reliable, honest lot of Percherons, all but eight head of which were bred on our farm. Twenty-eight head are the get of the celebrated St. Louis World's Fair winner, Vermouth, and many of the mares are bred to him, others being bred to Molineaux, Olbert, Jayette, Perfection. If you are looking for Percherons of merit and breeding, the reliable working kind, you will make no mistake by attending this sale. Every mare is a worker and a producer. Some outstanding young stallion propositions are cataloged. Write today for the catalog. Mention The Homestead and address

ROBISON BROS. - - - - - MORTON, ILLINOIS

Cols. Jones, Reppert, Seeley and Carius, auctioneers. Sale at farm, five miles east of Morton on line of Illinois Traction System, with cars every hour from Peoria, Bloomington and Springfield. Get off at Robison Road, which is right at the farm.

mentioning The Homestead when you write. The advertisement appears on page 13.

Tow's Hereford Sale.

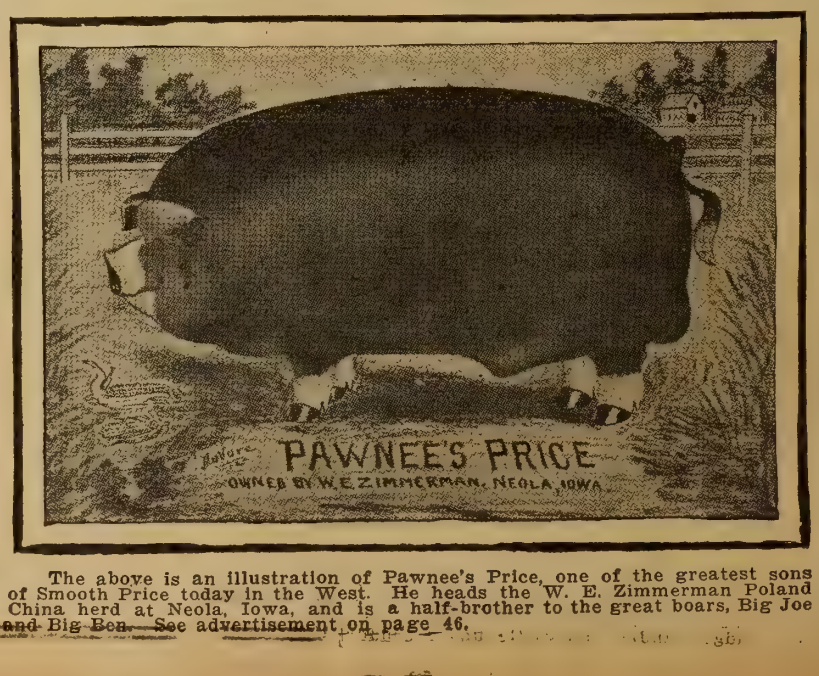
Cyrus A. Tow, Norway, Iowa, will hold his third sale of prize-winning Hereford cattle at his Fairview Farm on October 21st. Mr. Tow from a modest beginning a few years ago has built up one of the best herds of Hereford cattle to be found in the country. Such was his ambition from the start. In order to accomplish this end he purchased nothing but the best bulls and females to be found. His purchase of Disturber and the entire Brock herd was a great addition to the herd and has been a great means of bringing the herd to its present high standing. Twenty-three bulls and thirty-seven females have been listed for this occasion. The bulls are probably as good a lot all through as has yet been offered at public auction. Every one of them is of herd heading character. It is very seldom that as many really high-class bulls can be found on one farm as will pass through this sale. A description of the good ones would mean a description of the entire lot. There are several sons of the grand champion bull, Standard, and they will meet with the approval of the most critical. There are a few sons of the prize-winning son of Distuber, Distinction, and they are extra good. We will not attempt to describe each individual bull, but want to impress upon the breeder in need of a high-class herd bull the importance of attending this sale. A Homestead representative has inspected the entire offering and we want to say that the quality of the bulls to be sold in this sale could not be overdrawn. Fairview Farm is one of the best equipped farms for the rearing of pure-bred cattle that can be found in the state of Iowa. It is worth the time of any breeder to visit this farm and see the equipment. The females are a grand lot and those of breeding age will either have calves at foot or be safe in calf to Standard or the $2,500 Byron Fairfax, a son of the great champion, Perfection Fairfax. It is from such a herd as this that beginners or breeders can get the really high-class sort of breeding stock. This herd won more prize money at the last International stock show than any other exhibitor. You can expect these matrons and bulls to keep on reproducing their sort. Write Mr. Tow for catalog, mentioning The Homestead. Look up his announcement on page 39.

W. B. Rigg's Short-horn Offering.

Regarding the Short-horn cattle that he will contribute to the sale of R. W. Botts, Plymouth, Ill., October 16th, W. B. Rigg, Mt. Sterling, Ill., writes: "The cattle that I am selling are virtually all my own breeding, as I sold four years ago to Mr. Ravenscroft the three cows, Princess Minnie, Roan Minnie and Golden Poppy 3d. I have sold him every bull that he has ever used, and the three cows that I have mentioned and their produce are the cattle that I am selling. Individually they are good and in good flesh. Roan Minnie is a large, smooth cow, with a nice head and horn, a good producer and heavy in calf to Roan Champion. Princess Minnie is a good cow and an extra good breeder. She sells with an extra good calf at foot, and is safe in calf again since April. There are not many better cows than Golden Poppy 3d, and she is due to calve before sale day to the service of Roan Champion. Golden Rose is a two-year-old heifer out of Princess Minnie, sells safe in calf to Roan Champion, and has a pair of heifer calves at foot. She will be a bargain for some one. Roan Champion, the bull that I am selling, was two years old in July. I sold him when he was just a year old, and every one pronounced him a better calf than the white bull I sold at Galesburg last spring. He is sure and all right in every way." Mr. Rigg's statement in regard to his cattle can be relied upon in every particular. The announcement for this sale appears on page 41 and catalogs can be secured by addressing R. W. Botts, Plymouth, Ill. When you write kindly mention The Homestead.

Naiman Still Offering Bargains.

Those Poland China bargains that have been offered by John L. Naiman, Alexandria, Neb., are attracting attention. Men in search of good stock are finding that Mr. Naiman has the goods to offer and his prices for the class of stock offered are mighty low. This is a season of short crops with Mr. Naiman and he is offering these boars at such prices that they simply must move. The specials this week are three early March boars, big, broad fellows with lots of length and bone, and they are sired by Naiman's Choice by the great Blue Valley. These boars are all right in every way and the stockman that lands one of them will have reason to congratulate himself. Also some later pigs by Blue Valley's Orange are very good and will sure go at bargain prices. Fall pigs at $12.50 each are also being offered and early orders will be the only ones that are sure of being filled, for these good pigs will go fast. Get in line on this stuff without delay. Mention this paper when you write. See page 38.



The above is an illustration of Pawnee's Price, one of the greatest sons of Smooth Price today in the West. He heads the W. E. Zimmerman Poland China herd at Neola, Iowa, and is a half-brother to the great boars, Big Joe and Big Ben. See advertisement on page 46.

Cooper Offers Poland China Boars at $25.

W. H. Cooper, Hedrick, Iowa, one of the reliable breeders of big-type Poland Chinas, is offering for sale fifty head of big-type boars of March and April farrow, all large enough for service, at $25 each. They are sired by the 1,000-pound Big Bone 2d, 900-pound Big Expansion and the 600-pound yearling Chief Leader. The dams of the pigs are extra large sows weighing from 500-pound yearlings to 800-pound matured sows. Mr. Cooper is very busy, having a large auction business and has not time to carry on an extensive correspondence and for this reason asks anyone interested in a good boar to send him a check for $25 with first letter and he guarantees to send you a boar that is worth the money. If you want a good boar write Mr. Cooper at once and send him your check as per his announcement on page 47. When writing him be sure and mention The Homestead.

Affairs at Pioneer Stud Farm.

John G. Truman, manager of the Pioneer Stud Farm, Bushnell, Ill., writes: "Our horses arrived from the Indiana State Fair in good condition. We had our usual success at that fair, winning both championships on Shire stallions and mares, together with every first prize that we showed for. We have recently sold to Samuel Insull for his Hawthorn Farm, the imported Percheron fillies, Lagestiere and Limonade. The former will be remembered as the filly that won the first prize in the two-year-old class at the great Percheron show held at Mamares on July 6th. She was pronounced by expert judges at that time to be one of the grandest specimens of the breed ever exhibited at that show. Limonade is also an outstanding filly of the same age, and both fillies are sired by the noted Huchoir. They weighed last week 3,470 pounds, there being only ten pounds' difference in their weight. I am pleased to say that our horses are all doing well. The importation that arrived three weeks since are in first-class condition and ready for sale. We are making attractive prices just now in order to make room for another importation that W. E. Truman will bring over next month. We shall be pleased to mail our catalog to anyone requiring strictly high-class draft horses of either of the breed we handle." See the Truman advertisement on page 42.

M'MASTER'S SALE OF SCOTCH SHORT-HORNS

ALTONA, ILLINOIS, WEDNESDAY, OCTOBER 15, 1913

40 HEAD---5 BULLS---A TOP LOT

THIS is the fourth annual offering from Glenview, and is the best lot of cattle ever sent forward from the herd, both as regards breeding and individuality. The female list includes some of the greatest breeding matrons and young cows ever presented in any sale. Ten cows will sell with calves at foot by such sires as Roan Sultan, Masterpiece, Silverdale, Browndale Sultan and other top bulls. In the bull list is Glenview Dale 4th, a red yearling by Browndale Sultan, that is a top one in any company; a good one by the champion, Avondale, and some outstanding calves. In this sale are daughters of Silverdale, Villager, Whitehall Sultan, Nonpareil Crown, Masterpiece, Lord Lenten, Avondale, Maxwalton Dale, as strong an array of sires as the breed affords. The catalog tells the story and will be sent upon application. Mention The Homestead and address

C. J. M'MASTER - - - - ALTONA, ILLINOIS

Colonels Jones and Reppert, auctioneers. Attention is called to the following Short-horn sales: S. F. Lockridge, Chicago, Ill., October 13th; Thos. Stanton, Wheaton, Ill., October 14th; R. W. Botts, Plymouth, Ill., October 16th.

SHORT-HORN DISPERSION SALE

PLYMOUTH, ILLINOIS, THURSDAY, OCTOBER 16, 1913

40 HEAD---13 BULLS---ALL SCOTCH

TWENTY-FIVE females are listed, nineteen of them bred to Pride of Linwood or Village Magnet. There are six strong heifers by Pride of Linwood. The bull offering includes Village Magnet, a two year old by Bapton Magnet, a son of the great Silver Plate, and out of a Cruickshank Village Blossom dam; Progress, a two year old by Pride of Linwood out of an Acanthus dam by Baron Golddust 3d; Elm's Diamond, a red yearling by Pride of Linwood out of a dam by Imp. Pennan Diamond, and ten young bulls and bull calves by Pride of Linwood, all Scotch, and including many outstanding prospects. This lot of cattle will please you. Every cow in the Elms herd raised a calf this year. The families represented in this offering are Nonpareil, Acanthus, Lavender, Rosemary, Queen of Beauty, Village Blossom, Marr Mary Ann, Violet Bud and a few Scotch-topped Waterloo J.'s, a family I have bred with much success for twenty years. W. B. Rigg, Mt. Sterling, Ill., consigns nine head, eight females and one bull, all Scotch bred but two head. Attend this sale. Write for catalog, mentioning The Homestead, to

R. W. BOTTS - - - - - - - - PLYMOUTH, ILLINOIS

Colonel Carey M. Jones, auctioneer. Sale on farm midway between Plymouth, on the C., B. & Q. road, and Bentley on the Wabash. Parties met at both points. Attention is called to the following Short-horn sales: S. F. Lockridge, Chicago, Ill., October 13th; Thos. Stanton, Wheaton, Ill., October 14th; C. J. McMaster, Altona, Ill., October 15th.

The Robison Percheron Sale.

No more reliable lot of Percheron horses will be offered this year than that to be sold at Morton, Ill., Monday, October 20th, by Robison Bros. No matter what your wants may be in the horse line, you can secure what you need at this sale. There are forty head cataloged, and with the exception of seven imported mares and one American-bred mare, every horse in the sale was bred by Robison Bros., so the value of the offering as a genuine breeding proposition is at once apparent. One fact of great importance in connection with this sale is that the younger stock, the yearling stallions and fillies, the weanlings and the suckers, are all by one horse, Vermouth, the winner at the St. Louis World's Fair, and a stallion with a wide reputation as a sire of the very best class. In addition there are a number of the mares that are bred to this horse. Vermouth, despite the fact that he is somewhat along in years, is still in active service in the stud, and giving as good an account of himself as a sire as he ever did. The mares in this sale are the right kind. They do all the work on an 1,100-acre farm and are regular breeders, as a visit to the farm will demonstrate, for colts are to be found on every hand. Imogene is an extra good brood mare, a granddaughter of Seducteur and Introuvable, and bred to Vermouth. Imp. Hereuse is one of the good imported mares in the sale. She is six years old, and has had four colts, so you can see she is a breeder in the fullest sense of the word. Vermouth's Empress is an outstanding good young mare by Vermouth, and Imp. Norcrase is one of the good ones. She is the dam of one of the best yearling fillies in the sale, and is bred to Vermouth. There are plenty of good values in the mares in this sale. They are bred to Vermouth, Molineaux, Olbert, Jayette and Perfection, all outstanding sires. The stallion portion of the sale offering is in every way in keeping with the high standard of the mares, and some exceedingly strong propositions are listed. An extra fine prospect is offered in Velpau, by Vermouth, dam by Seducteur. His full brother was a winner at the Illinois State Fair and the International Live Stock Exposition. This stud should attract attention sale day. Vendome is a cordy-legged youngster by Vermouth, with lots of bone and substance, and Vernon, by Vermouth, out of an imported dam, is a flash-going colt, with conformation and substance. A very attractive proposition is Vassar, another yearling stud by Vermouth, dam Imp. Hereuse, one of the best brood mares in the stud. There are other good young things in this offering, and you will not be disappointed in the horses if you attend the sale. Look up the advertisement on page 40 and send for a copy of the catalog to Robison Bros., Morton, Ill. When you write kindly mention The Homestead.

Zimmerman's Pawnee Price Boars.

On page 46 you will find the Poland China boar advertisement of W. E. Zimmerman, Neola, Iowa, who is offering thirty head of immune boars for sale and they are sired by his great young boar, Pawnee's Price 185387. This boar, Pawnee's Price, is one of the great Poland China herd boars in western Iowa. He is a son of the great Smooth Price and he is out of Extra A., a daughter of Fesenmeyer's old A Wonder, and she was one of the best sows we ever saw. This boar is a half-brother to Fesenmeyer's Big Joe and Pfander's Big Ben, and he is to be classed right along with these two great herd boars. He is a boar not only Mr. Zimmerman can feel proud of, but he would be a great boar in the herd of any of the more noted breeders' herds. He has the size and the bone and quality that they are all after and he is breeding well. In fact, some of the best pigs that Mr. Zimmerman has raised this year are sired by this hog and he has had pigs by several of the other leading boars throughout the West and they have all received the same care. There are few breeders of Poland Chinas here in the West that can show up a better herd boar than can Mr. Zimmerman, and he can show you a bunch of young boars by this sire that you will take off your hats to. He is offering thirty young boars for sale and they have all been vaccinated a month or more ago and are therefore immune and cholera proof. Mr. Zimmerman writes us that he will sell one of his present herd boars, Mastodon King, a son of King Mastodon, and this hog was the top of the Ed Hickey sale last fall. He is a good breeding boar, has plenty of size and ample bone and he is immune, having been vaccinated a month or more ago. Here is a good chance to buy a good herd boar and one that is immune. Write Mr. Zimmerman at once or go and see these boars he is offering for sale. When writing him kindly mention The Homestead.

The Lockridge Short-horn Sale.

Our readers should keep in mind the sale of forty head of Scotch-bred Short-horns at Chicago, Monday, October 13th, by S. F. Lockridge, the veteran Short-horn breeder, at Greencastle, Ind. The cattle are a well-made and well-bred lot, carrying in their veins probably as much pure Cruickshank blood as can be found in any herd in this country. They will be presented in good condition, not in any way overdone, but in shape to go ahead and do well for the buyer. Mr. Lockridge handles his cattle under condi-

tions that are sane and sensible and make for future good results, and those who attend this sale can rest assured that they will not be disappointed in the offering. Remember the date, next Monday, October 13th. This is the first of a four days' circuit of Illinois Short-horn sales, all within easy distance of each other, and every one well worthy of the utmost consideration and patronage.

Botts' Short-horn Dispersion.

There is much to interest the lover of good cattle in the catalog for the Short-horn sale of R. W. Botts, Plymouth, Ill., Thursday, October, 16th. Mr. Botts is selling practically his entire herd, consequently the public will have an opportunity to place values upon a good many cattle that otherwise would not be priced at all. Some very desirable Scotch-bred females are listed. The cattle in this offering were practically all bred by Mr. Botts, and are the kind that have proven profitable to him during the quarter of a century that he has been engaged in breeding Short-horns. One of the most valuable things in the offering is Azelia 3d, belonging to the Cruickshank Acanthus tribe, and while she is ten years old she is well worth consideration. Mr. Botts purchased this cow when a yearling heifer for $180. He has sold $1,250 worth of her produce and has nine head of her descendants in the sale. There can be no more striking illustration of the value of this lot of cattle than is embraced in this cow and her descendants. This cow is by Baron Golddust 3d, one of the best sons of the great Baron Gloster, and out of a dam by Gold Coinage, a Cruickshank Queen of Beauty. Fifth Elms Azelia is a daughter of this good cow, sired by the richly bred Prince Henry. She is bred to Pride of Linwood, the Duchess of Gloster, son of Victor Linwood by the International winner, Cock Robin, so successfully used by I. M. Forbes & Son. Lavender Lady is a good, thick, young cow, due to calve by sale day to the service of Village Magnet, the good young bull listed for the sale, and another good, young cow bred to him is Rosa Gem 9th, a Rosemary by the Cruickshank Violet Bud bull, Gay Prince. Village Pride 2d is a Village Blossom by Golden Crown, with a roan heifer calf at foot by Pride of Linwood, and Emma 27th belongs to the popular Emma tribe, was sired by Lord Roberts and out of a dam by Imp. Pennan Commander. These are but a few of the many good things that Mr. Botts has listed for this sale. There are a number of attractive young Scotch heifers by Pride of Linwood that will look well in any herd. Don't overlook this sale. There will be cattle to please you. The sale comes the day following that of C. J. McMaster, Altona, Ill., and can be easily reached from there. The final announcement appears on page 41. Look it up and send for a copy of the catalog, mentioning The Homestead when you write.

Stanton's Short-horn Sale.

The offering of Short-horn cattle to be made at Wheaton, Ill., Tuesday, October 14th, by Thos. Stanton, will comprise a lot of Scotch and Scotch-topped animals that will appeal very strongly to the buying public. The entire lot of cattle of Bates and Scotch-topped American sorts are of the most approved pattern, the big, roomy, breeding sort of matrons, swinging udders that are good enough to take rank with the dairy breeds. If ever there was a desirable lot of females sent through a sale ring they will be found in this offering. And while many will discriminate against them on account of their pedigrees, we venture to say that at no sale this year will there be offered cattle that will return any more profit to the buyer than this collection of typical Short-horn matrons. The majority of these cows sell with lusty calves at foot, adding very materially to their value. There will be a number of desirable Scotch cattle in the sale, part consigned by Mr. Stanton and part by Smith & Heisserer, Oran, Mo., who selected their cattle for foundation stock, securing the very best that money and experience could buy, and which are now offered owing to the dissolution of the herd. This sale follows that of S. F. Lockridge, Chicago, Monday, and parties can easily attend both.

AN IMPORTANT SALE OF ABERDEEN ANGUS CATTLE

TO BE HELD IN THE SALE PAVILION

WILLIAMSBURG, IA., THURSDAY, OCT. 16, '13

I AM offering many of the most desirable females in my herd in order that breeders desiring really high-class cattle will not be disappointed in the offering. William Cash, Williamsburg, Iowa, and P. J. Donohoe, Holbrook, Iowa, are contributing a few choice specimens of the breed. I take great pride in inviting every breeder and farmer interested in good beef cattle to attend this sale and pass your judgment on the value of the cattle to be sold. Many daughters and granddaughters of the noted Black Woodlawn, the undefeated Erwin C., Prince Ito, Black King of Homedale 2d and others are listed for this occasion. They are of the Blackbird, Trojan Erica, Pride and Queen Mother families. If you want a high-class herd bull or a few females to raise the average of your herd write me for a catalog at once, mentioning The Homestead.

Auctioneers, N. G. Kraschel and Fred Reppert.

100 HEAD 100

POLLED DURHAMS AND SHORT-HORNS

At Auction in Sale Pavilion at

ORD, NEBRASKA, WEDNESDAY, OCT. 15, 1913

In this sale will be offered about fifty head of Double Standard Polled Durhams from the herd of Walker Bros. Ord, Neb. These cattle comprise absolutely the best lot of stock that has gone in a western sale ring in years. They are of the very highest order as to individuals and all of excellent pedigree. All of desirable ages and in the best of thrift. The great show and breeding bulls, Cupbearer Prize, Splendor, Golden Hero Jr., Roan Hero and a few others are represented. The Short-horns include the entire herd of L. B. Branson, Ord, Neb., and are a grand lot of choice beef producers. They carry the best blood of the breed and present an extraordinary chance to get a good foundation of strictly meritorious beef producing cattle. There will be eleven choice bulls in all, and those searching for herd-heading material, of either breed, will find them here. Trains leave Grand Island at 7:00 a. m. Arrive Ord at 10:00 a. m. Leave Ord, 5:00 p. m., and arrive Grand Island 8:00 p. m. Col. Z. S. Branson, Auct. For catalogs mention Homestead and address

MARMION'S BIG POLAND CHINAS

I CAN furnish you with as good a pig as can be found in the corn belt. Pigs sired by five of the best boars of the breed, some by one of the good sons of Rood's Giant and out of a Long King sow. Also a litter by Big Knox.

B. F. MARMION - - **R. F. D. 2, FARMINGTON, IOWA**

POLAND CHINAS AND SHORT-HORNS.

A FEW extra good spring boar pigs at very moderate prices sired by Jumbo the Great 170453 and Long Chief Jr. 179443. Herd immuned by simultaneous treatment and all healthy. Three yearling Shorthorn bulls sired by Pleasant Lawn Knight, an exceptionally good and large bull. All sows and gilts reserved for our sale of February 21, 1914.

ORVILLE O. JONES - - **R. F. D. 1, YORK, NEBRASKA**

45 Poland China Fall and Spring Boars

I AM offering 15 splendid fall boars sired by **Blain's Exception, Big Victor** and **Mammoth Prospect,** and **30 choice spring boars** sired by **Panama Chief** and **Mable's Wonder,** 1st prize Iowa State Fair boar. **Prices $20 to $40.** All out of sows vaccinated last fall. Write me at once and mention The Iowa Homestead. Address **A. W. STEWART** - - - **HARLAN, IOWA**

Poland China Boars---Bargains for Quick Sales

I HAVE a dozen spring boars, big, growthy, big bone and good quality that I will sell at mighty low prices if taken soon. Must have room. Address, mentioning The Iowa Homestead,

J. H. COPE - - - - - - - - - **CARLISLE, IOWA**

Easy Feeding, Heavy-Boned Big-Type Poland China Hogs

8 EXCEPTIONALLY good fall of 1912 boars at $40 to $50. Special prices on last of March and April boar pigs for a time in order to make room for big crop of fall pigs. Choice of these at $25, and some less. Must sell as I am short on room. 50 excellent gilts at $25 and $30 per head, all sired by Big Wonder and Iowa's Product. Fall pigs of 1913 at $12 and $15 at weaning time. Guarantee safe delivery. Perfect health, no disease in neighborhood.

J. B. HEISEL - - **GRINNELL, IOWA**

CEDARBANK POLANDS

SIZE

FULL spring crop of boars at private sale. All have been immuned with the simultaneous serum treatment. Write us. We guarantee satisfaction.

THOS. F. MILLER,
R. 6, YORK, NEB.

Be an Auto or Tractor Expert

Scores of Positions--Good Paying Positions--Are Open!

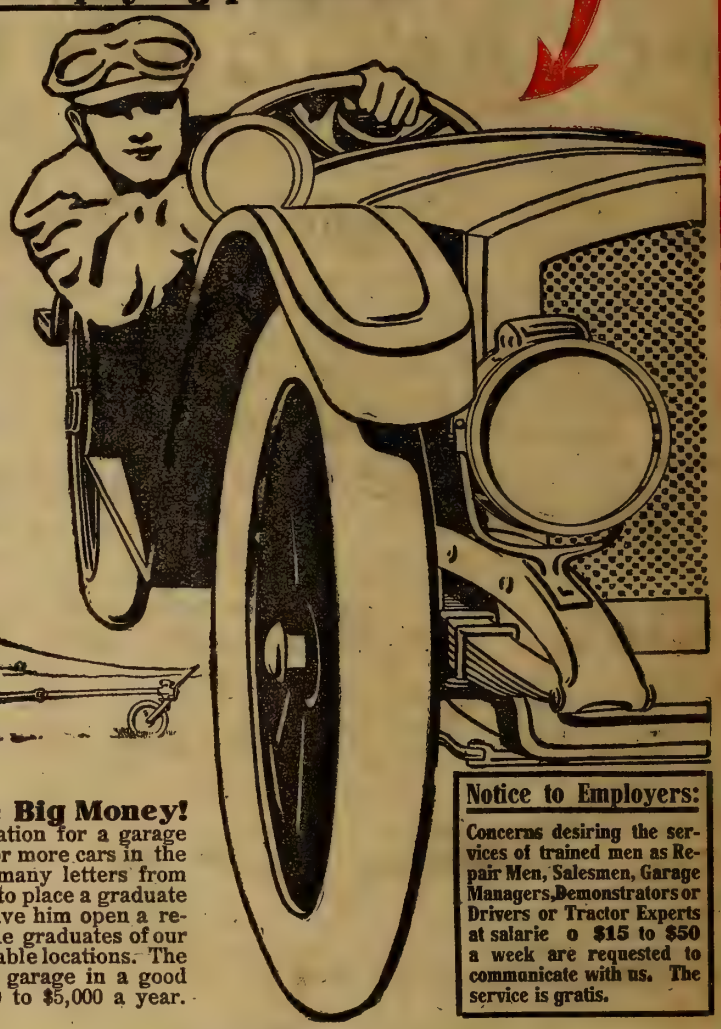
Six weeks from the day you commence your studies in this great practical school you will be able to repair any make of automobile and drive any car on the market. Prepare yourself to make a salary of $75 to $200 a month, or go in business for yourself as garage owner or automobile agent and make from $2,000 to $5,000 a year.

After a thorough inspection of our institution, our equipment and our thorough, practical way of teaching our students, THE REPRESENTATIVE OF "THE IOWA HOMESTEAD" SAID:

"Mr. Rahe, you have a wonderful institution. It is easy to see why it is that your graduates get the best paying positions."

Every visitor, every student, every graduate says the same. The Automobile Training School is an institution that invites inspection. It is a practical school. We have the best equipped automobile and tractor school in America. Thousands of dollars' worth of Automobiles, Tractors, Engines, Magnetos, Chassis, Gears, Lathes—in fact every kind of automobile equipment and machinery are here and **used** daily to instruct our students. Our Garage and Repair Department is one of the largest in Kansas City or the West.

Scores of Automobiles are brought here for repair and adjustment. Our students lay aside their good clothes, don overalls and under the careful guidance of our officers and members of the faculty, **learn by practical experience** how to repair quickly any make of automobile. This is a kind of instruction that other schools cannot offer. In this great Garage and Repair Department our students are taught the details of garage management, how to buy and sell automobiles as well as to do Expert Repair Work. It is here they gain that **practical experience** and **expert knowledge** that secures for the graduates of this school the highest salaried positions as Auto Salesmen, Demonstrators, Garage Managers, Repair Men and Drivers.



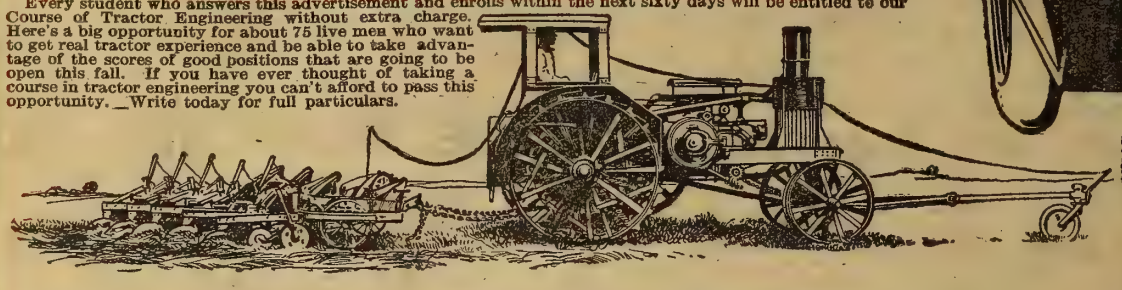
Earn $75 to $200 a Month

Automobile Training School graduates are in demand. The letters reproduced below are from the Studebaker Automobile Company, the Winton Motor Car Co., and others regarding the efficiency of our graduates. We will gladly send you letters from our graduates, many of whom formerly earned only day wages, but who now have responsible and good paying positions. Many are in business for themselves and making big money. It is a fact easily proven that the Automobile Training School of Kansas City has many times more graduates holding responsible positions than all other Automobile Schools in the West **combined.**

We have just added to our equipment a complete "Deaco" starting and lighting system and are in a position to offer you more in this branch of study than any other Auto School in the West. We have a brand New "Deaco" System of the latest model for your instruction; lighting, wiring and taking expert care of self-starting systems. Factories are paying big salaries to experts in lighting, wiring and ignition. You'll have every advantage—you have a brand new 1914 model to work from.

TRACTOR Course FREE!

Every student who answers this advertisement and enrolls within the next sixty days will be entitled to our Course of Tractor Engineering without extra charge. Here's a big opportunity for about 75 live men who want to get real tractor experience and be able to take advantage of the scores of good positions that are going to be open this fall. If you have ever thought of taking a course in tractor engineering you can't afford to pass this opportunity. Write today for full particulars.



The woods are full of ordinary men. Jobs for them are scarce. Good opportunities are open only for **trained, competent** men. Be one of them. You can earn big money in the auto business provided you prepare yourself for the right kind of work. A large auto dealer said recently: "There are not half enough competent reliable automobile men to supply the demand in the west, let alone the big cities in the east."

Auto experts earn $75 to $200 a month, some of them a great deal more. Scores of our graduates now hold responsible places because they can do expert work. In every city the demand for trained automobile experts is enormous. For years to come this condition will exist because the auto truck and tractor business is still in its infancy and it will require thousands of trained men to fill the need in these branches alone.

Garage Owners Make Big Money!

Almost any town is a good location for a garage and repair shop if there are ten or more cars in the locality. In our office we have many letters from business men who have asked us to place a graduate of our school in their city, and have him open a repair shop. We are glad to help the graduates of our "C" and "D" course to find profitable locations. The earnings of a properly conducted garage in a good community should be from $1,000 to $5,000 a year.

Notice to Employers:

Concerns desiring the services of trained men as Repair Men, Salesmen, Garage Managers, Demonstrators or Drivers or Tractor Experts at salarie o $15 to $50 a week are requested to communicate with us. The service is gratis.

Read These Letters From Automobile Manufacturers

THE STUDEBAKER CORPORATION.
Automobile Department,
Kansas City, Mo.
Automobile Training School,
Kansas City, Mo.

Gentlemen: No doubt you will be pleased to learn that one of your graduates has been promoted to the position of Road Expert. The balance of the boys in our employ who came from your school are doing exceptionally good work.

You have the unqualified endorsement of the local Studebaker Agency.

Yours very truly,
The Studebaker Corporation,
By J. L. Purcell,

Kansas City, Mo.
Mr. H. J. Rahe, Pres.,
Automobile Training School,
Kansas City, Mo.

Dear Mr. Rahe: There isn't any question in my mind that your automobile school is the best in the country.

I, for one automobile repair man, would not think of having a student who came from any other school.

Yours very truly,
W. R. DEMSTER.

THE ADMIRAL GARAGE AND REPAIR WORKS.
Kansas City, Mo.
Mr. H. J. Rahe, President,
Automobile Training School,
Kansas City, Mo.

My Dear Mr. Rahe: For the past three years nearly all of our mechanics have been graduates of your school. It is a pleasure to state that they handle delicate repair work on magnetos and coil boxes like factory experts. It has often puzzled the writer that such expert knowledge could be drummed in a man's head in such a short time. Wishing you continued success, we remain,
ADMIRAL GARAGE,
W. A. Slusher, Mgr.

SCHERRER AUTO REPAIR CO.
Automobile Specialists
Automobile Training School,
Kansas City, Mo.

Gentlemen: The other night at a meeting of the Automobile Repairmen's Association, the members in general discussed the plan whereby they could hire competent Auto Repairmen.

It was then that I learned that nearly every garage repair shop and agency in Kansas City are hiring your students exclusively.

Hereafter when we are in need of competent help we will communicate with you.

The Scherrer Auto Repair Co.
By Chas. J. Scherrer, Mgr.

NO BOOKS USED— NO TOOLS TO BUY

The Automobile Training School has no pretty picture books, and offers no charts or correspondence courses. These things don't teach you the automobile business so that you can go out and earn a big salary. Our students receive individual, practical instruction under practical conditions on real up-to-date automobiles. The progress of each student is carefully watched by our instructors.

Our Complete "C" Course

Our complete "C" Course is a Life Scholarship and consists of all practical work and includes eight weeks' instruction in Driving, Vulcanizing, Practical Repair Work, Tires and Tire Trouble, Forge Work, Lathe Work, Welding and Assembling, Automobile Salesmanship, Shop Management, Lubrication and Oils, Commercial Trucks, Electric Cars, Gasoline Engines, Garage Management, Automobile Laws, Magnetos and Automobile Advertising.

Special Offer to The Iowa Homestead Readers

I have a special offer to make a limited number of readers who answer this advertisement right away. I am authorized to make you a special low price on our $100 "C" Course which includes a life scholarship and our complete Tractor course without extra charge. Your tuition covers all expenses at the school. We have no extras. **Good board and room near the school at special low rates to our students.** Here is a chance you may never have again to fit yourself for the fastest growing, best paying industry the world has ever known. Write me TODAY.

Send the Coupon Today for Important Information!

Write today for our big free catalog. It is interesting and instructive—does not cost you one cent and places you under no obligation whatever. You need it for your own sake, not mine. Some of the brightest wide-awake young men in the West are here in school now. Are you going to join them? There's no profit in waiting. Write me today, or better yet, get on the train, come to Kansas City, and let me show you what a great big splendid opportunity there is here for you.

Overland

$1075
With Gray & Davis electric starter and generator

Value up! Price down!

THE infinite advantages and manifest economies of large, unrestricted automobile production must be clear and evident even to those who have neither experience nor conception of what governs, controls and limits a manufacturing institution. It is a certain and established fact that the largest automobile producer can readily get his manufacturing costs far below the "average" and thus undersell the "market."

Each year Overland *value has increased*—

Each year Overland *prices have decreased*—

Each year the Overland *output has been enlarged*—and it is the greater production that makes feasible an *increased car value* at a *reduced price.*

Our output for 1914 is 50,000 cars, which is the world's largest production on this type of car.

And every Overland value increase is just as visible, just as conspicuous and just as actual as the material reduction of our selling price. While other manufacturers refer you to more comfort, more grace, sweeter running motors and other *invisible* and more or less *imaginary* incidentals, *we give you in addition to more comfo. t, grace and beauty, increased value that is substantial and tangible.*

Look at the newest Overland.

The wheelbase has been *increased* to 114 inches.

But the price is lower than ever.

The motor is *more powerful.* It has been *increased* to 35 horsepower.

But the price is lower than ever.

The tires are *larger*—33 x 4 in. Q. D.

But the price is lower than ever.

The equipment includes such *costly additions* as electric lights all around—head, side and tail—even under the dash.

But the price is lower than ever.

The body is designed with *full cowl dash* and finished in *Brewster green* with lighter green striping and trimmed in polished nickel and aluminum.

But the price is lower than ever.

Then there are Timken bearings; a $40 jeweled Stewart Speedometer (set so that it can be read from the driver's seat) an electric horn, deeper upholstery, and an 18-inch steering wheel.

But the price is lower than ever.

And so we could go on, almost indefinitely, giving new additional features—new value increases—one after the other.

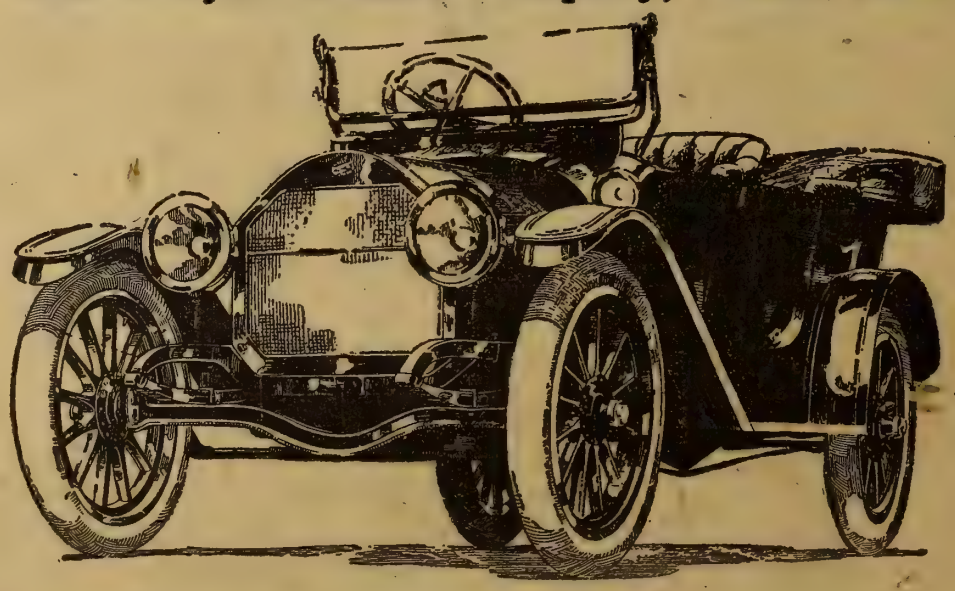
You had better see this car before you buy. Any one of our dealers will be glad to give you full details and a thorough demonstration.

There is an Overland dealer right in your town. Look him up today. We advise prompt action for in seven days after our 1914 announcement we had immediate shipping orders for over 5,000 cars.

Handsome 1914 Catalogue on request. Please address Dept. 80

The Willys-Overland Company, Toledo, Ohio

Electric head, side tail and dash lights
Storage battery
35 Horsepower motor
114-inch wheelbase
Timken bearings
Splitdorf magneto
Model R Schebler carburetor
Three-quarter floating rear axle
33 x 4 Q. D. tires
Cowl dash



Brewster green body with light green striping, nickel and aluminum trimmings
Deeper upholstery
Mohair top, curtains and boot
Clear-vision windshield
Stewart speedometer
Electric horn
Flush U doors with concealed hinges

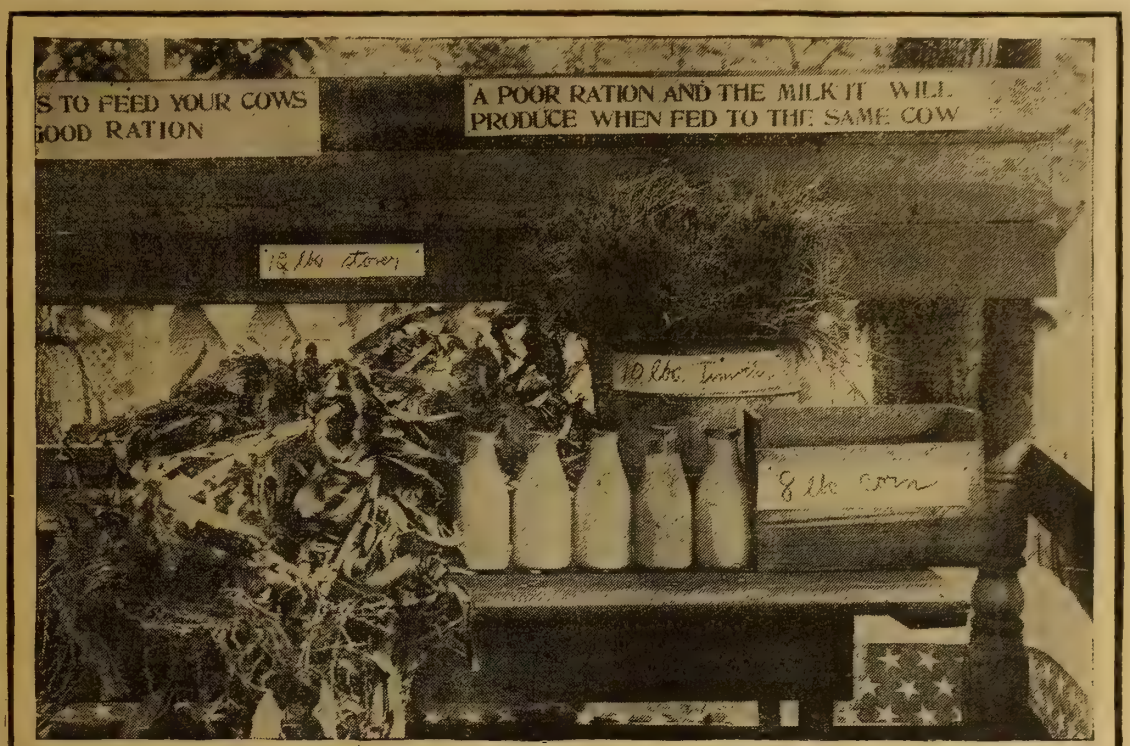
Getting Profit From The Cows

How the Problem of Feed Determines Whether the Cows of the General Farmer Are Earning Their board or Should be Sent to the Butcher Block—By A. A. Coult

A LARGE part of the profit from dairy farming depends upon the feeding, yet very few farmers really know what is a well-balanced ration. The larger dairymen have given more attention to the business, and most of them know just how much milk and butter fat each cow produces a year, as well as the proper proportion of grain and roughage to feed. A great many farmers have become interested during the past few years in keeping records of milk and butter-fat production and have found that many of their cows show a financial loss, placing the cost of feed and care against the revenue from the milk products. Naturally they get discouraged and want to dispose of the "boarders" as soon as possible. P. M. Brandt, instructor in dairy husbandry at the University of Missouri says that a large part of the financial loss may result from improper feeding of the same cows. Experiments have been made at the college station at Columbia, and from the results obtained, Professor Brandt has made up an exhibit showing the usual ration, and also a good ration for one day, and the results. The usual, or poor ration is composed of: 12 pounds of corn fodder, 10 pounds of timothy and 8 pounds of shelled corn, which produces five quarts of milk. This ration is available for almost every farmer and seems to be the one commonly fed. The good ration consists of: 30 pounds of silage, 10 pounds of clover and 8 pounds of mixed grains, composed of shelled corn, 4 parts; bran, 2 parts, and oil meal, 1 part. This ration fed to the same cow which was producing only 5 quarts of milk on the poor ration should produce 13½ quarts of milk per day. However, it is not intended to convey the impression that changing the feed one day will make a difference in milk production the next day. It will not, but in a few days there should be a noticeable increase in the milk production. The quantities given for feed and results are based on an average of a number of experiments. If the farmers who have been feeding the poor ration to their cows and are about decided to get rid of them will try the good ration, beginning when the cows are fresh, for a reasonable length of time and give them a fair trial, no doubt some fairly good milk-producing cows will be saved from the butcher's block until better milk producers can be obtained, the present ones being able to show a profit under proper feeding. If the cows do not respond with an increased milk production after being fed the good ration for a reasonable time, they should be disposed of.

It is highly important that the widest publicity should be given to sensible feeding methods at this time because the tendency to slaughter calves even from the best cows has been entirely too great during the last five years. The country is short of good cows at the present time and will be for years to come, and it is, therefore most desirable that even mediocre cows be fed in such a way so as to bring them up to the point of maximum production. Possibly every dairyman cannot change the record of a cow from five to thirteen quarts by altering the methods of feeding, but it is possible by the sensible use of feeds to at least double the production of an ordinary cow. It is also true that all dairymen do not have at hand a supply of ensilage and while in this respect they are handicapped, yet after all corn fodder of good quality may be fed with reasonable expectation of obtaining good results. Equally good or better returns will be obtained by cutting out the corn fodder and substituting clover hay in the place of the thirty pounds of ensilage that is recommended by Professor Brandt. It must be remembered that in the matter of pounds there is a wide variation between cows, but the relation of one ingredient to another as given should be maintained regardless of the number of pounds used daily. An increased production to more than two and one-half times the original quantity, on feed costing practically the same money, is worth consideration from every farmer who owns at least one cow.



A POOR RATION, YIELDING BUT FIVE QUARTS OF MILK.

A GOOD RATION, YIELDING 13½ QUARTS OF MILK, WHEN FED THE SAME COW.

SHIPPING WATER INSTEAD OF CORN.

The United States Department of Agriculture estimates that the farmers of the United States ship practically 500,000 tons of valueless water each year as a constituent part of the new corn crop. This extra weight would be sufficient to load a freight train 110 miles long.

A thorough investigation of the problem relating to the surplus moisture in food stuff is being made by the department in the hope of cutting off a very decided waste. Under the present system the shipping of this useless water has much to do with the great shortage question and has still more to do with reducing the quality of the product on account of the deterioration of the shelled corn before it is finally consumed.

Attention is called to the fact that compared with those of foreign countries American methods are exceedingly wasteful in this regard. An example of this is shown in the manner in which potatoes are shipped in Germany. In that country all culls and faulty potatoes which, in this country, are thrown away, are dried so as to remove all excess of water and then shipped to various points for stock food purposes. Potatoes in their natural state contain upwards of 70 per cent of moisture and it can be easily understood why long shipments of this valueless material contribute, at least to some extent, to the high cost of living.

In the press report that has been sent out by the department of agriculture no specific remedy is suggested in regard to the reduction in the percentage of moisture in corn that is shipped. Presumably, it is the desire of the department to encourage farmers to grow varieties of corn that will mature and that, therefore, will be well dried out at cribbing time, but, as a matter of fact, in order to accomplish anything like practical results along this line sensible economy can only come through improved systems of drying. Corn is never cribbed until freezing weather and excess moisture largely remains in the corn until it is thawed out. If it is shipped, therefore, any time during the winter months the extra supply of water must be carried to market unless it is artificially dried before being shipped. While the problem is one that interests farmers immensely, yet after all it is of equal moment to the grain merchant as well as to the consumer. It is only a question of introducing an economical drying method that will more than offset the waste that is now involved in shipping.

SAVING THE CALVES.

There were 10,000,000 calves slaughtered in the United States last year, each calf approximating sixty pounds of dressed meat. Mr. Arthur Meeker, vice-president of the Armour Packing Company, points out that these calves had they been kept two years would have yielded 600 pounds of dressed beef each, thereby making 6,000,000,000 pounds of dressed beef in the aggregate. This represents one-third of the annual beef consumption in the United States and Mr. Meeker concludes that unless we discontinue the practice of slaughtering calves we shall soon have no calves to slaughter.

A plan is being considered by which part of the half-million-dollar appropriation of the American Packers' Association will be used to educate the consuming public against veal consumption. It is pointed out that every pound of veal eaten is a stone in the edifice of high prices. If sufficient sentiment could be created against the consumption of veal so that it would afford no profit to the consumer the wholesale marketing of vealers would soon be discontinued.

There is another phase to this calf-slaughter question, namely, that one-half of the calves sent to market are females and in many instances these heifers carry two or three crosses of improved blood. Viewed from this standpoint it must be conceded that the marketing of 10,000,000 calves annually actually amounts to wanton waste.

THE DISK PLOW.

A Missouri subscriber asks for information concerning the draft of the disk plow. His soil is a gravelly loam and he wishes to compare the relative merit of the disk and moldboard plow when these are used in this type of soil.

Professors Davidson and Chase, in their work on farm machinery, call attention to the fact that the draft of the disk plow is often heavier in proportion to the amount of work done than is the draft of the moldboard plow. In the first place the plow itself is much more cumbersome. The disk plow is only recommended to be used in sticky soils, that is, soils that will not scour with a moldboard plow. Under certain conditions the disk plow may also be used where the ground is exceedingly hard. In this case it will do the work with less draft than will the moldboard plow. Even manufacturers of both types of plows agree that the field for the disk is exceedingly limited and that therefore, under ordinary circumstances, a moldboard plow is to be preferred.

Attention should be called to the fact that the disk plow cannot be used in sod because it is first and foremost a pulverizer. This being the case, it can be inferred that for ordinary farm conditions a moldboard type will give much better satisfaction all round.

MEN NOT ALTOGETHER TO BLAME.

When Secretary Houston, of the department of agriculture, recently wrote 5,000 farm women about their home life it was expected that there would be some interesting replies received. He is already getting them. Womanlike, some say that their hard lot is due to husbands who are grouchy. Others say that they have to work too hard and that there is not enough companionship for the woman on the farm. Still others, and probably with the best grounds for complaint, call attention to the large amount of physical labor which the farm woman must do, in carrying water, coal and wood, lifting heavy chicken coops and attending to the other duties connected with a day's work on the farm.

That most farm women do more work and harder work than there is any call for cannot be denied. That the "old man" of the farm is entirely to blame for this, in many cases, is doubtful. Most men will equip their homes with labor-saving equipment, if they have the money with which to do it, whenever the women folks insist upon it. Hard working themselves, most men think little about the work in the home unless their attention is called to it, and rarely is this attention called except, perhaps, after broken health or peevish spirits make it too late to remedy matters. Where conditions are not what they should be in a farm home, a woman is usually to blame though she is not aware of it and would stoutly deny it if accused of being.

Most folks, women included, receive, in this world, about the sort of treatment which they expect, or are willing to accept from others. If a woman regards herself as the proper person to chop the wood she is very likely to have that opportunity. If she regards herself as able to carry water from the well in the barnyard when a cistern and pump at the house is needed, she is very likely to be allowed to do so. And what is worse, if she brings up her sons and daughters to expect this sort of work of a woman she is doing nothing to lighten the work in other farm homes of the future.

Many men are "ornery critters," there is no disputing that fact, yet conditions in many farm homes where, according to the farm women writing Secretary Houston, conditions could be greatly bettered are, in a great measure, due to the lack of interest of the women themselves, all rumors to the contrary notwithstanding.

OUR FRIENDS THE BIRDS.

During the cold winter days when the snow covers the ground several inches deep there is danger of the quails and other birds that winter in cold climates starving to death. It will pay to look after them and scatter some grain where they may have access to it. It will pay to take care of the birds.

Birds are a blessing to the producer, inasmuch as they protect the growing crops from the ravages of various insects. One hundred quails will devour several thousand weed seed every day, and in the spring will catch hundreds of insects that prey on the crops if left alive.

But the quail is not the only bird that gathers seed, bugs and worms. The robin is also fond of seeds and insects. I have seen this bird on her hunt for bugs and worms. She would hop about in the garden looking among the foliage of vines and vegetables for insects. In a moment she would have one in her bill and away she would fly to her nest in the tree where the mouths of newly-hatched birds were stretched wide open to receive the bug or worm.

The swallow that flits about the eaves of the barn is one of the most insectivorous of birds. He has a mania for catching flies, and often captures this insect on the wing.

The blackbird is often troublesome to the farmer because he will dig out the newly-sprouted corn and sometimes devour grain at harvest, but he more than pays for all the damage he does. He is a veritable bug hunter, and insects by the hundred find their death in his craw.

The bluejay lives mostly on insects. He is especially fond of those insects that hibernate. If he can find their home he will tear it to pieces and devour the occupants.

The sparrow family are never-tiring hunters for weed seed. Their food is composed mainly of weed seed, and a sparrow will eat a quarter of an ounce of these every day. So in many states these sparrows are devouring tons of these seed each year. This is certainly a help to the farmer.

Mr. Crow, sometimes spoken of as "the black rascal," will often dig up the sprouting corn and devour a few turkey eggs if he can locate the nest, yet his appetite calls for grasshoppers, cutworms and meadow mice. So he is really a friend to the farmer.

The hawks and owls are surely targets for the farmer's gun, but they like grasshoppers and crickets. Mice and other rodents often fall victims to their claws. They may steal a chicken now and then, but the good they do the farmer counterbalances the evil.

POP CORN DESERVEDLY POPULAR.

Pop corn time will soon be here. Red, juicy apples, nuts and open fire and plenty of pop corn do as much to make the farm home attractive and loved by young folks and old ones, too, as any other agent. No statistics are available, yet it is a safe bet that the homes in which there has always been plenty of pop corn, plenty of sociability and family life, are the homes from which come fewer failures, fewer wayward girls and dissolute men than the best and most elaborately furnished homes in the world, where there are no attractions in the shape of pop corn and family affection. Agriculturally the growing of pop corn is of small import. There are only a few sections of the country, not large in extent, where this variety of the maize family is grown upon anything like a commercial scale. Yet so important is this crop that the United States Department of Agriculture has just issued a bulletin on the subject of "Pop Corn for the Home." It is known as Farmers' Bulletin No. 553, and contains much valuable information regarding the growing of this crop, including several excellent recipes for making pop-corn balls and other pop-corn goodies. A free copy may be had by writing to the department at Washington, providing one writes while there is an available supply.

SENSIBLE USE OF STRAW AND LEAVES.

An Illinois subscriber in advocating the policy of economy strongly endorses the practice of converting into fertility such forms of cheap roughage as straw and leaves. Among other things he says:

In the fall of the year many farmers spend a good deal of time burning up the straw and the leaves. This is a mistake. Both of these are an asset to the wideawake farmer. There are many uses to which the straw and leaves can be put. In the first place straw will be relished by stock in the cold winter. They should not be put on this alone as a roughness, but it can be mixed with hay or be kept in a manger to itself where the stock can have free access to it. Oat straw, especially, is considered good for horses and cattle, and when roughness is scarce they will thrive very well on it with a liberal feed of grain. Then as a bedding straw and leaves can be used very profitably. If the leaves are gathered and piled in a dry place they can be placed in the stalls at night and horses and cattle will enjoy them as a bedding. Either straw or leaves are good for a mulch for strawberries in winter. I have used both and find they are equally good to protect the tender plants from the freezing cold weather. Leaves should not be spread so thickly as straw, as they pack down closer. When vegetables are to be covered for winter, a light covering of either leaves or straw will protect them from the soil and keep out lots of cold.

But I have found that straw or leaves are good as a fertilizer. If they are plowed under or allowed to decay partly they will assimilate with the soil and add humus to it. I know men who haul out their leaves in the fall of the year after raking them from under the trees and scatter them over the land, plowing them under before the winds sweep them away. By spring they will have decayed and enriched the soil. Then if leaves are piled up in a pen and allowed to rot, the leaf mold, as it is called, will be very fine for enriching the soil, but I believe the greatest benefit is realized when the leaves are plowed under in the fall. Likewise straw is good for fertilizer when plowed under in a loose condition. I tried this plan on a small tract of land and found it built up the soil almost as well as the fertilizer from the barn. The old straw rick that has rotted down can be utilized for manure very profitably. The farmer should never burn it, but haul it out and scatter it on the fields for a fertilizer. I have done this and could tell to the very row the next year where the rotted straw had been scattered. The man who utilizes all the by-products of his farm and gives back to his land the strength he has taken away in the crop will never impoverish his land and make farming unprofitable.

Certainly the day is past when men can afford the waste involved in the careless handling of straw. In the case of leaves the element of labor might enter as an important factor, that is, the benefit of using the leaves might not offset the expense of handling them. No fault whatever can be found with the recommendation of the plan of using leaves for mulching certain vegetables and, indeed, even for storing a supply for bedding if, in the latter case, as said before, the labor of gathering is not too great.

AT SEA ABOUT SWINE TROUBLE.

In the following communication one of our subscribers, Mr. L. H. Rowlet, gives his experience in dealing with a herd of diseased hogs. Among other things Mr. Rowlet says:

Your article published in a recent issue on "Hog Cholera, Typhus Fever," etc., by A. L. Beverly, is of special interest to farmers and hog raisers. It is a fact that most of us have considered all the hog troubles of a serious contagious form to be hog cholera and up to this year veterinarians have paid little attention to swine, therefore they don't know much about their troubles.

Vaccination with serum was reported to check the disease when administered in time. When it happened that hogs died after being treated with serum the thought was that they were infected with cholera germs long before showing any signs of it.

Disease came closer to my herd every week and I decided to vaccinate, and so told our local veterinarian. On the 12th day of August we went at them with the so-called immune preparation that he got in Indianapolis. All this time I had kept the hog quarters clean, sweeping the cement floor several times each week and spraying it with a solution of water and zenoleum. I also poured a few drops in their drinking water, feeding oats only and slop made of shorts. Learning later that the immune preparation used was not considered much good, I insisted on

having my hogs vaccinated with serum, for which I had to await my turn. By the time the serum came my hogs were affected with a cold contracted in the first rain we had this fall which brought a sudden change of temperature. I had no bedding in the stable and consequently they lay that night on the ground in the cold rain rather than on the cement floor. After this some began to cough and some seemed to be troubled with dyspepsia. When we vaccinated them several had fever as high as four degrees. Since then I have lost ten one-year-old hogs or over and about twenty-five shoats. In fact I have only fifteen shoats looking healthy.

Since that rain I have kept bedding in the stable, leaving it only two days and then burning it. The floor is swept clean and sprayed. In spite of this they are dying faster every day and I am sure they are affected with typhus, as they have all the symptoms described in the above mentioned article. Some have the red spots, some discoloration of the skin, their respiration is affected and they are paralyzed in the hind quarters, etc.

In another pasture I have ten sows that farrowed the latter part of August. When the cold rain came they had a shed with a dirt floor. The sows look good and healthy, but I lost half of the pigs with what I thought was a mouth disease. Their mouths were sore and their backs were blistered. The rest look well now.

I have done practically everything recommended in your recent article to keep my herd healthy, but have failed. I would by all means save those ten sows and their pigs if I knew of any treatment that I could apply.

Unfortunately this is a form of swine disease to which veterinarians have given little attention. In a book on animal diseases published within the last month by a veterinarian who is recognized as a high authority, not one word is said in regard to the method of handling hogs when they have contracted typhus fever. It is claimed in some instances, however, that 95 per cent of the contagious diseases that appear among swine are cholera and it has been proven that where real cholera exists good serum is effective as an immunizing agent. The results in Scott county, Iowa, during the season of 1913, for example, indicate that the loss was only 1.3 per cent when hogs were treated while in healthy condition. On the other hand, after the herd began to show some signs of being affected the loss was 10 per cent, going up to 25 per cent when the hogs were quite sick before treated and to 58 per cent when they were sick. From this time on it is hoped that scientists will devote more attention to the handling of those diseases of swine that are responsible for heavy loss and yet diseases which in no sense can be called cholera or swine plague.

ECONOMIZE ON ROUGHAGE SUPPLY.

A subscriber who presumably knows something about the necessity of making every forkful of roughage go as far as possible under present conditions, gives some pointers on the subject in the following communication:

In many sections the feed crop is short this year. This means that we must make it a point to utilize every particle at our command. We must not let any roughness go to waste about the farm. This means that all fodder, straw and hay should be properly cared for and properly fed.

The fodder should be tied up well after the corn is husked. It should be tied with stout binder twine. The storms will not blow it down. If a shock is wrecked by the storm, the rain will soak it. It will then decay and become unprofitable for feed. It will be better to haul the fodder to the barn and stack it in one great pile under a shed than to have it blown down by the storms. It will be a good plan to husk the corn when the fodder is a little damp and it can be handled to better advantage.

The straw rick does not furnish the best ration for the cattle and horses, but it will be eaten if it is nice and bright. It has always been our custom to top out the rick anew after threshing and to weight it down with poles to keep the wind from blowing off the top and admitting the rain. Then the straw was salted every week. That is, where the cattle began to eat, salt was thrown into the straw. The stock seemed to relish it better when salted. Some farmers dissolve the salt in water and dash it onto the straw.

The hay should also be under shelter. The big barn should be chock full before winter. Get as much of the hay under cover as possible. My neighbor has a large canvas covering over his big rick, and it turns the water and saves lots of hay for him. Better that than nothing.

Then the farmer should make preparation to feed his roughness so that none of it will be wasted. The plan of feeding fodder and hay on the ground is an extravagant one. Stock will trample more or less of it under their feet. This waste is unnecessary, and it can be avoided. At small or no expense the farmer can construct feed racks into which hay and fodder can be thrown each day. These can be made of poles cut from the timber if lumber is not at hand. By thus making all his feed count the farmer can get his stock through the winter on a great deal less than he thinks.

There is one item in particular referred to by this subscriber to which special attention should be called. He speaks about tying up the fodder after it is husked. As a matter of fact, we are rapidly getting away from the practice of husking corn from the fodder because in reality this is a most expensive task. While ordinarily husking will be done in the fall at a cost ranging from three to five cents per bushel, we doubt if it can be husked out from the fodder under ten cents a bushel, and in some instances it will run as high as fifteen cents. It is true that the husking is not worth so much as it is in the fall, but after all, time is time and we like to get away from as many expensive items of labor as possible. Where any considerable amount of fodder is to be fed out in this way the husking should be done in a job lot by shredding the fodder. It can then be placed in a stack or in a mow and kept where it is accessible and where it will preserve in the highest degree its feeding value.

INTEREST IN AGRICULTURAL CO-OPERATION.

At the last annual meeting of the Kansas State Board of Agriculture the question of agricultural co-operation was discussed at length. One delegate, Mr. Edwin Snyder, called attention to the tendency of those who champion co-operative movements to go too far and thereby injure their own cause. Among other things Mr. Snyder says:

Co-operation is no new matter. More than seventy-five years ago a dozen poor weavers met in a poor inn in Rochdale, England, to devise some means to better their condition. After discussing several matters, strikes and the like, they concluded that if they couldn't make arrangements to get better wages they ought to try to do something to make what they received go further, and they organized at once into a society. Of course, a good many scoffed, but they went ahead. They were to pay into the common fund twenty pence per week, and only a few were able to do it at that time, and it took a year to raise a capital stock of $140 with which to begin business. They rented a room, bought only such goods as were absolutely needed by their families, sold for cash only, and at first opened the store only at night. That society has been going for over seventy-five years. It has spread all over England. They buy their wheat by the cargo, to be ground in their own mills for their own members. They buy refrigerated meats, mutton and beef from Australia and the United States in cargoes, to be sold at their butcher shop. It has been extremely prosperous. I have no doubt that each one of the members of this society is far better off personally because he learned to save something and to do business. That is what we need in this country—co-operation among the farmers. We must have it, and it is not a difficult matter. Of course, during the Farmers' Alliance agitation, twenty-five years ago, we started a great many co-operative stores. Most of them failed through mismanagement and the credit system. Cash payment is the essence of successful co-operation, and we cannot have it without. Of course, when we started out in the alliance we were going to reform the whole universe. We cannot do that. I believe that if the farmers will study co-operation it will be found immensely to their advantage.

Those who expect the principle of co-operation to work out in this country on the same scale that it is operated in Europe will be disappointed. In the first place we have in every agricultural community so many different nationalities of people to deal with that a new difficulty is encountered and, while these people are all good Americans, they look on matters of this kind from a radically different viewpoint. Co-operation in the end will succeed best if in the beginning it is applied to simple matters. A good example of this is found in certain neighborhoods where a number of men engage in breeding the same class of stock. In this case they have the advantage of many economies both in the buying and selling of their stock, in the use of males, in addition to the natural advantage that results from friendly rivalry. It is a desirable form of co-operation when men subscribe themselves to pay the expenses of a county expert in order that they may be sensibly advised and wisely guided by one in whose judgment they have absolute confidence. These are the less complex types of co-operative movements and the success that they are meeting with indicates that our people can take advantage of this important principle when it is sensibly applied to their own affairs.

DOES NOT ENDORSE FEEDING SILAGE ALONE.

A Missouri subscriber, Mr. L. E. Cline, calls attention to the necessity of using supplementary forms of roughage in conjunction with ensilage. Among other things Mr. Cline says:

The silo has many advantages to recommend it, although if the beginner catches the enthusiasm of the silo agent, or of the man who farms with his imagination only, he is likely to look upon one as a panacea for all farming troubles. It serves its greatest purpose when it is used for storing away corn or similar coarse crops where much of the crop is rendered worthless by the ordinary methods of curing. While silage is very palatable and its beneficial effect upon the animal is very noticeable in the laxative condition and in the fine coat of hair, we should not be misled into believing that it will answer all purposes any more than any other one kind of feed. It is best adapted to cattle feeding for the reason that cattle are able to consume large quantities of it, though the writer has used it also as the bulk of the ration for breeding sheep and for idle horses. Nor should we look upon silage as a concentrated feed. In fact it is the least concentrated of any feed in general use today. This is due, of course, to the high water content, amounting on an average of about 75 per cent, the amount of water depending on the maturity of the corn. This high water content is very evident, when we remember the difference in weight between green corn and cured corn.

Because of the bulkiness of silage it is hard for many classes of animals to more than maintain themselves on it if given all they will eat. We, in the blue grass region, look upon blue grass as a bulky feed yet it is a far more concentrated feed, by actual analysis and experience than corn silage and a better balanced ration. It takes about forty pounds of ordinary silage a day to maintain a 1,000-pound animal, and cattle are the only animals that will eat that much or more, so one can readily see that to get gains on beef cattle, or milk from dairy cattle, or work from horses, the silage for proper results must be supplemented by some more concentrated feed. This supplement should be of a character to make up for the deficiency of proteins in the silage for dairy cows and work animals. Leguminous or clover hays, oil meal, bran or cotton seed meal are the supplements in most general use today. In case of dairy cattle in full flow of milk, where a heavy grain ration is required, corn chop is most frequently used.

It should be said in this connection that the condition of the corn crop when it is put in the silo is a factor that has much to do with this question of supplementing ensilage. Where the fodder is green and very watery it is almost absolutely necessary to offset this succulent condition with dry feed of some form. On the other hand where it is converted into ensilage very good results are frequently obtained by the use of ensilage alone. It is true that large gains cannot be expected, though we have known instances where as much as one pound a day gain has been made by dry cows and stock cattle. It will be found that where ensilage is fed in large quantities cattle will eat a considerable supply of straw and so much the better if they can have access to well-filled straw stacks at will.

WHERE WE ARE AGRICULTURALLY.

According to a statement prepared by the National Department of Agriculture, the condition of all crops on October 1st of this year was about 13.6 per cent lower than their condition on October 1st last year and about 9.7 per cent lower than the average condition of crops on October 1st of recent years (mostly ten-year averages). As conditions on September 1st were 12.2 per cent lower than on September 1st last year and 10.1 per cent below the average year, it is seen that the month of September, as affecting crop prospects, was somewhat more favorable than the average September, though less favorable than September, 1912.

The general level of farm prices of staple crops increased about 2.1 per cent from September 1st to October 1st. This is an unusual increase, for during each September of the past five years the level of prices declined during September, the average decline for the five years being 3.8 per cent. The average level of prices of crops on October 1st was 8.1 per cent higher than on October 1st last year, 0.8 per cent higher than two years ago (a year of short crops), and 6.3 per cent higher than the average of the past five years on October 1st.

The average farm price of meat animals on September 15th was about $7.15 per 100 pounds, which compares with $7.20 on August 15, $6.74 on September 15th a year ago, $5.87 two years ago, and $6.92 three years ago. From August 15th to September 15th the price level decreased 0.7 per cent, which compares with an increase of 2.7 per cent during the same period a year ago, unchanged two years ago, and an increase of 3.7 per cent three years ago.

Newspaper reports tell us that there was still a man that was fool enough to hunt for a leak in a gasoline tank with a lighted match. He found the leak, but he "will never do it again."

Genasco

THE TRINIDAD-LAKE-ASPHALT

Ready Roofing

Just as oil in harness-leather makes it pliable and keeps it from cracking, so the natural oils of Trinidad Lake asphalt preserve Genasco Roofing against the drying-out of wind and weather.

The oils of Trinidad Lake asphalt are put there by *Nature*—and put there to stay. The oils in roofings made of substitutes for natural asphalt are put there by *man*—and they soon dry out.

Genasco lastingly waterproofs all your roofs. It saves you money in the end.

Ask your dealer for Genasco. And you get the Kant-leak Kleet in every roll of smooth surface Genasco—makes roofing doubly easy to lay and waterproofs the seams without cement. Write us for the Good Roof Guide Book and Samples.

The Barber Asphalt Paving Company

The largest producers of asphalt, and largest manufacturers of ready roofing in the world

PHILADELPHIA

New York **San Francisco** **Chicago**

SHERWIN-WILLIAMS
PAINTS & VARNISHES

Your roofs have the biggest share in the constant fight against weather. In summer, sun and rain beat down upon them—in winter, it's snow and sleet and frost. Roofs cost money, and roof-insurance is

SHERWIN-WILLIAMS ROOF AND BRIDGE PAINT

Its durability is great—its cost little. This ready-prepared paint flows under the brush freely and easily and covers a wide space. It is made for roofs that are shingled or of metal and tin, for bridges, iron work, and barns or any other buildings of rough, unplaned lumber.

To understand the use of the many paints and varnishes we make for the farm, send for our booklet, "Paints and Varnishes for the Farm."

It will save you useless mistakes and guide you to the proper, economical use of paint on your property. We send it free.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

Calamity howlers are making all the noise they can because the drouth damaged the corn crop in some localities. In the meantime the drouth-stricken (?) farmers have cut their corn fodder and are feeding other grains to their stock. There may be some cases where the drouth has caused real suffering, but so much noise about the partial loss of a single crop is best answered by the "I should worry" phrase.

We have had almost perfect weather for gathering seed corn up to the middle of October and no doubt many farmers have made the most of it, but at the same time those who have a good place for drying seed should not hesitate to pick more than they will use. In every community there are always a few who prefer paying five dollars a bushel or more for their seed corn rather than hustle a little in the fall.

Cornstalk disease, like hog cholera, is always to be dreaded and avoided if possible. It seems that there is no "sure cure" in either case. In regard to the stalks it is a good plan to see to it that the cattle are not hungry when turned into the stalk field and also to see that they are well supplied with salt and water.

Now that the baseball season is over and the world's series is a thing of the past we may settle down to corn husking without hunting for an excuse to be at the gate when the mailman comes. Baseball is a great game and our United States would be a lonesome place without it.

In looking through our local stores a few days ago I could not find a single pair of leather husking gloves. There were hooks and pins of every description and bales of cotton gloves and mittens. It seems that leather-husking gloves are too clumsy for the "hurry up" age in which we are living today.

The cheap cast steel auger bit is a poor investment for a farmer who ever uses tools. A high-grade bit will last a long time with proper care and will do the work for which it is intended with "neatness and dispatch." The cheap bit is of no earthly use except to have around to lend to chronic borrowers.

Those who did not tie the tops of their corn shocks should go into the field and take a look at their fodder now after the rains, then make a visit to their neighbor's field where the shocks are tied and compare. A wide-awake farmer can learn a whole lot by observation.

Jack Frost has been here to remind us that it is time to prepare for the coming of old King Winter himself. To get fuel and prepare shelter for man and beast will keep most of us busy till snow flies. With everything snug we may "let her howl" with some degree of comfort.

Corn is cheaper, though not yet low in price, nor will it be until we have at least one great crop that is a great crop everywhere. I believe those who must buy will do well to buy at husking time this fall, as the harvest price is usually the low price of the season.

When I hear a man talk about "eradicating" weeds, or when a man uses that word in print. I know he is no farmer. A real farmer does not "eradicate" weeds; he kills them.

Alfalfa seed is the lowest this fall it has been in many a year, a great inducement to sow. I know of many who are going to sow just because of the cheap seed. Some have sown late this fall, willing to risk a late seeding because it cost little to do it.

Woven wire fencing for hogs is not complete without a barb wire along the bottom. Let them once get onto the fact that they can crawl under a smooth wire, the whole herd, big and little, will do it, especially in wet weather. It rusts the lower wire too quickly to put it so low they cannot crawl under so a single barb wire along the bottom is cheaper as well as better.

Once upon a time I used a neighbor's fence-weaving machine, but it was only for once. Weaving by machinery can be done cheaper than weaving by hand—also better—and now it is possible to buy good woven wire fencing for the cost, per pound, of the wire, as it is as cheap for machinery to weave wire as to bundle it into rolls.

There should be a law against leaving hedge brush in the public highway. Thorns not only puncture auto tires, but are also injurious to the feet of horses. Some very careful farmers are careless about leaving hedge brush to blow about.

Doping a sick horse, first with one thing and then with another, is a poor way to make him well. When I do not know what ails a horse I do not dope him. The thing to do then is to call in someone who does know and let him attend to the case. Worst of all, do not trust the life of a $200 horse to a "hoss doctor," the sort of a man to whom you would not trust a plain matter of judgment of anything else.

With raw rubber cheaper than it has been before in years, I cannot understand why overshoes, rubber boots and other rubber goods should not be cheaper than they are. But a few years ago I remember buying a good pair of overshoes for $1; now they charge me $1.50 for the same quality, with raw material much cheaper.

Some Kansas sage has said that the way to get through dry years in the best possible shape is to view the future as does the optimist and prepare for it as would the pessimist. This ought to leave a man free to set his own pace.

The chores, which must be done, rain or shine, is what disgusts many a man with farming. I must confess that many a time in my life I would have been glad of the chance to have had no chores to do, but, at the same time, it pays to do chores well. I doubt if any other work pays so well as chore work that is well done.

Expert automobile mechanics get $100 to $150 a month, demonstrators and salesmen more. Good jobs are going begging—there are not enough experienced men to fill them—because the automobile industry is growing faster than men can be trained. Equip yourself for a good salary as expert mechanic or for entering the automobile business for yourself. Ours is the largest and best equipped auto school in the west, the only school in Nebraska with its large building devoted entirely to automobile training. Complete machine shops, all accessories, many makes of autos. Individual experience in large touring cars. Write for booklet.

The Little Six $1,895

The Original Mitchell Engineer

Again at the head of the Mitchell-Lewis Motor Company—a matchless line for 1914

The Mitchell 1914 Line is being produced by Engineer John W. Bate, *the man who created the Mitchell car*, and the famous Mitchell *Baby Six*. After a year's rest he returns to Racine to place the Mitchell *in a stronger position than it has ever occupied.*

The Mitchell-Lewis Motor Company, *with unlimited capital at its command*, has surrounded Mr. Bate with the best facilities and the finest factory that it is possible to build. It will back the car with the most liberal *Service-Policy for car owners* that the business mind can conceive.

This Means for the Mitchell Car for 1914

Quality—Efficiency—Long Life

Eighty years of faithful service to the American public is the Company's Guarantee

The Mitchell Little Six is the most logical value on the market. It is a six-cylinder car of aristocratic design. It has fifty horse power, 132 inch wheel-base, five passenger capacity. It has a long, low, rakish streamline body, is luxuriously upholstered, is equipped with electric self-starter and generator, electric lights and all modern conveniences and sells for the reasonable price of - - - **$1,895**

Equipment of All Mitchell Models

Electric Self-Starter and Generator.
Electric Lights.
Speedometer.
Mohair Top and Cover.
Rain Vision, Ventilating Quick Action Windshield.
Extra Removable Rim.
Double Extra Tire Carrier.
Bair Bow Holders.
License Plate Bracket.
Electric Horn
Electric Exploring Lamp.
Complete Set of Tools.
Pump Jack.
All included in list price.

Prices F. O. B. Racine

The Mitchell Big Six is very much the same design as the Little Six. It has sixty horse-power, 144 inch wheel-base and seats seven passengers. It has big tires and the same splendid finish throughout as the Little Six, likewise the same fine equipment. Price, - - - - - - **$2,350**

The Mitchell Four has 120 inch wheel-base, forty horse-power and seats five passengers. It is a splendid family car for little money. It is equipped precisely the same as the two sixes and sells for - - - - **$1,595**

No matter which one of the Mitchell cars you select, *you will make an investment.* You have *Bate's* word for it. You have *our* word for it. And the *service* that lies behind it is *ten times better than a guarantee.* We are going to make you like the car, like us and like the agent you deal with. In all respects this is to be a Mitchell year and you will love

The Car You Ought to Have at the Price You Ought to Pay

"Here Is a Watch That'll Be Your Partner for Life"

Go See It At Any First-Class Jeweler's. Have Him Tell You About the Famous South Bend Ice-Test!

ONLY a *quality* watch can stand the drastic test that every South Bend Watch passes through—that of being *frozen in solid ice* for twenty-four hours. Think of owning a watch built of such superlative materials, of such remarkable workmanship that neither boiling temperature nor below freezing can affect it.

The "South Bend" Watch

Surely this is the kind of watch you want—a watch that you can trust through *your* lifetime, and one you can hand down to your children as a treasured heirloom when you are gone.

When you are in town ask the leading jeweler to show you the new South Bend "double-roller" movement. No watch made surpasses it. The South Bend Watch is never sold *by mail*. You can secure it *only* through the retail jeweler, who adjusts it and regulates it to suit your individual personality. That is *one* reason why South Bend Watches are such superb time-keepers.

Write for the Free Booklet Today

It tells all about this marvelous watch, how it is made, the amazing tests it goes through, and why you will find it so exactly suited to *your* requirements.

THE SOUTH BEND WATCH CO., 10 Ironton St., SOUTH BEND, IND.

CURRENT EVENTS

CURTAILMENT of the high prices of meat is up to the public, according to a statement recently made by Chas. W. Armour, president of the Missouri Corporation of Armour & Company, packers. Mr. Armour says that if consumers will discontinue eating veal for two years until the supply of cattle is brought back to its normal condition the bottom will drop out of prices. Furthermore he looks for the lowering of values as the result of the change in the tariff which places meats on the free list. This expert probably failed to remember that it requires at least five years for a policy of this kind to have any effect on increasing the supply while in the meantime the withdrawal of calves from the market will cut the supply to the extent of one-half billion pounds annually.

STATISTICS show that upwards of 3,000 Methodist ministers in the United States preach and work the year around for less than $500 each. These figures were presented at the thirty-second annual meeting of the Methodist Woman's Home Missionary Society which met in Washington, D. C., last week. It was the belief of the majority of the members of the board that this state of affairs should not exist in a land so highly favored as the one in which we live, and particularly at a time when the cost of living is so great.

GOVERNOR WILLIAM SULZER was found guilty last week by the high court of impeachment on three of the articles preferred against him. Following the vote of the court he was removed from office but not disqualified from holding office in the state in the future unless there is a substantial change in the informal vote which has been reported. Article one charges the governor with falsifying a statement of campaign contributions. Article four charges that the governor suppressed evidence by means of threats to keep witnesses from testifying before the Frawley committee. The vote to remove the governor from office is reported to be forty-three to fourteen. According to report the governor is in the best of spirits and it is presumed that he will soon make a statement in his own behalf unhampered by the advice of his attorneys.

MR. JOHN LIND, President Wilson's personal representative in Mexico, reports to Washington that there is every indication of General Huerta's resignation being forthcoming. Mr. Lind calls the president's attention to the fact that the United States may be called upon indirectly to indicate whether or not Huerta's successor will be recognized. Various names have been suggested and the acceptability of the individual to the American government may have much to do with the final choice. At least one conclusion has been reached, namely, that there will be no more parleying by the Washington government with the Huerta regime.

THE turbulency of conditions in Mexico has been such as to necessitate the presence of a German warship in Mexican waters. The cruiser Hertha, which has been used as a school ship, has been made available for duty. Although the United States was not officially notified concerning the sending of this cruiser it is apparent that it is not in any sense displeasing to the president and his cabinet. Other European governments have, upon many occasions in the past, maintained cruising vessels along the Mexican coast. The action of Germany is supposed to indicate that the German government has lost faith in Huerta's ability to control the situation.

PROF. OSCAR RIDDLE, research assistant of the Carnegie Institute, Washington, D. C., announces that he has discovered the secret of sex control in animals. He has been experimenting with 500 pigeons and his investigations have been so extensive as to lead him to confidently announce the discovery. He is not assured, however, that the point has been reached that will find application in the human, though it is believed that the experiments now under way by Professor Riddle will lead to that end.

THE president of the United States is to take a hand in deciding the question of whether Mrs. Emmeline Pankhurst, militant suffragette of England, shall be admitted to this country or not. Mrs. Pankhurst has been detained temporarily at the immigration station on Ellis Island with the expectation of being deported as an undesirable alien. An appeal has been made to Washington in the hope that she will be admitted to bail and thus gain her freedom. Presumably Mrs. Pankhurst had in mind passing through her final hunger strike when she said: "If I am deported the ship taking me back will carry me to my death. I feel that I cannot last long after six hunger strikes—not much more than twenty-four hours—if I enter upon a seventh."

Get Your Canadian Home From the Canadian Pacific

WE will make you a long-time loan—you will have 20 years to pay for the land and repay the loan—you can move on the land at once—and your Canadian farm will *make you independent*.

20 Years to Pay

Rich Canadian land for from $11 to $30 per acre. You pay only one-twentieth down—balance in 19 equal annual payments. Long before your final payment comes due your farm will have paid for itself over and over. This advertisement is directed only to farmers or to men who will occupy or improve the land.

We Lend You $2000 For Improvements

The $2,000 loan will help you in erecting your buildings, and you are given twenty years in which to fully repay this loan. You pay only the banking interest of 6 per cent.

Advance of Live Stock on Loan Basis

The Company, in case of approved land purchaser who is in a position and has the knowledge to take care of his stock, will advance cattle, sheep and hogs up to the value of $1,000 on a loan basis, so as to enable the settler to get started from the first on the right basis of mixed farming. If you do not want to wait until you can complete your own buildings and cultivate your farm, select one of our Ready-Made farms—developed by C. P. R. Agricultural Experts—with buildings complete, land cultivated and in crop, and pay for it in 20 years. We give the valuable assistance of great demonstration farms—free.

This Great Offer Based on Good Land

Finest land on earth for grain growing, cattle, hog, sheep and horse raising, dairying, poultry, vegetables and general mixed farming, irrigated lands for intensive farming—non-irrigated lands with ample rainfall for mixed and grain farming. These lands are on or near established lines of railway, near established towns.

BREAD FROM STONES

By Cyril G. Hopkins

IN NOVEMBER, 1903, I purchased a farm in southern Illinois at a cost of less than $20 an acre. It comprised about 300 acres of poor gray prairie land (the commonest type of soil in about twenty counties in that part of the state) and a few acres of timber land.

It was christened "Poorland Farm" by others who knew of its impoverished condition, and I finally adopted this as the farm name.

In 1913 a forty-acre field of this farm produced 1,320 bushels of wheat. This particular forty acres was bought at $15 an acre. It had been agriculturally abandoned for five years prior to 1904, and was covered with a scant growth of red sorrel, poverty grass and weeds.

During the ten years, this field has been cropped with a six-year rotation, including one year each of corn, oats (or cowpeas) and wheat, and three years of meadow and pasture with clover and timothy.

A fairly good stand of volunteer clover appeared with the oats in 1911 and this was allowed to produce a crop of clover hay in 1912, wheat being seeded in the fall of that year for the 1913 crop mentioned above.

During the ten years about four tons per acre of ground limestone and two tons per acre of fine-ground raw rock phosphate have been applied to thirty-seven acres of this field. Two applications have been made of each material; the phosphate was plowed down for the corn crops of 1904 and 1910, and the limestone was applied in the fall and winter of 1904-5 and after the ground was plowed for wheat in the fall of 1912.

The entire forty-acre field was covered with one uniform application of six loads per acre of farm manure with a fifty-bushel spreader.

A six-rod strip entirely across the field (eighty rods) received the same application of manure and the same rotation of crops as the remaining thirty-seven acres, but no phosphate was applied to this strip, and no limestone was applied to it until the fall of 1912, when the regular application (about two tons per acre) was applied to one-half (three rods) of the six-rod strip.

Only thirty-nine acres of this field were seeded to wheat in the fall of 1912, a lane having been fenced off on one side; and the 1,320 bushels were produced on the thirty-nine acres.

The actual yields were as follows:

One and one-half acres with farm manure alone produced eleven and one-half bushels per acre.

One and one-half acres with farm manure and the one application of ground limestone produced fifteen bushels per acre.

Thirty-six acres with farm manure and two applications of ground limestone and two of fine-ground phosphate produced thirty-five and one-one-half bushels per acre.

The cost of two tons of limestone delivered at my railroad station is $2.25, and raw rock phosphate has averaged about $6.75 per ton, making $9 per acre the cost for each six years.

To this must be added the expense of hauling these materials two miles from the station and spreading them on the land, which I estimate at fifty cents per ton. This makes the average annual cost $1.75 per acre for the limestone and phosphate spread on the field, and this average annual investment resulted in the increase of twenty-four bushels of wheat per acre in 1913.

Thus we may say that the previous applications of these two natural stones brought about the production in 1913 of 864 bushels of wheat, sufficient to furnish a year's supply of bread for more than a hundred people. No high-priced or artificial commercial fertilizers are used on this farm.

As a rule the check strips across each of the six forty-acre fields in the rotation are not harvested separately from the rest of the fields. The limestone and phosphate have produced even more marked difference in clover than in wheat; and where the first application of limestone was made to the three-rod check strip, as well as to the thirty-seven acres receiving rock phosphate, the superiority of the phosphate and limestone together over the limestone alone has been exceedingly marked on both clover and wheat; and, of course, the wheat and other grain crops are benefited not only by the limestone and phosphate, but also by the previous increased growth of clover on the well-treated land, especially where this is pastured or plowed under.

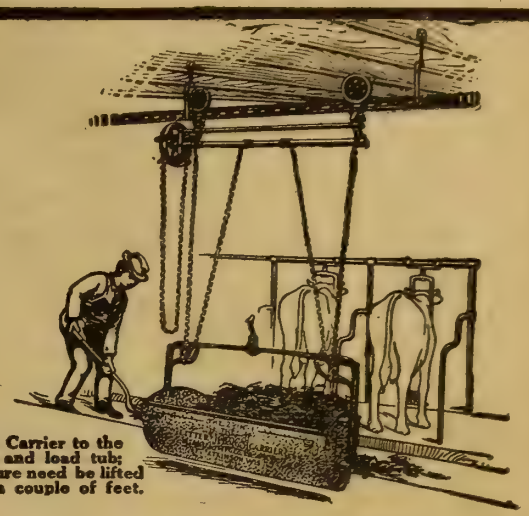
Poorland Farm is in no sense an experiment station, and neither is it a "show" farm. It is operated solely from an economic standpoint, and with the full understanding from the beginning that general farming is not a highly profitable business, and that it is highly unprofitable on poor land.

On the other hand, it is equally well known that intelligent permanent soil improvement on land that must be, or will be farmed, is both the safest and the most profitable investment open to the farmer and landowner. But both the difficulties and the methods of building up run-down soil have been repeatedly discussed by the writer, in public addresses and in published articles, bulletins, and books, and there is no necessity of repeating them here.

Poorland Farm is usually inspected each year by my class of university students in soil fertility, about 100 of whom saw the fields of wheat and clover in June, 1913. It is for the benefit of such as these, who desire to know the truth regarding economic systems of permanent soil improvement, that this brief statement is published.—[Illinois Station Circular.

The factory of the Menominee River Sugar Company at Menominee Falls started the season's run on October 6th. Four hundred men are being employed, in addition to the skilled labor, and will be kept steadily employed for ninety days of twenty-four hours, two shifts being worked as is customary. Beets have been arriving at the rate of fifty to sixty car loads a day. Twenty-four hundred farmers have been growing beets for the factory. These will be shipped to Menominee from 160 points in Dickinson, Menominee and Delta counties in Michigan, and from Wisconsin as far south as Oshkosh. It is anticipated that the factory will pay out in wages about $100,000 and $80,000 and more for beets. The estimated output is 18,000,000 pounds of granulated sugar and 2,000 tons of sugar beet molasses. —[Wisconsin Farmer.

Raising and Lowering Carrier—Track Can't Sag While Loading. A Shove—Out it Goes, Dumps and Returns Automatically.



Drop Carrier to the floor and load tub; manure need be lifted but a couple of feet.

JAMES

2-in-1 Carrier Rigid and Rod Track Combined

This new JAMES Carrier has all the advantages of the rigid track inside the barn—the celebrated JAMES I-beam track that can be bent to any curve without the use of heat, doing away with the expense for curves; the JAMES simple, sure-working switches; the "button-on" hangers that make the carrier easy to erect; a tub that can be quickly dropped to the floor for loading, and that "stays put" while loading—track can't sag, hence carrier moves *only* when you push it—and other features that make barn cleaning easy.

This carrier has all the advantages of the rod track outside the barn. Stand at the barn door, give the carrier a shove, the carrier runs out, dumps at the desired point and returns automatically to the barn. Saves walking through the wet yard and through the snow. An ingenious device makes dumping certain. The 2-in-1 Carrier is the newest JAMES improvement—backed by all the *quality*, *reputation* and *experience* that have made JAMES Carriers and JAMES Sanitary Barn Equipment famous and successful.

We're enthusiastic about it! So is every man who sees it.

It is one of the most *sensible* and *valuable* labor-savers ever put on the market, and is proving a big winner.

Let us tell you all about the 2-in-1 Carrier before you invest a dollar in manure carriers.

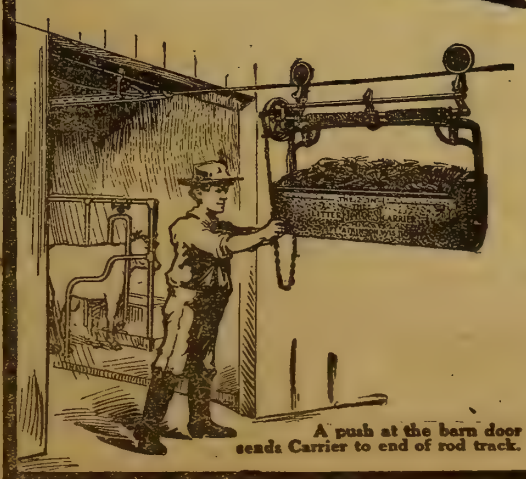
The JAMES is a complete line of carriers—the "Big Boy" and "Mascot" for rigid track, each in two sizes; "Chore-Boy" for rod track; and the "2-in-1" for use on a combination of the two tracks.

All the *know-how ability* that has made JAMES Sanitary Barn Equipment such a nation-wide success is back of these carriers. *Get the facts now!*

Makers of JAMES Sanitary Cow Stalls, Stanchions, Bull Pens, Calf Pens, Cow Pens, Manure Carriers, Feed Trucks and Dairy Barn Ventilators.

James Manufacturing Co., AU-98 Cane St., Ft. Atkinson, Wis.

"Originators of Sanitary Barn Equipment Ideas"



A push at the barn door sends Carrier to end of rod track.

When Carrier strikes the trip, tub dumps automatically.

James Mfg. Co., AU-98 Cane St., Ft. Atkinson, Wis.

Gentlemen: Please send me complete information regarding your new JAMES 2-in-1 Carrier, Rigid and Rod Track Combination.

I have ..... cows; ..... horses.

Please send Catalog No. 12, Stalls, Stanchions, Pens ( ); Catalog No. 14, Barn Ventilators ( ); Catalog No. 13, Rigid and Rod Track Carriers ( ).

Name .....

P. O..... R. F. D..... State.....

Big Ben

He works 36 hours at a stretch

And overtime when needed. Anyone can afford him, for he only costs $2.50 to buy and nothing at all to keep. 3,000,000 American homes have taken advantage of this and have employed him to get the family up in the morning.

Even if you have a *preference* about waking up, he's ready to get you up *your way*. If you like to be wakened gradually, he'll ring little short rings every other half-minute for ten minutes. If you're a hard sleeper and need a strong dose, he'll sing out with a long, vigorous, full five-minute ring. Either way, you can shut him off at any point.

20,000 jewelers are necessary to take care of the demand he's created for himself. He's made a World's Record as a success.

He's invaluable on the farm, because he not only helps you get the hands out on time, but serves as a first-class clock to tell the *day*time by.

He stands 7 inches tall, is triple nickel-plated—has a vest of good implement steel that keeps him hardy; large, bold figures and hands to tell the time by in the dim light of morning. He is as fit for the parlor as the bedroom.

If your jeweler hasn't him, send a money order for $2.50 to *Westclox, La Salle, Ill.*, and he'll come anywhere in the States by parcel post, prepaid.

He bears this imprint, "Made in La Salle, Illinois, by Westclox," which is the best alarm-clock insurance you can buy.

THE ADAMS SEED COMPANY
Box 61 Decorah, Iowa

Iowa State Dairy Association Show

THE annual show of dairy cattle held under the auspices of the Dairy Cattle Congress and the Iowa State Dairy Association took place at Waterloo the week ending October 18th. It was a remarkable representation of the dairy industry of Iowa in particular and of the United States in general. The collection of dairy cattle included 624 head, all of which, with the exception of possibly 100 head which were present for sale purposes, took part in the competitions of the show. The cattle, in all, represented thirty-nine herds, sixteen of which were the property of Iowa breeders. This is an extraordinary showing for the dairy cattle men of the state and applies to individual merits of the animals exhibited as well as to numbers.

In the endeavors of the management to be assured of a liberal attendance, it was planned to make the show a sort of political rallying ground and while the object was fairly successful, it is feared that the plan was detrimental to the real objects of the exhibition. The program had been arranged in such manner that the many addresses provided took place at the same time when the shows were in progress. As a result, some of the speakers found themselves facing empty chairs and, in one instance, the speaker refused to present his address. Governor Clarke appeared as a representative of the republican party, but refrained from any discussion of the principles of his organization. Lieutenant Governor Harding was also present and made some interesting remarks having a general application to agriculture and dairying. The progressive party was not represented, as no speaker of prominence could be obtained. Secretary of State Bryan appeared Friday afternoon and drew an immense audience.

The most interesting address given was, perhaps, that of President Pearson, of the Iowa State College of Agriculture. He addressed himself particularly to the subjects of importance to the dairy industry, opening his remarks with a laudation in which he presented the startling assertion that the dairy cows of Iowa, with their calves, had a valuation of more than $80,000,000, an amount which, if used as purchase money, would buy the manufacturing interests of all the leading cities of the state and still leave a liberal proportion of the money unexpended. He believed that Iowa was closely following Wisconsin as a leader in dairying and expected at no distant day to find her occupying a proud position at the very front. President Pearson said that he began his career as a dairyman and that when his services should no longer be required as the head of the institution he now represents he would return to that occupation.

In the Holstein-Friesian classes were 174 head of cattle. They represented fourteen herds, ten of which were owned by Iowa breeders. This was really the premier breed of the show, excelling all others in numbers and bringing out competitions of extraordinary merit. While the grand championships both went to Mr. Haeger, of Illinois, the junior championships were captured by Iowa breeders, R. B. Young, of Buffalo Center, taking junior championship on bull with his remarkable youngster, Buffalo Pieter Doede, and C. A. Nelson, of Waverly, taking the junior heifer championship with Groveland Johanna Inka, a heifer of extraordinary promise and one which will, in every probability, develop into a grand champion in her later show-yard experience. One of the heifer classes contained twenty-seven contestants and brought out material which will, in later years, constitute an excellent representation of the greatest animals of the breed of their day.

While there were 223 Jerseys in the show, perhaps 100 of these were there for sale purposes so that in actual competition the Jersey occupies second place. They were, however, from a more widely distributed territory than any other breed, representing Texas, Kentucky, Minnesota, Illinois, Wisconsin, Indiana, Oregon and Iowa. In many of the classes the shows were remarkable. In particular, the class of bulls two years old and under three was an unusual one. It included but five contestants, but presented a remarkable situation in that each of the five has this year been a grand champion winner at a state fair. So evenly were the merits of this class distributed that the decision was a ticklish one which finally landed a Texas exhibitor's animal, Noble's Eminent Lad, at the head of the lot, and that bull was later declared grand champion of the breed.

CHICAGO STOCK FARM'S JUNIOR CHAMPION HOLSTEIN BULL, BUFFALO PIETER DOEDE.

Guernsey breeders brought out 116 head and they represented, in every probability, the best show-yard material which the breed has brought out this year. Marsh's herd gained both bull championships and grand championship on females, the junior championship on females having been won by Wilcox & Stubbs, of Des Moines.

In the Ayrshire classes there were but four exhibitors, with seventy-five head of cattle in the rings. Some new material appeared since last year and the old winners, in many cases, were crowded to the background. However, it was a show of unusual excellence and one which was highly creditable to the breed.

Two herds of Brown Swiss cattle were in the show and so far as first places were concerned, it was a rather one-sided affair. Both herds were owned by Wisconsin breeders.

W. J. Gillette, of Rosendale, Wisconsin, who officiated as judge of the Holstein-Friesian classes, won the admir-

ation not only of exhibitors but spectators by the manner in which he took care of his duties. He went at the job with a confidence that inspired the crowd with the idea that he knew his business and made his decisions with a promptness and justice that received general applause. Mr. Gillette's methods might well have been followed by other judges whose tendency towards uncertainty of action weakened the confidence in their decisions and at the same time took up a great deal of valuable time.

The butter show included 167 tubs. In the whole milk-butter class first prize was awarded to T. E. Sadler, Hazleton, Iowa, whose butter made a score of 98. Second went to A. W. Mooney, Denver, Iowa, on a score of 97½.

The milk exhibit was said by State Milk Inspector Thompson to have scored higher than any milk he had ever seen. Wilcox & Stubbs, Des Moines, and Marsh Dairy Farms, Waterloo, tied for first place with a score of 96¼. Second place went to the Shoe-maker-Van Pelt-Mayne Dairy Farm on a score of 95 points. Inspector Thompson loudly praised the conditions and care which made such high scores possible. He said they indicated clean milk properly cooled.

The annual meeting of the Iowa Dairy Association presented an interesting program which lack of space prevents us from giving. The election of officers resulted in the selection of W. R. Quarton, Algona, Iowa, as president; Geo. Kalthoff, vice-president; E. T. Sadler, Waterloo, secretary; J. J. Ross, Iowa Falls, reasurer; E. S. Estel, Waterloo, dairy expert.

In the butter makers' contest Chris Jensen, of Radcliffe, won first place, while Julius Brunner, of New Haven, and F. W. Bremer, of Sumner, tied for second place, third going to F. M. Zell, of Sumner.

The Iowa Holstein Breeders' Association held a banquet and annual meeting, at which a program was presented and the usual business affairs acted upon. The election of officers resulted in the election of F. J. Jenkins, Algona, president; Geo. McKay, Waterloo, vice-president; and R. B. Young, Buffalo Center, secretary and treasurer. Student judging teams in charge of their respective professors from Iowa, Missouri, Minnesota and South Dakota were present.

The Iowa State Dairy and Food Department made its usual exhibit in the interests of pure foods. While this exhibit is no doubt of interest to those who have time to study out the facts present at the show, it is really a little difficult for those who can give it but a passing glance.

An unusually attractive exhibit was that made by the Blackhawk County Crop Improvement Association. This organization has been in existence for about one year. It is supported through the efforts of business men of the county who add their gifts to the $100 per month provided by the government for the employment of a crop expert or county adviser. An excellent display of corn, oats, wheat, grasses, alfalfa and garden products was presented. The organization is one which is not meeting with the approval and co-operation of farmers to the extent to which it is entitled. An interesting presentation made at this exhibit was a self feeder for feeding hogs, together with a statement showing that corn and meat meal fed by this means resulted in the hogs consuming more, making greater gain and larger profit than when given the same feeds by hand. The statement is made that when the hog has access to the feeder at all times he will not over-feed but will feed more regularly than when only given feed at stated intervals.

GUERNSEYS.

Chas. L. Hill, Rosendale, Wis., acted as judge and had before him 116 animals from the herds of M. H. Tichenor, Oconomowoc, Wis.; A. W. & F. E. Fox, Waukesha, Wis.; John H. Williams, Waukesha, Wis.; Wilcox & Stubbs, Des Moines, Iowa; W. W. Marsh, Waterloo, Iowa; George Alexander, Littleton, Iowa; Nelle Fabyan, Geneva, Ill. His awards were as follows:

Bull 3 Years or Over (5 shown)—1st Marsh on Hayes Cherub 2d; 2d Tichenor on Glenwood's Combination 5th; 3d Marsh on Rex Mar; 4th Fox on Topsy's Count Yeska; 5th Fox on King Talladeen of Chestnut Hill.

Bull 2 Years and Under 3 (3 shown)—1st Wilcox & Stubbs on Gay's May King; 2d Fox on Tricksey's George of Sunnyside; 3d Williams on Trislette's King of the May.

Bull 1 Year and Under 2 (5 shown)—1st Marsh on Bopeep's Mar of Iowa; 2d Fox on Raymond's Billy of the Hague; 3d Marsh on Violet's 3d Son of Iowa; 4th Williams on Park's Flossie's King; 5th Fox on Billy's France of the West.

Senior Bull Calf (6 shown)—1st Fox on Quida's Sequel; 2d Fox on Glenwood's Volunteer; 3d Tichenor; 4th Marsh on Victor Van of Maple Farm; 5th Wilcox & Stubbs on Patritia's Son.

Junior Bull Calf (6 shown)—1st Fox on Gratify Standard; 2d Williams on Park's Isabella's King; 3d Wilcox & Stubbs on Holden's Monogram; 4th Tichenor on Westmoreland Village Boy; 5th Williams on Park's Prince.

Cow 5 Years or Over (12 shown)—1st Fox on Essie Jeweler; 2d Tichenor on Daisy's Homestead Dolly; 3d Marsh on Glenwood's Hazel; 4th Marsh on Jedetta of Pinehurst; 5th Marsh on Fernleaf of the Glen.

Cow 4 Years and Under 5 (6 shown)—1st Marsh on Jessy Rose 10th; 2d Tichenor; 3d Wilcox & Stubbs on Village Lassie; 4th Williams on Park's Golden Spot; 5th Fox on Imp. Maid of Richmond.

Cow 3 Years and Under 4 (5 shown)—1st Wilcox & Stubbs; 2d Marsh on Itchen Carduns; 3d Fox on Pleasure of Waukesha; 4th Wilcox & Stubbs on Frances Rose of Fairview; 5th Wilcox & Stubbs on Miss of St. Louis 2d.

Heifer 2 Years and Under 3 (13 shown)—1st Marsh on Hayes Cherry 9th; 2d Marsh on Meadow Girl 2d; 3d Fox on School Girl of Waukesha; 4th Williams on Park's Princess Rhea; 5th Marsh on Hayes Snowdrop 4th.

Marsh Guernsey Special for best 2-year-old heifer in milk—Fox on School Girl of Waukesha.

Heifer 18 Months and Under 2 Years (10 shown)—1st Wilcox & Stubbs on Frances Rilma of Iowa; 2d Marsh on Rose Des Howard's 57th; 3d Williams on Park's Isabella 2d; 4th Fox on Dairy Maid of Waukesha; 5th Marsh on Hayes' Snowdrop 5th.

Heifer 12 Months and Under 18 (9 shown)—1st Wilcox & Stubbs on Village Lassie 2d; 2d Marsh on Grace of Iowa; 3d Wilcox & Stubbs on Budding Blossom; 4th Fabyan on Polly of River Bank; 5th Marsh on Fleurie Mar.

Senior Heifer Calf (13 shown)—1st Marsh on Lilly Lapine; 2d Marsh on Express 8th; 3d Marsh on Hayes' Citron 3d; 4th Fox on Pleasure's Promise; 5th Marsh on Glencoe's Bopeep 2d.

Junior Heifer Calf (13 shown)—1st Wilcox & Stubbs on Village Lassie 3d; 2d Tichenor on Village Highland Girl; 3d Marsh on Emblem of Iowa; 4th Wilcox & Stubbs on Hilcrest Maid; 5th Fox on Sundari's Dairymaid.

Cow having official yearly record begun at 5 years or over (3 shown)—1st Marsh on Jedetta of Pinehurst; 2d Marsh on Fernleaf of the Glen; 3d Fox on Selma of Pinehurst 2d.

Cow having official record begun at 2 years under 5 (4 shown)—1st Marsh on Jessy Rose 10th; 2d Marsh on Jedetta of Pinehurst; 3d Marsh on Fernleaf of the Glen; 4th Fox on Imp. Maid of Richmond.

Exhibitor's Herd (5 shown)—1st Marsh; 2d Marsh; 3d Wilcox & Stubbs; 4th Fox; 5th Tichenor.

Young Herd (4 shown)—1st Marsh; 2d Williams; 3d Fox; 4th Fox.

Calf Herd (6 shown)—1st Marsh; 2d Wilcox & Stubbs; 3d Marsh; 4th Tichenor; 5th Fox.

Get of Sire (7 shown)—1st Marsh; 2d Wilcox & Stubbs; 3d Williams; 4th Fox; 5th Marsh.

Produce of Cow (6 shown)—1st Williams; 2d Wilcox & Stubbs; 3d Marsh; 4th Fox; 5th Williams.

Dairy Herd of 4 Cows in Milk (4 shown)—1st Marsh; 2d Fox; 3d Wilcox & Stubbs; 4th Williams.

Senior Champion Bull—Marsh on Hayes' Cherub 2d.

Junior Champion Bull—Marsh on Bopeep's Mar of Iowa.

Grand Champion Bull—Marsh on Hayes' Cherub 2d.

Senior Champion Cow Marsh on Jessy Rose 10th.

Junior Champion Cow—Wilcox & Stubbs on Frances Rilma of Iowa.

Grand Champion Cow—Marsh on Jessy Rose 10th.

BROWN SWISS.

Prof. H. Kildee, Ames, Iowa, who judged the Brown Swiss, had before him only two herds, those of Joseph P. Allyn, Delavan, Wis., and H. W. Ayers, Honey Creek, Wis. His awards are given below:

Bull 3 Years or Over (2 shown)—1st Allyn on My-One-Boy; 2d Ayers on Imp. Zell.

Bull 2 Years and Under 3 (1 shown)—1st Ayers on Zell A.

Bull 1 Year and Under 2 (3 shown)—1st Allyn on Iown Laddie; 2d Ayers on Ayers' Traveler; 3d Allyn on Buccaneer of A.

Bull Under 1 Year (4 shown)—1st Allyn on Casper Brown of A.; 2d Ayers

(Continued on page 16.)

ALLYN'S GRAND CHAMPION AGED BULL (BROWN SWISS) MY-ONE-BOY.

MARSH'S GRAND CHAMPION GUERNSEY BULL, IMP. HAYES CHERUB 2d.

Look for the Lanpher Label When You Buy a Sheep-Lined Coat

YOU'LL find comfort in its tailored fit, in its roominess, in its warmth.

You'll get better service, than in any other sheep-lined coat. It will stand rough wear, last longer.

The reasons?

First, the materials are better. The sheep linings, for instance, are bought in the colder sheep-raising sections where the animals grow thick-wooled pelts. These pelts are tanned, nailed and made up just as carefully as our high grade furs, leaving no stretch or skrinkage to them. They hold their shape.

Second, Lanpher Sheep-Lined Coats are really *tailored*—sewn into shape by the same organization of skilled tailors who made the high-priced Lanpher Fur Lined Coats.

The quality in Lanpher Sheep-Lined Coats makes their prices seem very low indeed.

Get the most value for your money—get a *Lanpher* Coat.

Lanpher Sheep or Mocha Lined Vests

Snug and warm. Afford entire freedom of movement. Ideal for hunting, wood chopping—all active outdooor work and play. Get a Lanpher dealer to show you.

Write for the Lanpher Book of 1913-14 styles if you want to know more about Lanpher men's and women's clothing for outdoor wear, and where to buy them in your neighborhood.

Lanpher, Skinner & Co.,

WONDERFUL GALVANIZED Steel Roofing OFFER

Fire, Water and Lightning Resistant. Practically Indestructible.

Special Offer

A fortunate purchase enabled us to secure a limited amount of brand new, high grade corrugated iron and galvanized steel roofing, some of which we are offering, while it lasts, for as low as $1.25 a square of 100 sq. ft., f. o. b. cars, Chicago. This is only one example of how much we can save you on all your roofing purchases. Never before in the history of the roofing business has such a remarkable money-saving roofing offer been made. It doesn't make a bit of difference what kind or make of roofing you have in mind to buy—corrugated, iron, galvanized steel or ready roofing, rubber surfaced, pebble, marble, flint or gravel coated—we can supply your every need with just the kind you want. Write today for—

$1.25 Per 100 Sq. Ft. Buys Best STEEL ROOFING

FREIGHT-PREPAID PRICES

and let us **prove** that we can save you **big** money on every kind of Roofing, Siding and Ceiling. We can furnish you the material necessary for re-roofing your house, barn, granary, church, residence, garage or poultry house. We can also furnish you the siding, conductor pipe, eaves trough, and everything needed. METAL ROOFINGS ARE BEST and cheapest in the long run, easiest to lay, longest life, non-absorbent; fire and lightning proof; cooler in summer, warmer in winter; do not taint rain water; with ordinary care will last a lifetime.

New, Heavy, Galvanized Roofing 2¾c per Sq. Ft.

Just another example of how hard we've smashed roofing prices this season. Never before and probably never again will you be able to buy such roofing at this price.

We Save You Money

Now is the time to send in your order for this roofing—don't delay it a single day. Even if you do not intend to use it for several months to come, send your order in now with a reasonable deposit which will protect you in your purchase, and the material will be shipped when you are ready to use it. Metal Roofings are best and cheapest in the long run, easiest to lay, longest life, non-absorbent; fire and lightning proof, cooler in summer, warmer in winter; won't taint water; with ordinary care lasts a lifetime.

Chicago House Wrecking Co.

Prominently known everywhere to the public for 20 years as the great "Price Wreckers" and now owned by the Harris Bros. Co., have decided that their best interests require that the name of the principal owners of the company be more prominently brought to the public's notice. There is no change in our business, except that the four Harris Bros. will, in the future, advertise and sell their goods, under the name of the Harris Bros. Company, instead of the **Chicago House Wrecking Co.**

LEGAL DEPARTMENT

SUBSCRIBERS who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention, inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail, should remit $1.00, addressed as above. All inquiries must be signed if they are to receive attention.

LAW QUESTIONS CONSIDERED

PURE CIDER VINEGAR.

A Subscriber, Le Claire, Iowa.—Would it be lawful for me to sell pure cider vinegar at my home and could I put up a sign advertising it for sale there?

Answer.—You have a perfect right to sell pure cider vinegar at your home, and advertise it in any way.

HUNTING LICENSE NOT NECESSARY.

A Subscriber, Rockford, Iowa.—(1) Can a farmer carry a gun and hunt and shoot crows and game on his own land, during the shooting season, without having a gun license? (2) Am I liable to a fine for carrying a gun from my house into the garden or to my barn, if I have no gun license?

Answer.—(1) He can. The law provides that owners of farm lands, their children and tenants, shall have the right without procuring a license, to hunt and kill wild animals, birds or game, upon the lands owned or occupied by them. (2) You are not liable to a fine in such a case, and you need no license.

UNITED STATES GOVERNMENT BONDS.

A Subscriber, Woodburn, Iowa.—(1) How does one proceed to invest money in United States government bonds, and what interest do they bear? (2) Are such bonds exempt from taxation?

Answer.—(1) You can invest in government bonds, through nearly any bank. Inquire of the banker with whom you do business. United States bonds are of various kinds, payable at different times. They generally bear interest from 2 to 4½ per cent. Usually they cannot be purchased in less amount than $1,000. (2) They are exempt from taxation.

LAWFUL FENCE IN ILLINOIS.

A Subscriber, Stockton, Ill.—A owns forty acres of land adjoining C's land. A uses his forty acres for hogs and put a hog-tight wire fence around it, putting hog-tight wire on C's posts between the two farms without asking C to do it. C did not object to it and nothing was said as to who should keep up the division fence. C does not keep hogs on his side of the line. A's hogs break through the fence and C refuses to fix it. (1) Is A required by law to keep the whole partition fence in repair? (2) Can A compel C to make his part of the partition fence hog tight?

Answer.—(1) A is only required by law to make and keep in repair one-half of the fence between his land, and the land of C. (2) A can compel C to make and keep in repair a lawful fence on half of the division line. The law of Illinois provides that fences four and one-half feet high, consisting of rails, timber, boards, stone, hedges, barbed wire, or whatever the fence viewers of the town or precinct shall deem equivalent thereto, shall be deemed lawful and sufficient fences. There is no law specifically providing for a hog-tight fence. Voters in any town, may, at the annual town meeting, determine what shall constitute a lawful fence in such town.

LEASE FOR ONE YEAR.

A Subscriber, Battle Creek, Neb.—A rented a farm from B for one year, from March 1, 1913, to March 1, 1914. A would like to stay on the farm another year and he had B come out to see how he farmed it and kept everything in good shape and asked B to let him have the farm for another year, but B said, "There is plenty of time to promise, but when a man farms my place well as you are doing, and keeps everything in good shape, why should I change renters?" Later A asked B for the place twice more and received the same answer. (1) Can A hold the land another year on such a promise? (2) If B wants A to leave the place on March 1, 1914, must he give A six months' notice to vacate at that time? (3) If B does not give A six months' notice to quit on March 1, 1914, and rents the place to another man, can A recover damages from B? (4) A agreed to keep up all fences and buildings on the place, but nothing was said about who should pay for staples and nails. Can A compel B to pay for them?

Answer.—(1) The rental contract was for the definite term of one year and there was no certain promise by the landlord that A could have the place longer than that time, therefore A cannot hold it lawfully after the expiration of the year. (2) B is not required to give A notice to quit. (3) A cannot recover damages if B rents the place to another for the next year without notice. (4) A cannot compel B to pay for the nails and staples.

WILL—MARRIAGE OF SURVIVOR.

A Subscriber, Humboldt, Iowa.—A and B were husband and wife residing in Iowa. A died leaving a will by which he divided his real estate equally among his three children. B made no objections to the will and three years after A's death she married again. Has her second husband any share in the real estate left by A?

Answer.—He has no share whatever.

AUTO DRIVING—DAMAGES.

An Iowa Subscriber.—(1) A had good lights on his automobile and was driving it at night on the public road at the rate of eighteen or twenty miles an hour. A calf that had been turned into the road to graze suddenly jumped from behind some weeds into the road and was struck and died of the injury later. Is A liable for the value of the calf? (2) A was driving his auto at night with good lights, and one of B's cattle which had been turned into the road to graze ran in front of the auto and was struck and the auto was damaged. Is B liable for the damage? (3) Is an auto driver liable for dogs and chickens killed by his machine when he is driving at a less speed than twenty miles an hour?

Answer.—(1) A is not liable for the value of the calf, unless he saw it in time to avoid striking it. (2) If the collision was not caused by negligence on A's part, B is liable for damages to the auto. (3) The driver of an auto has no right to run over dogs

INTERLOCKING FENCE CO.
BOX 17 MORTON, ILLINOIS

or chickens on purpose, or merely because they are in the road, if he can avoid doing so, otherwise he is not liable for damages when driving at a less speed than twenty miles an hour.

LIFE INTEREST IN LAND.

A Subscriber, Henry County, Iowa.—A, who is an adopted son, and an old bachelor, owns a farm only by a life lease, and rented the farm to B for a term of years. In case A should die before the expiration of B's lease, could B hold the farm till the expiration of his lease?

Answer.—A owns an interest in the land for his lifetime only. He could not lawfully lease the land for any time beyond his death, because his interest will then cease. His tenant, B, cannot hold the land after A's death.

WORK ON ROADS—ABLE-BODIED.

A Subscriber, Delhi, Iowa.—If a man is blind in one eye, or is ruptured, does the law of Iowa require him to work on the roads?

Answer.—A man is not required to work on the public roads in Iowa unless he is able-bodied. Just what infirmities or defects would prevent a man from being able-bodied for manual labor on the roads is a difficult question to determine. Blindness in one eye or a slight rupture might not interfere with such labor.

ORAL LEASE FOR MORE THAN ONE YEAR NOT BINDING.

A Subscriber, Atalissa, Iowa—A rented a plat of ground and constructed thereon a temporary house and other buildings, with the understanding that he could remove them at any time. The property changes hands often. At the last sale of it A came near being sold out by reason of the seller forgetting to notify the purchaser of the agreement about removing the said temporary improvements. A wishes to add other improvements, but is fearful of consequences. He asked the owner for a written agreement about removing such temporary improvements, but the owner refused to sign any papers. (1) What can A do to protect himself? (2) Is there any way by which A can get the oral agreement about removing his improvements on the record?

Answer.—We infer from the above statement that A rented the ground for more than one year. If this be so, the entire agreement should be in writing and signed by both parties. A is not at all safe on a mere oral agreement. He should insist on a written agreement between himself and the owner, and quit the place unless he gets it and attempt to remove the improvements already made. Contracts about real estate for more than one year must be in writing. (2) There is no way to get the oral agreement on the records.

ALLEY BY ADVERSE POSSESSION.

A Subscriber, Vinton, Iowa.—In this town there is an alley eight feet wide running east and west that has been used as such for more than twenty years. The southwest corner was fenced. My house and barn were built on opposite sides of it. The owner of land on the southeast moved his barn over south, so as to clear the alley. The three owners on the southeast have always used the alley and considered it as such, but the fourth owner finds it was not platted and recorded on the town plat as an alley, and has closed it up. Had he a right to do so, and if not, what steps can be taken to open it?

Answer.—Although the alley was not platted, the continued use of it as a public alley for twenty years makes it an alley by adverse possession in the public, and it cannot lawfully be closed by a person owning abutting land. The town authorities should bring action in the district court against the person who closed the alley, and obtain an injunction or writ of mandate against him.

JUDGMENT—INHERITANCE—DRAINAGE.

A Subscriber, Montrose, Mo.—(1) There is a judgment against a certain man who will inherit some money from his father's estate. Can the holder of the judgment collect it from the share the man will inherit? (2) A public road forty feet wide, as established by record, runs along a man's farm. His fence is set in on his land five feet from the recorded line of the roadway, and has been there more than ten years. The township board claims that said strip of five feet has become a part of the public road because of being used as such for more than ten years. Is such claim correct, and has the man a lawful right to make a ditch along his fence on the outside, to carry water from a small draw, along the road?

Answer.—(1) The holder of the judgment can collect from the man when he obtains his inheritance. (2) It is very doubtful whether the township board can hold the five-foot strip as part of the road. Unless it has been claimed as a matter of right as part of the road, as well as used, the owner of the land can hold it and he has a right to make a ditch along his fence to carry off drainage water.

DEALINGS IN STOCKS.

A Subscriber, Battle Creek, Neb.—Two stockholders in a certain company in Council Bluffs, Iowa, and an agent of said company, induced me to buy five shares of the company stock at $200 per share. One of said stockholders is my neighbor with whom I have been acquainted for twenty years. At first I refused to buy, because I did not have the money and because I knew nothing about the affairs of the company, but my neighbor said it was all right, and if I would take the five shares, and was afterwards dissatisfied he would take them off my hands. The agent arranged at the bank for me to get the money at 6 per cent and so I bought the stock. I was to have 10 per cent on the amount, and a dividend. I have only received $37.50 in the last two years. Two or three months after I bought the stock I asked my neighbor to take it off my hands, but he could not do so. The company has had trouble, and changed its name, and there was a lawsuit about it in Council Bluffs. I look to my neighbor for protection. Is there any way by which I can get my money back?

Answer.—In the absence of a written agreement with your neighbor, it would be difficult and most likely impossible for you to recover from him the money you paid for the stock. Whether or not you will be able to get your money back depends upon the financial condition of the company. It is probable that you will not get your money, unless you can sell the stock you purchased.

Although auto tires are cheaper than they were, almost every auto owner feels they are too high in price now, material in them and present day low cost of manufacture considered. We're all looking for the successful substitute for the rubber tire.

AUTOLOADING SHOTGUNS

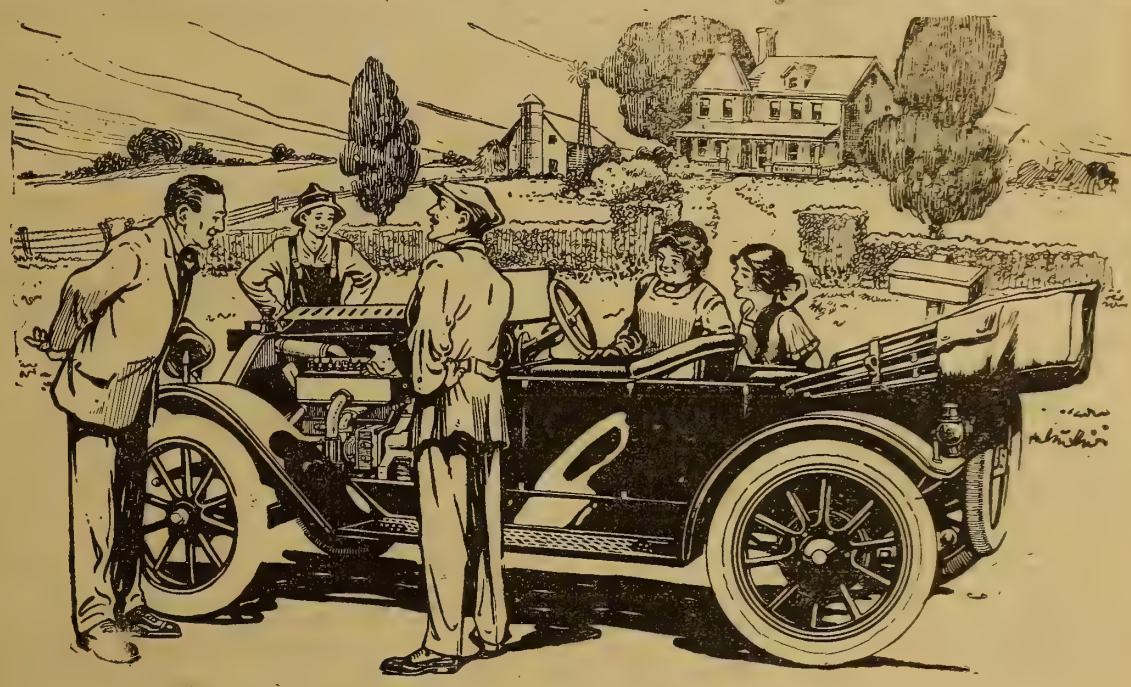
ANY way you look at it, the Autoloader is the highest development in modern shotgun design. It puts five loads at your disposal by merely pressing the trigger. It puts the *recoil to useful work*—to eject the empty and slip in the fresh shell.

It saves the gunner's shoulder—rids his sport of annoyances—increases his shooting average.

Your danger is that in your enthusiasm over the autoloading *principle*, you may forget to insist on getting the *finest* embodiment of that principle—the *Remington-UMC* Autoloading Shotgun.

The peculiar advantages of the Remington-UMC are too many to detail here. What you want to do is to get one of the Remington-UMC dealers in this section to demonstrate them to you on the gun itself.

Remington Arms-Union Metallic Cartridge Co.
299 Broadway New York



You already know that we believe the Hupmobile to be the best car of its class in the world.

If you don't share our conviction now, we doubt that you will be able to avoid sharing it after you have seen and inspected the new Hupmobile.

Because the more thoroughly you go into details of design and structural features, the more thoroughly you will realize and approve the strength of our belief.

The powerful, economical small-bore long-stroke motor is as uncommon among cars of the Hupmobile class as its compactness and soundness of design are uncommon among automobile motors.

When the dealer raises the Hupmobile hood you will see the cylinders and the intake and exhaust manifolds cast in one piece.

You will see the valves—and every working part of the motor clutch and transmission—enclosed and fully protected from dirt and grit.

The dealer will tell you that this construction requires a greater amount of expensive aluminum than any other car of the Hupmobile class uses.

The fact that the Hupmobile uses a greater amount of costly spring steel is another impressive item that sets it above cars of its class.

We could sell as many Hupmobiles, doubtless, without building-in these costly materials.

But cars of lesser quality could not give the day-in-and-day-out economical and satisfactory service that is the big feature of Hupmobile ownership on the farm and in the city.

So we spend more money in design and construction that you may have longer life and service in the Hupmobile.

We shall be glad to have the nearest dealer give you a thorough demonstration if you will say so when you write for the details of the 1914 Hupmobile.

Hupp Motor Car Company, 1224 Milwaukee Avenue, Detroit, Michigan

Hupmobile

"32" Touring Car or Roadster—$1050 f. o. b. Detroit

Four-cylinder, long-stroke motor, 3¼x5½ inches; unit power plant. Selective type transmission, sliding gears. Center control. Full floating rear axle. 106-inch wheel base. Tires, 32x3½, Q. D. "32" Touring Car or two-passenger Roadster with Westinghouse two-unit electric generator and starter; electric lights; over-size tires, 33x4 inches; demountable rims, extra rim and tire carrier at rear—$1200 f. o. b. Detroit.

DAIRY

MILK REQUIRED TO RAISE A DAIRY CALF.

The Illinois Experiment Station has recently conducted an experiment designed to determine how small an amount of milk a calf will thrive on without in any way impairing its growth or affecting its digestive system injuriously. The result of this experiment proves that it is a most important thing in raising calves to give them a good start. During the first two weeks of their lives they must have a reasonable amount of whole milk or milk containing at least 3 per cent of butter fat. After this their feed may be gradually changed to skim milk, but until they are about eight weeks old they must receive practically all of their nourishment in the form of milk. If calves are required to obtain even a portion of their nutrients from grains or hay when they are less than seven weeks old their digestive systems will become badly deranged and even though they are continued on a generous amount of milk for a considerable length of time damage has been done from which they will not rapidly recover.

Three of the calves in this experiment were entirely weaned from milk when they were forty-two, forty-five and forty-six days of age respectively. After that they were obliged to subsist on grain and hay alone. This resulted in developing a feverish condition in the digestive tract. They showed an abnormal craving which they tried to satisfy with water, drinking such large amounts that they breathed with great difficulty. This copious supply of water in turn seemed to generate digestion troubles. At the end of two months these calves were exceedingly thin, but careful feeding later developed them almost normally. It is carrying the practice of economy too far, however, to deprive calves of milk at such an early age as was the case in this instance.

For the first ten days the calf requires about twelve pounds of milk, and a slight economy may be practiced by using ten pounds of whole milk and two pounds of skim milk per day. After this period it was found to be practicable to change to one pound per day, thus substituting a pound of skim milk for a pound of whole milk. At the end of twenty-five days the calves in this experiment were receiving whole milk only. For the next twenty days or until they were forty-five days old they received twelve pounds of skim milk per day, after which they received one pound per day less until the supply was entirely cut off. In addition to the milk a ration composed of four parts oats, four parts corn, one part bran and one part linseed meal was used and in addition good clover hay was fed. When fed in this way the calves made a gain of sixty-five pounds during the first seventy days of their lives.

As the result of one test it was found that to raise a calf in good thrifty condition it required from 137 to 167 pounds of whole milk and from 378 to 491 pounds of skim milk. The average amount of food required in feeding out twenty-eight calves was 134 pounds of whole milk and 422 pounds of skim milk, making a total of 556 pounds. Computing skim milk at twenty-five cents per 100 pounds and the whole milk at $1 per 100 pounds the cost of milk required to raise a calf was $2.40. With whole milk selling at $1.20 per 100 pounds the cost is $2.67 while at $1.80 per 100 pounds, which is an extreme price, the cost of the milk alone was $3.48. This would indicate that after all the cost of milk required to raise a calf is not excessive, though an enormous number of calves from good dairy cows are sacrificed each year simply because dairymen feel that they are not in a position to afford the milk required to raise them.

ECHOES FROM A KANSAS FARM.

The first week of October was warm, with some moisture. This combination was hard on the shock corn. It has molded and partly rotted many of the shocks that were not standing perfectly straight, and the outer bundles were badly weather beaten on the perfect shocks.

Those who have their roughness in silos are ahead as far as damage from the weather is concerned, but there is still conjecture as to just how valuable this drouth silage will be. It is a common opinion that those who figure on this year's silage feeding out as silage has in other years will be greatly disappointed.

We have put up ten acres of shock corn in two round stacks, getting it in before the last rainy spell. We were told that the drouth fodder would keep no better in the stack than in the shock, but ours is keeping all right. It was only damp enough to handle nicely when stacked, and although the stacks have settled considerably, the fodder has not turned nor has it molded a particle. At the first opportune time we will stack more.

The storms keep on in their habit of letting down moisture in streaks as they have done throughout the season, in one locality a rain will be heavy while but a few drops may fall but a short distance away. Some localities have ponds and all watercourses full to overflowing, but most of us would still like to have more moisture before freezing weather.

Corn is slightly cheaper. Were offered a carload by a dealer at seventy-six and one-half cents, last week. Those who were in a hurry to lay in their supply at eighty and eighty-five cents will figure they missed it, for in all probability the price will go lower as cribbing time draws near for those in sections of this universe where corn was raised. Next spring, though, we may reasonably expect very high-priced grain.

$1.90 FOR THIS DANDY GATE

These gates are not a special lot built down to a low price, but are full of the same quality, satisfaction and durability which can be obtained in any of our **triple-galvanized, high-carbon steel**

Iowa Gates

FOR SALE

ONE Hart Parr oil tractor and two engine plows. Will dispose of same at a sacrifice as I have no use for the outfit. Address
H. C. Davis, 826 So. 6th St., St. Joseph, Mo.

WANTED Salesman or farmer to co-operate in distributing Silos, Silo Fillers, Implements and Specialties. Up-to-date proposition. HUDSON BAY LUMBER CO., Lackawanna, New York.

The William Galloway Farm
AND BOTH HERDS OF
Holstein and Ayrshire Cattle
WILL BE SOLD ABSOLUTELY WITHOUT RESERVE ON
NOVEMBER 5 AND 6, 1913

THE farm itself of 180 acres and the modern dairy equipment upon it offers one of the greatest chances for big dairy or live stock profits in the corn belt. It is situated so that the markets of Chicago, Des Moines, Omaha, St. Paul and Minneapolis, just a few hours away, are ready to take the entire butter production, while Waterloo itself will take all the high class certified milk which can be produced at ten cents per quart. This is the best equipped dairy farm in the corn belt and the highest class proposition for a good, live dairyman anywhere in the West.

HOLSTEINS.

Among the cattle to be offered on sale day will be included King Segis Pontiac Combination 94710, a son of King Segis Pontiac 44444 and King Pontiac Girl 120834, whose sister, Spring Farm Pontiac Lass, holds the world's record of 44.153 pounds butter in seven days. This is the best bred young bull west of the Mississippi river today.

Also will be offered Fay Jewel Beauty 59866, grand champion Waterloo Dairy Show, 1912, grand champion National Dairy Show, Chicago, 1911; Daisy Mercedes Johanna Ormsby 78049, one of the best producing cows in the country, a 26.36-pound cow; and Daisy Mercedes Johanna Ormsby 2d 194972, a show heifer in every particular and said by eminent judges to be one of the finest produced last season. Lady Grace De Kol Johanna 67412 with a record of 20.46 pounds of butter in seven days, is a wonderful individual.

AYRSHIRES.

Among the Ayrshires will be offered Auchenbrain Good Gift 15487, one of the noted herd bulls, an imported animal of splendid conformation and most excellent breeding.

Among the cows will be Imported Howie's Ladylike 21432, said by Professor Kennedy to be an ideal type of Ayrshire dairy cow; Nona 2d of Avon 23090, a wonderful individual and a high-class show animal; Clemie of the Briers 33874, a cow now in a year's test for the A. R. O. (She milked about 70 pounds a day when fresh last January.)

Lady Hopeful's Pride 34428, and Dalpeddar Lady Taylor 30666, show cows of great merit, to say nothing of the blood of the prominent Milkman and other high-class Ayrshire strains.

Catalog ready. Remember the sale dates, and let nothing interfere with your being present as this stuff will go in its entirety, owing to my lack of time to give this wonderful farm and herds my personal attention.

There will be 20 head of Hampshire brood sows and early spring gilts, as well as the Hampshire herd boar, Rollen True. Our entire herd of show and breeding Durocs which we were just getting nicely started will also be offered, show gilts and sows and herd boars among these Durocs that will bring any breeder Duroc notoriety.

WILLIAM GALLOWAY - - - WATERLOO, IOWA

HOLSTEIN-FRIESIAN CATTLE.

65 HEAD REGISTERED HOLSTEIN-FRIESIAN COWS AND HEIFERS

I AM offering a splendid lot of cows and heifers for sale, due to calve in the fall to a son of King of the Pontiacs, or Sir Pontiac Ragapple Korndyke. Will make prices to suit for next sixty days. Also a few bulls of serviceable age for sale. Address **ROCK BROOK FARM, Station B., OMAHA, NEB.**

Pure-bred Registered
HOLSTEIN CATTLE

Large sums are put into land, buildings, horses, machinery and labor in order to maintain cows that are utterly unable to return a profit.

On a dairy farm the efficiency of the herd should be the first consideration. With good pure-bred Holsteins you are sure to earn a generous profit on any intelligent investment of your money, time and labor.

After the cost of her feed is deducted a good Holstein will return a profit of $60 to $100 per year in addition to a valuable calf.

POULTRY DEPARTMENT

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be inclosed with inquiries. Address all letters relating to poultry topics to this office.

THE WINTER SUPPLY OF VEGETABLE FOOD.

To the Editor of The Homestead:

Vegetable food of some kind as a part of the poultry ration is now regarded as essential to the greatest success in winter egg production. If this fact was kept in mind when harvesting the late vegetable and root crops it is probable that a number of home products have been secured, some of them to be fed in the raw state and others to be steamed or cooked, for adding succulency to the ration at a time when such food is difficult to obtain.

Cabbage is, perhaps, one of the best green foods for winter use, as it tends to keep the fowls in good health, and they relish it very much. Cabbage heads can be chopped up and cooked with the mash, or they may be hung up in the poultry house for the birds to pick at. Cabbage is fairly easy to keep through the winter. The best method of storing it is to pit the heads. Freezing will not hurt them for poultry food if they do not freeze and thaw alternately with every change of the weather. If one does not have a sufficiency of cabbage in his own garden to have a surplus for the chickens, it is usually possible to obtain a good supply at small cost in late fall from growers who do have a surplus.

Turnips, beets and small potatoes not large enough for table use can be saved for poultry to good advantage. Turnips are good as an appetizer. They may be chopped fine and fed raw, or else cooked with the mash. Beets also may be cooked in with the mash as may a limited amount of potatoes. It is best not to feed potatoes very liberally unless the fowls are receiving plenty of animal food. Potatoes are composed largely of starch, so the fowls require animal food containing a large proportion of protein to balance up the starchy potatoes and thus make a proper ration. Turnips, beets and potatoes may all be pitted outdoors if no cellar is available for their storage, and if the work of pitting is done properly they will go through severe cold weather in good shape. The pits should not be opened when the temperature is much below the freezing point, however, as the cold air thus admitted may do considerable damage to the roots.

Onions, parsnips, etc., may also be given to poultry in moderate quantities if cut fine and cooked with the mash. Every poultry raiser having a surplus of any of the various garden crops should make arrangements to store them at the proper time, as his flock of layers will make profitable use of them before spring arrives.

Along with garden crops clover is a valuable winter feed, whether fed dry, or steamed and fed in a bran mash. Where clover hay is fed to the stock the shatterings can be saved for the hens, or a special supply of the hay can be put aside solely for the use of the poultry. This should be chopped up into short lengths and steamed before feeding. W. F. Purdue.

The food research labaratory of the bureau of chemistry is conducting experiments in canning eggs for winter use. Specialists in this department are enthusiastic about this branch of the poultry business. Only perfect eggs are used for canning and the utmost cleanliness is practiced. Eggs must be kept at a temperature low enough to prevent spoiling. Well, we shall see what we shall see. Anyhow it sounds better than the old-time idea that a composition substitute for eggs was evolved. Nature has beaten us on some things.

POINTERS

—E. A. Bergsten, Sperry, Iowa, is advertising Single Comb Leghorn Cockerels for sale at $1 each. This is a chance to get some good cockerels at a reasonable price. See this page.

—Mrs G. W. Brockway, Clarksville, Iowa, will offer some big bargains in Rose Comb Brown Leghorn hens and cockerels, Fawn and White Indian Runner ducks and drakes, and also a few White Indian Runner drakes of the Fischel strain. Her advertisement appears on this page.

—On this page appears the new advertisement of J. D. Smith, Montezuma, Iowa. He writes: "As I am going to move to Minnesota December 1st, will close out my surplus stock of 500 head of Wyandottes, turkeys, geese and ducks at greatly reduced prices. The quality is as good or better than ever and all are in perfect health. In getting this stock within the next thirty days the express will be less. Here is a chance of getting the best at one-half the price asked by others. If in need don't fail to get my prices. Look for the advertisement and write at once."

Hog Cholera Poultry Roup

Keep your stock in fine shape. At the first sign of disease in hogs, chickens or other live stock use Sloan's Liniment. Read what others did.

Governor of Georgia Uses Sloan's Liniment for Hog Cholera

Gov. Brown says that he has never lost a hog from cholera, and that his remedy has always been a tablespoonful of Sloan's Liniment in a gallon of slops, decreasing the dose as the animal improved.

SLOAN'S LINIMENT

Sure Remedy for Roup

Sloan's Liniment applied to the affected parts is the speediest and surest remedy for roup and canker in all its forms, especially canker in the windpipe.—*E. R. Spaulding, Jaffrey, N. H.*

She Cannot Say Enough In Its Praise

In the fall my chickens were all sick, including some white leghorns. One had bumble-foot and one had the worst kind of a sore mouth and windpipe, her eyes were closed and her head turned round to the back.

I used Sloan's Liniment on them and I am happy to say that every one of them got well. I cannot say enough to its praise.—*Mrs. J. W. White, Montgomery, Ala.*

Sloan's Book on Horses, Cattle, Sheep and Poultry Sent Free

All Dealers. Prices 25c, 50c and $1.00 Address Dr. Earl S. Sloan, Inc., Boston, Mass.

USE GERMOZONE

For Bowel Complaint in old or young chickens: Clean up, change feed and give Germozone, a teaspoonful to a quart of drinking water.

For Roup, Colds, watery eyes or nostrils, swelled head, nostrils stopped up, etc., a teaspoonful of Germozone to a glass of warm water. Inject through the nostrils into the head passages. Wash soiled places under the wings with same solution. Give Germozone in the drinking water as for bowel trouble.

For Yellow Canker or diphtheria in mouth or throat of chickens: Remove the canker and apply Germozone right from the bottle. One application generally effects complete cure.

For Regulating Bowels: Give Germozone twice a week as for bowel complaint. It is marvelous how much better chickens will thrive, grow, or produce when bowels are kept regular.

For any Sore, Cut, Wound, Burn, irritation, itching or tenderness of the skin, apply Germozone diluted, one teaspoonful to a glass of water.

For Old Sores, Ulcers, etc., apply Germozone full strength (right from the bottle) once or twice a day.

For Dogs, Singing Birds, and pet stock, a little Germozone in the drinking water (a teaspoonful to a quart of water) is a great bowel regulator, mouth and throat cleanser. Many birds do not sing because of sore throat. Germozone will generally start them singing.

Many other uses. See our large pamphlet for complete list of uses of Germozone.

GERMOZONE may be purchased at most every town; 10,000 dealers in U. S. Fifty cents per bottle. Sample 10 cents postpaid. Booklets free.

GEO. H. LEE CO., Omaha, Neb.

Books by a farmer

We employed a practical farmer to travel all along the Cotton Belt Route, in Arkansas and Texas, and talk with the farmers themselves; get pictures of their farms and their *personal* statements. Because he was a farmer this man knew what *you* wanted to know about these sections, and he tells you in these free books (new editions). Scores of actual photograph pictures of the farms he visited. You must not miss reading these books if you are interested in a *better* location. Send me your name and address today.

Grand Champion Cow—Ness on Holehouse Randy 9th.

Cow With Official Record—Seitz on Imp. Beuchan Dorothy.

THIS IS SEED CORN MONTH.

To the Editor of The Homestead:

Probably there never was a time when good seed corn was as scarce as it is this year. Every man should make an especial effort to select the best of this year's crop; otherwise he will be forced to buy bottom-grown seed, which, in many cases, has given very poor results on prairie land. The Missouri Experiment Station has found by careful observation and experiment that for best results, seed should be selected from the field during October. It takes only one dozen good ears of seed to plant an acre. It is cheaper to take one day's time and select seed for the entire crop than to later pay an exorbitant price for seed. One dead ear out of every twelve would cut the yield of a fifty-bushel crop over four bushels per acre. The wise man will go through his corn some time within the next three weeks, husk out twice as much corn as will really be needed for seed next spring, and hang this corn up in a dry, well-ventilated place where it will be safe from mice and rats. In case there is no corn standing in the field, he will pick out the best seed ears while shucking out shock corn and hang these ears up for seed.

T. R. Douglass.

Approximately $250,000 will be spent by the American Society of Equity to establish a co-operative packing plant in the city of La Crosse, according to the statement of J. R. Carnahan, of Eau Claire, vice-president and organizer for the state of Wisconsin. Official confirmation of the plan will be made at the state convention to be held the first week in December. The La Crosse plant will be the first of a system of plants to be built by the society which proposes to own and operate packing houses much as co-operative creameries have ben conducted.

Montana

Needs More Farmers

To Energetic, Ambitious Men, Montana Offers Greater Opportunities Than Any Other State in the Union

There are millions of acres of fertile land awaiting the plow to convert them into the finest grain land in the world. With only a small part of its vast area under cultivation, Montana has become, both for quality and quantity, the greatest grain producing state in the Union. United States government reports show that Wheat, Oats, Barley, Rye and other grains run ***double the yield per acre*** that of any middle western state—on land costing about one-third that of middle west land.

Take Advantage *Now*

Cease being a renter. Take your savings and buy a farm in Montana. Land prices are low and you are assured of the best of climate, richest soil and splendid crops. Low fare round-trip homeseekers' excursion tickets are on sale on certain dates every month, via the

COAL Direct From The Mines

Keep Dealer's and Jobber's Profits In YOUR Pocket

DO you know that wherever you live *you* can now buy coal straight from the mines at wholesale prices, the prices your *dealer* has to pay?

Do you know that this winter you can save from $50 to $100 on your coal supply—have it delivered promptly—the cleanest, best heat-producing coal you ever used?

It is literally throwing your money away and adding to the high cost of living *with a vengeance* to continue to pay local prices for coal.

Our great mines near Vincennes, Indiana, produce enormous quantities of the finest coal in the country—the coal that is famous for its remarkable heat unit efficiency. We ship everywhere direct from mines in carload lots this splendid guaranteed fuel.

Tecumseh Coal

Save $50 to $100

on your winter's coal supply. We know that seems too good to be true, but it is an absolute fact that hundreds of people far and near are already buying Tecumseh Coal from us at wholesale and making this marvelous saving.

Not only is Tecumseh the best heat giving coal—but it is *all coal*—cleaned at the mines by the most perfect system ever installed.

No matter how big your coal bills have been in the past—no matter how much you have fattened the jobber's and dealer's profits—the time to turn your back on the old costly round-about way of buying is now. Begin with *this* winter to make this real saving.

It is plain common sense for you to save money by dealing *direct with the mines.* You owe it to yourself to find out the facts and prices—to learn more about Tecumseh Coal. All we ask is the opportunity to quote you prices—to prove in actual figures the splendid saving you can make.

This should interest you whether or not you intend to buy a full car of coal.

Club with Your Neighbors

If you cannot use a whole car—25 to 40 tons—you can easily arrange with your neighbors to divide up the shipment and still make this handsome saving on your winter's coal.

This money-saving plan is too important to be set aside. The amount of waste money you have been paying your dealer belongs in your own pocket. Keep it there. Right now take the first step. It obligates you to nothing Just fill out and mail us the coupon in this advertisement. The prices we quote will positively surprise you. But do it now before the matter slips your mind. Address

NEWS OF THE SALE RING

McMaster's Short-horn Sale.

One of the most successful Short-horn sales of the year was that of C. J. McMaster at Altona, Ill., October 15th. The Attendance was very large, the public having been apprised that Mr. McMaster would present a very choice lot of cattle, and the result of the sale gave ample evidence that those present appreciated the offering at its value. No better lot of Short-horns, both as regards breeding and individual merit, has passed through a public sale in a long time. Mr. McMaster is building up one of the great Short-horn herds of the country and the cattle he offered in his 1913 sale were a credit to him in every way. The wide distribution of the offering over several states gave evidence that Mr. McMaster has his reputation firmly established, and emphasized the fact that the buying public wants desirable specimens of the Short-horn breed. There were no extreme prices, the top being $810, at which figure Thos. Stanton, Wheaton, Ill., secured Sultana F., a five-year-old daughter of the champion, Whitehall Sultan, with a fine heifer calf at foot. Mr. Stanton also purchased the show heifer, Rosewood 18th, by Masterpiece, at $725. Excellent value was secured by George Allen & Son, Lexington, Neb., in the imported cow, Sunny Blink 8th, with a bull calf at foot, at $415, and H. G. Bowers, Elmwood, Ill., made an excellent selection in the cow, Fairplay 8th, by Villager, at $435. The Marr Clara cow, Clara A., with a roan heifer calf at foot, went to Carpenter & Ross, Mansfield, Ohio, at $610. The top for bulls was $500, at which price J. E. Goodenough, Maquoketa, Iowa, secured the yearling, Glenview Dale 4th, by Browndale Sultan, and the same price was paid by Morrow Whitaker, Toulon, Ill., for Glenview Dale 5th, a January calf by Mr. McMaster's fine herd bull, Silver Dale. Col. Carey M. Jones conducted the sale in an exceptionally high-class manner, and was ably assisted by Col. Fred Reppert. Mr. McMaster carried out every detail in the reliable manner characteristic of all transactions at Glen View farm and the following detailed list of sales tells the story of one of the most successful short-horn sales of the year:

FEMALES.

Imp. Sunny Blink 8th and b. c, calved 1908; George Allen & Son, Lexington, Neb.	$415
Butterfly Lady 5th and b. c., calved 1906; W. M. Oakes, Laura, Ill.	265

SUMMARY.

27 females	$ 9,030; average	$334
5 bulls	1,980; average	396
32 head	11,010; average	344

The American Royal Hereford Sale.

The sale of Hereford cattle held at Kansas City on October 9th, was the only public sale of breeding cattle held during the week of the American Royal. The offering was up to the standard with probably one of the best offerings of bulls seen in a Roal sale for some time. Buyers from a wide territory contended in the bidding for the better lots and the bulls sold at very satisfactory prices. The top of the sale was $1,975, paid by O. Harris & Sons, Harris, Mo., for Vernet Prince, the senior second prize bull calf of the show. This calf had many friends among the breeders during the show who predicted he would be first in class. He was not consigned to the sale and W. J. Davis, Jackson, Miss., his owner, consented to sell him in the sale, as several breeders wanted a chance at him. J. M. Curtis, Kansas City, Mo., and W. T. McCray, Kentland, Ind., were contending bidders. The general average of $384.70 shows the healthy condition of the pure-bred cattle business and it is to be regretted that other breeds did not fill their sales with as good a class of cattle as were contributed by the Hereford breeders. The sale was conducted by Colonel Reppert. Following is a list of sales and the averages:

BULLS.

Proctor Onward, calved Jan. 5, 1912; J. B. Burkett, Hereford, Tex.	$ 750
Domino Lad, calved May 8, 1912; T. N. Croak & Bro., Strasburg, Mo.	200

Stanton's Short-horn Sale.

The offering of Short-horn cattle at Sittyton Grove Stock Farm, Wheaton, Ill., Tuesday, October 14th, by Thos. Stanton drew a good crowd. Mr. Stanton had cataloged an attractive lot of cattle, both Scotch and Scotch topped, among the latter being some extra fine cows, and the offering was taken on a good range of values. In addition to Mr. Stanton's cattle there were listed fifteen head of finely-bred Scotch animals from the herd of Smith & Heisserer, Oran, Mo., and from this list buyers secured some excellent values, several going below their actual value. Like all sales at Sittyton Grove, this one was conducted in an exceedingly satisfactory manner. Prices ruled on a conservative basis, the top being $485, paid by F. W. Harding, Waukesha, Wis., for the Smith & Heisserer Augusta cow, Augusta 115th, with a a heifer calf at foot, at which figure she was a decidedly attractive proposition. Colonels Woods, Jones and Reppert were the auctioneers, and the following is a detailed list of sales:

FEMALES.

Botts' Short-horn Sale.

A large local crowd, with a number of buyers from a distance, attended the Short-horn sale of R. W. Botts' at Plymouth, Ill., Thursday, October 16th. It was practically a dispersion on the part of Mr. Botts, who has been actively engaged in breeding Short-horns for a quarter of a century, and the public was presented a well-bred lot of cattle in good sale condition. In addition to the Botts cattle there were nine head consigned by W. B. Rigg, Mt. Sterling, Ill. Values ruled at a very even range, B. W. Aylor, Grandin, N. D., and S. F. Huston, Carthage, Ill., were important factors in the success of the sale, both gentlemen being liberal bidders and buyers. Col. Carey M. Jones was the auctioneer, and did an excellent day's work, assisted in the ring by Colonels Johnson and Weir. The following is a detailed list of sales:

FEMALES.

5th Elms Azelia, calved 1910; B. W. Aylor, Grandin, N. D.	$230

Lockridge Short-horn Sale.

The sale of Short-horn cattle at Chicago, October 13th, by S. F. Lockridge, Greencastle, Ind., was well attended and the cattle presented met with a good appreciation. Mr. Lockridge is one of the veteran Short-horn men of the country, and he offered to the buyer a good lot of cattle, richly bred and presented in a satisfactory condition. There were no extreme prices paid, but values ranged at a lead that made the sale a profitable one to Mr. Lockridge and yet left the buyer a very satisfactory margin. With but three exceptions every animal in the sale was bred by Mr. Lockridge and reflected credit on him and his work as a breeder. It was a clean cut sale in every way and was conducted in the most satisfactory manner throughout. The cattle were well distributed, going to Iowa, Illinois and Indiana buyers. Colonels Woods and Jones were the auctioneers, and the following is a report of the sale in detail:

FEMALES.

Hog Cholera Losses In 6 Months

E. Myers, President, E. Myers Lye Company

The above is a conservative estimate of the stupendous sum lost by American farmers during the first six months of 1912 from hog cholera alone! (Not including the **enormous loss from hog worms.**)

Now, men, let's make a mighty, united effort to put an end to this terrific slaughter—this awful waste of money. We can do it if we work together. I **know** we can do it. I have the remedy that **has been proved will prevent** hog cholera, put your weak hogs on their feed, **rid them of worms,** make them strong, hearty, fat and healthy. My remedy,

Merry War Powdered Lye,

is very simple and inexpensive to use and results have been **proven.**

In an interview, which was so important that it was given a full column on the front page of the Fort Dodge, Ia., Messenger, on November 7th, 1912, Mr. Collie Bowers, a prominent hog raiser in that section, says: "Last Fall I had lost twenty-six young pigs, when I was told to get some MERRY WAR POWDERED LYE and feed it with swill. Every one of the eight or nine pigs that were then sick recovered and I had no more trouble. This Fall the same sickness started after I began feeding this year's crop. I started the Merry War Lye treatment and the pigs got well. My brother used the Lye with his pigs and saved all the sick ones. Earnest Stromberg heard about the treatment and came to our house in the night to learn how to use it. We told him and he drove to Fort Dodge in the night and got a grocer up to get the MERRY WAR POWDERED LYE. His pigs all got well."

You can easily prevent an outbreak of cholera among your hogs, for again I say to you that MERRY WAR POWDERED LYE is the **safe preventive** of that dread swine disease. You can tell your neighbors about it just as Mr. Bowers in this interview is telling his farmer friends about it. You can in this way help to put an end to this needless and enormous money loss. Will you do it?

There Are No Substitutes

Go to your nearest dealer today and get a few cans of MERRY WAR POWDERED LYE. Don't accept an ordinary, old-fashioned lye as a substitute. To use such a lye would be but a doubtful and perhaps a **dangerous** experiment. MERRY WAR POWDERED LYE is the specially prepared lye that is **safe** to feed to hogs—that is **not** an experiment. **Insist** on the genuine.

Its wonderful merit has been **proved by experience.** Price only 10c per can **(120 feeds).** It is convenient to buy in case lots, 4 doz. cans, $4.80. If your grocer, druggist or feed dealer can't supply you, write us stating their names. We will see that you are supplied; also send you, **free,** a valuable booklet **"How to Get the Biggest Profits From Hog Raising."**

Order direct from us in case lots 4 doz. cans, $4.80, if your dealers won't supply you.

Which Kind Do You Want?

The Fred Swan Sale.

One of the best Duroc Jersey sales of the fall season was made by Fred Swan, Missouri Valley, Iowa, on October 17th, when he sold forty head of boars at an average of $40.75. There were no high prices, but it was an even range and this speaks all the more for the class of hogs he was selling. The top was $100 and but three spring boars sold as low at $25. It was an offering that met the expectations of those who attended the sale. We list herewith the entire offering:

1.	Jno. Fahrenkrog, Logan, Ia.	$ 49.00
2.	I. E. Stickelman, Clarinda, Iowa	57.50
3.	B. W. Hunt, Denison, Iowa.	100.00

Young's Chester White Sale.

M. W. Young, Ankeny, Iowa, held a public sale of Chester White hogs October 14th and disposed of fifty-eight head at an average of $27.60 each. A. B. Somerville, Monroe, Iowa, paid $60 which was the top price of the sale, for a mature sow, Margie Belle. The same buyer took several others of the highest-priced stuff. Mr. Young consigned to this sale a selection of Chester Whites which was a high-class one, but notwithstanding this fact, buyers seemed intent upon depressing prices to the last degree. There was only a fairly good crowd in attendance and bidding was of a most sluggish order. Mr. Young is to be congratulated that he had courage to carry the sale through, even when the sale of each animal was given away from 25 to 50 per cent of the value of the animal disposed of. The list of buyers includes the names of A. B. Somerville, Monroe, Iowa; G. H. Lewis, Geneseo, Ill.; C. C. Evans, South English, Iowa; Burkey & Sons, Ankeny, Iowa; M. A. Harley, Grimes, Iowa; M. Sexauer, Ankeny, Iowa; A. D. Marts, Polk, Iowa; P. Parmer, Polk, Iowa; M. Moeckley, Polk, Iowa; H. Hursh, Polk, Iowa; Chas. Ringgenborg, Crocker, Iowa; Henry Grief, Dallas Center, Iowa; N. Marts, Polk, Iowa; John Lundstrom, Polk, Iowa; H. A. Docker, Ankeny, Iowa; M. J. Cody, Gowrie, Iowa; Carl Tessdell, Huxley, Iowa; E. M. Allen, Derby, Iowa; W. I. Troup, Maxwell, Iowa. The sale was conducted by Col. C. C. Evans and Col. C. E. Luther, assisted by Chas. Howard.

Professor Thomas Shaw declares that he is positive that he has bought for J. J. Hill, of the Great Northern Ry., the best herd of dual-purpose Short-horns that ever left England. The average price for these Short-horns was $600. One of the bulls is worth $2,000.

FIELD NOTES.

Sixty Holsteins at Auction.

On Tuesday, November 11th, T. A. Gierens, Walton, Neb., will sell at his farm one-half mile west of Walton and eight miles east of Lincoln, Neb., sixty selected Holstein cows and heifers. These are of the same high-class sort that Mr. Gierens has always put up. They are the real "bred for production" kind. Part of the offering are pure breds and recorded. The remainder are for the most part pure bred but they are not recorded. Kindly watch The Homestead for further announcements and if interested, better write Mr. Gierens today for further particulars.

Farm at Public Auction.

A. G. Thurman, Blanchard, Iowa, announces that he will sell at public auction, October 30th, a farm of 150 acres. This is a good stock farm, is well equipped with three barns, two houses, water system and electric lights. Thirty acres are under cultivation, the remainder being in grass. It is in a desirable location, good land, and particularly well suited to the business of stock raising. Mr. Thurman on the same day sells Short-horn cattle and Shire and Percheron horses, as will be noted in the advertisement on page 32. Further particulars with reference to the farm may be learned by writing to A. G. Thurman, Blanchard, Iowa.

LANDS AND HOMES

Farm for Sale at Public Auction

Wednesday, October 29, 1913,

At 2:30 P. M., at the Farm Residence,

CHILLICOTHE, IOWA

Known as the Andrew Lames Farm

235 ACRE farm adjoining Chillicothe (First Station west of Ottumwa, Iowa, on the C. B. & Q. R.); close in on the south side of the town; land lies well from level to slightly rolling; good, deep, rich soil, and is particularly adapted for grass and small grain and more especially for corn.

About 150 acres of this farm has been in grass and pasture for about nine years; balance rotated in corn and small grain. This farm, for several years, has been used for feeding cattle the year around. In the summer season with the cattle on corn and grass, the pasture has become very productive.

Well improved, with a ten-room house; fully modern; hard maple floors and oak finishing throughout, upstairs and down. Splendid basement with laundry, with small gasoline engine for running churn and washer; coping of basement wall extending thirty inches above the ground. House has only been built two years, and is located about forty rods from the high-school building, and is the finest residence in town.

Good horse barn with basement under entire barn. Splendid cattle barn equipped with a new 12 H. P. gasoline engine for crushing corn, the corn being carried by apparatus to self-feeding box, which holds 300 bushels. This barn is so arranged that one man working two half days a week can feed one hundred head of cattle. Fine spring running a stream of water into watering tank within six rods of the barn; feed yard splendidly drained, and a 100-acre pasture adjacent, which is well supplied with water at other points. Small grove near this barn which affords excellent shelter for the stock at all times. And ample other outbuildings. The entire farm is well fenced.

TERMS: $2,500.00 cash at time of sale on sale contract. Half of sale price taken in mortgage for five years at 5½ per cent, interest payable semi-annually; balance of sale price payable March 1st, 1914, when abstract showing good title, and warranty deed, and possession are given. Option of paying $1,000.00, or any multiple thereof, on mortgage on any interest paying date.

This is regarded as one of the best farms, and best equipped in Iowa, and will be offered for sale at Public Auction, Wednesday, October 29th, 1913, at 2:30 P. M. at the farm residence, Chillicothe, Iowa. Dinner served at farm.

William Hankins, Auctoneer. G. E. Jenkins, Clerk.

LEROY BURCH, Proprietor - CEDAR RAPIDS, IOWA

3 Crops Yearly THAT'S what many Southern Farmers are making. Alfalfa yields 4 to 6 crops annually. Other hay crops do proportionately as well. It's the greatest dairy and livestock section of America.

GOOD LAND, $15 an Acre Up

Truck, poultry and fruits of all kinds make big profits. Seven to ten months growing season. Climate very healthful. Learn the facts, ask for "Southern Field" magazine and land lists.

STATE LAND SALE IN NEW MEXICO

ON December 8th, 1913, there will be sold at the court house in Deming, New Mexico, 18,000 acres of land. Practically all the land will be sold in tracts of six hundred forty acres. The land is in what is known as the shallow water belt, and irrigation by pumping is being operated successfully on lands in that vicinity. The terms of sale are cash, or ten per cent of the highest bid, the balance divided into thirty equal annual payments, with four per cent interest on all deferred payments. **Robert P. Ervien, Commissioner of Public Lands, Santa Fe, N. Mex.**

WISCONSIN

LAND Seekers' Rates October 21st, November 4th, November 18th. Arrange early with your railroad agent for tickets. See the Marshfield District on this trip—Country of BLUE GRASS, CLOVER and the BIG RED BARNS. Let us show you **FARMS THAT ARE FARMS.** **COLE'S LAND AGENCY, Marshfield, Wis.**

Minnesota's Choicest Corn Land

IN the garden spot of Southern Minnesota, fine improved farms $75 per acre and up. Prices advancing rapidly. Come at once. Address **A. M. Kavanagh, Spring Valley, Minnesota.**

WITH THE EDITOR.

Man supplies the material, but to woman are we indebted for the creation of the home. The evolution of the home would be an extensive and interesting subject. The first homes were cheerless caves. Fires could not be built in them because of the smoke, and it was a woman that sought a cave with an opening in the rear to permit the egress of the smoke. Time passed and woman presided in a tent. She searched for wood that was old and seasoned, and this solved the fuel problem. To woman we are indebted for the chimney, the kitchen, the dining room, the living room and the sleeping rooms, resting in comfort, good taste and morality.

A home is not necessarily a house; neither is a house a home. Many a woman sits in the shade of her humble abode, sewing tiny garments and singing to her babies, who is as truly a homemaker as one who has every modern convenience.

Do we ever pause to consider, I wonder, the great difference in homes, where, viewed as houses, they look almost exactly alike? A few years ago I was brought in close touch with a row of miners' cabins. The train was passing through a cut and the windows were on a level with the houses. A dreary outlook it was, too, that dismal, foggy day in January. The buildings contained one, or possibly two, small rooms, and the uncurtained windows stared drearily at one, revealing the wretched, comfortless interior. All the houses had been passed but one, although a counterpart of the others, that would give you courage and happier thought—and all because of a shade made from common white paper, that shaded a clean window wherein bloomed a single beautiful geranium. All honor to the woman who thus raised her work above the sordid level of her surroundings. Country women were behind the times longer than their town sisters in comparative worldly circumstances, because they had less opportunity for united effort; little or no opportunity for organization, and too often less education. Happily that day is passed. More and more, farmers, as a whole, are supplying their families w .h the best they can afford. Especially is this true of education, and people who, heretofore, regarded the farmer with good-natured tolerance, today know that it requires just as good a set of brains to be a successful farmer as it does to be a merchant or a professional man.

Not as many farm women desire to move to the city as is generally supposed, and the oftener they get away from home to compare notes the gladder they are to get back to where there is a yard for the children to play in and "elbow" room, as it were, for themselves. One lonesome night of waiting in a depot of a great city sometimes plays havoc with the city microbe.

Home! the one word of all others that causes the heart to bound. A half century ago two opposing armies were encamped, one on each side of a river in the Southland. Your father and mine, many of them were mere youths, who were there only because duty called them. They on one side sang a song relative to their own home. The other side responded with their favorite. Then somebody started "Nome, Sweet Home," and with one ac-

This Splendid Piano Will Be a Credit to Your Home

That Child of Yours Deserves Such an Instrument

And Our FREE Piano Catalog Shows You How You Can Save $150.00

HERE is an opportunity for you to obtain one of the greatest musical instruments ever manufactured—without one penny's obligation on your part until you are actually convinced that every claim we make is true, and with a guarantee that practically means a *lifetime* of *splendid piano service.*

The World Famous
Fuehr & Stemmer Piano
Direct from Factory to You

represents the most superb musical quality, at a price no greater than you would pay a retail dealer for some ordinary piano. How can we offer such a magnificent instrument at a price enabling you to actually ***save $150.00*** and under such a remarkably strong guarantee? Simply because we, the makers of the piano, are doing business *direct with you*—no others in between us to claim profits from the sale.

You get the benefit of the dealer's own price. *You* save his profit. You come in close relations with the men who alone are responsible for this instrument from its beautiful outside finish to the perfectly balanced and regulated tone that gives it such marked individuality.

Send for the Proof

We will satisfy you as to the superior merits of the Fuehr & Stemmer Piano and the musicianly service it is giving to hundreds of owners in your own state.

Your family deserves this high-grade piano—which also represents remarkable value from the money standpoint, because it goes right to your home from the experts who make it.

30 Days' Free Trial—Lifetime Guarantee

Every Fuehr & Stemmer Piano is given ten separate tuning operations here at the factory. Each piano has a special guaranteed action—giving it responsive touch and delicate tone quality that command the admiration of musicians.

Faultless materials are used in manufacture—every piece being inspected again and again before the piano is sent out. Our skilled workmen give the closest attention to *each* piano, and the one you receive for free inspection and use will indeed be a masterpiece.

Let us tell you how to enjoy this great triumph of piano building in your own home, without obligation to buy unless you really feel it is the piano you ought to have. Let us explain the terms of a guarantee that practically means a lifetime of assured satisfaction and service.

Write today for handsomely illustrated catalog—*Free.*

HOME AND HOMEMAKING.

ART OF CAKE MAKING.

"Cake is to the appetite what mirth is to the melancholy." There is cake and cake. The coarse, spongy combination that will put any, except the strongest digestion out of commission, and the kind that is a light, delicate texture and delicious flavor. Flour that contains an excess of gluten will not make a cake of fine grain or texture. Prepared cake flour is the best, winter wheat flour is the next best, while spring or hard wheat flour is the least desired. The baking of a cake is of more importance than the mixing. The time should be divided into quarters. During the first quarter the mixture should become heated and begin to rise; second quarter, continue to rise and begin to brown; third quarter, continue to brown; fourth quarter, finish baking and shrink from pan. If the cake is moved in the oven or the stove jarred, while in a soft condition, the cells will be broken before they are cooked and the result is a fallen cake. When done the cake will spring back quickly when pressed gently with the finger. Aside from a few general directions, experience is the best teacher. It is by doing things over and over that we become proficient.

Moonshine Cake.—One cup butter, two cups sugar, one cup milk, one-half teaspoon orange extract, four cups cake flour, two heaping teaspoons baking powder, white eight eggs. Cream butter and sugar until very light; sift the flour with baking powder three times; put back into sifter for the final sifting into the cake; add alternately with the milk; add flavoring; cut and fold in the whites very gently; bake in square, shallow pans in a quick oven about twenty minutes; use any icing desired; before icing is quite hard, mark with a knife into squares; half of an English walnut placed on each square is very nice.

Ginger Cookies.—Molasses, two cups; sugar, one cup; butter, one cup; boiling water, one cup; soda, one teaspoon; ginger, two tablespoons. Roll soft. Soda should be dissolved with the water.

LITTLE HELPS BY THE WAY.

I think it is rather fine, this necessity for the tense bracing of the will before anything worth doing can be done. I rather like it myself. I feel it to be the chief thing that differentiates me from the cat by the fire.—Arnold Bennett.

This is the gospel of labor,
Ring it, ye bells of the kirk,
The Lord of Love came down from above,
To live with the men that work.

This is the rose that He planted,
Here in the thorn-cursed soil;
Heaven is blessed with perfect rest,
But the blessing of earth is toil.
—Henry Van Dyke.

THE MAKING OF CIDER VINEGAR.

To the Editor of The Homestead:

This has been a very remarkable year for apples, and great numbers, especialy windfalls, are going to waste when they might be utilized to good advantage. There is no reason why cider vinegar, when properly made, from these apples will not conform to the requirements of all pure-food laws. I wish to give briefly a statement in regard to the manufacture of cider vinegar on the farm with important points to be noted.

Always use fresh, clean barrels. If they have been formerly used for the manufacture of cider vinegar, be sure to thoroughly scald them with boiling water or steam. There are two important changes which take place in the conversion of the fruit juice into vinegar. First, it is necessary to have a solution which contains sugar. The juice of ripe apples contains from 7 to 15 per cent of sugar—the average being nearly 11 per cent. An apple juice containing 8½ per cent of sugar will produce a vinegar above standard. Mature, ripe apples contain the largest amount of sugar, green apples contain a much smaller quantity, and overripe apples contain a less amount of sugar than ripe apples. Contrary to the usual belief, sweet apples are ordinarily no richer in sugar than sour apples. They taste sweet because they contain less malic acid than sour apples. Malic acid is the normal acid of apples. In pressing the apples, it is well to use as powerful a press as possible because of the greater amount of cider which can be obtained. For instance, a hand press may yield only two gallons of juice per bushel, while a power press would yield four gallons of juice per bushel of apples.

The apples should be washed if dirty, and only sound apples should be used in the manufacture of cider. The first point to be noted is this: Do not add any water, sugar, or molasses to the cider. This is unnecessary, and these adulterants are prohibited under the pure-food law.

The addition of one cake of compressed yeast to five gallons of juice is advisable after first thoroughly softening the yeast with lukewarm water. The presence of the yeast causes the first change to occur in the cider, viz., converting the sugar that is present in the apple juice into alcohol. The temperature interferes materially by retarding the fermentation, while higher temperatures may cause a loss of alcohol by volatilization. Do not let the cider freeze.

When fresh cider is placed in barrels, and stored in ordinary cellars, and yeast has been added, the alcoholic fermentation can be completed in about three months. Do not add any old vinegar or mother of vinegar until the alcoholic fermentation is completed, as the presence of acetic acid in the vinegar retards the alcoholic fermentation. When the alcoholic fermentation has occurred, the product is then known as hard cider. After the alcoholic fermentation is completed, then it is advisable to add about one gallon of good vinegar, containing what is known as the mother of vinegar, to a barrel of the hard cider. The mother of vinegar is another form of yeast, and has the power of converting alcohol into acetic acid. The process of converting alcohol into acetic acid is an oxidation process, i. e., it is necessary to add oxygen to the alcohol in order that acetic acid may be formed.

The old theory of filling a barrel full of cider and placing a bottle in the bunghole to admit light ito the cider is wrong. It is much better to fill the barrel only half or three-quarters full, and every few days shake the barrel so that the contents will be thoroughly mixed with the air, and place gauze over the bunghole to keep out dirt and insects. The more air that can be incorporated with the vinegar, the more rapid the process will take place.

W. B. Barney.
Iowa Dairy and Food Commissioner.

There are about two dozen varieties of pop corn, and the preference between them is largely personal. The colored varieties often are more attractive to children, and the tiny Tom Thumb is popular for decorations. Early planting in a warm, well-drained soil is the chief requisite for success in growing the crop.

AMONG OURSELVES.

R. H. M. gives her idea about social life in the country:

Social life in rural communities declines more rapidly as the country grows older and the people become wealthier. Perhaps the reason for this is that the American farmer has become so absorbed in money-making that he neglects the social part of his nature. In earlier times men were more dependent, one upon another, to get their work done; while today they are independent by having so much machinery to do their work for them. The young people, instead of spending their evenings at the neighboring homes in the community, are found at some entertainment in the near-by town or city. To rally the social life in their home communities these young people might have an entertainment in their own home where, instead of inviting their city friends, they might invite the young people of the neighborhood, get acquainted and have a good time. One way in which the people may be drawn together to enjoy a social time is by the organizing of the farmers with their families into a country club, where a profitable, as well as a social, time may be enjoyed. Topics on "improved farming" are discussed by the men; while the women discuss "housekeeping made easier," and the young people and children betake themselves to another part of the house or lawn where games are played and various amusements furnished. The evening may be brought to a close by serving a simple lunch, which will send the people home in a better frame of mind than most anything else. A literary circle may also be organized by the young people, where a jolly good time may be enjoyed by all. Debates, readings, farces, vocal and instrumental music may be had, while the evening may be brought to a decisive close by an old-fashioned "spelling match." Thus we see that there is much which we can do to raise the social standing in our rural communities.

A few earnest promoters like the above would go a long way toward solving the social problem of farming communities. After carefully noting many different communities, I find the greatest detriment to social life in the country is to break up into classes. Especially is this true when the coun-

try has advanced in wealth. Letters are desired on this very subject. Please let us hear from our folks.

We are privileged with a talk from a wise mother. Reading between lines one can understand where this mother's boys spend their evenings, and the kind of company the girls choose from their masculine friends:

We try to make the home attractive for our children. We have a piano, which my daughter and I can play. We have singing, we are all lovers of music, and games. We give a party once in awhile. Oh, parents, don't be in a hurry to have your boys and girls grow up, for they will grow up pretty fast after they begin to walk. I miss my children out of my arms. We have four dear children. One is a preacher in New York, another son a "Vet," living 130 miles from home, and a daughter also lives on a farm 120 miles away, and one daughter attending the high school. Also we have a daughter and a son in Heaven. My daughter raised a calf that her father gave her when it was three weeks old. She kept it until it became a cow. The first year my daughter gave her father the first calf. The second calf she sold for $6; afterwards she sold the cow for $30, and put the money in the bank. She also had some hens and chickens for her own. Children take pride in raising calves and chickens, and in a garden. It won't be long before they take their parents' places. Let them know that you have an interest in them, encourage them all you can, give them something to do and help them to reason out things. When children see that their parents take an interest in their welfare, they'll go to their parents quicker than to a neighbor or friend. I knew of a family that had three boys and three girls. With them it was work, work, work and not much play in that home. Just as soon as the boys could handle the horses, their father would set them to plow, cultivate, harrow, and do almost a man's work, instead of sending them to school to get some education. But they were after that almighty dollar. Finally the mother died of overwork, while their father goes to town and stays until mealtime and the boys stay at home, working in the field. It's all right to teach the children to work, but we believe in teaching our children to see something of the world. We take papers and magazines and farm journals, so we all have plenty to read. We have a large library and have plenty of good books. My daughter and I are companions to each other. I believe if parents joined in with the young people in their sports, they would feel younger. I know that we feel younger to join in their innocent games now and then. The children enjoy it, too. Make your children feel at home. If God has prepared a "beautiful home for the faithful and all those that love Him," how should we make our home for our loved ones? Let us make it better and sweeter, as we grow older. Then our children will rise up and bless us.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Rural Route, No. 56, Box 21, Philo, Illinois.

IRELAND'S SHAMROCK.

(First Prize.)

You have heard that the shamrock is the national emblem of Ireland. Have you ever wondered why the people of the country of Ireland chose the modest shamrock out of hundreds of far more beautiful flowers to be their emblem? It is said that once St. Patrick, a famous minister of the gospel, was preaching in a village to a large congregation of Irish infidels who did not believe what the great man said; but jeered and ridiculed his ideas. St. Patrick became excited and stooped down and caught up a trefoil from the Irish soil at his feet. By means of the trefoil or shamrock he explained his ideas so well that the people were satisfied, and went home loud in their praises of the great man. Ever since the three-leafed clover, or shamrock, as the Irish call it, has been known as the national emblem of dear "Old Ireland."

—Ella Ahlers.

The Discovery of the Dahlia.

(Second Prize.)

Years and years ago a young Swedish botanist, Andre Dahl by name, went to sunny Spain for specimens of flowers for his beautiful collection. Growing on the banks of a murmuring brook, at the foot of a mountain, he found a gorgeous flower smiling in the bright sunshine. The young botanist was greatly pleased at his discovery and took some plants of it along with him when he returned to his native land. The Swedes fell in love with the brightly colored flower; his friends named the plant "dahlia," in honor of him. Today many varieties of flowers, in many shades and colors of the dahlia, grow in every land. No flower garden is complete without a few of the young Swedish botanist's beautiful dahlias. —Anon.

William McKinley.

(Third Prize.)

William McKinley was born in Niles, Ohio, on the twenty-ninth of January, 1843. He received his early education at Poland Seminary and later entered Allegheny College at Meadville, Pennsylvania, but was compelled to quit on account of ill health. He taught school for several years. In 1861, he enlisted in the 23d Ohio infantry under General Rosecrans; he served through the civil war and gained the rank of brevet major. McKinley studied law and was admitted to the bar in 1867. In 1876, he became a member of congress and governor of Ohio in 1891, and was elected twenty-fifth president in 1896 over Bryan, the democratic candidate. He was re-elected in 1900. McKinley delivered an address at the Pan-American Exposition at Buffalo on September 5th; a reception was given him the next day. Leon Czolgosz, an anarchist, shot and fatally wounded him. He died the fourteenth of the same month and was buried on the nineteenth. Business was suspended for five minutes, througnout the world, at the hour of interment. —M. A.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

4th Quar. Lesson 4. Nos. 20: 1-13, Oct. 26, 1913.

THE SINS OF MOSES AND AARON.

It is a mistaken notion, wide of the mark, which pictures the pilgrim nation as a compacted army, marching in serried column. That would have been impossible. They scattered out widely, in groups or clans, in quest of pasture and water. Thus for a whole generation they had adjusted themselves, like bedouins or shepherds, to the topography of the district. But now the long-drawn process—the preparation of Israel for Canaan—nears its end. The wilderness had been one great schoolhouse, where they had suffered the discipline and learned the lessons which have fitted them to be preeminently the torch-bearing nation for the others which still sat in darkness. So a rendezvous is named and an assembly of the whole "congregation" is called, preparatory to an immediate passage into the land of promise. But an accident spoils it all! That is a laconic but fateful remark. "There was no water." Millions of people and a water famine! Could anything be more untimely? Why this massing of the hosts in the dry season of midsummer? What better was this promised land than a mirage? It was even now fading from view, like a mystic oasis. Were not the people justified in criticism and complaint? Yes!—if God had not paved the whole wilderness with his deliverances! They ought to have been able to anticipate the devout logic of David's psalm, "The Lord hath been mindful of us—he will bless us!" Quiet communion with God and their own souls would have restored their self-possession. But instead they talked and fussed among themselves. Distrust, bitterness, criticism, as usual, was the result. The worst of it all was that Moses himself had caught the subtle infection and had fallen into the very sin of the people. He lost poise and temper. He was to have performed a holy function, as a representative of God, before all the people. The act called for deliberate calmness, dignified carriage, well-modulated voice. But instead, with the petulance of a spoiled child, he did the direct opposite of what he had commanded. Instead of addressing the rock, he took opportunity to upbraid the people. He was not told to strike the rock at all, but in his temper he struck it twice. However, though the spirit and method were so evil, God did not count it against the suffering hosts. The water gushed out in abundance for man and beast. Moses' public offense could not be condoned without lowering the moral tone of the whole people. The punishment was exemplary. The very form of it was significant. He failed to reach the supreme object

Do You Know Where "Ladies' Home Journalville" Is?

That is what a suburb of a Southern city is called, because it is built up entirely of the small house-plans published in *The Ladies' Home Journal*. And all say it is "one of the prettiest suburbs" they have ever seen!

Over 25,000 houses have been built in the United States from plans published in *The Ladies' Home Journal*.

For 20 years these plans have been published and new ones are constantly being given now.

Then, there is an Architectural Editor attached to *The Ladies' Home Journal*, who answers by mail, free of charge, any question about house-building, and an Interior Decoration Editor, who solves all problems about how to make a home pretty inside.

Last year these two editors answered 11,000 letters—quickly, fully and authoritatively: not in print or in the magazine, but by mail: a personal service direct and intelligent.

What these editors have learned in 20 years about house plans is at your service. A booklet, entitled "The Story of 600,000 Invisible Hands," tells something about this service. A postal-card request will bring a copy.

A year's subscription to *The Ladies' Home Journal*, by mail, costs $1.50, or it may be bought from any Newsdealer or Boy Agent at 15 cents a copy.

WILLIAM GALLOWAY, President

I Want Every Reader of the Iowa Homestead to Write Me for My Money Saving Catalogs

I want **you**, the man who is holding this paper in his hands right now, to write me **right away.** I'm making a special appeal to the readers of this Great Farm Paper. I've got **something special** to offer every one of you. I want you to get my catalogs **first,** because they are the first step in our getting better acquainted in a business way, on my direct from factory to farm, one-profit, money-saving plan. My catalogs are my only salesmen. They are the cheapest and best salesmen in the world. Just write me today for the catalog or catalogs you want. A one cent postal will bring them.

Just a Personal Word from William Galloway

I HAVEN'T any secrets about my business. The more my farmer friends know about my affairs the better I am satisfied. I've made good, but I know that every bit of my success is due to the fact that every single man who does business with me has found that **he can trust me absolutely.**

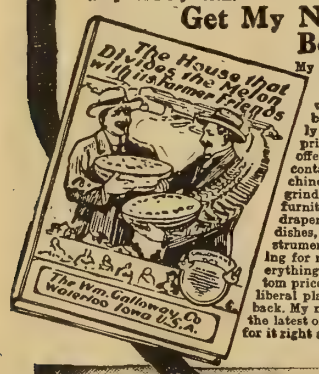
I'm a farmer myself, a dairy farmer. Always have been a farmer and always expect to be. The picture below shows my big dairy barn, two money making silos, manure granary where we keep the manure produced by one hundred head of thoroughbred Holstein and Ayrshire cattle in as perfect condition as possible for getting the full value of it when spread on the land. You can see some of my Ayrshire cattle in the picture and a Galloway Low Down Spreader just ready for the field.

I was born and raised on a farm and I know what you're up against when it comes to buying right, because I've been through the mill myself. That's why I got into this business. I used to sell farm implements for other people. I didn't keep at it very long because I saw with my own eyes every day the actual evidence that a farmer simply couldn't get a square deal and his money's worth so long as he had to pay a lot of middlemen's profits which were always loaded on to the real value of the goods.

I made up my mind to see if the cheaper and better way wasn't to manufacture my own goods—making them just the best that they could be made—**and selling them direct to the farmers at actual factory cost with only one very small factory profit added.** I started out in a small way because I didn't have much money. But it didn't take long to prove that my faith in the intelligence and buying judgment of the men on the farms was founded on solid rock. My business has been tremendous right from the start. My profits have been small—smaller than almost any other manufacturer in the country. And I'm going to keep 'em that way. I'd rather make a small profit and sell a lot of goods than a big profit on a few goods.

Naturally the dealers don't like me very well, for I stand in the way of their big profits. That's why a lot of them have gone out of their way to misrepresent my business. They can't do that very well any longer, now, for I've made a $5,000 Challenge Offer to any man or company in the world who can prove that every word of Galloway's story is not true right down to the last detail, or can disprove that my factories are not exactly as shown, or can disprove any statement or claim I make. I'll send you a copy of this challenge offer when you write me. Besides that, I protect every single man who does business with me with a $25,000 Cash Guarantee Bond that makes it just as safe for you to do business with Galloway as with the United States government. **Now** I want you to find out just what all this means to you in **cold, hard cash.** I've enlarged my line tremendously for 1914. I am offering **more** bargains and **bigger** bargains than I have ever been able to before. I want you to get the proof for yourself.

Get My New Big Book of Bargains



My big General Merchandise catalog has 1000 or more bargains for the farm, home and family. You want to get a copy of this big book without fail. You will simply be amazed at the wonderful price and quality bargains I am offering you in this big book. It contains a full line of farm machinery, tools, buggies, harness, grinders, household furnishings, furniture, carpets, rugs, linoleums, draperies, curtains, refrigerators, dishes, sewing machines, musical instruments, watches and jewelry, clothing for men, women and children—everything at the same amazing rock bottom prices and on the same wonderfully liberal plan—satisfaction or your money back. My new big catalog is just out with the latest of everything. **It's free.** Send for it right away.

My Factory to Farm Plan Saves Farmers a Million a Year

You know what I've done in the **past—saved more money for** the farmers of this country and given them **a squarer deal than any other manufacturer.** That's why I have been able to build up a mammoth direct-to-farm business here in Waterloo in so short a time. Now, this year I'm going to break all my past records. And I'm going to do it by putting some special propositions right up to the best farmers in the country. I'm going to make you some offers that are so unusual that you **simply can't get away from them.**

Over one hundred and thirty-five thousand farmers know by actual experience that the **Only Way** is the **Galloway, Selling Direct from Factory to Farm,** and I want you to **give my plan a trial.** I want you to **at least investigate it** by sending for my catalogs which **tell all about my plan.** I want to show you just what a man can do for you when he will **sell you direct from his own factories to your farm.** I want you to see for **yourself** what an amazing difference it makes in prices when you **don't have to pay one single middleman's profit.** Write me; you won't be under the **slightest** obligation. I'll show you how you can save hundreds of dollars in the next year alone. I'll give you the evidence, then let you decide. Just mail me a postal or letter for the catalogs you want **right now.**

My 5 h. p. Stationary Gasoline Engine $99.50

Can you beat that price? Never! Yet I am making prices all along the line to equal it. My 1 3-4 H. P. Air Cooled Boss of the Farm Engine sells for only $26.75. My 2 1-4 Little Wonder at only $39.50. My 6 H. P. Stationary at only $109.75. My 7 1-2 H. P. Stationary at $179.50. My 10 H. P. at $247.50. My 15 H. P. at $342.50. Can you beat these prices? Never! You can't equal them, for they are the lowest ever made in the history of this country on a strictly standard, high grade gasoline engine.

Listen! Before I came on the market a few years ago with my famous 5 H. P. engine, dealers were asking for inferior engines of same size from $250 to $325. I have forced them to come down on their high prices but they are still clear out of range of my amazing low prices. Yes sir, on my direct from factory plan, **I'll save you $50 to $300**—Depending on the style and size engine you buy, and I guarantee to give you as high a grade an engine as there is on the market regardless of price.

My Complete 50-60 Bushel Spreader Only $64.75

That's my new low price. Can you beat it? Not by any means. My price includes trucks, spreader box, force feed, whiffletrees, and neck yoke—everything complete. If you only want my wagon box spreader, I'll sell you a guaranteed attachment spreader for only $39.50.

Nine different styles and sizes to select from. My new, low-down, semi-underslung spreader is a wonder. Don't buy a manure spreader of any other style or make until you get my catalog and new low spreader prices. You can't afford to, because I'll save you $25 to $45 on the lightest draft, largest capacity, best built, two horse spreaders on the market. Let me prove it to you. I'll make you this unheard-of-offer. Try one 30 days on your own farm, with your money in your own pocket, no bank deposit, no notes, a strictly free trial offer. Give my machine any kind of a test you can think of, then keep it or send it back, if it doesn't suit you. You take no risk whatever. Over 40,000 Galloway Spreaders in use today. Get my new special manure spreader offer. Just write me today for new spreader catalog. Do it without fail.

I'll Save You $50 to $300

Here is just the sort of offer I make you and have made the more than 30,000 Galloway engine users today. You send for one of my engines, any one of my nine different styles or sizes, either mounted on trucks, with wood sawing outfit or stationary. Remember, you have five different plans on which you can buy, cash, bank deposit, two note plans and installment. When you receive my engine give it any kind of a test you want to, run it right along side any other make on the market. Do this for thirty days entirely at my risk, and keep the one that suits you best. Every Galloway engine is sold on 30 days' Free Trial backed by a 5 year warranty on materials and $25,000 legal bond. You take absolutely no risk when you try one; if the engine you buy isn't perfectly satisfactory you can return it and I will refund your money and pay all the freight charges. Isn't that a fair, square offer? No one can make you a fairer one, can they?

Free Service Bureau. Then you have the services of a big corps of engine experts always at your service who will assist you in installing your engine. They'll tell you how to use it to best possible advantage for your work, best size pulleys to buy, line shafting, etc. This service costs you nothing. It's a part of my plan. Now, don't wait, write me. Get my engine catalog. Mail me a letter or postal asking for it today. It explains my entire plan and gives my new, low, unequalled engine prices.

My New Galloway Sanitary Cream Separator Only $42.50

This is the machine it has taken us three years to perfect and build. It's in a class today by itself. It's the most modern, most sanitary and closest skimming machine ever invented. It's the easiest to run, easiest to clean. Gearing runs in a constant bath of oil. Requires oiling only once a month. I want you to know more about this incomparable Galloway Sanitary Cream Separator. Get my catalog.

The new Galloway Sanitary is built in three sizes—500-750 and 950 lbs. capacities. My prices are $42.50—$51.00 and $63.50 respectively.

The lowest prices ever made on a standard large capacity, high grade cream separator. Remember, I'll save you $35 to $50 over what you would have to pay a dealer or agent, for an inferior machine.

Write me today without fail. Get my new low prices. Get my big illustrated cream separator catalog. A postal will bring it.

Get My Special Cooperative Profit Sharing Offer

I'm ready to help you dairy farmers to put money right in your pocket. I'll prove that I can do it. You are going to buy something that I can save you a lot of money on, within the next few weeks. Get my prices, **learn more about my direct from factory plan before you spend another dollar for anything for the farm, home or family.** When you send for my catalogs I will explain my new co-operative, profit sharing offer to you. This new plan of mine will help you get your machine partly or entirely without cost to you in the end. I'll tell you all about it in a personal letter when you write for my free books. Get this sure. It won't take you a minute. It may mean hundreds of dollars to you this year alone. **Write for my catalogs and my special offer before you lay this paper down. Do it now.** Address

of his whole career—entrance with the people into the land of promise. Thus, in a singular and speaking way, God proved his deadly hatred of sin. He could not and would not overlook it even in the man who was dearer to him than any other who walked on earth. He cannot look upon the least degree of sin with the least degree of allowance.

GOOD BOOK FOR FARM LIBRARY.

Under the title "Educational Resources of Village and Rural Communities" there has recently come from the press a very readable volume by Prof. Joseph K. Hart, of the Washington University. It is in reality a summary of the experiences of men and women who are striving for the better development of the social standing in rural and village communities. There is set forth in much detail the great lines of community interest, activity and resource. The subject chapters are The Community as Educator; The Physical Resources of the Community; The Human Resources of the Community; The Economic Activities of the Community; Community Health, Hygiene and Sanitation; The Local History of the Community; The Political Life of the Comunity; The Development of Outdoor Beautification in a Community; Economy and Beauty in the Homes of the Community; The General Social Life of the Community; Recreation, Play and Amusements in the Community; Moral and Social Deficiencies of the Community; The Religious Life of the Community: The Intellectual Life of the Comunity; The Community Life as Curriculum of the School and Comunity Activity in the Administration of Education.

The regular publisher's price of this volume is $1 and this paper is able to supply it to its readers at this price.

Because of the fact that a large number of county boards hold their meetings during the second week in September the dates for the annual convention of the Wisconsin Potato Growers' Association have been changed to November 20th and 21st. The large armory at Rhinelander, Wis., has been secured as headquarters for the convention and accompanying exhibition. It is expected that the exhibit of potatoes will be the largest ever held in the Northwest, and the gathering of men interested in potato growing will be one of the most significant ever held in the United States.

Fuehr & Stemmer Piano on Thirty Days' Trial.

On page 20 of this week's issue the Fuehr & Stemmer Piano Company, 18 East 24th St., Chicago, Ill., have a large advertisement which we believe will interest our readers. A piano in the farm home is considered almost a necessity in this day and age, and this concern is making a very liberal offer of thirty days' free trial. They say of their pianos: "Every Fuehr & Stemmer Piano is given ten separate tuning operations here at the factory. Each piano has a special guaranteed action—giving it responsive touch and delicate tone quality that command the admiration of musicians." We suggest that our readers look up the advertisement and write for catalog.

Write for This Stove Book.

For years the Kalamazoo Stove Company, Kalamazoo, Mich., have been advertising and selling stoves direct to our readers and it is said have built up a splendid business and a remarkable reputation for fair dealing. Now they are advertising to send free to any home, all postage prepaid, one of their big book, catalog No. 165, on stoves illustrating over 400 stoves in every style and size and giving the prices of these stoves freight paid to your station. We believe it would be to the interest of our readers who are in the market for stoves to send for this book, as it is said to contain much information of an educational value regarding stoves in general and we would suggest that they obtain a copy before buying a stove. See page 22.

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect fitting, seam allowing patterns at 10 cents each postage prepaid. Full directions for making, as well as the amount of material required accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

6110 Children's Apron.—This apron is developed in white linen and embroidered around the edges with white floss. It is made to be slipped on over the head and a pocket is sewn in each side of the front.

The pattern 6110 is cut in sizes 4, 6, 8, 10 and 12 years. Medium size requires 1⅞ yards of 27 or 36-inch material. Price of pattern ten cents.

6234 A Practical Waist.—This design is to be classed with shirt waists. It has two tucks at each side of the front, but the back is plain. The closing is made with a box plait or without as preferred and the neck is trimmed with either a standing collar or a flat, ornamental one, both being provided in the pattern. This style is good for crepe materials, linen, gingham, cambric, pongee and the like.

The pattern 6234 is cut in sizes 34 to 42 inches bust measure. Medium size requires 2½ yards of 36-inch material. Price of pattern ten cents.

6231 Boy's Russian Suit.—We have yet to find an improvement on the Russian suit for little boys. This design shows a plain, straight blouse section with sleeves very slightly gathered at shoulder and wrist and with the neck cut round and trimmed with an applied band which also extends down the front. With this blouse small knickerbocker trousers are worn.

The suit pattern 6231 is cut in sizes 2, 4, and 6 years. Medium size requires 2¾ yards of 36-inch material, with ⅞ yard of 27-inch contrasting fabric to trim as shown. Price of pattern ten cents.

6294 Girl's Coat.—This coat is made with the long blouse effect. The skirt of the coat is cut in three gores. The collar can be used or not as preferred. Serge, cheviot or mohair can be used to make this coat.

The pattern 6294 is cut in sizes 4, 6, 8, 10 and 12 years. Medium size requires 2⅞ yards of 44-inch material, ¾ yard of 27-inch material for collar and cuffs and ⅜ yard of 24-inch satin for the belt. Price of pattern ten cents.

6316 Misses' Dress.—In this model we have the simple yoke style, which is so becoming to all figures. The yoke in this case is sc and fairly deep, with the balance of the waist, both front and back, gathered where it is attached. The sleeves are plain and the skirt is made with four gores, the panel effect being used in front and back, with gathers at the sides.

The dress pattern 6316 is cut in sizes 14, 16 and 18 years. Medium size requires 4⅞ yards of 36-inch material. Price of pattern ten cents.

6305 Girls' Dress.—This very simple frock offers one element of novelty in the arrangement of the shoulders where the material extends over the sleeve. The closing is in front and there is an unusual collar arrangement at the neck. A belt confines the very slight fullness at the waist. This model will be pretty in gingham, linen or ratine.

The dress pattern 6305 is cut in sizes 6, 8, 10 and 12 years. Medium size requires 2⅝ yards of 36-inch material. Price of pattern ten cents.

$285 Motorcycle Given Away!

YOU see here a picture of the $285 Harley Davidson Motorcycle I am going to give away. In another part of the picture is the face of the rider. When you find the rider, mark his picture with a cross (x) and send to me.

Be sure to send your name and address so I can tell you all about the contest in which you can win a $285 Motorcycle and many other prizes.

1500 Votes Free I will send you a special coupon good for 1500 votes toward the motorcycle. All you have to do to get this coupon is to send your name and address at once.

FIELD NOTES.

Sol Frank, Sioux City, Iowa, advertises good Duroc Jersey boars at $25 to $50 on page 37.

Immune Duroc Jersey boars are advertised for sale at $25 and $35 by J. F. Kerns, Holstein, Iowa, on page 36.

Howard S. Cooper, Wellman, Iowa, has two St. Bernard pups that he is offering for sale in his advertisement on page 15.

Forty-five head of Poland China boars are advertised for sale by A. W. Stewart, Harlan, Iowa, at from $20 to $45 on page 38.

The advertisement of Henry Althoff, Lansing, Iowa, offering full blood Fox and Wolf hound pups for sale, appears on page 15 of this issue.

W. S. Huber, Tipton, Iowa, has full-blooded Fox Terriers on which he is quoting prices in his advertisement that appears on page 15 of this issue.

Mrs. A. N. Bonnett, Birmingham, Iowa, is advertising bright, intelligent Collie pups from trained stock for sale in her advertisement that appears on page 15.

On page 32 of this issue of The Homestead appears the advertisement of Vane Coen offering Tamworth spring boars, fall yearlings and a few choice gilts for sale.

Davenport & Mack, Belmond, Iowa, advertise fifty Poland China boars for sale on page 39. Their price is $25 to $40. Order one of these at once and get the pick of the bunch.

Fifty head of large-type, big-boned, immune Poland China boars are advertised for sale by M. P. Hancher, Rolfe, Iowa, on page 38. Price $30 to $50 for immediate delivery.

Eugene Holden, R. R. 1, Williamsburg, Iowa, advertises on page 32 that he has for sale ten very choice Tamworth boars of spring farrow and one mature boar, and that he will sell them at reasonable prices. Write him.

When a car like the Mitchell can be obtained for less than $2,000 it is just like picking up a good profit, because it is worth the saving of several hundred dollars. The Mitchell is the car of quality, efficiency and long life. The makers have everything at their hand in the way of manufacturing equipment and materials, together with the choicest scientific and mechanical ability necessary in planning and in construction. The principal features of the 1914 Mitchell are given in the advertisement. Complete details may be learned by writing to Mitchell Lewis Motor Co., Racine, Wis., U. S. A. See page 7.

W. E. Hemenway & Son, Steward, Ill., claim December 8th as the date for a sale of Hereford cattle and Clydesdale horses, full particulars regarding which will appear in later issues of The Homestead.

The Omaha Hide & Fur Co., has an interesting advertisement on page 25. They guarantee highest market prices and satisfaction to customers. For price list address Omaha Hide & Fur Co., 1228 Jones St., Omaha, Neb.

Silas Igo, Indianola, Iowa, is offering some great Duroc-Jersey spring boars for sale on page 37. He also offers one of the best sons of Crimson Wonder Again and H. A.'s Queen that we know of. Write him at once about these boars.

E. W. Biggs Trapper's Guide and free catalog advertised on page 17 tells all about furs and trapping. It may be obtained by any reader of this paper without cost by writing to E. W. Biggs & Company, 138 Biggs Bldg., Kansas City, Mo.

Ball Band footwear advertised on page 8 is designed to protect the farmers' feet from wet and cold. A free illustrated booklet tells about the various kinds made. Write for it to Mishawaka Woolen Mfg. Co., Water St., Mishawaka, Ind.

Percheron stud colts and fillies are offered for sale by Henry Moll, Garner, Iowa. He wants to close out a bunch of these and he is making bargain prices for the next thirty days. He also has a good yearling Short-horn bull that he offers for sale.

Mrs. Peter Ellerbroek & Sons, Sheldon, Iowa, are offering some splendid large-type Poland China boars for sale on page 39. They are making special prices on these boars in order to make room for their fall pigs. Mention The Homestead when writing them.

Those of our readers who want Aberdeen Angus bulls should read the advertisement of Chas. M. Russell, Carroll, Iowa, on page 35. He offers twenty head of the best and most noted tribes. Write him about these bulls and mention The Homestead.

A circular and handsome hanger printed in five colors describing the McDonald Pitless Scale may be obtained free by addressing a request to the Moline Plow Company, Department 11, Moline, Ill., whose advertisement of the McDonald Scale appears on page 18.

An offering of high-class Shire horses will be made at Bushnell, Ill., January 15th by C. C. and R. W. E. Williams. Included will be a number of state fair and International Live Stock Exposition winners. Full particulars will appear in later issues of The Homestead.

Big Ben is the farmer's clock. It is made of implement steel so it lasts for years. It is an alarm clock that does its duty. It is a time-keeper that never goes wrong. Three million families are using it. All others should. Clock makers every place keep it. See page 10.

Jesse Binford & Sons, Liscomb, Iowa, breeders of Short-horn cattle, write under recent date: "We have a few good young bulls of serviceable ages which we are pricing low. We would like to have Homestead readers needing a bull inspect our herd." See advertisement on page 34.

C. H. Porter, Eagle Grove, Iowa, is advertising forty-five head of well-bred, big-type, immune Poland China boars for sale on page 38. He is pricing these boars at from $30 to $50 and now is a splendid time to order one. When writing Mr. Porter kindly mention The Homestead.

In an advertisement on page 32 Harry Hurless gives notice that for the next thirty days he will sell Chester White boars and gilts at remarkably low prices. He has about forty head of spring boars on hand and wants to get them out of the way for his crop of fall pigs. The boars will weigh from 140 to 300 pounds. They are long, good bone, with strong backs and neat heads and ears. They are the get of three different sires. They are guaranteed to be as described and will be sold at from $20 to $35 each. Do not buy before investigating this offer. Address Harry Hurless, Olden, Iowa.

Overland dealers are the happiest lot of automobile men in the business. The reason is easy to learn. In fact, there are a whole lot of reasons. The important ones, however, are that every year the value of the Overland has increased while eveery year the prices have decreased, the motor being more powerful, the equipment more perfect, the design more beautiful and the servicableness of the car unquestioned. Read the big advertisement on page 2. It tells the story in brief. In full length it is told in the handsome 1914 catalog for which write to Willys-Overland Co., Department 80, Toledo, Ohio.

H. C. Mehring, Manson, Iowa, whose advertisement of Hampshire fall and spring boars for sale appears on page 38, writes: "The Blue Ribbon Stock Farm is offering for sale a fine lot of Hampshire boars. And these are immune. We have had them all vaccinated simply because we think that buyers are wanting immune boars and we wanted to be in a position to fill their orders. We also have boars for sale from six months to two years. These are all well marked. We also have some fine Scotch Collie male pups for sale. These are all the big kind and are regular hustlers. They are eight months old and will sell at reasonable prices." For description and price list write to H. C. Mehring, Manson, Iowa.

John C. Nyrup, Harlan, Iowa, is offering some of the best Poland China boars he has ever raised at $25 each on page 38. Send Mr. Nyrup an order for one of these boars at once and you will be satisfied.

Hog cholera and roup are the two most serious affections of farm stock. Sloan's liniment is advertised on page 15 as a means of preventing hog cholera and a sure cure for roup. Those who use it are loud in its praise. Note the prices in the advertisement and forward orders to Dr. Earl S. Sloan, Boston, Mass.

A splendid, big-type yearling Poland China boar, sired by Barker's Hadley and out of a Big Orange bred sow is offered for sale by C. L. Thuirer, Fostoria, Iowa. He went through the cholera and so is immune. He is a splendid boar and $100 takes him. He is a bargain at the price and you will say so if you go and see him.

C. G. Good, Ogden Iowa, a well-known importer of Percherons and Belgians, leaves this week for the old country where he will make selections for an early importation. Mr. Good has already disposed of one lot of imported horses and finds it necessary to go for more on account of the demand which is made on him.

The expression which heads the advertisement of Funsten Bros. & Co. on page 10 tells an important story. This firm handles furs and pelts of all sorts, and their immense business enables them to pay the very top prices for good goods. An interesting circular, together with a free copy of Trapper's Guide and a list of game laws, may be obtained by writing to Funsten Bros. & Co., 1614 Funsten Bldg., St. Louis, Mo.

In an advertisement of the Southern Railway on page 21 the announcement is made that excellent homesteads may be purchased along the lines of that railway at from $15 to$50 per acre. The advertisement gives other and additional important facts. Still further information may be obtained by writing to M. V. Richards, Land & Industrial Agt., Southern Railway, Room 50, Washington, D. C.

C. A. Saunders, Manilla, Iowa, announces on page 32 that he has twenty-three pure-bred Percheron horses that he wants to trade with some man who will come and look at them. He will not answer letters because the trade must be made the last of this month or not at all. Any read of this paper who wishes to go into the horse business on the basis proposed should go and see Mr. Saunders without delay.

Germozone, the Lee preparation advertised on page 15, is just as successful in the cure of bowel complaint in chickens old or young, or for roup, canker or sores of any sore in poultry, as was the original Lee Lice Killer in its work when it was first introduced. A sample of Germozone will be sent to any address on receipt of ten cents to pay postage. Booklets describing it may be had free. Address George H. Lee Co., Omaha, Neb.

The Morning Sun herd of Chester White hogs advertised on page 32 offers for sale a choice lot of spring boars, the get of Fancy Boy. Fancy Boy is a son of Sweepstakes, that will be remembered as the 1,260 pound Boyer hog that made such a sensation at the state fairs last year. Fancy Boy weighed over 500 pounds at fourteen months old. His pigs show the same growthiness and quality. Write for prices. Address W. M. Stoll, Le Mars, Iowa.

W. T. McLaughlin has for sale good Poland China boars of fall and spring farrow and advertises them on page 32. Mr. McLaughlin's herd is headed by Bouncer 190715, he is a son of the well-known Dorr's Expansion, that aside from being a breeding hog of remarkable merit was a prominent show winner and sire of show winners at the Sioux City Fair. Bouncer's dam was Griffin's Samboline, a sweepstakes winner at the Sioux City Fair of 1912. The blood lines involved are good ones, the pigs are thrifty and growthy, and will be sold at reasonable prices. Address W. T. McLaughlin, Manson, Iowa.

Any reader of this paper who has a bunch of Short-horn cattle that he is willing to trade for Percheron horses will be interested in the advertisement of C. A. Saunders, Manilla, Iowa, which appears on page 32. The lot of horses includes one extra Percheron stallion that was a first-prize winner at the Iowa State Fiar in 1908. All the mares of sufficient age are good work horses that have been working on the farm all summer. Mr. Saunders is recognized as one of the best horsemen in the state and has never been willing to keep a poor horse on his farm. The opportunity is a good one. Do not neglect it.

Doolittle's Chester White Hog Sale.

W. P. Doolittle, Woodland, Mo., will sell at his White Eagle Farm, on Thursday, October 30th, fifty head of O. I. C. hogs that are the most uniform and toppy lot ever offered from the herd. Twenty big, growthy, spring boars, ten fall yearling gilts and twenty spting gilts are listed. They have for sires White Eagle Chief 32392, Pompos 39027, Nymph's Eagle Chief 36935, White Eagle Tom 35007, Billy Boy 358825 and O. K. Perfection 29586 and are from selected sows that Mr. Doolittle has reserved for his breeding herd. They represent several years' work in building a herd that stands among the good herds of the country. In this sale the tops of 150 head are listed and those looking for boars or gilts that are well bred and are good enough to go to any breeding herd should not fail to attent Mr. Doolittle's sale. A few of the hogs were taken to three of the best county fairs in northeast Missouri and fifteen first prizes, thirteen second prizes and eight champion pfizes were won. Mr. Doolittle wants to send you a catalog and will on receipt of your name and address. He invites you to the sale whether you buy or not. Woodland is on the Burlington railroad nineteen miles west of Quincy, Ill., or Hannibal, Mo., and four miles west of Palmyra, Mo. Note page 33 for Mr. Doolittle's advertisement and when writing him kindly mention this paper.

Gruis' Immune Boars.

On page 36 Heiko Gruis, George, Iowa, advertises a choice lot of immune Duroc Jersey boars for sale, sired by his first-prize senior yearling boar at the Interstate Fair this fall, and we might incidentally remark this hog was one of the best boars shown at that fair. Mr. Gruis has had his herd vaccinated with the single treatment and these boars are ready to ship at any time. He is pricing them at $25 to $35 and they will weigh from 150 to 175 pounds. When writing him kindly mention The Homestead.

Some Great Angus Bargains.

Those of our readers who want some choice Aberdeen Angus cows or heifers should read the advertisement of Escher & Ryan, Botna, Iowa, on page 35. They are offering some wonderfully good cows and heifers of the very choicest families and some extra choice young bulls. If you are thinking of purchasing Angus cattle it will certainly pay you to visit this great herd and look it over and you will be sure to buy. Their prices are within the reach of everybody. When you write them kindly mention The Homestead.

Snyder's A Wonder for Sale.

Perry A. Snyder, Carlton, Neb., owner of Snyder's A. Wonder is offering that great boar for sale. He is sired by a son of A Wonder and we want to say that this boar is an exceptionally good one. He is big and smooth and is siring an extra choice line of stock. The writer has seen this boar and we pronounce him good and well worth the price asked which is $75.00. Homestead readers that can use a good yearling boar should not hesitate on this fellow. Kindly notice the advertisement on page 32 and write Mr. Snyder at once.

Crees' Poland Chinas.

On page 38 C. W. Crees, Coon Rapids, Iowa, is advertising some splendid Poland China boars, and they have all been vaccinated with the simultaneous method, and are, therefore, immune. He showed at his county fair and got first on boar, first on sow any age or breed and this sow weighed 700 pounds. Mr. Crees has some excellent young boars for sale and a grand good yearling boar that is good enough to head any herd. Remember his boars are all immune. If you want one of these write him or go and see him. When corresponding with him kindly mention The Hometsead.

Save Money on Poland Chinas.

Readers of The Homestead will be able to effect a real saving on the purchase of a Poland China boar if they make their purchase of H. C. Meinhold, Stromsburg, Neb. Mr. Meinhold says that he is overstocked with big-boned, broad-backed Poland Chinas at present and he wishes to close out at least a part of the stock on hands. Spring boars, also spring and fall gilts, either open or will be bred for spring litters to good boars, and everything will be sold at real farmers' prices. Kindly notice the advertisement in this issue of The Homestead, and if interested write without delay. Mention The Homestead when you write. See page 39.

Marmion's Poland Chinas.

B. F. Marmion, Farmington, Iowa, is offering some of the biggest and best Poland Chinas that he has ever owned. They are the large, smooth, easy feeding kind that can be fed out at any age and be it a marketable condition. The pigs he is offering are largely of early farrow, one fall yearling by Pawnee Orange, by Big Orange, is just right for some farmer who wants to breed a large number of sows. This boar is a sure breeder of large litters. Mr. Marmion has some very good May boars just right for December use and if purchased soon the express charges would be very light. See page 32 and write Mr. Marmion your wants, mentioning the Homestead.

McDowell's Sale of Poland Chinas.

On November 1st, at the Vandebur Feed Barn, at Chariton, Iowa, E. E. McDowell, will make his first annual sale of big-type Poland Chinas and he will offer forty-five head. There will be thirty head of good spring boars and fifteen head of his choicest gilts. Mr. McDowell has been breeding Poland Chinas for a number of years and bought his foundation stock from the best big-type herds of the state. He is listing a very useful and a very good string of boars that will weigh from 200 to 225 and a few will touch the scales at 250 pounds. These have not crowded and yet they have been well-grown and you will find some good boars in his offering. They are sired by Big Special, a son of Crow's Special, one of the boars that made the Sefrit herd, and a number are sired by Smooth Wonder 3d. Most of the boars are sired by Big Special, and they are out of his best large-type sows. This boar, Big Special, is out of Katie Jones 2d, and she was out of that splendid brood sow, old Katie Jones. The gilts are just as good as the boars, and it will be a good place to buy a few of these. This sale will also be a good one to buy your boars as you can buy them at reasonable prices, inasmuch as this is his first public sale. Write for

the McDowell catalog and then go to the sale. Mention The Hometsead when writing for it. His advertisement appears on page 31.

Watchmakers in Demand.

To our readers who are interested in learning the watchmaker's trade we desire to call their attention to the advertisement of Stone's School of Watchmaking, 910 Globe Building, St. Paul, Minn., which appears on page 22 of this issue. This school promises positions to graduates. We suggest that our readers look up the advertisement and write for full information.

Lawler's Immune Poland Chinas.

Jas. Lawler, whose advertisement appears on page 30 has for sale a well-bred lot of Poland China boars, eight of which are of fall farrow and forty-two spring pigs. These carry strong infusions of the blood of the Miller and Mouw herds. Ther are the strictly big-type sorts, have size to back it up and quality enough to attract those who want good looks. For prices or additional information write to James Lawler, Clare, Iowa.

C. W. Hutchins Sale Called Off.

Owing to an outbreak of disease in his herd, C. W. Hutchins, Weeping Water, Neb., has called his sale off. His sale was billed for Oct. 27th, but will be postponed for some time. The herd has been vaccinated with the double serum treatment and if they come through all right, a sale will probably be held about the middle of November. Further announcements will appear in an early issue of The Homestead. This sale was of Poland Chinas.

C. H. Harper Buys a New Boar.

C. H. Harper, Benkleman, Neb., advises us that he has recently purchased a choice Poland China boar from the Thos. F. Miller herd at York. Mr. Harper maintains a good herd and is very careful in making selections of his breeding stock. The boar purchased is sired by Mouw's Black Orange, a boar that has few equals in the state today. This boar should make a valuable addition to Mr. Harper's good herd, and we feel sure that he will.

Duroc Jersey Boars.

Warren Hughes, Littleport, Iowa, is advertising March and April Duroc Jersey boars for sale, that are sired by Protection Medium by Chief Protection and Model Select by Chief Select. The dams are sired by Muncie Col. 2d, Sedmere Crimson Wonder and Dairy's Chief. Mr. Hughes will offer a few red gilts later on that will be bred to Gayno Again, 140963. Write your wants to Mr. Hughes, kindly mentioning The Homestead. See page 32.

Farming Without Horses.

This is what the corn-belt farmer will eventually do. The farm tractor will in time handle the work for which horses are now being used. In fact the tractor is taking the place of horses to a much larger degree every year. It can do the work of a number of horses, and is untiring regardless of the length of the day. It is also unmindful of heat and cold. On page 11 of this week's issue will be found an advertisement of the Waterloo Gasoline Engine Company, 179 W. 3d Ave., Waterloo, Iowa. They also manufacture smaller gasoline engines and cream separators. We would suggest that our readers look up the advertisement and write for further information to the address given.

Sanitary Barn Equipment.

New improvements are being brought out every year which save labor for the farmer. One which is meeting with a great deal of favorable comment is the James 2-in-1 Carrier, manufactured by the James Manufacturing Company, AU-98 Cane Street, Ft. Atkinson, Wis. A large advertisement for this concern appears on page 9 of this week's issue. They say of it: "This carrier has all the advantages of the rod track outside the barn. Stand at the barn door, give the carrier a shove, the carrier runs out, dumps at the desired point and returns automatically to the barn." This concern also manufactures stalls, stanchions, pens and barn ventilators. We suggest that our readers look up the advertisement and write for catalog.

C. W. Phillips' Poland China Sale.

C. W. Phillips, New Sharon, Iowa, has one of the best herds of big-type Poland Chinas to be found. On November 4th Mr. Phillips will sell at public auction thirty-five boars and five fall yearling sows. Five of the boars are fall yearlings and the balance spring pigs. Four of the fall yearlings are sired by Fesenmeyer's A Wonder, one of the most noted boars of the breed and out of a Mammoth King dam. Three of these boars are big, long, heavy-boned, smooth fellows and a breeder who wants a well-bred boar and a good boar cannot go wrong in attending this sale and buying one of these A Wonder boars or sending a bid on one. There is also a good fall yearling sired by the noted Big Orange and out of a dam by Big Sensation. Among the thirty spring boars is one sired by Long King Superior, Mr. Phillips' sensational two-year-old son of Long King and out of a dam by Guy's Prospect. This pig is an extra long, heavy-boned, good footed, smooth fellow and will make someone a great herd boar if properly developed. Some breeder who wants to develop his own herd boar should look after this pig. There are other good ones by Long King Superior, P's I. X. L. and a number by A. Wonder Again, Mr. Phillip's noted son of the great A Wonder. Charlie Phillips has held a number of sales and has raised a lot of good hogs, but this Homestead representative can frankly state that this is the best offering of boars Mr. Phillips has ever presented at public auction. For size, bone and quality they are a hard lot to beat. Carlos C. Palmer will attend this sale and will carefully look after any bids sent him in care of Mr. Phillips. See page 33. Mention The Homestead when writing for catalog.

The Value of a Good Sire.

The question is often asked, what is the value of a good sire? We are not trying to answer it here, but we will ask another question. What is the value of Good Knight, the Scotch Short-horn bull owned by H. H. Hess & Son, Surprise, Neb.? These gentlemen have sold all the bull calves by this sire that have dropped the past season for an average of $170, and all at less than a year old. True they have sold conservatively for the class of calves and $170 is not the world's record, but it represents easily a $100 per head net profit. We feel that Good Knight has added $50 to each calf sired by him, and he could sire forty calves a year without injuring him. It looks like his value would easily mount into the thousands; at any rate he is worth some money. Many of the bulls have gone to head the very best of herds and have been picked up right from the cows. They have been profitable for Hess & Son, and they should prove even more profitable for the new owners. These gentlemen have some Good Knight heifers that they would sell.

Blackburn's Duroc Jersey Sale.

As we have already mentioned in The Homestead a couple of weeks ago, J. R. Blackburn, Ord, Neb., will hold a sale of choice Duroc Jersey boars at his farm near Ord, on November 5th. This sale should be of more than ordinary importance, for the reason that it is made up almost entirely of the get of Crusader Col. and he was the 5th prize boar of the Nebraska State Fair this season. He was shown in a very strong class and well deserved the place that he got. Crusader Col. is sired by Proud Col., and he was champion at Sioux City a couple of years ago. Proud Col. was a litter mate to Freed's Col., the grand champion at Iowa State Fair a few years ago, and each of these boars has already sired a very fine lot of prize winners. There are some boars in this sale that look like they would be able to make a good, showing next season; in fact, if we were looking for a junior yearling prospect, we believe that this sale is where we would go to get a couple. We do not make this statement extravagantly, but with due regard for the opinion of those that might attend this sale in search of such stock. If you do not have the catalog, send for it immediately, and if unable to attend this sale, send bids to J. C. Price, representing The Homestead and your wants will be faithfully looked after. See advertisement on page 33.

Nelsons' Immune Poland Chinas at Auction.

On Friday, November 7th, S. A. Nelson & Sons will sell twenty-five strictly big-type Poland China boars. They are all immune, and every one by a noted herd boar. Several that are bred by Peter Mouw and sired by his herd boars, Chief Price and Adams Big Hal are included. Others are by Long King's Model, A Mastodon, Jumbo C., Hillcroft Giant and a few others. They are from a choice lot of sows. At the same farm and on the same day the above named gentlemen will also sell about fifty pedigreed Short-horns. A field note elsewhere in this paper, also the advertisement, tell much of the offering. Kindly send for the Poland China also the Short-horn catalog without delay, and when writing mention The Homestead. See advertisement on page 31.

Immune Duroc Boar Bargains.

J. E. Forke & Son, Malcolm, Neb., have a herd of very choice Duroc Jerseys, and they offer Homestead readers their pick of ten selected boars of their spring pig crop. These boars are all immune, and are big and well grown considering that they went through the disease about two months ago. The writer saw these boars a few days ago, and we wish to say that they are very choice, three or four really good enough for headers for the best herds. One very choice one is by Silver Chief 2d, another is by F. & S.'s Col., and still another is by Critic's Col. Another choice boar is by Uneeda Crimson Wonder and a show prospect is by Queen's Col. Mr. Forke states that he will close these boars out at farmers' prices as he wishes to dispose of them without delay. We would like to see some one looking for a good boar write these gentlemen, we are sure they would be pleased with a boar from here. Some choice gilts will be sold, and will be priced either open or bred to good boars. No need to hesitate on these Durocs, for they are good individuals, well bred and in good thrift. Order without delay, and mention The Homestead when you write. See advertisement on page 32.

E. Crabs' Durocs.

E. Crabs, Aledo, Illinois, has on hand, forty extra good Duroc Jersey boars of spring farrow for sale. They are the best lot of boars he has ever had on the farm and every buyer that visits his herd makes a purchase which speaks well for the quality of Mr. Crabs' Duroc Jerseys. He has a two-year-old son of Orion Chief that he purchased of Thos. Johnson & Son, that he will price for the next twenty days at $100. He is a well-built boar weighing around 600 pounds and has proven an extra breeder. Mr. Crabs has used this boar extensively in his herd and can show a large number of good pigs sired by him, which is his reason for disposing of the boar. This boar's dam is sired by Col. Gladness, a full brother to Prince of Cols. See page 37 and write Mr. Crabs your wants, mentioning The Homestead.

Immune Duroc Boars On Approval.

With this issue of The Homestead, F. C. Crocker, Filley, Neb., one of the best known swine raisers in the corn belt is starting an advertisement in which he offers the readers of The Homestead their choice of about 100 spring Duroc Jersey boars. These boars have all been given the double serum treatment and will be sent on approval to readers of this paper without a cent of money down. Mr. Crocker raises good hogs, the best that his long experience and sound judgment will enable him to produce and he sells these good hogs at a price that will please those that buy, hence he is not afraid to ship these boars to readers of The Homestead without a cent of money down. His plan is unique, but nevertheless, it is straight business. He raises hogs to sell, and he raises lots of them, maintaining right now and for several years past the largest herd of purebreds in Nebraska. They are grown in the best possible manner, and all that can be saved in the way of production is given to the buyer. Mr. Crocker must have a profit for growing them, and they would make him that on the market, but he wishes to sell the best of his crop as breeding stock, for the stockmen need them, and Mr. Crocker is in shape to supply that need. Sons of the most noted boars in use in the country are offered, in fact Mr. Crocker has always maintained the best lot of herd boars that money would secure, and their progeny are the sort offered. Kindly mention The Homestead and write at once for one of these selected boars. They should find homes mighty speedily, and they will. It will be good business judgment to order at once. Kindly mention The Homestead when you write.

Walter Johnson's Polled Durhams.

A good breeder of Polled Durham cattle is Walter Johnson, Dorchester, Neb., and he now has for sale a few very choice young bulls. This stock is well bred and comes of such pedigree that most breeders could use it in their herds. These bulls that are now offered are nice and thrifty, well grown and of the blocky order. Mr. Johnson is a practical farmer and stockman, and believes in growing all stock in a good manner, but pampers nothing. Hence, these bulls will go out and do good service in the average breeder's hands or may be carried to any state of fitting that the new owner would wish. When writing for prices, kindly mention The Homestead.

McCurdy's Giant Poland Chinas.

Wm. McCurdy, Tobias, Neb., owner of the Maple Grove Stock Farm, is naming special prices on a lot of his giant Poland China boars. Mr. McCurdy has a really good herd of Polands, one of the good herds of the southern part of the state, and as the corn crop is light in his section he is offering Homestead readers some distinct bargains in these giant boars. Nothing short of the very best has ever been good enough for him to put into his herd. He has bought a number from the herd of Walker & Sons, of Alexandria, Neb., and he always buys the tops. He is now pricing these spring boars at real farmers' prices and some of them are really choice. Kindly mention The Homestead and write him without delay. See advertisement on page 32.

Some Choice Boars at Special Prices.

W. J. Eavey, Geneva, Neb., is offering some very choice Poland China boars at prices that should move them at once. Mr. Eavey raised the biggest and best lot of Poland China boars this season that he has ever raised. He has culled the bunch close and still has about thirty that are mighty fine. These boars should go to good herds of pure breds, but at the prices asked, no farmer can afford to use a grade. They will soon be worth on the market the prices asked for them and we would urge Homestead readers to order them immediately. There are still a lot of good ones left, and they are nearly all by the great breeding boar, Blue Ribbon Hastings and he is by a son of Jumbo Jr., the noted boar in the Albert Smith & Sons herd. Write about these boars without delay. See page 39.

White-Agan Poland China Sale.

On November 1st, at Malvern, Iowa, Geo. H. White, of Malvern, and W. E. Agan, of Silver City, will sell forty head of Poland China boars and sows and they are selling some splendid things in this sale. Mr. White is selling his splendid herd boar, Big Mastodon, in the sale and he is a boar that has done excellent service in his herd. He is a son of B's Mastodon, that did such excellent service in the W. H. Barr herd, and he is out of a dam by Pawnee Look. Most of the boars and the gilts that Mr. White will sell in this sale will be sired by this boar, while most of the boars and gilts that Mr. Agan will sell will be sired by Victor Lad, a son of the noted big Victor. This boar has been used with the best of success in his herd and you will like his breeding when you see the boars and the sows that he is selling in this sale. There are some very good February and March litters in this sale that have plenty of size, and ample bone, and you can very easily find some good herd-boar material among them. Write G. H. White, Malvern, Iowa, or W. E.

Worms Will Get Your Hogs If You Don't Let Me Kill The Worms

Fully nine-tenths of all hog losses are caused by worms. These parasites sap the very life blood of your hogs, rob them of nourishment, and so weaken them that they are easy victims of cholera or any other swine disease. Get your hogs worm-free and keep their digestive organs in proper working order and they will be **Cholera proof.**

I'll Rid Your Hogs of Worms!

Feed **Columbian Stock Powders** to your hogs and inside of 12 hours you will **see** the dead worms that have been expelled. These powders are not a food but a highly efficient **medicated** preparation that not only **kills** but also **expels** all worms. These are the **original** Stock Powders. They have been on the market for the past 25 years and all that time they have been recognized as **best** by the largest, most progressive stock raisers of the country. They will put a speedy end to all digestive troubles in hogs, sharpen the appetite—keep the animals on their feed—so strengthen the digestive system that there is absolutely no waste of food—greatly shorten the fattening period with 25 per cent less feed.

BEST FOR BROOD SOWS Feed **Columbian Stock Powders** to your brood sows and see the strong thrifty litters they farrow. Keeps the sows in finest condition, strong, healthy, free from fever and insures an abundant flow of pure milk.

"Hogs Dying By Hundreds—COLUMBIAN Saved Ours"

"Please ship F. W. Diehl at Shannon, Ill., 500 lbs. Columbian Stock Powders in 250-lb. lots; and Geo. Diehl, Milledgeville, Ill., 300 lbs. in 100-lb. lots. Please RUSH the above orders as the hog cholera is something fierce all over the neighborhood. Hogs are sick and dying by hundreds. Ours were sick but Columbian saved them.
Yours truly, DIEHL BROS., Milledgeville, Ill.

90 Days Use Before You Pay a Cent

I don't want you to pay me a cent until I positively prove to you that **Columbian Stock Powders** are the quickest, surest and biggest profit makers you ever tried. Just mail coupon, stating how many hogs you are feeding and I'll make a free trial offer that gives you 90 days' feeding before paying a cent.

Columbian Self Feeder FREE!

Regular price is $5; but if you will write or mail the coupon at once, I will tell you how to get one **FREE.**

Free Book Most interesting and instructive book on stock raising ever published. Finely illustrated. Write for your free copy.

NEXT WEEK'S SALE PROGRAM

Monday, Oct. 27	Duroc Jerseys, J. P. Peterson, Herman, Neb.
Tuesday, Oct. 28	Poland Chinas, O. J. McCullough, Central City, Neb.
Wednesday, Oct. 29	Duroc Jerseys, Economy Stock Farm, Shenandoah, Ia.
Thursday, October 30	Percheron Horses, A. G. Thurman, Blanchard, Iowa. Shire Horses, A. G. Thurman, Blanchard, Iowa. Short-horns, A. G. Thurman, Blanchard, Iowa.
Saturday, November 1	Poland Chinas, Geo. H. White and W. E. Agan, Malvern, Iowa. Poland Chinas, E. E. McDowell, Chariton, Iowa.

Agan, Silver City, Iowa, for a copy of their catalog and mention The Homestead. Then make it a point to attend their sale. See this page.

Quire's Hampshire Swine.

F. T. Quire, Sully, Iowa, is advertising some extra good Hampshire boars for sale on page 32. They are spring pigs weighing from 160 to 175 pounds and are of the same blood lines as his silver cup winners at the Iowa State Fair in 1912. All have received the double treatment and are immune from cholera. These pigs are in nice condition, well belted and are guaranteed breeders. If you want a good Hampshire boar, write Mr. Quire mentioning The Homestead. He is pricing these pigs at $25 each.

Economy Stock Farm Sale.

One of the Duroc-Jersey sales that is attracting the attention of the breeders throughout the West at the present time is that of the Economy Stock Farm, which will be held at Shenandoah, Iowa, on October 29th. There are several reasons why this sale is one that you should attend. First and foremost, they will sell five of their very best sows in this sale that will be sold with a breeding privilege to Big Wonder, their noted senior and grand champion boar at the Iowa State Fair this fall. This should be attraction enough for one sale but that is not all they have in their sale by any means. They are selling their splendid herd boar Highland Chief, and he is one of the great breeding boars today of this breed. He is a son of the great Helen's Chief and he has been used with the best of success in this herd. Another good boar they are selling is Top Col., and he is one of the most intensely bred Col. boars that will be found in the West. They are selling some unusually good fall boars in this sale that are sired by Highland Chief, and mostly any one of these will be good enough to head any of our good herds. These fall boars are out of daughters of Defender, Golden Col., King Pal's Last, Harding's King of Cols., H. R.'s Top Col., and other noted boars. A couple of these are sired by Captain Gano, a son of old Col. Gano. Some splendid spring boars in this sale will be sire by Chief's Col., and a few by the other boars. Among the good sows they are selling that will be offered with a breeding privilege to Big Wonder are daughters of King The Col., Col. Gano, Defender King and Highland Chief. One of these is the 3d prize Highland Chief sow they showed at Des Moines and she is a good one. In fact there are many things in this sale that will make it worthy of the attention of the Duroc-Jersey breeders. Write for their catalog at once and kindly mention The Homestead. Bids sent to M. T. White, Homestead representative, in care of the above firm will be attended to on day of sale. See page 37.

Isaac's Big-type Duroc Sale.

One of the great sales of large-type Duroc Jerseys that is going to attract attention this week will be that of T. H. & J. D. Isaac, at Red Oak, Iowa, on Saturday, October 25th. These are the men that are the original big-type Duroc-Jersey breeders of the West and they are certainly breeding them big. They not only breed them large but they grow them large and they are selling eighty-five head of the largest boars and gilts that you will see this year. These are sired by Jim's Mogul, Great Crimson, Chief's Crimson, Big Crimson, Jumbo Critic, Climax 3d and a number of other big boars that have been making a reputation along big-type lines. This sale will be held in town at Red Oak, Iowa, on Saturday, October 25th, and if you want a large Duroc Jersey boar make it a point to attend their sale.

Choice Oxford Ewes for Sale.

Geo. W. Damrow, Lincoln, Neb., is offering Homestead readers some excellent Oxford ewes, many of them of the best prize-winning blood and all of excellent conformation. They are being bred to one of the best Oxford rams in the entire West. He was imported by one of the best judges of sheep in this country and was sold to Mr. Damrow for a long price, probably as good as has been paid in the West for an Oxford in some time. Ewes bred to this kind of a ram should be mighty valuable, and those that feel like starting a flock for their farms should write Mr. Damrow immediately, and by securing a pair or more of these bred ewes a good herd can be founded and without a large outlay of money. Do not overlook this opportunity, but write without delay and mention The Homestead when doing so. See advertisement on page 29.

Fain's Immune Duroc Boars.

In a recent letter from H. S. Fain, Emmetsburg, Iowa, he says: "I wish you would say to Homestead readers that I have vaccinated my entire herd with the double treatment and to satisfy myself I have distributed several boars on farms where they had the cholera and they came through all right and lived right through it. I have decided to sell my fall and spring boars on the following terms: I will guarantee every hog to live thirty days from date, it matters not whether they have the cholera where he goes or not, and if the hog dies within the thirty days I will refund the money. If any of The Homestead readers want to look up my guarantee all they have to do is to write the Emmetsburg National Bank. My spring boars will weigh 200 and my fall boars 400 pounds. Now if your readers want to do business and they want boars with a guarantee behind them that does guarantee then let them write me and send an order for one of these boars. See advertisement on page 37.

Funke Offers His Herd of Scotch Shorthorns.

One of the greatest opportunities we know of to buy a really high-class herd of Scotch Short-horns is offered by Henry Funke, Greenfield, Iowa, on page 30. This is one of the very best herds we know of in the state, and the entire lot are Scotch cattle and of the very best breeding. Mr. Funke has sold his farm and must sell these cattle, otherwise they would never be sold. There are twenty-four head in the herd, among which is one herd bull purchased from George Burge, eleven choice cows, three yearling heifers, nine calves and two cows that are right at their calving. The herd bull is Excelsior 370180, and he is a son of Choice Sultan and out of a dam by Hopeful Knight, his granddam being the noted show bull, Money Musk. He is a yearling and a good bull and will be sold with the rest of the cattle. Among the females are four Lavenders, six Violet Buds, one Princess Royal, one Gwendoline and one Aurora. Included will be the great cow Lavender Bud, a cow that he bought at the C. C. Norton sale at $625. She is a daughter of the noted bull Banker's Victor and is out of a daughter by Imp. Calamis. She is regarded as being one of the very best Lavender cows today in the West. Her three-year-old heifer and a yearling heifer is also in the herd and she also has a good bull calf at foot. Another good cow is Honeysuckle 3d, a daughter of Cumberland Chief that headed the Norton herd and her dam is Imp. Honeycomb 5th, one of the greatest cows that C. C. Norton ever owned. She has a good heifer calf at foot and she is rebred. Queen Gloster is a richly-bred Duchess of Gloster cow and she has a heifer calf at foot and she is rebred. She also has a yearling heifer in the herd. Gay Princess is a Princess Royal and she is the dam of one of the best bulls he raised this year. There are a number of other splendid cows and heifers in the herd that are bred along the very same lines and we will say to the man that wants to get hold of a select herd of Scotch Shorthorns that here is one of the best opportunities that we know of. This herd was started without regard to expense and the very best cattle secured. Not a poor one in the herd. It is the only instance we know of where such a richly bred herd can be secured at private treaty. Write Henry Funke, Greenfield, Iowa, about these cattle at once and if you are interested it will pay you to go immediately and see him. When writing him kindly mention The Homestead.

Cockerton's Big-Type Boars.

On page 32 James Cockerton, Whiting, Iowa, starts his big-type Poland China boar advertisement and he is offering twenty head of large, stretchy, big-boned, spring boars for sale. These are sired by Orange Jumbo and Cloverdale Wonder, and they are out of his largest and his best sows. He also offers a splendid spring yearling boar for sale that is a son of Big Wonder, a son of Smooth Wonder 2d, and his dam is a daughter of old Long Chief. Mr. Cockerton says this boar will easily make a 1,000-pound boar and the first check for $60 gets him. The Poland China breeder who is looking for a good herd boar should get busy and buy this boar before it is too late. The younger boars he is pricing at $30 to $40 and they are splendid bargains at those figures. Write Mr. Cockerton at once about these boars and mention The Homestead.

Closing Out Milking Short-horns.

On November 20th, A. H. Metier, Weldon, Iowa, will make a closing-out sale of forty-five head of Bates-bred Short-horns, of the best known milking strains. The Metier herd is one of the oldest herds in the state of Iowa and for over thirty years has been bred in the blood of the original Bates strains, known as the most famous of all the milking Short-horns. Included in this sale will be four head of Oxford Duchesses and a number of richly-bred Waterloos. These are strictly pure Bates cattle, and belong to the famous Oxfords and Waterloos, that in early times were the highest priced cattle known to this great breed. Mr. Metier is also listing twenty head of Golden Pippins, or more familiarly known as Julia Wards. This particular strain has been in the Metier herd since its foundation by the elder Mr. Metier some thirty-five or forty years ago and they have been among the best cattle they have ever bred. There will be some splendid young heifers in this sale that are unusually choice. He is also selling his splendid herd bull, Arabella's Crescent Knight, a richly-bred Scotch bull, and a most excellent breeder. He is a roan in color and is a son of Imp. Crescent Knight, a bull formerly used by the Cargills, of Canada, and later by R. O. Metier, of Lucas, Iowa. This is a splendid bull, and when you see the young heifers and young bulls that are sired by him in this sale, you will admit of his great worth as a breeding bull. Drop Mr. Metier a card and ask him to place your name on his list for a catalog and when writing him kindly mention The Homestead.

Hollingshead's Great Sale.

On November 11th, at Chariton, Iowa, R. C. Hollingshead, of Russell, Iowa, will make a public sale of sixty head of large-type Poland Chinas, and he will offer one of the greatest bunches of Poland Chinas that have gone through a sale ring this fall. We have passed upon many of the different offerings this year, but we want to say to readers of this paper that you will see one of the best offerings in this sale that you have had the opportunity of passing on this season. There will be sixteen head of spring and thirteen head of fall boars in this sale and they are sire by two boars, Big Combination, and Valley Chief. There will be thirty-one head of fall and spring sows in this sale and they will be sired by the same boars. Of the thirteen fall boars that he will sell in this sale, we will say they are the largest we have seen in our travels this fall. To those breeders and those farmers who are wanting size they will certainly get it in this bunch of boars. When it comes to length and bone, you will all have to take off your hats to them. They will be out of daughters of Wide Valley, Chief Girl, Nebraska Girl, Iowa Girl 2d, Big Sarah, Wonder Girl and Our Standard, sows that will hold their own in any herd and as large as any sows to be found today in the state or the West. He is selling some corking good spring boars in this sale and among these are some of the best we have seen. Among these is a February boar by Big Combination and out of the large sow. Wide Valley, that is about as good as you will see this fall. We have seen boars that have sold for a lot of money this fall that were not near as good as this pig and he is going to make some breeder a good herd boar. Another good February boar is sired by Valley Chief and he is out of Iowa Girl 2d. There are six head of these boars in the sale and they are all good, and if a man cannot find a herd boar among this bunch he will be hard to please. Just a word about the fall sows and the spring gilts that he is selling in this sale. They are certainly as good as we have seen and it will be one of the best places we know of to buy sows that will make great herd sows. These sows are in excellent shape, are well grown out and are right to go on and make great brood sows. In fact, this offering is one that will surprise you and if you have not bought your boar as yet, or,

Makes Lame Horses Sound

Cures All Kinds of Lameness, Quickly, Positively, Permanently.

Mack's $1,000 Spavin Remedy is absolutely guaranteed to cure Bone or Bog Spavin, Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Lacerated and Ruptured Tendons, Sweeny and all other forms of lameness affecting a horse, or your

money back in a jiffy. It's a powerful remedy that goes right to the bottom of the trouble and cures the lameness in just a few days, and the animal may be worked as usual. Contains nothing that can injure the horse and heals without leaving scar, blemish or loss of hair.

Ask your druggist for Mack's $1,000 Spavin Remedy—if he cannot supply you, write direct to us. Ask for our valuable Free Book, "Horse Sense" No. 8.

If you are not positive as to the cause of your horse's lameness, mark on horse above where lameness occurs and tell us how it affects his gait, also tell age of animal. Our graduate veterinarian will diagnose the trouble and tell you how to cure it. This service is free.

Price $5.00 per bottle and worth it.

BREEDERS' HIGH-CLASS

ABERDEEN ANGUS

AT AUCTION

UNION STOCK YARDS PAVILION SOUTH OMAHA, NEBRASKA,

TUESDAY, NOVEMBER 4, 1913

60 HEAD, consisting of 20 bulls and 40 cows and heifers, all females safely settled in calf or with calves at foot. They are of the most fashionable families, Blackbird, Trojan Erica, Pride of Aberdeen, Queen Mother and other popular families. There has probably been no sale this year that will show more bulls of the high-class, herd-heading kind than this sale. They are bred in the purple and their individuality is such that they will please. Whoever is in the market for a top-notcher Aberdeen Angus bull should attend this sale. This lot of bulls are right from every viewpoint. They are from 12 to 24 months old, have extraordinary scale, with plenty of quality, low-down, blocky chunks, the popular type. Every one will sire the market topper steer. The cows and heifers cataloged for this sale are the very tops of S. Melvin's herd. Every one of them was bred by him. They are splendid individuals and in excellent condition to breed on and make money rapidly. They are sired by the very best bulls the breed has ever produced. They are teeming with the best and highest priced blood that is known to the breed. Everyone who is in the market for good cattle will be pleased with this offering if they will only come out sale day and examine them. Send for a catalog. Mention The Homestead and address

BIG-TYPE POLAND CHINAS

Malvern, Iowa, Nov. 1, '13

40 HEAD. BOARS AND SOWS 40

WE are selling 40 head of splendid boars and sows in this sale that are sired by **Big Mastodon,** a son of B.'s Mastodon, and **Victor Lad,** a son of Big Victor. If you want a good, big, stretchy boar or a few good sows, then come to our sale. We are also selling the splendid herd boar, **Big Mastodon,** that will be a bargain for somebody. Write for our catalog and be with us on sale day. Colonel Talbott, Auctioneer. Address

GEO. H. WHITE, Emerson, Ia. W. E. AGAN, Silver City, Iowa

if you want some really choice sows, here will be a most excellent place to buy them. Write Mr. Hollingshead at Russell, Iowa, for a copy of his catalog and then remember that the sale will be held at Charlton, Iowa, on November 11th. Bids sent to M. T. White of The Homestead in care of Mr. Hollingshead will be attended to on day of sale. When writing for catalog kindly mention The Homestead and above all things make it a point to attend this sale if you possibly can. See advertisement on page 30.

Deigan's Immune Poland Boars.

We wish to call special attention to the fact that the Poland China boars that are being offered by W. H. Deigan, Raymond, Neb., are immune, having been given the double serum treatment early in the fall, and are now in the finest sort of shape. Mr. Deigan is the man that bred Sampson, the boar that was used with such success in the Shattuck herd at Hastings, Neb. Mr. Deigan kept Herod, and has used Herod 2d and many of the pigs are by him. This stuff is extra heavy boned and good footed. A couple of litters of pigs bred by Peter Mouw are also on the farm, and they are the making of big hogs too, but some of these other boars are headers for the very best herds in the country. We believe that Homestead readers looking for the very best will find what they want here. Kindly mention The Homestead, and write at once. These hogs are worth looking after. See page 32.

Miller's Poland China Boars.

Probably no herd in the country has been more persistently bred for size than has the herd owned by Thos. F. Miller, York, Neb., and right now choice boars, bred for size and that have size and a lot of it are for sale. They have also been immuned with the double serum treatment and are guaranteed to please. The writer is familiar with this herd and we do not hesitate to recommend these boars. Leading breeders of the country have already purchased herd headers from here, and got good selections, but many good judges would have selected others than those taken, as there are so many good ones. Mr. Miller has two really great herd boars on his farm and the most of these boars are sired by them. One is a son of Long Chief 2d and the other is Mouw's Black Orange. This latter boar we believe is as good as we ever saw from the noted Mouw herd. When we first saw him last spring we thought that he was very near the perfect big Poland China. Write Mr. Miller for prices on this stock immediately, and when doing so kindly mention The Homestead.

Peterson's Immune Duroc Sale.

One of the Duroc-Jersey sales that will attract attention this fall will be that of J. P. Peterson, at Herman, Neb., on October 27th. It will be particularly attractive because the entire offering has been vaccinated and will therefore be immune, and this is something that is going to attract many of the farmers and breeders throughout the West. Pete is selling some choice things in this sale and it is possibly the very best offering he has ever sold since he engaged in the business. He is selling ten splendid fall and twenty spring boars and among these are some that will do to head our best herds. In fact he is selling some of the best pigs that have been listed in a western sale this fall. He is selling some good sows with litters at side and some very excellent spring gilts. We called particular attention to his offspring in last week's Homestead and we now want you to write for his catalog and then be sure to attend his sale. M. T. White will represent The Homestead at the Peterson sale and if you are going to want an immune boar send him a bid and he will take care of your interests on day of sale.

Briggs & Sons Immune Duroc Boars.

With this issue of The Homestead, Geo. Briggs & Sons, Clay Center, Neb., are starting an advertisement in which they offer readers of this paper an opportunity to get an extra choice Duroc Jersey boar, of as good breeding as is possible to find, from one of the best and oldest established herds in the entire country and cholera immune with the double serum treatment, also at a price that one can really afford. These gentlemen maintain one of the largest herds in the entire country, and they practice culling their stock closely, as they need a lot of feeding hogs anyway, and for this reason, none but the very best are offered for sale as breeding stock. The writer is thoroughly familiar with this herd, and we want to say that one of the best herds of sows of which we know is on this farm, and the herd boars are also of exceptionally high merit. The herd boars include Lincoln Wonder a son of Ohio Chief and out of a daughter of Crimson Wonder. Another boar is Crimson Wonder 4th and he was the first prize junior yearling boar at Lincoln either in 1910 or 1911. He was sold to these gentlemen in Mr. Widle's sale that fall for $350, the highest price paid in the state that season. This boar is a good breeder and a remarkable individual Another boar is Cleatham's Pride. He is by Crimson Wonder 3d and out of the great producing sow, Model D. 2d. This boar is an extra good sire and was second at Lincoln one year and 3d another year. Sill another boar is Queen's Crimson by Crimson Wonder Again. Queen's Crimson is a litter mate to Crimson of Crimson Wonder owned by H. Wernimont, and they are really two excellent boars, regarded as such by all the best breeders and judges, yet neither of them has ever been able to win what was justly due them in the show rings. Still another boar, one of the best that George has ever bred is Belle Wonder. He is the sire of some of the boars now being offered. We want Homestead readers to consider the stock offered by Briggs & Sons, and write them if interested. Mention The Homestead. See page 32.

Watson, Woods Bros. & Kelley's New Horses.

A few days ago Mr. Kelley, of the firm of Watson, Woods Bros. & Kelley, arrived at the company's barns at Lincoln, Neb., with one of the best shipments of horses that these gentlemen have brought over in recent years. These horses were all personally selected by Mr. Kelley, a past master, when it comes to picking the good ones. The shipment is made up of Shires, Percherons and Belgians. They are of the very highest order and all arrived in good shape. These gentlemen will name close prices on this stock to move them quickly and we would suggest that Homestead readers make a selection from this shipment as early as possible, for to do so will be to effect a substantial saving. This firm has a reputation for good horses that is world wide, and the fact that a stallion has been purchased from this firm will aid the stallioner to secure business next season. Kindly write these gentlemen without delay, and when doing so be sure to mention The Homestead. Address Watson, Woods Bros. & Kelley, Lincoln, Neb.

S. W. Swanson's Duroc Sale.

On November 5th, S. W. Swanson, Stanton, Iowa, will make his annual public sale of fifty head of fall and spring Duroc-Jersey boars, and he is holding this sale at Red Oak, Iowa, where railroad connections will be better. Mr. Swanson is one of the oldest breeders in southern Iowa and in his time he has bought some of the very best things that have been offered in the best public sales. He is selling possibly the best lot of boars that he has ever sold since he has been making public sales and the breeding that he will offer is the very best. There will be fourteen head of fall boars in this sale and they will be sired by Low Col., King Willetta and Model King, the latter being the greatest son of Hogate's Model, and he has ben in service in this herd for a number of years. The spring boars will be sired by such noted boars as Cherry Chief and the grand champion boar Crimson Wonder Again, as well as a number by other good boars. He is selling three good boars in this sale that are sired by Crimson Wonder Again and are out of a Proud Col. sow. He will also sell two good boars that are sired by the great boar, Cherry Chief, and these are also out of a Proud Col. sow. He is selling some very excellent boars at this sale that are sired by Model King and other boars. It will be a good place to buy your boar and the time will be right to get them. Write S. W. Swanson, Stanton, Iowa, for a copy of his catalog and kindly remember the sale will be held at Red Oak. Kindly mention The Homestead when writing for catalog. See page 33.

L. B. Williams & Sons' Sale.

One of the large-type breeders of Poland Chinas that always comes back is the firm of L. B. Williams & Sons, Villisca, Iowa, who make a fall sale at Sciola, Iowa, on November 6th. This herd has been one of the old and original large-typed Poland China herds in southern Iowa and for the past twenty years they have been breeding this kind of Poland Chinas. When many of the others were breeding the little fellows the Williamses were breeding the larger type of Polands and they have lived long enough to see the most of the breeders come their way. They are going to offer fifty head in their coming sale and they will have a nice offering that the breeders will appreciate. They had a good bunch of boars last year, but we think they will sell a better bunch this time. There will be thirty-five head of these in the sale, among which will be twenty-five spring and ten fall boars, and six fall sows and eight gilts. The spring boars are sired by W's Quality, a son of the great Blue Valley Quality; Orphan Wonder, a son of The Big Orphan; Big Tom Jr., a son of the prize-winning boar, Big Tom; and a few by Big Orient. The fall boars are sired by W's Quality, Orphan Wonder and their old boar Surprise All. The sows that they are selling are sired by W's Quality, Orphan Wonder and one good tried sow, a daughter of the well-known boar Big Wonder. There will be two large fall boars in the sale of Orphan Wonder, and these are out of the Big Wonder sow that will be sold in the sale. These will make splendid herd boars and should be sought after by some man wanting a herd boar. Nos. 1, 2 and 3 are good spring boars and they are sired by W's Quality and are out of a sow called Rosalind by Victor Hadley and he was by the well-known King's Hadley. No. 4 is a gilt of this same litter and these are very choice. No. 5 is a February boar by the same sire and out of a daughter of old Extended Jr., that was formerly one of the best breeding boars in southern Iowa. These are good enough to go anywhere. There are two good boars and two choice spring gilts by Orphan Wonder and out of Pawnee Lass by old Pawnee Nelson that came the latter part of February and you can just put it down that these are good. Then there are two good boars by Big Tom Jr., and out of a daughter of New Tecumseh that will be worth getting your eye on when you go to the sale, and three February boars by W's Quality and out of Abbie by Big Wonder that will make choice herd boars. There are a number of other good boars in this sale that are equally as good as those we have mentioned. Six fall sows and a number of good spring gilts make up the list and it will be a sale that will interest you if you are going to be on the market for some large-type Poland China boars or sows. Write for their catalog and mention The Homestead. M. T. White will represent this paper at the sale and will care for bids sent in his care. See page 33.

The Gibbs Short-horn Sale.

On November 19th C. E. Gibbs, Klemme, Iowa, will make a public sale of fifty head of Scotch and Scotch-topped Short-horns, and it will be one of the best offerings that will be sold in northern Iowa this fall. There will be thirty-four cows and heifers and sixteen head of bulls. Among these bulls will be the splendid Scotch bull Pride Goods, a son of the great Merry Goods. This is a pure white bull and he is a richly-bred Cruickshank Secret. He is just such a bull as should attract the attention of the best breeders who are going to want a bull to place at the head of their herd. He will also sell a number of splendid young bulls in this sale that will meet favor with those who are going to want a bull this fall. Drop Mr. Gibbs a postal card and have him place your name on his mailing list for catalog and when writing him kindly mention The Homestead.

The Bushnell Horse Show.

The sixth annual horse show at Bushnell, Ill., October 16th and 17th, ran afoul of the weather man, who pulled his worst brand for the first day, but did better for the closing day of the show, and contented himself with producing a raw, cold wind, but without the added discomfort of the rain that prevailed on the opening day. The first day's attendance was small, but fully ten thousand people faced the discomforts of the second day, and were well repaid, for the show was the best that has yet been staged at Bushnell. The entry list numbered nearly 700 head of horses, includinig not only the usual strong local displays, but the entries of a number of horsemen from a distance as well. No horse show of the character of the Bushnell exhibit can in any way approach it, either in magnitude of display of equine stock or in amount of prize money and number of silver plates and cups, the latter being contributed by both English and American enthusiasts. It has burst the boundaries of the local horse show class, and becomes a state-wide proposition. At no show given within the borders of Illinois, with the exception of the International Live Stock Exposition and the Illinois State Fair, is so good a horse show seen, and in many respects the Bushnell exhibition outclasses the state fair. To J. H. Truman, manager of the Pioneer Stud Farm, more than to any other one man, is due the success of this enterprise. He has been ably seconded all through by the business men of Bushnell, who have contributed liberally of their time and money to make the affair what it has become, the biggest thing of the kind in the country. Not only was every class well filled this year, but there was a noticeable improvement in the quality of the animals shown, strong evidence that the show is having a most excellent effect on the farmers of western Illinois, and causing them to each year produce a better class of stock. The rivalry is of the keenest sort, and ribbons of the Bushnell show are as eagerly sought after as are those of the larger shows, and the fact that many winners at this show have gone on to honors at the International will give some idea of the class of horses exhibited, especially when one takes into consideration the fact that all importers are barred from showing at Bushnell. There is nothing of a commercial feature connected with the Bushnell show, No entry fees are charged, and the show is given on the streets of the town, so there is no admission fees of any nature. Each year has shown a marked advancement in the show. The displays have been larger, the quality of the animals better and the range of territory from which exhibitors have been drawn has widened each year, until this year when horses were present from all

H. O. Williamson's Great Offering

sections of Illinois, and only the bad weather prevented the attendance of what would probably have been the largest crowds that ever attended an exhibition of this nature. The judges at this year's show were Edwin Hobson, Clifton, Ill., for the heavy horses, and Walter Palmer, Ottawa, Ill., for the light horses.

Closing Out Short-horns, Shires and Percherons.

On October 30th, at Blanchard, Iowa, A. G. Thurman will make a closing out sale of his entire herds of Scotch and Scotch topped Short-horns, Shires and Percherons, and it promises to be one of the most important sales held in southwestern Iowa this fall. The Thurman herds of Short-horns and Shires have been the best in that part of the state, and he is going to offer some great bargains in this sale. He is selling one Shire stallion named Keota Teddy, a twelve-year-old horse, but a good one. He has been a constant winner at many of the fairs and has been a most excellent breeder. Mr. Thurman is selling a splendid lot of mares in this sale, among which are two imported mares, and two others that are out of imported sires and dams. There will be seven head of Shire mares and fillies in the sale, and some of these are of the very best. Among the good things will be Bonny Royal, a two-year-old Shire filly that is a corking good one. She is a gray in color, and was sired by Nuneham Harold, a winner of second prize at the London show and five or six championships in England. His sire was Buscott Harold, a three times championship winner in England. This is a most excellent young mare, is safe in foal, and will make a great brood mare. One of the great imported mares is Rose, a four year old sired by Bertha's Boy, a noted winner in England and sold for $3,000 as a two year old. She is a very large, gray mare, a good breeder and is safe in foal. Another good imported mare is Beecher's Flower, a seven year old sired by Calwich Blend, a noted stud that stood at the head of the King's herd. A number of other choice mares of similar breeding will be sold and these have all been used on the farm. Among these are some choice young mares. He is also selling one two-year-old Percheron stallion and a right good one, and one three-year-old Percheron mare. He will sell twenty-eight head of Scotch and Scotch-topped Short-horns and here will be a splendid opportunity to buy some good cattle. There will be about ten head of Scotch cattle in the sale including the herd bull, Master B. A number of good young bulls are listed and some splendid cows and heifers. The herd bull is Master B. a six-year-old son of that noted grand champion bull, Master of the Grove, one of the greatest winners that has ever been seen in an American show ring. His dam is Banker's Lovely by Imp. Banker. This bull will weigh 2,200 pounds in just breeding condition. He is a good breeding bull and belongs to that noted Cruickshank Lovely family. He is selling a most excellent young roan Scotch bull in this sale named Ramsden's Cumberland. He is nine months old and was sired by True Cumberland 2d, that splendid show and breeding bull that stands at the head of the C. F. Mitchell herd at Farragut, Iowa. His dam is Ramsden's Missie by Pride's Ramsden, his grandsire is King Gloster and then comes the noted bull, Imp Bandmaster. This bull is a Cruickshank Missie, is a richly-bred fellow and a splendid young bull. He is a nice roan in color, a sappy fellow with a good head and horn, a good back and he will make an outstanding good bull when matured. Another good young bull is Master D., a Scotch topped White Rose, and four nice, young bulls. Among the good Scotch cows is Orange Bud a two year old by the undefeated grand champion bull, Ringmaster. She sells with a calf at foot by Best of Goods, and she belongs to the Cruickshank Orange Blossom tribe. Red Rose is a three-year-old daughter of the noted show and breeding bull, Acanthus King and out of Rosemary 5th by Imp. Challenger. She is well along in calf and a nice Cruickshank Rosemary. Birdie Gloster is a seven-year-old Duchess of Gloster cow and is one of his best breeding cows. She sells with a good red calf at foot. There are thirteen breeding matrons in the sale and twelve head of young heifers and calves. Mr. Thurman is retiring from the farm and is, therefore, selling everything. If you are interested in Shire or Percheron horses or

BIG DUROC BOARS BY WILSON'S DEFENDER

I HAVE an extra good lot of big, smooth, heavy-boned boars of spring farrow sired by Wilson's Defender and Wilson's Crimson Wonder that I am selling at $25 and $30 each. These pigs weigh from 150 to 180 pounds. I have 3 yearling boars by Wilson's Defender that are good at $50 to $75. Yearling sows by Wilson's Defender and Crimson Wonder I Am; gilts by Wilson's Defender and Wilson's Crimson Wonder, bred or open. Wilson's Defender and Select Model by Golden Model at the head of my herd. All my hogs have had the **double treatment** and are immune from cholera. I guarantee satisfaction on mail orders. Mention Homestead when writing. ½ mi. N. of town. **I. J. WILSON, WEST BRANCH, IOWA**

A Select Herd of Scotch Short-horns

FOR SALE

I AM offering at private treaty my small but very select herd of Scotch Short-horns. Comprising 24 head of the most richly bred Scotch cattle here in the west. There are 11 cows, 3 yearling heifers, 9 calves and 1 herd bull. This includes 4 Lavenders, 6 Violet Buds, 1 Princess Royal, 1 Gwendoline, 1 Aurora, and 3 Duchess of Glosters. Among the great cows in my herd is Lavender Bud (cost me $25) and her two choice heifers and she also has cow calf at foot. Honeysuckle 3d by the noted Cumberland Chief and out of Imp Honeysuckle 5th, has a heifer calf at foot and rebred. A choice lot of Violet Buds and Duchess of Glosters. Have sold my farm and must dispose of the select herd. A great bargain for some man wanting to start a herd. Write me at once or come and see me. Address

50 HEAD--DISPERSION SALE OF DUROCS AND HAMPSHIRES--50 HEAD

AT THE WM. GALLOWAY FARM NOV. 5-6 '13

AT which time the 130-acre farm and herds of Holsteins and Ayrshires and complete contents will be sold. The Hampshires are all selected show and breeding sows and gilts which have been retained to make this herd famous. Great big sows, heavy bone, good backs and feet, good heads and ears and finely belted. Sale includes every animal on the farm. Rollen True, our herd boar, also goes. Here is the greatest chance in Iowa. Come and see for yourself. Every animal registered. The Durocs are all show and high-class breeding stuff which we intended founding our Duroc herd with. Two fine boars and 15 head of fine sows and gilts. If you want good stuff at your own figures come on above dates. Don't forget the Holsteins and Ayrshires.

WM. GALLOWAY - - - - - WATERLOO, IOWA

JAMES LAWLER'S IMMUNE POLAND CHINA BOARS

50 IMMUNE Poland China boars. 8 good fall boars, 42 spring boars sired by Miller's Choice 170929 bred by John Miller, and Chief Price A 173973, bred by Peter Mouw, and Giant's Equal 198449, he by Equal's Giant 184927, he by Long King's Equal 177373. Their dams include all of the best big-type breeding. They are sired by Rock Valley Chief, Expansion King Jr. 3d, Chief Price Jr., A Wonder, Big Tom and Carey's Long Wonder. Come and see them or write for prices. **James Lawler, Clare, Iowa.**

When Writing to Advertisers Please Mention The Homestead

Short-horn cattle here will be a good sale to buy them. Send for his catalog at once and kindly mention The Homestead. See page 32.

Angus Auction at Omaha.

One of the important fall sales of beef cattle will occur at South Omaha, Neb., Tuesday, November 4th, when sixty head of high-class Aberdeen Angus cattle will be sold under the management of M. A. Judy, one of the best posted and most competent Angus authorities in the country. For this sale Mr. Judy has sixty head listed, forty females and twenty bulls, and he characterizes the offering as one of the best he has ever presented to the public. They are a strongly-bred lot, representatives of the Blackbird, Trojan Erica, Queen Mother, Pride of Aberdeen and other fashionable Angus tribes and their individuality is in keeping with the breeding. The bull list contains many herd heading propositions, as well as the sort that will sire the market topping steer. The bulls run in ages from twelve to twenty-four months, are the approved beef type, and should certainly meet with ready appreciation sale day. The forty head of females in the auction are an attractive lot and among them are many outstanding propositions. All the females are either safe in calf or have calves at foot, a fact that adds very materially to the value. At this time, when there is such a keen demand for cattle of the different beef breeds, the sale should certainly attract wide attention. It will be one of the very few opportunities presented this fall to secure desirable Angus cattle at public sale, and those of our readers in the market should certainly take advantage of it. The advertisement appears on page 28. Look it up and write for a copy of the catalog to M. A. Judy, West Lebanon, Ind., mentioning The Homestead when you write.

Prettyman's Poland China Sale.

On Monday, November 3d, Obadiah Prettyman, Fairfax, Mo., will sell fifty head of big-type Poland China boars and gilts that should interest those looking for breeding stock that is bred from stock that has made the big, smooth kind so popular. Seven fall boars, twenty-three boars of last spring farrow, three yearling sows, five fall gilts and twelve spring gilts are listed. The leading boar in Mr. Prettyman's herd and the sire of the fall boars and gilts and much of the spring stuff is the five-year-old boar, King Longfellow 57342, by Pawnee Prince, he by Pawnee Lad. His dam, Mary L., was by Big Prospect, which shows that he descends from big-type hogs that have made good and King Longfellow easily ranks among the top boars of today. He weighs in the neighborhood of 800 pounds in breeding condition, has as beautifully an arched back as is found, is one of the deepest bodied boars we have seen and is as smooth as a six months old pig. His good, masculine head, full rounding hams, heavy bone and good feet appeal to all. Had King Longfellow been pushed he would be among the prominent boars of today. Other boars and gilts in the sale are by Orange Wonder 65443, a son of Big Orange and Royal Lady, said to be the best A Wonder sow Mr. McClarnon could find. Orange Wonder is a great big yearling with great length, heavy bone and is a worthy assistant to King Longfellow. The dams of the sale hogs carry the blood of Johnson's Chief by Chief Tec. 3d, Grand Loog and Max'c Dude furnish Orange Wonder litters. Mr. Prettyman is proud of the record his sows make in farrowing and raising large, even litters and those who buy from him get the produce of prolific sows. His herd passed through the cholera early last June and everything has been treated with the simultaneous treatment so they should be immune. Fairfax is sixty miles north of St. Joseph, Mo., and is easily reached over the Burlington route from St. Joseph, Mo., or Omaha, Neb. Note page 30 for his advertisement and send for his catalog. Col. H. S. Duncan will do the selling and bids sent to him will be handled properly.

Big, Smooth Polands, the "Smith Kind."

Readers of this paper that are interested in the big smooth Poland China will be interested in the "Smith Kind" for they are a kind to themselves. It is really a work of a great breeder when he can establish a type that is recognized as singular to his herd, and such is really the case in the Smith herd, owned by Albert Smith & Sons, Superior, Neb. These gentlemen have hewed close to one line, and they have perfected to a great extent a Poland China that fills the wants of those looking for a hog that is big, yet smooth and an easy feeder. The writer has watched this herd with much interest for the past several years, and has watched the produce from this herd in other leading herds, and we wish to say that the good they have done should be a matter of much satisfaction to the breeders and they certainly have been profitable to the other owners. Smith & Sons have been eminently successful in holding public sales. They have always realized good averages, and their sales have been very uniform as to the range of prices, there being nothing fictitious about the values, and the great uniformity of the offering kept the range of prices even. On account of the nearly total failure of the corn crop in their section of Nebraska, these gentlemen have not attempted holding a public sale this fall. They have selected about half of the very best of the boars and are offering them for immediate sale at private treaty. We believe that as good, if not the best crop of boars that these gentlemen ever raised, have been produced this season. They are by Jumbo Jr., one of the very best sires of the corn belt today, Victor's Prospect and Mogul's Model. We recommend these boars, and they are priced at less than their real value. If interested, kindly write them today and mention this paper when doing so.

S. A. NELSON & SONS

again direct attention to their annual sale, which will be THE GREATEST WESTERN SALE OF

SHORT-HORNS

of many months. Sale at Farm near

MALCOLM, NEBRASKA, FRIDAY, NOVEMBER 7, '13

50 head are offered: 8 serviceable, herd-heading bulls, 35 females, some with calves at foot. Some of the most valuable specimens ever passed through a Western Sale Ring are included.

THE BREEDING IS OF THE BEST containing blood of the most noted of the breed.

THE INDIVIDUALITY WILL PLEASE critical stock men. Winners at recent fairs included.

THOSE OF THE PUREST SCOTCH pedigrees are listed.

EXCELLENT AMERICAN FAMILIES nicely Scotch-topped go in.

Those in Search of Herd Bulls will be interested in the beautiful roan youngster, a son of GOOD LAD'S GOODS and from a daughter of BURWOOD SULTAN, or the September yearling, HILLSDALE GOODS. ALSO BY GOOD LAD'S GOODS and from NONPAREIL FLOWER 2D, or either the red January calf by the same sire and from ORANGE BLOSSOM 2D. These are all of the purest Scotch breeding, two of them as valuable prospects as will be found. Other bulls of extra choice conformation will please the good stockmen.

Those that Appreciate the Ownership of choice Short-horns will be sure to appreciate the cows that will be offered. Massive cows that are suckling nice calves and are rebred, younger ones well up to calving and beautiful yearling heifers of showyard makeup, and everything of good pedigree, more than half pure Scotch, are listed. The older cows are bred to the splendid sire, DAUNTLESS CHIEF, while his heifers and other younger things are bred to GOOD LAD'S CHOICE by GOOD LAD. His dam by VICTOR'S ROAN DUKE.

25 IMMUNE POLAND CHINA BOARS will also be offered. They are the get of Jumbo C by Wade's Jumbo, Long King's Model by Long King, Chief Price and Adams' Big Hal, Hillcroft Giant and a few others. No bigger breeding anywhere or more popular. You can secure a herd boar here. Some of these boars are bred by Peter Mouw and all are from good herds. A special train leaves Lincoln at 7:00, making connection with all morning Burlington trains, and will leave Malcolm in time to make connections with evening trains out of Lincoln. Remember that the sale will be held at the farm, one mile northeast of Malcolm, Neb. Free conveyance to and from farm. We ask you to be with us November 7th. Ask for our catalog, look it through carefully and plan to be with us. Mention The Homestead when you write. Col. Z. S. Branson, auctioneer. J. C. Price will represent The Homestead. Address

Holly Williamson's Poland China Sale.

One of the very best sales of large-type Poland Chinas that will be held in eastern Nebraska this fall will be that of H. O. Williamson, at Herman, on November 5th, and you just take our word for it you will see one of the best offerings you have looked at this fall. We don't want to throw any bouquets that are not deserved, but we will say that we never saw Holly Williamson sell a poor offering, and the sows and the boars he will sell in this sale are in keeping with the kind he has heretofore put into his sales. He is selling fifty head in all, fourteen spring boars, and they are good ones and they are very large for their age; seven of his best brood sows with litters at side, among which is a daughter of Big Columbus, Long Prospect, Dutch Pan, Grand Hadley, Ponder Hadley, Wade's Jumbo and A's Victor. These sows are all good and they have nice litters at their side by some of the splendid boars he is using in his herd. Then there will be six of the very best sows, three yearlings and twenty spring gilts. Another good boar he will sell is Great Mastiff, a son of the grand champion boar, King Mastiff. He is a three-year-old and a good breeding boar. He is also listing nine head of his best fall and yearling sows. These sows are sired by Big Wonder, and great Mastiff and are out of such well-known sows as Mollie King, by Long King; Peaches Lady by Blue Valley Quality; and Big Mariah by Dutch Pan. We will have no excuses to make for these sows when you see them as they are as good as anybody will sell this fall. He is selling a February boar and gilt by Great Mastiff and out of old Peaches Lady that are both very choice. This boar will bear inspection on day of sale and he will make a good herd header. Then there is a litter of two boars and three gilts by Gold Dust Hadley and out of a sow called Dora that are all right and there are some good herd-boar prospects among these. A choice litter is sired by Henry's Expansion and out of Myra. These are of February farrow and are therefore large and they are good. One choice boar and two good gilts are sired by Great Mastiff and are out of Lady Pan by Dutch Pan, and another very choice litter is sired by Spot's Best and are out of a sow called Jumbo Spot, and she is a daughter of the great boar Wade's Jumbo, who in turn is a son of Wintermute's old Jumbo and this boar has long since been regarded as one of the best breeding boars in the state of Nebraska. There are a number of other splendid litters in the Williamson herd that are going to look very good to the breeders who attend this sale. It is an offering that we take pride in urging our friends to attend because they will find they are bred right and they have been grown in such a way as will insure the best results for those who buy them. Write for the Williamson catalog and kindly mention The Homestead. M. T. White will represent The Homestead at the sale and will care for any bids entrusted to him. See advertisement on page 29.

DeKalb's Great Hampshire Sale.

On November 4th, at the Kiel Barn, Council Bluffs, Iowa, H. D. DeKalb, DeKalb, Iowa, will make his annual fall sale and he will sell the greatest bunch of boars of this breed that he or any other breeder has ever put through a sale ring. This is a strong statement, but it is a statement we will stand behind and when the breeders see them they will say the statement is true. There will be sixty head of boars in this sale made up of thirty-five head of fall boars and twenty-three spring boars. Talk about your good things, just come to the DeKalb sale and see them pass through the sale ring. Among the best of these

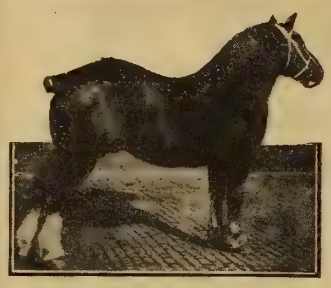
Short-horn Cattle, Shire and Percheron Horses

Blanchard, Iowa, October 30, 1913



HAVING decided to retire from the farm, I am, therefore, compelled to sell my splendid herd of **Scotch** and **Scotch-topped Short-horns** and my well-known studs of **Shire** and **Percheron stallions** and **mares.** I will sell **1 aged shire stallion,** a well-known show winner and a splendid breeder; **7 Shire mares** and **fillies,** two of which are imported, and two are sired by imported stallions and our of imported mares and some outstanding young Shire mares. Also **1 two-year-old Percheron stallion** and one **three-year-old Percheron mare.** Many of my best Shire mares were selected without regard to expense from the best breeders and importers in this country. One highly-bred saddle stallion and two saddle fillies, practically of pure breeding, high acting and good going kind.

28 HEAD SCOTCH and SCOTCH-TOPPED SHORT-HORNS--28

I am selling my entire herd of well-bred Short-horns, including my Scotch bull, **Master B.,** a seven-year-old son of the grand champion bull, Master of the Grove. He is a Cruickshank Lovely and a good breeding bull, and he will weigh 2,200 pounds in just fair breeding condition. **Ramsden's Cumberland** is an outstanding young, roan, Scotch bull, sired by the show bull, True Cumberland 2d and out of a well-bred Missie cow. He is a roan in color and a good one, also **4 other good young bulls.** Among the best Scotch cows will be **Ramsden's Missie,** the dam of the best young Scotch bull, and she will calve again in January; **Orange Bud,** a daughter of the undefeated grand champion bull, Ringmaster, and she sells with a calf at foot by Best of Goods; Red Rose, a daughter of the show bull, Acanthus King, and she is a well-bred Cruickshank Rosemary; **Birdie Gloster,** a richly-bred Duchess of Gloster, and one of my best breeding cows, sells with a good calf at foot. Also a number of other good Scotch cows and heifers. If you want **Short-horn cattle, or Shire** or **Percheron horses,** here is an opportunity of a life time. Also will sell at public auction 150 acres, good stock farm, 3 large barns, 2 houses, water works in all barns and lots, electric lights on country road. All but thirty acres in grass. Catalog will be mailed upon application. Mention The Homestead when writing for it. Address

AUCTIONEERS: COL. H. S. DUNCAN, ROBT. McKEE, R. E. MILLER

A. G. THURMAN, Manager, BLANCHARD, IOWA

TOO LATE TO CLASSIFY.

PERCHERON HORSES FOR SALE OR TRADE

20 MARES, imported and home bred; most of them bred or with colt at foot, and 5 stallions, one a first-prize Iowa State Fair winner. All are good work horses. Want to give all my time to cattle. Will sell cheap or trade for Short-horn cattle. Must deal this month or not at all. Come and see them. No correspondence answered. This advertisement will not appear again.

C. A. SAUNDERS - - - - - - MANILLA, IOWA

---

will be the great boar, DeKalb's King 50th, possibly as good a Hampshire boar as was ever listed for a public sale. This boar was farrowed August 6th last and he is a son of the wonderful breeding boar, Major, that stands at the head of the DeKalb herd and has proven himself to be one of the greatest living Hampshire breeding boars. He has for a dam the great sow, Nellie Aylor's Best, that is one of the great sows in his herd and she in turn is out of that equally noted sow, Jennie Aylor. Here is a boar that has a right to head the best herd in the land and we care not who owns him. Two two-year-old boars that have been used in this herd will be sold and they are good breeding boars. One of these is DeKalb's King 13th and the other is DeKalb's King 55th. The former is sired by Major and the latter by Commodore and both of these hogs are excellent breeding boars. Another splendid fall boar by Major is out of a sow called Mona, that is unquestionably the best sow in the DeKalb herd and one of the greatest Hampshire sows now living. Another good fall boar by Major is out of Lady Wide Belt. Another great boar in this sale is DeKalb's King 75th, and he is not only sired by the boar, Major, but he is also out of that wonderful sow, Jennie Aylor 6th, the sow with which Johnny Robbins topped his last sale at $460, and she stands today the highest priced sow of this breed. He is a full brother to a boar that Mr. DeKalb is keeping in his herd and he may show him next year and if he does it will make them all go some. Here is a boar that the breeders cannot afford to pass up we care not what they have to pay for him. There will be twenty-five head of yearling boars in this sale that will be sired by this noted boar, Major, and it will be a most excellent time to buy one of these and place him at the head of your herd. Then there are a number of good, spring boars in this sale and the most of them are sired by Erlanger 1039, the boar that was grand champion at the Indiana State Fair in 1908. There are a number of other boars in this sale that we might mention, but when we say to our readers that they are the best bunch of boars of the Hampshire breed that we have ever seen listed for a public sale, it should be sufficient to make you want to attend this sale. Write H. D. DeKalb, DeKalb, Iowa, for copy of his catalog at once and kindly mention this paper. If you cannot be present and you want one of these boars write our Mr. M. T. White, 4015 Izard St., Omaha, Neb., and send him your bid and he will attend the sale in person and will attend to your wants to your entire satisfaction. See advertisement on page 30.

Nelson & Sons' Great Sale of Short-horns.

On Friday, November 7th, at their farm one mile northeast of Malcolm, Neb., S. A. Nelson & Sons, of that place, will put up one of the good offerings of Short-horns that have been sold in recent years in Nebraska and without question the best lot of Short-horn cattle that have been sold in the West in some time. This is far and away the best lot of stock that these gentlemen have ever cataloged, not only in point of pedigree, but individual merit as well. It is true that they have at former times sold some extra select cattle, but this sale is practically made up of that kind of stock. The American tribes represented are topped with some of the best and most noted Scotch bulls of the breed, and we fancy that many men are not paying as strict attention to the matter of family in the Short-horn breed as formerly, but are looking more to the real value of a pedigree, which is the fact that an animal carries a large percentage of blood of good animals. In this respect there is not a poor pedigree in the Nelson catalog, for only choice cows, and the very best of bulls have ever been kept on this farm, and all selections made from other herds have been of the very best stock. There are about five strictly herd-heading bulls in this sale that are old enough for service. Some of them will not be ready for hard use till toward spring, but the breeder that is abreast of the times will not wait till spring to buy a herd bull this season, else the range buyer will beat him to the good ones, for the western men are right now paying good prices for bulls for next spring delivery. These bulls are all sired by Good Lad's Goods and he is by the grand old bull, Good Lad. Good Lad was sold for big prices a couple of times, owing to the fact that few bulls approached him as regards individual excellence. Those that insist on the straight pedigree will be allowed to purchase some as fine animals as we have seen sell in Nebraska in several years. Some are by Royal Sultan, others by Dauntless Chief, one by Baron Sultan, the noted bull owned by Shoebotham Bros., and still others are by other noted sires. We will not go into detail as regards this offering, for the details are in the catalog, but we do want to say that they are strictly a choice lot of stuff, the sort that will please those looking for good ones, and they will probably sell for much less than the same cattle will bring three months hence. Twenty-five Poland China boars, all immune, will also be sold the same day. A special train has been arranged for. It will leave Lincoln at 11 o'clock and will arrive at Malcolm at about 11:30. Free conveyance to farm and return. The special train will reach Lincoln in time to make connections for all points in the evening. Drop a postal for the catalog. It will be sent only on application. Mention The Homestead when you write. See page 31.

McCurdy's Giant Polands

SOME of the biggest, heaviest boned boars to be found anywhere, and they are of the very largest breeding. If you want big ones that are smooth, write me. I will save you money. Address
WM. McCURDY - TOBIAS, NEB.

THE MOST WONDERFUL CLUB IN THE WORLD

THE FARMER'S WIFE SHETLAND PONY CLUB of St. Paul, Minn., is the most wonderful club in the world for boys and girls because it gives away Shetland Ponies free to its members. Already over 126 boy and girl members have received real Shetland Ponies and Outfits worth about $250.00 each. If you haven't any Shetland Pony, now is your chance to get "BEAUTY" and her splendid Outfit, the next pony to be awarded to a new member of the Pony Club. All you have to do is to send us your name and address and we will tell you how to join the Shetland Pony Club and get "BEAUTY" for your own. It doesn't cost a single cent to join this Pony Club, the members pay no dues and the Shetland Ponies are given free to the club members who show they are the most deserving.

Notice we print the pictures of 8 lucky children and their ponies we have given them and also the names of 30 more—all we have room for—so you may feel sure we give away real, live Shetland Ponies. Perhaps some of these 126 lucky children live in your county or a county near you and if so you probably know them because our lucky pony winners are now the best known children in their locality. However, it doesn't make any difference where you live, all you have to do is to send us your name and if you are the lucky member to get "BEAUTY" the next pony we are going to give away, she and her whole outfit will be shipped directly to your home without a cent of cost to you. We can't explain our whole Pony Club plan here but we have a great big surprise for you that will double your chances of being the lucky member to get a pony if we hear from you right away.

HERE ARE THE NAMES OF A FEW OF THE 126 MEMBERS TO WHOM WE HAVE GIVEN PONIES

"Zip,"	Ella Fullam, Randolph Co., **Vermont**	"Toots,"	Isabelle Whitcraft, Baltimore Co., **Maryland.**	"Scotty,"	Catherine Rohrbeck, Pacific Co., **Washington.**
"Roine,"	Clarence F. Busick, Adams Co., **Indiana.**	"Andy,"	Alfred H. Brown, Teton Co., **Montana.**	"Bob,"	John B. Corn, Jr., Pulaski Co., **Arkansas.**
"Beppo,"	Larue C. Wertman, Carbon Co., **Pennsylvania.**	"Star,"	Clarence Grover, Polk Co., **Minnesota.**	"Tramp,"	Keith Walker, Juneau Co., **Wisconsin.**
"Jim,"	Joey Edwards, Barton Co., **Kansas**	"Patsy,"	Rena Smith, St. Lawrence Co., **New York.**	"Early Bird,"	Edwin Larson Worcester Co., **Massachusetts.**
"Busy,"	John H. Albrecht, Jr. Camden Co., **New Jersey.**	"Dixie,"	Walter McLaren, Moody Co., **South Dakota.**	"Stubby,"	Harold Quick, Jefferson Co., **Kentucky.**
"Toby,"	George Lynch, Lake Co., **Illinois.**	"Luiu,"	Louise Damron, Benford Co., **Virginia.**	"Cub,"	Eugene Mumpower, Buncombe Co., **N. Carolina.**
"Pippin,"	Doris Navarette, Fairfield Co., **Connecticut.**	"Sonny,"	Elmer Hoth, Allamakee Co., **Iowa.**	"Bingo,"	Jeanette Lansing, Dixon Co., **Nebraska.**
"Jean,"	John H. Elrod, Smith Co., **Tennessee.**	"Fritzie,"	Marie and Margie Parker, Knox Co., **Illinois.**	"Dainty,"	Gladys Ellwood, Franklin Co., **Vermont.**
"Captain,"	Ida O'Keefe, Mountrail Co., **North Dakota.**	"Chum,"	Bozzie F. Thornton, Mercer Co., **West Virginia.**	"Foxy,"	Charles F. McCoy, Story Co., **Iowa.**
"Roxy,"	Eldon Crego, Madison Co., **Ohio.**	"Mac,"	Ruth Mead, Saline Co., **Missouri.**	"Flo,"	Lloyd Thomas, Allen Co., **Ohio.**

WE WILL GIVE YOU THIS PONY FREE

Or SOME OTHER BOY or GIRL

A DAUGHTER OF A PRIZE PONY WE GAVE TO ONE OF OUR CLUB MEMBERS

"BEAUTY" is a dear spotted Shetland Pony, pure bred and registered and the most romantic pony we ever gave away. "Beauty" is the daughter of "Evangeline" whom we gave to Gladys Houx of Saline County, Missouri, who was one of our Pony Club Members in October 1910. Gladys tells below her picture in the lower right hand corner of this page how she found "Beauty" as a little colt in April 1911. "Beauty" is the first pony we ever gave away which was raised by a member of the Shetland Pony Club so you see that we not only give away Shetland Ponies to club members but we also buy ponies of members and pay well for them when they are old enough to be given to new members of the Pony Club. You never heard of a club like this before, did you? Our club motto is "A Shetland Pony for every boy and girl" and if you just send us your name and address (don't send any money, not even a postage stamp) you will have as good a chance as anybody to get "Beauty" and probably in two years or so we can buy a pony of you to give to another new Club Member.

This is "Beauty" and Her Elegant Outfit

THE OUTFIT we send along with "Beauty" is the finest and most complete pony outfit that money can buy—pony, buggy, harness, saddle and bridle. The buggy is about the prettiest and easiest riding pony vehicle made and the handsome nickel trimmed harness set off "Beauty" to best advantage as it is a real Shetland Pony harness. Then the hand made saddle and real Indian horse hair bridle complete this wonderful Outfit. The bridle is the most beautiful one you ever saw or heard of. It is made especially for us by an old cowboy at Deer Lodge, Montana, and it takes him and his pardner two whole weeks to weave it out of beautifully colored horse hair,—red, blue, green, black, white and yellow—woven into remarkable Indian designs and mounted with colored rosettes and the horse hair reins ending in a real cowboy quirt. No matter how rich a child's parents might be they could not buy him a handsomer pony or more complete Outfit than "Beauty" and her Outfit which we will send free to some lucky member of our Shetland Pony club.

SEND US YOUR NAME TODAY IF YOU WANT TO OWN "BEAUTY"

Mail This Coupon Today or Copy on Post Card

THE FARMER'S WIFE PONY CLUB
305 WEBB BLDG., ST. PAUL, MINN.

I want to be a member of your Shetland Pony Club. Please send me pictures of "Beauty" and the romantic story of her life. Also tell me how to take care of Shetland Ponies. I haven't any pony and want to own "Beauty."

Write Your Name and Address Here

"Beauty," 3 Weeks Old

R. F. D.....

P. O.....State.....

GOOD FOR 1,000 VOTES FOR "BEAUTY"

As soon as we hear from you we will explain our Pony Club plan and tell you how to go ahead and get "Beauty". This darling little pony—whose "Mama-Pony," "Evangeline" we gave to Gladys Houx, (picture of whom you will see on the lower right hand corner of this page) is surely going to some new member of our Pony Club who has never yet received a pony. Don't let anybody persuade you that you cannot become the proud owner of "Beauty" because our plan of giving away ponies is different from others. The fact that we have already given ponies to 126 Pony Club Members all over the United States, from the state of Vermont to the State of Washington, is proof that we do as we say. The Webb Publishing Co., publishers of The Farmer's Wife, has been established for 30 years and is one of the largest publishing firms in the United States, so your bank or postmaster will tell you that we can well afford to give away ponies to boys and girls who are members of our Shetland Pony Club to advertise our papers. We never heard of any of these 126 children until they wrote and told us they wanted a pony so you should send us your name and address at once to join the Pony Club if you want us to send you "Beauty."

A PRIZE FOR EVERY PONY CLUB MEMBER.

Every single child who becomes a member of our Pony Club will receive a handsome prize of his own choosing. Besides "Beauty" and her Outfit (and the Big Surprise we have for you) we will give Bicycles, Diamond Rings, Sewing Machines, Rifles, Cameras, Gold Watches, Music Cabinets and many other wonderful rewards that you never could get until now. We would like to give prizes to every boy and girl but we can only reward the few who send us their names and become members of our Shetland Pony Club and one of you will surely get darling little "Beauty" and her whole Outfit, so be sure to send us your name now before it is too late.

BE SURE TO ADDRESS YOUR POST CARD OR ENVELOPE TO

The Farmer's Wife Pony Club,
305 WEBB BUILDING, ST. PAUL, MINNESOTA

Gladys, "Evangeline" and "Beauty"

"I want to tell you something about 'Beauty.' You see the Webb Publishing Company really gave me two ponies. First they sent 'Evangeline' to me in October, and then one morning in April, Dan, the hired man, called mamma and said a little stranger was in the barn. You can imagine my surprise and delight to find that 'Evangeline' had the dearest little colt. We named her 'Beauty.' Pony colts are worth lots of money, so I am getting rich.

"This year 'Evangeline' had another little colt, so papa said, 'Why can't we make some other little boy or girl happy by selling 'Beauty' to The Farmer's Wife for them to give to some member of their Shetland Pony Club?' We all thought that was fine and arranged it with the Pony Editor of The Farmer's Wife. 'Beauty' is such a dear little pony that we are awfully glad she is going to some member of the Pony Club and I do hope the lucky member who gets 'Beauty' will be very good and kind to her.

Your little friend,
GLADYS HOUX.

VOL. LVIII. NO. 44. DES MOINES, IOWA, OCTOBER 30, 1913. WHOLE NO. 2925

Harvest Queen

Maxwell Motor Cars

We make them better—sell them for less—that's why they're leaders

Ask Dun's, Bradstreet's, Or Your Own Banker

NOW, MORE THAN EVER BEFORE, it behooves the dealer and the buyer to look carefully to the financial stability of the automobile manufacturer whose car he contemplates owning.

THERE HAVE BEEN SOME occurences of late that should serve as a warning in this regard. On the other hand, there hasn't been a failure that wasn't scheduled. They were foreordained from the first—inevitable.

SOME WERE OVER-DUE, in fact. Thanks to the splendid demand for cars, which we and other responsible concerns were unable to supply in full, some of them were accorded a longer lease of life than their product or experience or financial backing entitled them to.

THERE WAS NO EXCUSE, however, for any buyer being in ignorance of what impended. That was easily foreseen.

LET US SUGGEST that now, you who are in the market for a car, look into this matter as it deserves. You owe it to yourself—and us.

ASK BRADSTREET'S OR DUN'S. Or if you are not a subscriber, ask your Banker to investigate and inform you. He will do it gladly.

ASK HIM WHICH ARE the five financially strongest automobile manufacturers.

YOU WILL FIND that the Maxwell Motor Company is one of the five—and it will not be fifth in point of stability either.

HAVE HIM ANALYZE the latest financial statements of these five strongest and tell you which have the greatest amount of assets in proportion to liabilities—including bonded indebtedness, etc., of course. We think he'll tell you the Maxwell Motor Company is one of the leaders.

PERHAPS YOU DIDN'T KNOW—there's been so much confusion in this matter—that the Maxwell Motor Company has no connection whatsoever with the late Maxwell-Briscoe Company except that this concern purchased, through the U. S. Courts, all the assets, not only of that, but of several other concerns.

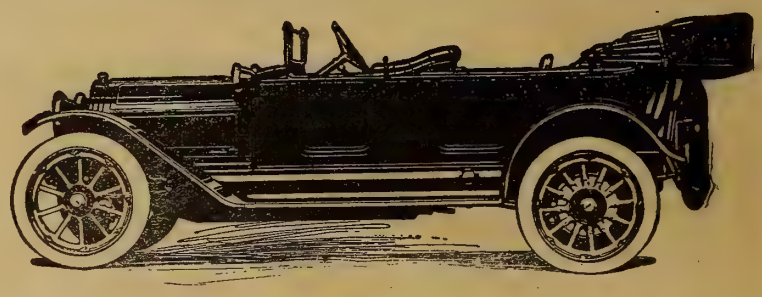
WE STARTED WITH A CLEAN SLATE—with plants worth many millions, with ample cash on hand to take care of our manufacturing operations, etc.

WE HAVE NO BONDED INDEBTEDNESS—no outstanding notes or debts of any kind except current open accounts not yet due.

AND TODAY WE ARE nine months old with orders on our books for more than thirty thousand cars.

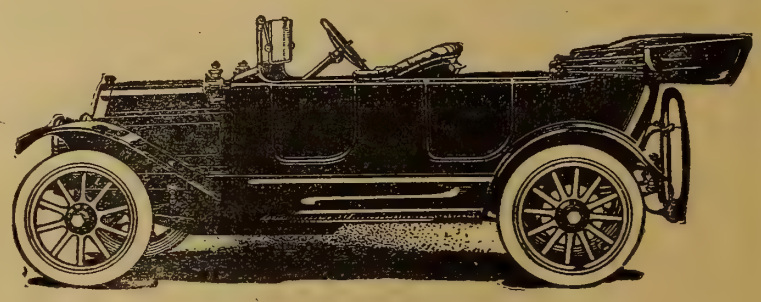
HAS THAT RECORD EVER been surpassed in this industry? We submit the account of our stewardship—ask Bradstreet's, Dun's or your Banker for further particulars regarding the operations and stability of this Company.

THEN YOU'LL FEEL SECURE on that point and, when you compare the cars as carefully, there will be only one answer, "Yours will be a Maxwell."



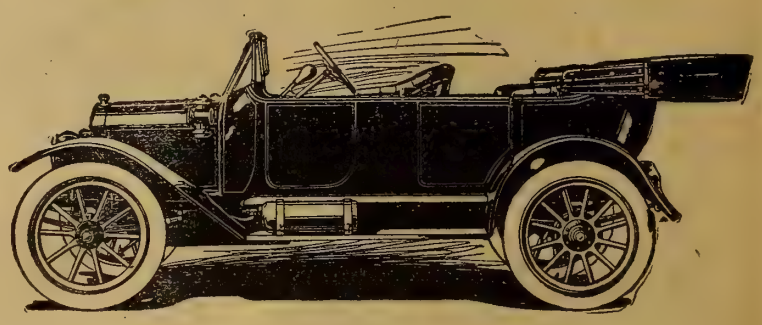
1914 MAXWELL "50-6"—$1975

The sweetest running thing on wheels. Six-cylinder motor, bloc-cast, 50 H. P.; 130-inch wheel base; electric starter and lights; Bruce Ott body; 5-7 passengers; disappearing seats; 36x4½-inch tires all around. Luxuriously finished; long, easy-riding springs and full equipment including ventilating windshield, top and Jiffy curtains—even an electric cigar lighter. Left or right side drive optional.



1914 "35-4"—$1085-$1225

Powerful, silent, sweet running; bloc-cast 4-cylinder motor; 111-inch wheel base; 33x4-inch tires all around. Left hand drive, center control. Electric starter and lights, at $1,225. Three-quarter elliptic springs. Bruce Ott body, ventilating windshield and full equipment, including Jiffy curtains.



1914 MAXWELL "25-4"—$750

The year's sensation. Four-cylinder, bloc-cast; 25 H. P. motor; magneto; weight, 1,600 pounds; 103-inch wheel base; 30-3½-inch tires all around; 3 speed selective transmission; full five-passenger body designed by Bruce Ott; complete equipment, including tire holders, windshield, top, Jiffy curtains.

A HEALTHY PIG.

By A. L. Beverly, D. V. M.

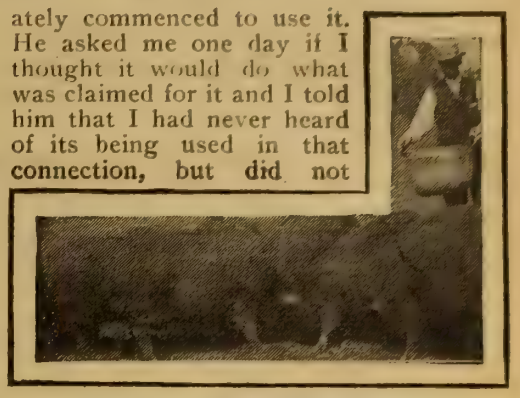
I HAVE been requested by some of the readers of the article on hog cholera, contagious pneumonia and typhus fever to give a practical cure for the above diseases, especially the latter two, when associated with cholera. These diseases when associated with cholera, which is the way they are generally found, run such a rapid course that any medicinal treatment is useless. Noted German authorities, when treatment is possible, recommend large doses of calomel in order to disinfect the stomach and intestines by the perchloride of mercury that is formed.

I have tried this treatment in several herds where these diseases were present with cholera to such an extent that vaccination was not deemed advisable. One herd in particular was treated at the very outset of the outbreak after only two or three pigs had died. This herd numbered about seventy head, averaging in weight about sixty pounds. Large doses of calomel were given; that is, about fifty grains per hog, fed in the slop every other day. These hogs seemed to do very well for a short time and, in fact, about thirty of them remained well for a period of three weeks. This so encouraged the owner that he told everyone in the country that he talked with about the remarkable cure of his hogs. The result of this was that a great many who had sick hogs commenced to use the calomel treatment. I had instructed this man as to what I was using, and cautioned him not to say anything about it unless he was sure he was receiving some benefit from the treatment. No doubt after his hogs did so well for that short period of time he concluded that he was safe, but they soon commenced to die and he informed me the last time I talked with him that he did not think he would save a single hog.

This illustration is given not because I have any faith whatever in the calomel treatment, but to show how careful a farmer must be lest he be misled into using something that he will derive no benefit from. Doubtless many farmers would have vaccinated had they not placed so much confidence in the cheaper treatment.

I have heard of many miraculous cures during the past summer. One man said that he saved his by using strychnine. Upon investigation I found that he had one hog left out of a herd of ninety. Another man claimed to have cured his by feeding large amounts of carbonate of ammonia. I tried this on several herds with no results whatever. These incidents should prove to you that when you hear of some remarkable cure, in 99 per cent of the cases, when the facts are obtained, there is no foundation to them whatever.

Another case was brought to my attention where a farmer read that a certain fluid extract would prevent cholera and its allied diseases. At the time this man had healthy hogs and he immediately commenced to use it. He asked me one day if I thought it would do what was claimed for it and I told him that I had never heard of its being used in that connection, but did not think he would get any benefit from it. This man spent about $25 for this drug, which was fairly high priced, and he afterwards lost every hog on the place.



FEEDING ON PASTURE.

I will say here that I do not know of any medicinal treatment that will cure these diseases which are associated with cholera, and I do not believe that anyone else does at the present time.

Typhoid fever in the human and hog cholera are very similar in form. Imagine trying to cure a case of typhoid fever and pneumonia together with some of these fool remedies. There is considerable to combat in the combination of these diseases and it is utter fallacy to expect to rout them by using some of the cures just named. No doubt there are hundreds of others just as inefficient and which are being used every day in the vain hope of curing their hogs.

There is only one preventive and cure that to my mind will give any results and that is vaccination. This probably sounds queer to recommend vaccination when another disease is present with cholera, but nevertheless good results may be obtained. When a farmer has a healthy herd of hogs and he vaccinates when they are in that condition he stands a small chance of losing his hogs with any of these diseases, the reason for this being that cholera seems

Des Moines, Iowa.

BEWILDERING HOG TROUBLES.

The following communication has been received from one of our Iowa subscribers, Mr. S. H. Best:

I think the article in a recent issue of your paper written by a licensed veterinarian is an indictment of the veterinary profession. He claims that the failure of the hog cholera serum is not due to the serum, but to the hogs having the wrong disease. We have been using the serum here with varying results. It is always administered by veterinarians licensed by the state. We farmers have been lenient with them when the treatment was not successful, laying the blame to poor serum. Now we admit it is gratifying after we have employed a veterinarian, paid him and paid for the serum and lost our hogs to be told that the trouble is not with the serum, but the hogs, of course, never with the veterinarians. If, as this writer says, the serum is all right, then the trouble must be with them. We acknowledge our ignorance by employing a veterinarian. We feel the same as we imagine they would feel if after consulting the family doctor for the toothache and receiving no relief, they were informed that he had prescribed for their corns and not the toothache. If, as this article in question claims, 50 per cent of the hogs of the state and 75 to 90 per cent in Hamilton county died of typhus fever, why don't they devote part of their efforts to a preventive for that disease?

It must be conceded that, taking all things into consideration, there is at the present time a general mixup on the whole question of swine diseases. It seems that there is a very marked difference in the manner in which different communities are affected. It is reasonable to suppose that typhus fever, for example, might destroy thousands of hogs in a given community and yet in a neighboring county a calamity of equal proportions may result from the spread of cholera. It is, therefore, a question of being able to diagnose before the disease can be successfully handled and on this point it may be said that the United States government and the experiment stations are putting forth their best efforts to prevent the spread of all types of swine diseases. To the man who is losing his hogs the results so far may seem discouraging, but as a matter of fact progress is being made and what has already been accomplished gives promise of even better results in the future.

DEMANDING MORE PAY.

The leading railways of the country are still kicking, or, to use a more dignified term, still protesting, because the government is not paying them more money for hauling mails. A few years ago when Congressman Victor Murdock was investigating the price paid the railways by the government he showed quite clearly that the railways were not only being paid a higher rate for hauling Uncle Sam's mails than they demanded for hauling express, or any other kind of merchandise, but that through fraudulent practices on weighing days the government was actually paying for mail which was never hauled. At that time the railroads had nothing to say about the mail service and doubtless would have nothing to say now, but for the fact that the parcel post is taking business away from the express companies in which the railroads are interested. Naturally they want to get the money back somehow and as Uncle Sam has been an easy mark for so long they seek to increase the rate. Besides enriching them, an increase in rates will do more than anything else to injure the farmer's friend, the parcel post, which is at present making so much money that its maintenance seems assured. If the railroads are really underpaid for hauling the mails they should be paid more, and that they will be paid more if it is justly due them is assured by the fairness for which the American people are famed. And if they are carrying the mails at a loss, as they maintain in a recent circular, why do we, every year or so, see the great transcontinental lines rushing trains across the country at break-neck speed in an effort to make a new time record and thereby secure the new contract for carrying the United States mails? Whatever may be the outcome of the railroads' protests we should see to it that nothing happens to the long-delayed, universally-appreciated "passle post."

RAPE IN WINTER WHEAT.

A subscriber who is growing a large area of winter wheat asks concerning the advisability of sowing rape seed on wheat land this fall or early in the spring. It is his intention to use the stubble land for sheep pasture next year.

This plan is practicable, but under no circumstances should the rape be seeded in the fall. It is just possible that the seed might lie on the ground during the winter without injury if it were sown after the period of growth has ceased, but in case the seed should germinate the crop would be killed then and there. In the case of spring sowing we would not advise seeding it until the wheat had made a spring growth of two or three weeks. When rape is seeded in any kind of grain there is always a little danger that it might outgrow the main crop, in which case it is difficult to harvest. For that reason when rape is sown with spring grain it is advisable to wait for a period of two or three weeks after sowing the grain before seeding the rape. This does not apply in the case of winter wheat because the crop really has a start, but nevertheless it is advisable to delay seeding for a short time so it may be assured that the wheat crop will keep ahead of the rape.

We would advise harrowing in the seed in this case, because this will do no harm to the winter wheat and it will cover the seed so as to insure a much better stand of rape.

DESTROYING RATS AND MICE.

An Illinois subscriber gives an outline of his methods of ridding the premises of rats and mice, in the following communication:

There are many ways of ridding the farm premises of rats and mice. Trapping, poisoning and the keeping of a few good cats and a good rat dog are some of the chief ways of getting rid of them. Also we can use ferrets. The ferret will enter holes and other places that cannot be reached otherwise, killing or running out the rats. A few hunts with a well-trained ferret will rid a place of rats completely.

As rats are very wise, one need not expect to have success all the time with one method, but should change from one to another. I have caught a great many rats and mice in the common steel traps by setting them in their runs or places most visited by them and baiting with a piece of meat tied on the pan of each trap. After they became shy of this I would move the traps to new places and cover them with pieces of paper, straw, etc., and then scatter corn, meal or wheat over the set. In this way I would succeed in catching some more. Wire traps are even better than steel traps. We have had as high as ten in the trap at one time. Catching them in barrels, with water concealed by a covering of chaff or bran, will catch a few, but the old rodents are usually too cunning for such traps.

Poisoning is somewhat dangerous to other lives and often offensive scents follow, yet it is often necessary to resort to the poisons. One should be as careful as possible with them, placing them under buildings or in the rats' runs where the chickens, pigs and calves cannot get at them and there will not be much danger from their use. Patent poisons are sometimes readily eaten by the rodents; at least we have been successful in using them. Arsenic put on cheese will attract them. Wheat or corn soaked in a solution of strychnine water and then dried and scattered in their haunts will get some also. And sometimes we sprinkle concentrated lye in their runs. The moisture of the ground dissolves the lye, and when they step into it it burns their feet. Some say that they will then lick their feet and thus get it into their stomachs, thereby killing them. I cannot say whether it kills them or simply makes them leave the premises, but I do know that their numbers diminish soon after the lye is put out. Plaster of Paris is yet another remedy against rodents. Mix together well one pound of plaster of Paris and three pounds of coarse corn meal, and put where the rats can have access to it. They eat this greedily and get thirsty, and when they drink the mixture hardens in the stomach and kills them. This should be put out in dry weather where it will not get wet, and where there is little danger of anything else getting it.

Cats can render valuable service in the warfare against rats, as well as mice that are ensconced in harbors that cannot be reached. The house can be kept clear of mice easier and better with the aid of one or two good cats than in any other way. In this way the mice are gotten away with immediately and there is no offensive reminder afterwards, as is the case if poison is used, when the odor from the dead mice is worse, if anything, than the trouble caused by the live ones. A good cat around the barn will beat a trap every time and will pounce on many a rat that ventures from his harbor for a moment. Cats will destroy young rats, up to the half-grown size, by the dozen and thus prevent their propagation. Not many cats will kill grown rats, although some few will. There are cats and cats; some tabbies are not worth their feed. But the ones that will put in most of their time faithfully hunting rats and mice are well worth keeping and deserve good treatment. Two to remain at the barn and one at the house will prevent much increase of the rodents, if, indeed, the cats do not exterminate them completely.

Concrete is a great enemy to rats when made into floors. When a plank floor is torn out, if it be replaced by one of concrete, there is one less home for rats. In my part of the country a great many concrete floors have been laid within the past few years (all new buildings that have gone up have concrete floors), and all who have them testify that they are bothered but little by rats; in fact, they haven't any of the pests unless there are some outside harbors for them. All farmers, of course, are not in a position to have concrete floors in all their barns, granaries, sheds, poultry houses, etc., but many more will have them in the course of time.

Whatever the methods adopted, wage a constant warfare against the rodents. This is the only way ever to rid a place of them. They cannot be exterminated or even materially reduced in numbers by giving them a "round" only occasionally. And if left alone they will eat one out of house and home.

It is a well-known fact that millions of dollars' worth of grain are annually destroyed around granaries by rats alone. And one discouraging feature about the fight against these pests is that they so freely migrate from place to place that it is almost necessary to have neighborhood action rather than to make an individual one. This is a matter that has been taken up in some instances by rural clubs whereby the interest of every man in a given community has been enlisted, the outcome being an almost absolute cleanup of the rodent tribe.

SOME SUCCESSFUL RURAL CLUBS.

The following communication received from a Wisconsin subscriber describes somewhat in detail what has been accomplished in various communities by the establishment of rural clubs:

Live, enterprising clubs are strong links to tie the young man and the young woman to the farm, and to make the older ones appreciate the manifold advantages of rural life. In Wisconsin, where so many innovations in agriculture have originated, several organizations or clubs are paving the way for a better country life. At the country life conference last February, the work of these was taken up in detail and some interesting experiences were related.

Woman, especially, has been the chief sufferer through social isolation. About all she had to fall back upon was the church, whereas her husband had his political life, his better farming clubs, his saloon, and frequent trips to town. That the farm woman is capable of solving her social difficulties, however, was brought out by Mrs. David Haddow in her description of the Home Culture Club, of St. Croix county.

One busy farm woman near River Falls, troubled by a growing lack of neighborliness in her community, broached the subject of a study club, with a definite purpose of self-improvement. The idea was received with enthusiasm despite the busy lives of these women, eight responding to the first call. From the beginning the club was successful.

None of the members were college women and nearly all wished to study some subject that was new. English history for two years, English literature one year, ancient history three years, medieval history three years, and modern history one year were the topics finally selected.

The change in the community life was marvelous. The women took hold of the project enthusiastically and even got their husbands interested, men and women alike being drawn more closely together in a genuinely friendly and neighborly association that could never have been the case had not some sort of country club been organized.

Another famous organization is the Skillet Creek Farmers' Club which was organized in 1905 under the leadership of William Toole. Its work has helped to make the neighborhood noted for its homes, gardens, orchards, schools and highways. Another Sauk county club is the Klover Klub, of Fairfield, a literary society of about eighty members. These two by no means exhaust the activities of rural Sauk county, however. The Narrows Prairie Country Club is one of a number of societies whose existence is due to the teacher. Meetings are held in the schoolhouse, and a corn show is an annual event. The Sauk Prairie's Club is an association of farmers; the Choral Club, of Excelsior, is a body of religious young people. Altogether, there are in operation outside of the village and city twenty-five country clubs, most of which are associated with the Sauk County Federation of Country Clubs.

Of an unusually large scope is the Inter-State Park Club, of Polk county, Wis., and Chisago county, Minn., which has extensive and varied functions connected with the business and social life of a large community. A remarkable harmony has characterized it from its inception when one considers that two states, two counties, and two adjoining villages are involved.

Notices for all the meetings are typewritten and mailed to editors of the county papers so as to reach them when their copy boxes are empty. After each meeting a thorough and interesting report is also sent. By this means of keeping before the public the club has enjoyed a most prosperous history, being of immense value to its members. All the meetings, even those held during severe winter weather, are well attended.

The Burke Equity Club, of Dane county, was organized in an effort to find a better tobacco market. Equity warehouses were built, and the association endeavored to sell the tobacco of its members. This part of the organization has long since been abandoned, but regular monthly meetings of a social nature are still held. An equity picnic is held each summer. In fact, the social wants of the community are catered to most effectively.

Outagamie county boasts of the South Greenville grange. Although somewhat in the nature of a co-operative organization, the social side has not been neglected and the entire neighborhood looks forward with pleasure to its various functions.

These are only a few of the country clubs of Wisconsin. Their work is being duplicated in dozens of other counties. They prove, however, that country clubs everywhere have an immense field of usefulness; with careful organization, tactful administration, and systematic advertising they can grow to be the greatest individual force in every neighborhood.

We are pleased indeed to bring to the attention of our readers these instances where community life has been benefited by this get-together spirit which, after all, is the real purpose of these rural organizations or clubs. In some respects Wisconsin is leading her sister states in the adoption of progressive ideas as affecting social life and as related to industrial progress. A record is being made that might profitably be emulated by every state in the corn belt. In this connection we would like to ask our readers who are associated with rural clubs to furnish us a brief history of the work that is being done in order that we may in turn pass it on to our subscribers and thereby allow the leaven to spread.

WHERE TO INOCULATE A HOG.

Another complication has arisen in connection with the practice of inoculating hogs. Packers have learned that the injection of serum into the ham may cause abscesses that are not discoverable until the ham is sliced for use.

Special attention has been called to this matter by the United States Live Stock Sanitary Association. This association recognizes the Niles-Dorset serum as the most valuable agent available for the checking of hog cholera, but emphasis is placed on the necessity of having the serum used by competent veterinarians. In the hands of an unskilled operator this association points out that the serum may cause serious damage to portions of hog carcasses. The proper area for inoculating is still an open question, but of necessity it should be in a part of the carcass that is not utilized as meat. At the present time one of the large packing firms is carrying on an extensive experiment in which groups of hogs are being vaccinated, some in the neck, others in the shoulder and still others in the ham and flank. These groups will be kept separate and slaughtered separately and injury to the carcasses will be made the subject of careful inspection by the United States government inspectors.

THE PUBLISHER'S VIEWS —ON— TOPICS of THE TIME

James M. Pierce

THE BIG MEN OF THE FARM.

I AM indebted to a country newspaper editor for calling my attention to a very interesting fact. Did you ever stop to consider that a great majority of the men who are doing the really-worth-while things of the world today came from the country or the country town? This editorial friend of mine mentions the fact because one of the great political parties of the day has chosen a man from a country town in the West, which boasts of but 3,500 population, as chairman of the congressional committee which has the welfare of the party in charge, while another of the leading parties has selected as secretary of its congressional committee still another western small-town product. My editorial friend pertinently inquires: "Why didn't they go to New York, or St. Louis, or San Francisco, or Boston, or Philadelphia for their campaign managers?" He answers the question himself by saying: "They didn't go there, because the men are not there."

Just take a minute and run over the list of men prominent in American life today who came either from the farm or typical small country towns, rural in taste, tendency, manner of living and general make-up. The speaker of the house, Champ Clark, is a country lawyer, from the little town of Bowling Green, Missouri, with less than 2,000 population. The leader of congress, Oscar Underwood, is from a country town, in Alabama, which only in recent years has begun to put on city airs and ways. The president himself, Woodrow Wilson, came from the little country town of Staunton, Virginia, with a present population of less than 8,000, where his father was the local Presbyterian preacher and which at the time of the president's birth was "pretty small potatoes" as country towns in the South go.

But we need not confine ourselves to politics, in considering this subject. The other day a member of my household asked me whom I consider the greatest living American. The query started quite an argument. We have a lot of great and good men in this country. But when we come right down to it, the great man is not necessarily he who occupies the most commanding political position or accumulates the most money or is most often in the public print. The really, truly great man is not Napoleon, fighting merely for the lust of power, but he who devotes himself to making the life and lot of other men easier, brighter or richer. We have a man still living in America whose greatness is felt clear around the world, every day of the year, in a dual manner: In making the day's work easier and in adding untold comforts and conveniences to lives which were bereft of them before his genius gave them birth. The man I mean is Thomas A. Edison, to whom the farmer is indebted for practically every electrical convenience he has, from the incandescent light to the talking machine. Thomas A. Edison was born in my native state, Ohio, in a little country town which has never yet reached the 800 population mark, although it is now more than sixty years since Edison was born there.

I could name a hundred men and women of prominence in America today who came either from the farm or the small country town. It isn't that bright boys and girls are not to be found in the city. It is because the boys and girls of the country have time to think things over, to compare facts and draw deductions therefrom, to consider the world's needs and connive at meeting those needs. Some day I am going to print the whole list of a hundred men and women whom everybody knows, because of their national prominence, all of whom came from the country or the country town. It will be an eye opener to most people. And it will effectually prove my contention that the rural spirit is the spirit which is ruling America today, bringing the nation up to a plane never approached before. All honor to our farm and country town parents for rearing the boys and girls who are doing the big things of the world today, going about their far-reaching work with a devotion to duty and an enthusiasm which is making a new era in American progress and prosperity.

THE PANAMA CANAL AND THE FARMER.

THE grain-belt farmer has a more direct and personal interest in the Panama canal than most of us are inclined to think. With the last formidable dirt barrier blown up last month and the day not far distant when the canal will actually be opened, we may well consider the subject of how the completion of this century-old project will benefit the grain-belt farmer.

First and foremost, the canal will mean reduced freight rates. Citrus fruits from California, wheat from Washington and Idaho, apples from Oregon and all the agricultural wealth of the Pacific west will be transported to the eastern market by water, for practically half what it costs by rail now. Vessels loaded with grain and lumber at San Francisco, Seattle and Portland will make the journey down the Pacific, across Panama and up the Atlantic, or across the Gulf of Mexico and unload their cargo at New Orleans and Galveston, for less expense than is now required to transport the same cargo one-third the number of miles, by rail, to the same destination. Knowing what an element in the final cost to the consumer is the item of freight the farmer can readily realize that the opening of the canal will mean cheaper citrus fruits and cheaper Oregon lumber, for both of which the grain-belt farmer is now obliged to pay exorbitant prices.

Nor does the advantage stop with this. Corn from Illinois, oats from Iowa, rye from Wisconsin, cotton from Oklahoma and rice from Arkansas can be shipped to the Pacific and Atlantic coasts and around the world practically the entire distance by water: down the Mississippi in river steamboats, then reloaded on ocean steamers at New Orleans and through the Panama canal to the Pacific coast and the Orient. What does this mean to the grain-belt farmer? It means an enlarged world market for his grains and crops which, thanks to the reduced price owing to the lowering of the cost of transportation, will thus be in free and unrestricted competition with the crops of the world, minus the now cumbersome and discriminating burden of excessive railroad freight rates.

In the second place, the Panama canal will mean a quicker market for the products of the grain-belt farm. The trip down the Mississippi by boat, or across the continent by rail, and then by steamer around South America to the Pacific coast, the Orient or the Occident (via the Suez canal) requires many, many weeks, rendering it practically impossible for perishable products from the grain belt to find a market so far removed. The Panama canal means a cutting down of the time for such trips, so that our grain-belt perishable products may at last find their way around the world and bring back still more golden dollars for the grain-belt farmer.

In the third place, the Panama canal will mean lower prices for the products of eastern factories and mills, for which the grain-belt farmer is now often obliged to pay excessive prices. Why? Because the railroads will be obliged to reduce their freight rates to meet the new water competition and this reduction in transportation charges will be felt materially in the price which the consumer is charged for farm implements from eastern factories, cloth products from eastern mills and miscellaneous products from foreign countries. Anyone who has lived or spent any time on the Pacific coast, as I have, knows what a big item freight is in the final charge to the consumer.

Three years ago I had the great pleasure of inspecting the work on the Panama canal in person. It was a wonderful sight for a grain-belt farmer and publisher. Its magnitude can hardly be realized. American genius has practically completed an engineering marvel, a miracle. Order has been brought out of chaos, the seemingly impossible has been accomplished in a matter-of-fact manner that is the wonder of the world. The meeting of the waters of the Atlantic and the Pacific is epochal in its romance. But it is far more epochal in its industrial significance. And the significance to the grain-belt farmer is one of the big phases of the subject which we must not overlook. I firmly believe no one thing within the next ten years will mean more to the grain-belt farmer, in the way of enlarged market for what he sells and reduced prices on what he buys, than the completion and opening to the world's traffic of the wonderful Panama canal.

James M. Pierce

FAVORS THE LOW-DOWN WAGON.

A Missouri subscriber writes very enthusiastically about his experience with the low-down wagon, endorsing it in the strongest possible terms. Among other things he says:

Never until this summer have I used the wagon with low wheels. I have always used the wagon with the highest wheels. I began to consider one day the amount of high lifting I had done, and how it worried me. The lifting of hay and coal and corn and other things as high as my head had often made me so tired at the end of the day I could hardly drag my feet along. Well, as a result I took the old wagon to town one day and traded for a low-wheel wagon, giving the man $10 to trade. He seemed pleased and so was I. I brought the wagon home and I have used it all summer. I am so well pleased that I have been ashamed to think I was so foolish as to use a high-wheel wagon so long. How easy to put on a load of hay, corn, fodder or coal. In fact there is not a purpose for which I have used this wagon that it has not been more satisfactory than the other. Of course our roads here are seldom ever muddy, and for that reason the low-wheel wagon pulls about as easy as the other wagon did. Then I have the iron wheels, and I am not troubled with loose tires. I have come to the conclusion that every farmer should have a low-wheel wagon to use about his farm even if he finds it necessary to have a high wheel one for use on the roads.

There is no question but what the use of the low-down wagon is an excellent means of transferring a considerable part of the heavy labor from man's shoulders to those of the horse. It is true that where the tire width is the same in each case the low-down wagon is of heavier draft than the ordinary wagon, but nevertheless it is so convenient in so many forms of labor on the farm that its use is more than justified. Furthermore all low wagons that we have ever seen are made with broad tires and in nearly all forms of farm work this, in itself, will tend to even the draft because it is well known that the wide-tired wagon under ordinary conditions draws easier than the narrow one.

MANURING FIELDS IN THE FALL.

It is scarcely necessary to go to the trouble to find arguments in favor of the plan of manuring land. Every farmer would willingly take the time to haul out more manure if a supply were available. A subscriber calls our attention to the matter at the present time and endorses the practice of manuring land in the fall. Among other things he says:

It looks good to stand in my door and see the manure being scattered over the fields. This is the time of the year when crops are off in many sections and farmers have begun to prepare for another crop. Every idle moment is being used in hauling out manure and spreading it over the field. As I live close to town much of it is being hauled from there without money and without price. All the farmer has to do is to hitch up his team and go after it. That is the reason the fields are being coated.

I like to plow the manure under in the fall of the year. By next spring it will be assimilated with the soil. The rains of winter will rot it and put its strength into the soil, and it will be ready for the use of the plant early in the spring. Often it will take the manure half the summer to rot when it is plowed under in the spring and one must wait another year to get the full benefit from it.

Of course I like the manure spreader. It distributes the manure evenly and without manual labor. It does its work quickly and well. Every farmer who is able should own one. But one must not fail to fertilize just because he has no spreader. With his pitch fork he can do very well. So he should take his fork and go after the fertilizer and scatter it as best he can over his place.

Put on a good coat of manure and you will have a good crop. One year I put on as high as ten tons to the acre on poor ground. Some of my neighbors thought I was putting it entirely too thick and it would burn the soil, but it did not and the crop that was grown there more than pleased me. It pays, it pays, it pays to manure.

While under ordinary circumstances manure may be plowed under in the fall with reasonable expectations of getting good results the following year, however, it may be said with an equal display of wisdom that the fall is an excellent time to cover pastures. More and more we are coming to believe that it is advisable to keep manure near the surface and to this end no plan can compare with that of top dressing meadows and pastures. There will be no waste whatever when this is applied and it absolutely does away with the danger that might, in some instances, arise, whereby coarse manure, when it is plowed under, intercepts the capillary movement of water. In the case of poor land when it is desired to improve a cultivated field immediately plowing under in the fall is good practice, but we desire to again endorse the plan of getting most of the manure spread over the meadows and pastures.

WINTER CATTLE FEEDING.

The whole country has been engaged in buying stock cattle and feeders since the first of October. Prior to that Iowa, Illinois and other states that raised a corn crop bought heavily, but Kansas and Missouri now have a large amount of feed for stock cattle, that has been grown since the first of September, and they are buying many cattle. Kansas is grazing wheat fields, and Missouri wheat fields and bluegrass pastures offer opportunities for wintering many cattle that were not thought of during the dry days of August. Distillers in Illinois, Indiana and Kentucky made a large amount of money on slop-fed cattle on the deals closed out the summer of 1912, and a fair profit on last winter's feeding, and are buying many cattle this fall. They use a plain set of animals, and absorb a large number of horned westerns that corn-belt feeders would side step.

Kansas and Missouri will confine their efforts largely to stock grades of cattle this winter, though a good many cattle will be finished. Silo builders were busy during the dry weather in those states, Lyon county, Kansas, erecting 200 silos this season, Greenwood county almost as many, and other counties in proportion. It will be a great season for concentrated feeds in Kansas and Missouri. During the dry weather many Kansas men almost lost faith that it would ever rain again, and laid in a large supply of cotton-seed product, overbuying their necessities in many cases. The rains came, and much of this feed remains on hand, but the Kansas field for the sale of concentrated feeds will be large.

Some Missouri yearlings, fattened largely on molasses meal, were marketed at Kansas City, October 22d, and sold at the top of the market, $9.25. The knowledge of new feeding methods that will be acquired this season in those districts that are deficient in corn will, doubtless, go far in making up for the loss occasioned by the drouth. Those sections where corn is plentiful will do well to watch Kansas and Missouri this season, as some valuable lessons in saving methods of feeding, and in substituting other feeds for corn, will no doubt be gleaned.

A dispatch from Winnipeg, Canada, says, "The influx of cattle into the United States under the new tariff law continues, and large shipments from western Canada are reported daily. A special stock train carrying 400 head of steers passed over the boundary Thursday night destined for Chicago. Another stock train of twenty cars crossed the boundary Friday night. The United States customs officials at Winnipeg are besieged with inquiries regarding the new tariff law.

RAILROAD TO HELP SHIPPERS.

One transportation company has just announced that it will inaugurate a new freight device to accommodate small shippers along its lines. The plan is to send iced cars over the road to pick up fruit and vegetables. At each division these will be transferred to a fast freight and they will go forward to available markets. The fruit and vegetables will be sold in the best markets, and the remittance made by the railroad directly to each shipper.

The idea is to aid the grower of small quantities of fruit and vegetables to market his produce at a paying price. In many localities there is practically no market for small lots of vegetables, and as the grower cannot dispose of it in his own town he must let it go to waste. The railroad can therefore be of great help to the grower by marketing his fruit and vegetables for him.

The railroad officials have the theory that the fruit and vegetable business can be developed along its route the same as the dairy and poultry business, and everyone knows these have grown to enormous proportions.

The campaign is to be opened about the first of November in the West and pushed with vigor over all the lines that traverse agricultural and horticultural territory. The idea seems to be to take the matter up with the farmers at all their gatherings and get their hearty co-operation. This is bound to mean a better day for the farmer if he will only take advantage of the opportunity. The business of marketing small quantities of fruit and vegetables will no doubt enlarge as the years go by.

WHEN HAULING TO MARKET.

Nearly every man who farms likes to be reasonably close to town, yet few have gone to the trouble of figuring out how much more it means to them in a day's hauling. The government has gathered data which shows that the man who lives but one mile from town may be expected to haul five loads of ear corn while the man who lives six miles away can only move two. If he is hauling shelled corn or wheat he can move four and one-half loads in a day if but a mile from town, while his neighbor who lives three miles from the depot can only get three loads in. And, of course, if the roads are as bad as they sometimes are even at this time of the year, the number of loads may be best represented by 0.

CONSOLIDATED RURAL SCHOOLS AND GOOD ROADS.

It is yet possible to find men who are thin-skinned and touchy on the subject of rural-school consolidation. They point to the records of great men who have been reared in the little red schoolhouse and hastily reach the false conclusion that what was good enough for our fathers is good enough for us. We treat with the utmost respect the men who hold that view, but desire to call their attention to the fact that there is a rapidly increasing interest in the modern plan of introducing the graded school system into the country. One of our subscribers points out the close relationship that exists between this new school plan and the question of good roads. Among other things he says:

We will never have first-class high schools in the country until we construct good roads and keep them in proper condition, summer and winter. The two are so closely related that we cannot have the first until we get the last. But with country roads in good condition twelve months in the year, children can get to school during severe winter weather, although living three or four miles from the schoolhouse, as easily as they could go a half mile on a bright spring morning. The establishment of a system of good roads in your county, besides being a very good thing within itself, for many reasons, will at the same time guarantee the radical improvement and greater efficiency of your rural schools.

Wherever a model rural school has been introduced in a prosperous farming community its influence and development has been wonderful. But with the coming of good roads the number of rural high schools will increase as if by magic. Then one teacher will cease trying to do the impossible. Instead of one teacher, in a one-room school, trying to teach everything, that teacher will be one of several experts amply employed at good salaries in a consolidated school. What we need in our rural communities today is team work in education, the get-together spirit which will move small school districts to unite for the building and equipping of high schools, and we will have it before a great while.

At present the greatest obstacle to the establishment of these first-class schools in country neighborhoods is the bad condition of the roads at just the time children are privileged to attend school. Trustees very naturally reason that it is useless to consolidate several districts and require children to go three or four miles to school when the roads are well-nigh impassable during a considerable portion of the winter. But with good roads 150 or more children could be conveyed a long distance to a modern, first-class, four-room school, where every teacher is an expert along certain lines. One of these teachers will give instruction in drawing, art, another in music, another in arithmetic, and so on, each teacher instructing in that special department for which he is best qualified.

It is absurd to expect one teacher to get the best results in trying to instruct in all the various branches which modern education demands. It cannot be done. You never saw a first-class stenographer, bookkeeper, typewriter, telegrapher, writer and artist combined in the same person. Nor is it likely that any one teacher could properly instruct pupils satisfactorily in all of those callings or professions.

The world's advancement demands that the successful teacher of today be an expert. By a system of consolidated schools there will be splendid openings for those who have prepared themselves for special work, and they will command high salaries. This statement is borne out by reference to the statistics in all county superintendents' offices. The standard of wages, even for the one-room school teachers in the back country, has risen rapidly in the past decade.

It is, however, the consolidated school which is going to solve the problem permanently. One of these schools established in each county will encourage the establishment of more such schools. When three or four districts get together and determine to have roads that will be in good order during the winter as well as the summer the whole matter will be settled. There are all sorts of ways of getting the scholars to school when the roads are good. A big motor would cover the territory in a short while. Old men who do not feel able to work on the farm could, at small expense, be induced to drive vehicles around to the various homes and take the students to school. Three or four such conveyances, or maybe fewer, could cover the farthest portions of the consolidated districts very satisfactorily. Of course many of the boys and girls would come on their own horses.

An easy and convenient means would be found for getting to school, once the roads were good and safe, and there was a school to get to really worth getting to. As conditions now are in the majority of rural communities boys and girls old enough to compare school conditions in their own neighborhoods with the town schools have very little encouragement to go even a short distance to the rural school. The instinctive demand of their natures, as the students increase in intelligence and keenness of observation, is for better school conditions at home, and yet no effort is being made in many localities to supply this demand.

There is no denying the fact that it is useless to spend much time and energy in advocating the central school plan if the same degree of enthusiasm is not spent in the interest of improved roads. Within the last decade certain phases of this problem have changed materially. We refer especially to the introduction of the automobile which unquestionably in the future will be the system of transportation used in conjunction with central schools. It can only be used, however, when communities, as a whole, are convinced that the road question is, after all, a fundamental one, requiring first attention from those who are advocating a sound system of rural education.

DEMAND FOR DRAFTERS CONTINUES.

Dr. C. E. McCampbell, secretary of the Kansas Live Stock Registry Board, has recently called attention to the fact that motor trucks have not in any way injured the draft-horse business. In other words, Mr. McCampbell believes that there is a keener demand for draft horses today than ever before. It is believed by this champion of the drafter that there is a distinct division between the usefulness of the motor car and the horse. For long hauls over good streets or roads the motor truck is the more economical, but it cannot compete with the horse on the shorter hauls or where there is much stopping required. One of the largest packing firms in Kansas City uses but three trucks and they are assigned to long hauls.

The demand for good draft horses exists not only in the city, but larger and better mares are demanded on the farm, according to Mr. McCampbell. Labor-saving machinery is taking the place of hand labor and in most instances this machinery requires horse power to handle it. It has long been known that for many farm tasks the larger horse can perform labor more economically than the smaller one. In other words, the relative cost of maintenance for a given amount of labor performed is smaller in the case of large horses. It is believed by Mr. McCampbell that in the state of Kansas the average weight of farm mares has increased at least 300 pounds in the last ten years. Furthermore, interest in pure-bred draft horse breeding is increasing as indicated by the greater demand for good draft stallions and by the decreasing numbers of grades that are used.

The Long-term Versus the Short-term Lease.

By I. P. Rodgers.

MUCH of the dissatisfaction with farm life in this country today is due to the conditions under which the renters of the land are living. They are continually moving about from place to place, thus destroying all community interests as far as they are concerned. They are never in any one place long enough to take that interest in those about them that makes life really worth living. They get to know the people of a community by name and that is just about as well acquainted as any of them ever do get. They do not know enough about the lives of their neighbors to take any interest in their welfare, and thus forget their own troubles for a season; and, to tell the truth, they in time become so selfish through caring only for self that they have little desire for any close relationship with those outside their own family circle. The schools of the country are neglected because there are but few families living near them that expect to get any good of any certain school for any length of time; no one cares to help improve, or to even assist in keeping up a school for someone else's children. Country homes become mere boarding houses, because they are not regarded as homes for any duration of time; tenants do not feel that it is in keeping with common sense to fix up and make real "homey" a place that they do not expect to live on for more than a year or so. They leave the matter of fixing up to the next fellow—who does precisely as they have done.

It will be found that the majority of the farms that are rented are leased but for one year at a time. Sometimes a tenant will remain on one place for a number of years, but, since he is never sure that he will be there for any longer term than that stated in his lease, he takes no more interest in things about him than he would were he sure that he would have to leave at the end of the year. In many cases the tenant does not desire to rent a place for a long term through fear that in a year or so he may hear of a better place that he would like to rent, and he be not free to rent it. Usually, however, it is the landlord's sense of precaution against undesirable tenants that is responsible for the one-year lease. He does not like to tie up for several years to a fellow that may prove to be quite worthless.

Such a condition is, of course, the cause of a direct loss to both parties concerned. It makes for loss to the tenant because it robs him of that interest in his place and its management that is so essential to success in farming, and it works a loss to the landlord through a greatly reduced crop production. And, not only is the production of the land reduced each year, but through such a system of careless and disinterested farming the producing power of the land becomes less and less. The land becomes injured to such an extent that it does not do nearly what it should do. The farm gets into a state of disrepair; fences are fixed up to last for the brief season which the tenant expects to use them, while the barns and outbuildings are seldom fixed at all. They are merely endured until the tenant can get away. The landlord in time grows to have almost as little interest in his place as his constantly moving string of tenants have. He finds that as each year goes by it adds to the cost to put the place in proper shape, and he is discouraged. He keeps putting the season of repairing off until the advent of that "desirable and deserving" tenant who never comes.

What would be the result if these conditions were changed and the long-term substituted for the short one? Let us consider the question. Such a change would surely work for the good of both parties. For the tenant it would arouse that interest in his work, the lack of which is the transient tenant's undoing. Though it is inferring that these tenants are a selfish lot, it is true that they, as well as any other people, do better work when they expect to reap the benefit of such work. A long-term tenant is interested in crop rotation and the building up of the soil because he expects to get a big crop off that built-up land in a year or so. If he puts a piece of ground in wheat and sows it to clover, he takes care to do it right, for if he is using the three-year-crop rotation it stands to reason that in three years he will see some big corn there. There are many farm crops that require soil preparation two or three years in advance. The long-term tenant can afford to make such preparations. He can afford to haul out and scatter over the fields that farmyard manure that the transient tenants of former years left to the "other fellow." They leave a lot to the "other fellow," do those short-term tenants! They leave the place in poor repair, for one thing, and when the long-term tenant gets there he has his hands full for quite a while before he gets things in any kind of shape. But he finally does get things to looking pretty nice, and capable of giving satisfactory service. He does not try to paint the barn or reshingle the house or anything like that—not right away, at least. He doesn't have to, for when he sees how "shipshape" the new tenant is getting things, the landlord grows ashamed of the old black barn and the ragged looking house and has them fixed up "on his own hook" as the small boys say. And, because they are both interested in something in common, they grow gradually into a spirit of co-operation that cannot fail to be of great benefit to tenant, landlord and, most important of all, to the soil.

Not only are the tenant, landlord and the soil benefited through the long term, and its resulting co-operation, but the community at large is helped to a better state of things. The long-term tenant takes an interest in the welfare of those about him, selfish as it may seem. It is to his interest to help neighbor Brown with his hay, for he may need help with that big crop of hay that he will have on the back twenty a year from now. He is not afraid to do a favor, for he he knows that he will be in the neighborhood long enough to have it returned, and he is not afraid of asking a favor, because he knows that he will have ample time in which to pay it back. He is interested in public property, because he expects to use such property. It is to his interest that the roads be in good shape and the bridges kept repaired. He may use them more than anyone in the years to come. Plans for building up the school system have his hearty support, because he is glad to do anything to better the condition of his children. Since he knows that he will get to live in it for several years, he makes a home of the old farm house—a home where he and his family really live. This is the best part of all the long-term system—this advancement of the farm home. Farmer boys and girls do not leave homes where the keynote is contentment. The long-term farm lease is going to start such a keynote ringing in many homes over the land, and let it be soon. It's up to you, dear tenant, and to you, dear landlord. And perhaps, come to think of it, it is up to all of us to a greater or lesser degree.

The Logical Car For The Man Who Wants All These Advantages

Light weight

Less tire trouble and expense

Less up-keep cost

Less annoyance

Less expense for fuel and lubricant

Greater speed

Greater hill-climbing ability

Lower price

Greater safety at night

Better and cheaper light

If you don't know why a gas-lighted car has all these advantages over an electric-lighted car, now is the time to find out.

Why electric lighted cars are heavier

Prest-O-Lite weighs little, and its operation consumes no engine power.

An electric lighting system weighs from 150 lbs. to 250 lbs., and consumes over 10 per cent of the power and fuel used in a car of moderate power and price.

When a motor car manufacturer adds 150 pounds or more of dead weight, the car must be strengthened throughout. This calls for heavier frames, axles, springs, etc., and larger tires—in short, the weight of the electric system is only one item in the increased weight of an electric-lighted car.

And since the electric system consumes 10 per cent of the engine power, and because the engine also has a heavier car to pull, a larger engine must be provided.

The final result is a heavier car, consuming more fuel and lubricant, wearing out more tires—more expensive to buy, more expensive to operate and maintain, more complicated, more troublesome, and less reliable.

To prove this to yourself, take the gas-lighted cars of 1910 and 1911, and compare them with the electric-lighted 1913 and 1914 models of the same make. Note the difference in engine size, tire size, and weight of car.

Take any of the 1914 models which have been re-designed to carry electric systems and make the same comparison with the 1913 model.

Then remember that the chief difference between the new car and the former model is a complicated, unreliable lighting system, giving poorer practical road light, and five to ten times more expensive to use than Prest-O-Lite.

Convenience

At an expense of only $3, for an Automatic Reducing Valve, any Prest-O-Lite car can be so equipped that it is no trouble at all to light the lamps with a match. If you want to go still further, and light and extinguish any or all your lamps from the driver's seat, you can do it by installing a Prest-O-Liter, or any other good automatic lighter, at an expense of from $15 to $25—and that's only a small part of what you would have to pay for an electric lighting system. Write us for full information about this.

Electric lights consume 10% of the power and fuel

You can't create power out of nothing. Electricity is a form of power. It takes power and fuel to create electricity.

To show how much fuel and power it takes on an automobile, a series of tests was conducted on the Indianapolis Motor Speedway in July.

The result showed that on cars of 40 actual horsepower, the electric system consumed about 7 per cent. of the power and fuel.

And on cars of moderate power and price (25.6 H. P., usually rated at 30 H. P.), the electric system consumed 10 per cent. to 12 per cent. of the car's power and fuel.

So you can see that electric lighting not only takes fuel, but also cripples the engine.

We'll gladly send you a full report of the Speedway Tests.

To make tests of your own, run an electric-lighted car as far as it will go on a gallon or half-gallon of fuel, then disconnect the dynamo and note the difference in mileage on the same amount of fuel.

Or if you have a gas-lighted car in good condition, test it on a hill alongside a new electric-lighted model of the same make, and see which car goes up the hill quicker.

Then write for the report of the Speedway Tests and you'll know why.

Prest-O-Lite gives better light

Prest-O-Lite does not send a thin dazzling beam of light a mile down the road where you don't want it, but Prest-O-Lite does give more and better light on the road in front of the car where you do need it.

The real cost of electric light

Talk about the "economy" of electric light—here's what electric light really costs, on any car of medium price and moderate power:

10% to 15% more tire expense.

More general up-keep, due to weight.

10% more fuel, on account of weight.

Another 10% more fuel to run the electric dynamo.

At least $12.50 per year for battery renewal (based on 2 years' battery life, which is longer than the battery will last).

$3 to $6 per year for light globes.

At least $15 per year for electric repairs (conservative, but based on 2 years' use).

When you have footed that up to suit yourself, see how it compares with what you or your friends have ever spent for gas light.

The average user of Prest-O-Lite pays less than $10 per year for light—a great many pay as little as $5 per year—it depends on how much he uses the light.

But it's different with electric lights—you pay for the light whether you use it much or not, and may pay even more if you don't use the light at all.

If your car was designed to carry an electric lighting system, a change to Prest-O-Lite would still insure a substantial saving in addition to the reliability and safety which Prest-O-Lite affords.

Who can repair an electric system?

You expect to take care of your car. You're probably a pretty fair mechanic.

But are you an expert electrician?

Do you know that the average garage or dealer cannot repair electric systems—doesn't even pretend to be able?

In case of a break-down, you'll either have to repair it yourself, or sit down and wait for a factory expert to come to you.

There are lots of parts to an electric system. It has a lot of mysterious troubles. Get one of the Instruction Books for taking care of electric systems and read it. See how much of it you understand.

If you don't want the job of taking care of the system, see if the dealer will guarantee to take care of it for the first 18 months, without expense to you.

Then remember that Prest-O-Lite is reliable, requires no expert repairing, and that Prest-O-Lite service is yours to command in every nook and corner of the country.

Gas lights are safe

Electric lights are apt to go out instantly and without warning at any time.

Suppose you are running 15 or 20 miles an hour on a narrow road, and your lights suddenly go out. The effect is to make you almost blind for several minutes. Where is the car apt to be by the time you stop it?

Isn't the safety of your family worth considering?

Prest-O-Lite does not fail suddenly. Even if you carelessly allow your gas supply to give out, the light dies down very gradually, giving plenty of warning.

The Prest-O-Lite Co., Inc.

707 Speedway, Indianapolis, Ind.

Exchange Agencies Everywhere

(Contributors to Lincoln Highway)

Read this free book before you buy any car

It tells all about the Speedway Tests, shows the cost of Prest-O-Lite and electric light, tells why automobile manufacturers use electric lights against their own wishes, contains letters from electricians and electrical engineers who use Prest-O-Lite on their own cars, and many letters from automobile owners who have discarded electric lights. Also tells why the compressed-air starter is the coming starter—in fact is chock full of real information on the whole subject.

This book is not written in a technical way. It is easily read, easily understood, and makes the whole thing clear as daylight. No matter whether you're figuring on gas light or electric light, no matter what car you're thinking of, read this book first so you can do your buying with your eyes wide open.

Easy on Man and Team

Low Down
Short Coupled

There is no argument as to the value of the Manure Spreader, neither as to the saving in time and labor nor in the increase in yield, resulting from proper spreading of fertilizer.

The most profitable investment you can make is—

The Flying Dutchman Spreader

A Steel Frame, Low Down, Close Coupled, Endless Apron Spreader, of the most modern construction, greatest convenience and lightest draft.

Easy to Load—The top of the Box being only 42 inches high, it is easy and quickly loaded, without that back-breaking lift.

Runs Easy—The box being higher in front than in rear, the apron runs down hill, giving lighter draft—you know it's easier to pull a load down hill than up. It is also equipped with Roller Bearings—reducing friction.

Wheels Under the Load—Just where they should be to secure the lightest draft—most convenience in turning and plenty of traction power on the rear wheels, without the use of lugs.

Clearance—The Endless Apron has 18 inches between its lowest point and the ground—6 inches more than most others.

Steel Frame, Steel Wheels, Steel Beater, Chain Drive

No other Spreader is so strong and well built. The Apron runs on three sets of steel rollers, safely carries 5,000 pounds without sagging.

Easy to Handle—One Lever operates the entire machine—a boy can handle it as well as a man, with no chance of breaking the machine. Being close coupled, it is convenient around the barnyard.

We also build the MOLINE SPREADER which is of the same general construction, except it has a Return Apron.

Ask your Flying Dutchman Dealer and Write Today for our Handsome Spreader Booklet and 1914 Flying Dutchman Almanac FREE.

CURRENT EVENTS

WILLIAM SULZER, impeached governor of New York, was nominated for the assembly last week by the progressives of the sixth assembly district. Mr. Sulzer began his public career as a member of this branch of the state legislature in 1889. The recent nomination is not endorsed by the state and county leaders of the progressive party. The ex-governor was highly pleased with his nomination and he is firmly convinced that this will be followed by an election. He is of the opinion now, and this he freely expresses, that he can do more good as a member of the house of representatives than he could accomplish as governor. The impeached official has most successfully played the role of the martyr since his removal from office.

ALTHOUGH American doors were for a time closed against Mrs. Pankhurst last week, they were finally thrown open and the greatest suffragette in captivity was allowed a few weeks' freedom to fulfill lecture engagements in the United States. This is the same Emmeline who has been engaged in such innocent pranks as filling mail boxes with glue and wrecking man's belongings and interfering with his comfort in general. It is the belief that the real purpose of Mrs. Pankhurst's coming to America is "cash." Students of the suffrage movement in England are free to assert that while there are many sincere followers of this type of belligerent, the leaders, it is asserted, are, in almost every case, notoriety seekers with little real interest in the cause of extending the franchise.

THE farmers of Canada are now showing considerable concern over the manner in which the United States is grabbing up the young breeding stock of the West since the new tariff bill went into effect. There is already some talk of putting a closed season on the slaughter of female stock. Prices that the American packers can pay even for half-fat yearling and two-year-old heifers have made a tempting proposition for Canadian farmers and ready money is none too plentiful an article in the West at the present time. Canadian cattle are healthy, and in the main, they are well graded up, so that when shipments from that region cross the line they should go into the feed yards and pastures rather than to slaughter.

MR. J. OGDEN ARMOUR announced last week that his company had 4,000 tons of beef ready to ship to the United States from the Argentine. Mr. Armour denies that the United States government has the right to interfere with his business in any way and he declares he will buy beef wherever it is obtainable and thereby take advantage of the splendid home market. According to Mr. Armour's observations of conditions in Europe business conditions are sound fundamentally in those countries notwithstanding evidence of depression in certain localities.

SENATOR KENYON, of Iowa, is now preparing a bill which will require an appropriation of $1,000,000 to be used in stamping out hog cholera. At the present time there is a small appropriation made by the federal government whereby part of the expenses of the work in certain counties is borne, but this, in the opinion of Senator Kenyon, is insufficient. In a single state (Iowa) the loss last year was over $12,000,000. The continuation of such losses, according to Senator Kenyon, is an important factor in increasing the cost of living.

ACCORDING to a recent decision of the Iowa Supreme Court a country chicken has the right to go anywhere it pleases and eat whatever it desires to eat without involving its owner in financial difficulties. This high court says that fowls are free commoners and if a man desires to protect his property against the ravages of such animals he should build fences to keep them out. To require owners to build such fences would paralyze the chicken industry, in the opinion of the court. There was but one dissenting vote from this view. The case which was decided upon related to an instance where the depredations of 200 chickens caused a farmer to sow certain portions of his grain three times.

ALMOST unusual case of philanthropy was brought to public notice last week. The proprietor of a factory where thirty girls were killed by a fire last summer in the state of New York, Mr. R. B. Freeman, started life over again last week at the age of sixty-six, having given away his entire fortune to various charities, this running into the hundreds of thousands of dollars. Optimistic and smiling Mr. Freeman opened a little office last week as a commission merchant, confident that his fifty years' experience in the wholesale clothing trade will enable him to accumulate sufficient means to properly care for his family. There are few such instances where men lived to its ultimate conclusion the doctrine of the Master: "It is more blessed to give than to receive."

THE United States government is preparing to notify the nations of the world generally that any interference in Mexican affairs will be regarded as unfriendly to this government. This conclusion has been reached by President Wilson and Secretary Bryan and it will be communicated to foreign governments. It is in line with the policy established earlier of keeping other nations informed of every step taken in its handling of the Mexican problem. The proclamation will serve as an explicit definition of the policy of the United States in its relationship with Mexico, the principle being indicated that recognition can only be given to governments on this hemisphere founded on law and order.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

Hauling the children to school in a storm is not a pleasure trip, and when the health of both children and driver is endangered by the trip I believe in staying at home that day.

We are all up against the problem of making a little corn go a long ways, and some of us are solving the problem in a most marvelous way. The horse that winters sleek and fat certainly can be called an easy keeper.

Hearing that I want to buy a milk cow I have been offered many chances to buy by folks who have "a good one" to sell. I notice no cow is ever over seven years of age and that all give surprising amounts of milk. For the purpose of pulling down a long price it seems easy to make a good milk cow out of almost any "critter."

After each storm the wind brings a chill with it that feels more and more like winter, reminding us that there is still much to do before we are ready for winter. It reminds me that I still have my winter supply of coal to haul, and that there is much manure to be taken out of the cattle yards.

We are now living under a new tariff, but I fail to notice any great change on or around my farm. It may be that the pigs crawl under the woven wire a little oftener than they did and the roosters crow a little earlier in the morning, but there is good picking outside for the pigs and there is moonlight in the early morning, so there seems to be a reason for these things aside from the tariff.

The automobile with water in its radiator and the gasoline engine used to run the feed grinder must soon be drained of water, or there will be an expensive freeze-up one of these cold nights. It doesn't take much freezing to burst the pipes of the automobile radiator, so a good habit to get into is to drain the water out every night.

Fodder still in the shock should either be stacked or shredded. If there is room under roof, a fine idea is to shred, then the feed is safe from storm and is likewise put in better shape for feeding. Letting fodder spoil in the shock is a practice that never did appeal to me, nor do I fancy pulling it out of a muddy field.

I have had considerable experience with hedge fences, and I find that when you want to get rid of them the best way to do so is to get a stump puller and just naturally take the whole thing out by the roots, then keep the ground plowed the first season afterwards.

Good, bright oat straw is a very good substitute for hay for winter feeding. If there is not too much dust about it, horses will do well on it for the roughness part of their ration. Those who failed to stack their oat straw well this year will have reason to be sorry for it before spring.

One can spend a good many useful days attending public sales. I go occasionally, but never have formed the sale-going habit, as have some, who take in every sale held within driving distance of their home. I know of men who never buy at sales, yet they attend every one for miles around. They have formed what I call the sale-going habit, just as some have the going-to-town habit.

It is all right to make a practice of hogging down corn if the hogs and the corn belong to the same man, but if the hogs belonging to one man get to hogging down another man's corn it means trouble that quite often results in a lawsuit that will cost more than a mile of hog-tight fence. Be on the safe side and build the fence first, two miles if necessary. It will pay for itself—a lawsuit between neighbors never does.

The question of fence posts has been bobbing up quite often lately and some day it is coming home to roost. In this vicinity we can still buy bur oak posts at fifteen cents. Ten years ago we could have bought fully as good posts at eight cents. Isn't it about time for us to think seriously of the post question of the future?

The road hog has made it necessary to pass some laws covering the passing of vehicles on the public highway. The road hog, as a rule, knows the law, but will not obey it unless he must. It seems that when he is on the road he loses respect for the law, for the persons he meets or passes and even for himself. Why is it?

Don't forget that all signs of rain fail in a dry time. Also that all signs of an open winter are merely guesses at what we are to have in the weather line. Guesses make mighty thin feed for stock and poor fuel and provisions for the family.

A straw shed is as good as a palace for the hog in the winter time, provided it is dry and well bedded. Just a little head work on the part of the owner will make it so that the hog can bed himself and Mr. Hog knows how to make a fine bed if he has the material handy.

The best cure for sore hands in corn husking is cotton gloves or mittens, but they must be worn before the hands become chapped and sore. An ounce of prevention is always worth more than a pound of cure.

As far as getting up a supply of winter wood is concerned the buck saw is one of the relics of the good old days of long ago. Now the gasoline sawing outfit makes short work of the sawing and gives us time to get warm by the stove instead of warming up at the wood pile.

About the best news I have heard for some time is that clover seed is to be cheaper next year. The reason this is good news to me is that I happen to be on the buying side of the fence.

There may be cases where the stalk field makes fine pasture, but as a general thing it must be about like sitting down to the table for a square meal with only crumbs in sight.

NOVEMBER IN THE FLOWER GARDEN.

To the Editor of The Homestead:

We have had our first rather severe freeze, and the flower garden calls us. Several things have been just waiting for this freeze, and now it has come we will give them our attention.

The tuberoses will have to be dug the first thing, for another freeze on them might reach the tender center shoots, and if they are killed our bulbs will not bloom for several years, or until the bulblets are big enough. Cut off the tops and scatter in a warm, dry place to thoroughly cure, for the hearts will rot if piled up now. Let them dry until the roots and withered tops can be rubbed off, then pack away in a loose crate or box in a warm room. It is not best for them to get too near the freezing point.

The dahlias should be dug also, and it is necessary to be very careful with them, for the tubers that are detached from the stem are useless. The eyes of the dahlia are on the stems just at the point where the tubers are attached, and a piece of the stem should always be cut off with the tubers when dividing. I usually put the clumps away whole and divide in the spring. When dividing split the stem up as much as is needed to give each bulb a particle. Pack the tubers in dust or some other material that will exclude air, for they will dry up and shrivel, losing their vitality if left exposed to the air.

Gladiolus bulbs are deeper in the ground and are more hardy so they can stand several freezes without injury. Dig them when you can get to it and dry them well. I generally leave the old corms, bulblets and roots attached until spring, but it is not necessary, for one year I removed even the husks and stored the bare bulbs and they came through perfectly and grew off well in the spring. They had dried up a little more than those not peeled, but there was no material difference. I always store them in paper sacks hung up in a room where it does not freeze. They are not at all particular, aand almost any dry place that does not get too cold will do.

The best way to handle the cannas is to carry right into the cellar when dug. They need to have the dirt left on them as much as possible, and should not get too dry before planting-out time. They can be stored any place where it does not freeze or where it is not so warm as to start growth during the winter. Cut the tops off as near the top of the ground as you can when taking them up. If you cannot spare the room to put the clumps away, you can divide them up, allowing two or three eyes to each bulb and bury them in road dirt moistened a little, or in moist sand. Cannas can be started early in the spring and be ready to set out with a good start by the time the dry bulbs could be put out.

After this freeze is the time to pot up those violets you want for the window this winter. The hardy Russian is generally grown, but the California and Lady Campbell are both good, though they are not hardy enough to stand a severe winter outdoors. The hardy Russian is perfectly hardy and blooms both spring and fall.
